UNIVERSAL ELECTRIC HEATING PAD

For Homes Wired With Electricity

Hot Water Bottle Comfort with the annoyance of Constant Changing left out

A HEATING PAD OFTEN SAVES A DOCTOR'S BILL

Do not wait until Influenza and Pneumonia, which have spread their destruction of life from one end of the country to the other, reach your very door before you find a means which will help stamp out this dreadful disease from your homes.

The UNIVERSAL Heating Pad will help a great deal towards the relief of that starting cold, which is the foundation from which the influenza starts.

The use of the Heating Pad when chilly or whenever an ache or pain starts will often check it before it develops into a cold which at this time is pointing to this dread disease.

The UNIVERSAL Heating Pad will help toothache, headache, backache, sprains or bruises. Ready relief is obtained by using this Pad, which is a stitch in time when trouble of this kind arises.

The only 3 Heat Electric Pad which positively maintains the temperature on each degree of heat, the changes being made by a simple pressure of the finger, can be changed in the dark.

This Pad is ideal for sleeping porches. It weighs but fourteen ounces, is covered with gray eiderdown and can be folded, laid flat or wrapped around any part of the body. Nowadays the finest of arts is to keep fit, so give this wonderful Heating Pad a chance to do its Bit for you. See your UNIVERSAL Jobber to-day, he always has a supply on hand to meet your demands.

Neōlin Half Soles

Among men who make and sell shoes to-day, Neōlin is admitted to be the hardest-wearing material ever used for making soles.

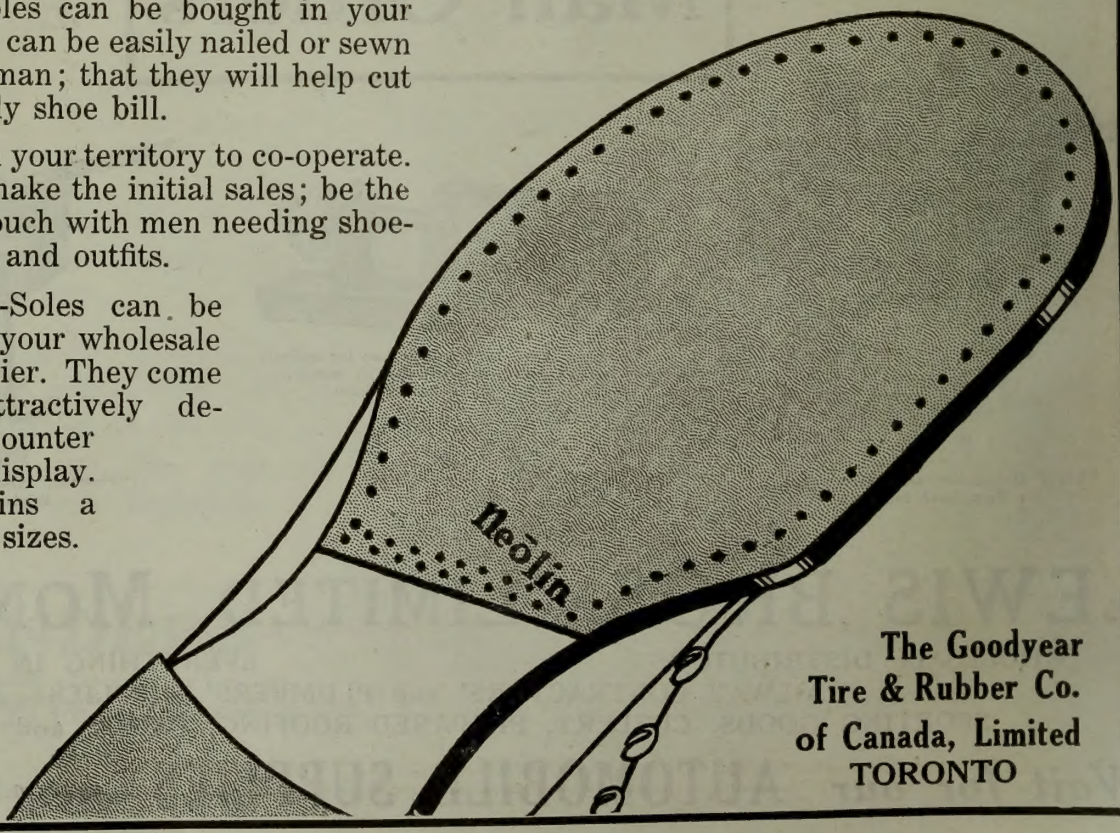
They admit it, for millions of pairs of Neōlin Soles have proved it true.

Now Neōlin may be had for Half-Soles.

That means you can now sell them. That means you can make **new profit** selling Neōlin's comfort, flexibility, waterproofness —and long wear.

You saw the advertising that put Neōlin Soles across—day after day, week after week, big space in newspapers and magazines all over Canada.

Neōlin Half-Soles are now being advertised in a campaign just as powerful, just as dominating, just as convincing.



We're telling folks by the thousands that Neōlin Half-Soles can be bought in your store; that they can be easily nailed or sewn by any handy man; that they will help cut down the family shoe bill.

Be the first in your territory to co-operate. Be the first to make the initial sales; be the first to get in touch with men needing shoe-repairing tools and outfits.

Neōlin Half-Soles can be obtained from your wholesale hardware supplier. They come in cartons attractively designed for counter and window display. Carton contains a dozen assorted sizes.

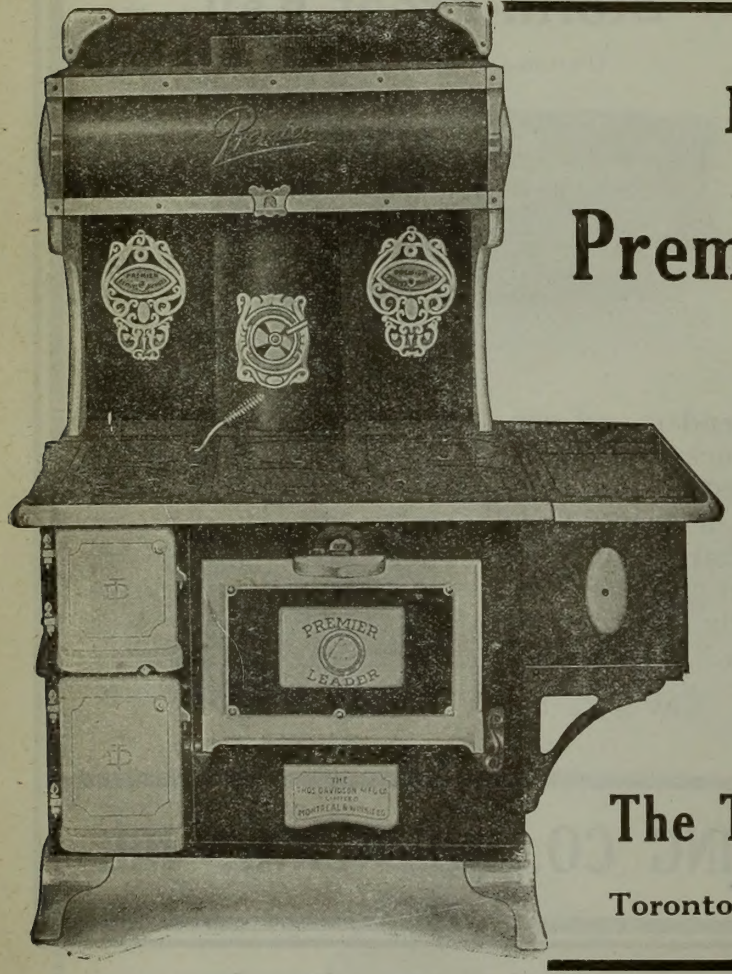
WROUGHT STEEL BRACKETS

These brackets are famous for their correct design, superb strength and attractive finish.

The use of the arched forms of steel in the wall and shelf plates give much greater strength than if flat metal was used.



The angle formed brace is well riveted and renders it secure against buckling or bending sideways under the severest strain.

Baked enamel finish, packed half dozen in a box. They sell quickly, easily and net a good profit to you.

Limited

Toronto Montreal Winnipeg

Where do you buy your Rope?

Do you buy your rope indiscriminately as needed from the first jobber whose salesman happens along? Or do you confine your purchases to one standard brand of cordage that you can consistently recommend to your trade at all times?

Rope stocks assorted and maintained through haphazard purchase, for price considerations, or to add weight to a miscellaneous shipment, represent a varying degree of quality and offer no opportunity or incentive for the hardware merchant to profitably specialize on his line of cordage.

Your customers look to you with confidence to supply their needs with merchandise that will give full satisfaction. You can strengthen this good-will by handling Plymouth Rope, for its quality is the highest and always uniform.

Confine your purchases to this long-established brand of cordage; feature it through your store display, and sell it by the foot. Our free dealer helps will enable you to do this successfully and profitably for the New Year.

WHEN YOU THINK
WASHING MACHINE
THINK KRIBS

WHY?

Finest finish in every detail. No rough castings or parts.

Attractive in appearance.

Tubs guaranteed not to warp or shrink.

Every piece of wood carefully selected by experienced workmen.

Simplicity of mechanical parts—a child can operate these machines.

Unsurpassed in the Canadian market.

WHY?

Every purchaser of a "KRIBS" becomes a satisfied customer; the satisfaction spreads to friends and neighbors.

"KRIBS" means highest excellence and greatest value at least possible cost.

Once used they are preferred above all others.

Every machine guaranteed.

Hand Power, Water-Motor, Electric, Gasoline-Motor

If you're not handling "KRIBS" MACHINES you're missing big possibilities for profits and customer-satisfaction. Ask your jobber for this line. If he isn't alive to his opportunity, write direct for catalogue, prices and proposition.

Sterling Spark Plugs

More About Why I Sell Sterling Spark Plugs

Last month I talked about Sterling electrodes in backing up my claims for Sterling Spark Plugs.

Now I am going to talk about leak-proof adjustment.

That is another reason why I sell Sterling Plugs.

To be readily cleanable, a spark plug must admit of repeated separation and re-assembly.

Naturally, then, to get absolutely leak-proof re-assembly every part of the plug—shell, bushing, core and the copper-asbesetos gaskets—must go back into perfect adjustment.

Sterling Spark Plugs are especially designed to fit together so accurately that, no matter how many times the parts may be separated, adjustment will be as truly leak-proof as when the plug left the factory.

No mechanic is necessary to re-assemble the plug; two wrenches are the only tools required.

Sterling Spark Plugs are sold by progressive garages and supply dealers everywhere.

"DECORATED FOR CONSPICUOUS BRAVERY"

AT THE FRONT

During the War such terms as Military Medal, Military Cross, Distinguished Service Order and Victoria Cross have become very familiar. Sometimes we hardly realize the courage and sacrifice which our men have displayed to merit these decorations, and if we consider the number of these honors which have come to our troops we will appreciate the fact that Canada has been worthily represented on the FIRING LINE.

AT HOME

Medals are not awarded for Service in the Commercial Contest, but if they were, we may be confident that many of our Business Men would be decorated for their fearless confidence in those early days of the War when the business outlook was so dark. These are the men who RECONSTRUCTED our PEACE business into a PROFITABLE AND PROSPEROUS WAR INDUSTRY, with the result that the world knows that Canada was a real factor in the production of the Materials of War.

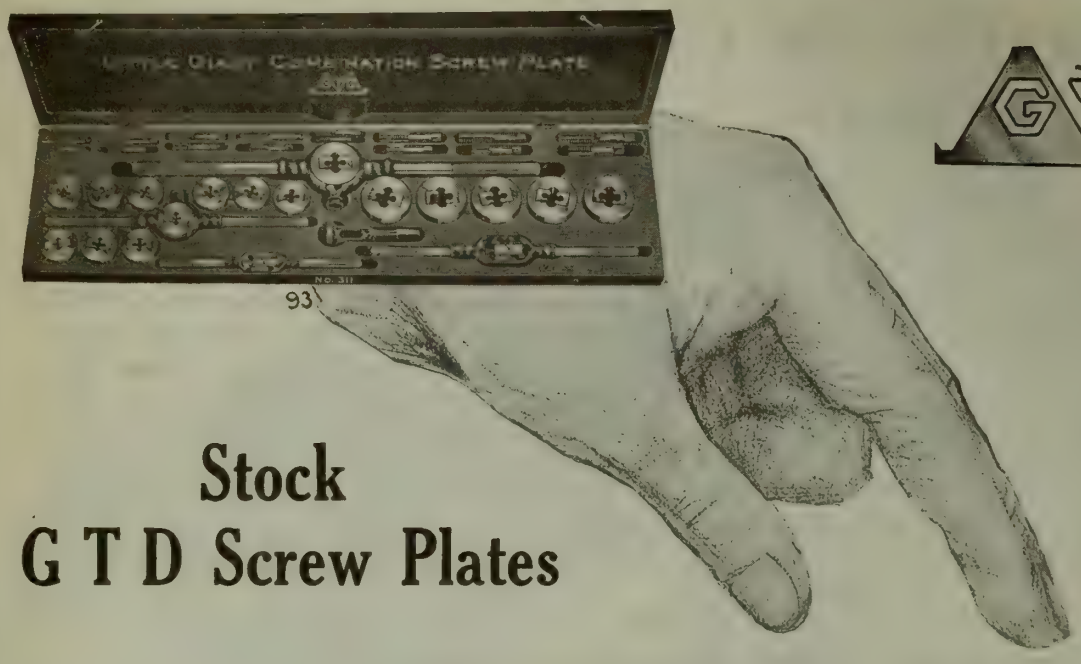
"PEACE AND RECONSTRUCTION"

The War is over now and we are face to face with a period of RECONSTRUCTION. Thousands of men who have been on the FIRING LINE will be returning to their former occupations, others who have been employed in the manufacture of Munitions will have to turn their efforts to PEACE PRODUCTION. This is a big problem, and will require the same COURAGE AND CONFIDENCE as was displayed in transforming PEACE-LOVING CIVILIANS into VETERAN SOLDIERS and INDUSTRIES OF PEACE into EFFICIENT WAR MACHINERY.

COURAGE AND CONFIDENCE! Are these not Canada's greatest Assets? Surely those men who faced the uncertainties of NINETEEN-FOURTEEN will not fail now. Industrial Panic means Industrial Failure. The future of Canada depends on INDIVIDUAL CITIZENS. YOU ARE ONE OF THEM.

Our Industries are organized to greater efficiency now than they have ever been before. Opportunities for EXPORT business are bigger, the Appropriations for PUBLIC WORKS are enormous, and our FINANCIAL position is enviable.

TO THE HARDWARE MAN this work of RECONSTRUCTION means bigger business. There will be large calls for everything in the HARDWARE LINE from NAILS RIGHT THROUGH THE LONG LIST TO HIGH CLASS TOOLS AND BUILDERS' HARDWARE.



WE ARE PREPARED TO MEET THIS DEMAND. Our stock in every line consists of goods of the BEST QUALITY, Goods that are NATIONALLY ADVERTISED, Goods that SELL EASILY and STAY SOLD.

OUR AIM IS YOUR GUARANTEE OF SATISFACTION.

"COMPLETE STOCKS, GOODS OF QUALITY, PROMPT SHIPMENTS."

Optimism in the Roofing Business

NOW that the war is over it is confidently expected that there will be a large increase in the demand for building and roofing materials.

The devastated areas of Europe which require rebuilding quickly will need large supplies of prepared roofings, because these roofings are the most easily and speedily laid.

In Canada, labor has been so scarce that there has been a comparatively small amount of building done. There are thousands of new homes, apartments, schools, stores, etc., already planned and only waiting for available labor to erect them.

There are also thousands of buildings that need re-roofing and with labor becoming available again there will be a large demand for prepared roofings for re-roofing purposes

There is every reason for optimism in the prepared roofing business. There has been no inflation or high prices due to war orders. The reasonable advance in the price of Brantford Roofing has been caused by legitimate reasons, largely to increased wages, increased freights, and increased taxes.

As it is not anticipated that there will be any material decrease in wages, freights or taxes for some time to come, and with a brisk demand for roofing materials anticipated, there is every reason to expect firm prices which means safe buying for the dealer and sure selling at a good profit.

The quality, reputation and economy of Brantford Roofing makes our line particularly suitable for present day conditions. Our line includes smooth surface, sanded and crystal-finished roll roofings and asphalt slates in two sizes and red or green colors, also sheathing papers. Every roofing purpose can be supplied in the Brantford Line from good, reliable roofings for temporary bunk houses to roofings suitable for large office buildings and department stores; from a sturdy, fire-resistant roofing for a barn to a beautiful, artistic asphalt slate roofing for a costly home

Brantford Roofing is well advertised to the consumer and is a ready seller. An agency for Brantford Roofing is one of the most valuable of assets to a dealer. Are we represented in your locality? If not, write for booklets, samples and trade information.

Why You Should Be A Michelin Dealer

No. 38

Instead of Using Up Your Prestige Michelin Increases It

You can sell almost any make of tire at a profiit for a while. Your local prestige, Mr. Dealer, enables you to do that.

But for your own sake you cannot afford to sell tires that trade on your reputation. Rather you should sell tires whose reputation is so high that you can trade on it.

In other words you should sell some make of tire like Michelin—and preferably the Michelin itself. No other tire has a world-wide reputation for quality in the same degree as the Michelin. It is *the* tire of tires on which to build a permanently successful business.

Write today for the Michelin Dealer Proposition.

Williams' Superior Drop-Forged "C" Clamps For Every Purpose

"THEY STAND THE STRAIN"

HELP the shop people to select the "C" Clamp best adapted to their needs: there's "A Williams' Clamp for every purpose."

For general utility—without need for maximum strength—Williams' "Light Service" line will fit the cost. 8 sizes, 2" to 12" capacities.

For stability and utility—medium service—Williams' "Agrippa" line offers the solution. 7 sizes, 4" to 18" capacities.

For extreme strength and heavy service—Williams' "Vulcan" line provides abundantly for both. 11 sizes, ¾" to 12½" capacities.

All are made of a special, high grade steel and after forging, are "heat-treated" to increase their toughness and strength.

Machinists' Tools Booklet with your imprint if desired.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

In Placing Their Orders For

TAPSOLES and TOPLIFTS

The Department of Militia and Defence bought more **TAPSOLES** and **TOPLIFTS** for Army Purposes from **ANGLO-CANADIAN LEATHER CO., Limited,** than from all other manufacturers put together.

WHY?—Because they found they were made from the best and most satisfactory **SOLE LEATHER.**

If the **ANGLO-CANADIAN LEATHER CO., Limited, "MAPLE LEAF"** BRAND **SOLE LEATHER, TAP SOLES** and **TOPLIFTS** are best for hard, army, active service conditions, are they not the best for you to stock and supply your customers?

We have a full line and solicit your orders. Write for price lists to

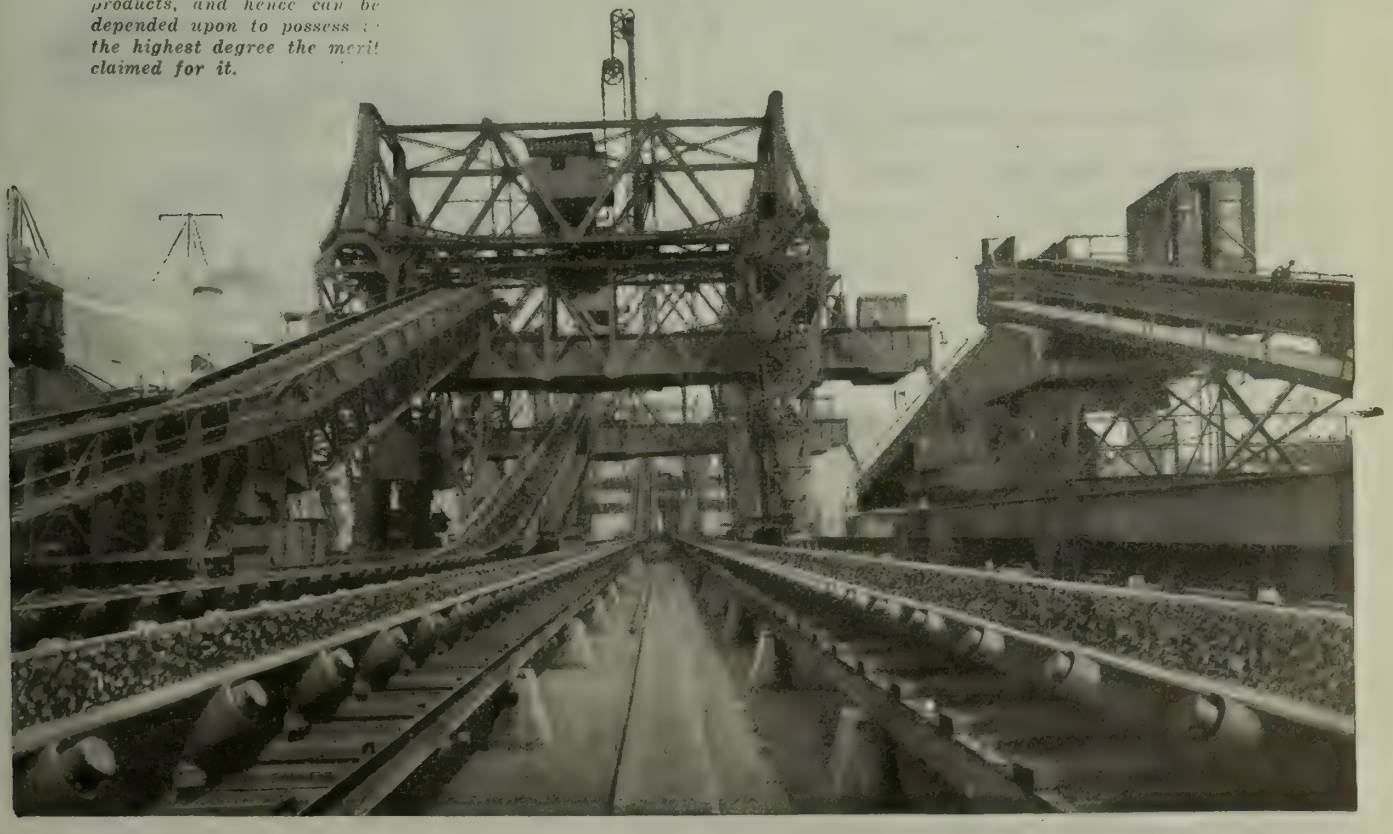
ARMCO IRON

In Railroad Service

This huge coaling pier of the Baltimore & Ohio Railroad at Curtis Bay, Md., is now in the service of the Government. Its magnitude is demonstrated by the fact that a ship of 7,000 tons capacity was recently loaded with coal there in two hours and ten minutes.

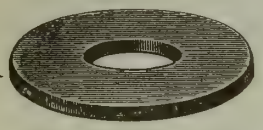
This pier also indicates Armco Iron's wide range of usefulness in railroad service. A decking of 100 tons protects the costly installation of conveyor belting. Armco Iron is also employed in a novel method for waterproofing the Feeder Pits located 11 feet below tide-level. Galvanized Armco Iron was used on the houses and loading towers.



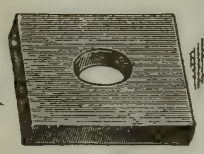
The protection and comparatively long life that Armco Iron affords because of its purity, rust-resistance and evenness is an invaluable form of metal conservation in the readjustment period, when every ounce of railroad equipment must be kept in service to the last possible moment and at minimum cost for replacements.

Armco Iron is serving in the following railroad uses: hopper cars, polished boiler jackets, coal chutes, water tanks, oil storage tanks, metal passenger, freight and mine cars, smokestacks, third rails, sheet car roofing, boiler tubes, fences, tie plates, equalizer bars, metal lath, window frames, ventilating ducts, culverts and milled letter signs (Lyle signs).

Write for Armco Iron literature applied to your needs. Ask for the advice of our specialists in sheet and plate metal service.



THE AMERICAN ROLLING MILL COMPANY, MIDDLETOWN, OHIO



The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company, with the skill, intelligence, and fidelity associated with it's products, and hence can be depended upon to possess to the highest degree the merit claimed for it.

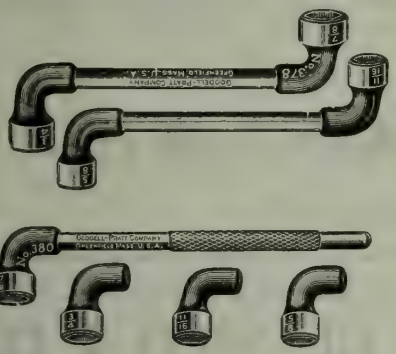
Genco Razors
Village Blacksmith Brand
Butcher Knives and Tools
American Hone Co.



Mr. Punch The Hole Maker, is shown on the left—you know, the drill which is advertised so extensively in Saturday Evening Post, etc.

It has a feature found in no other punch, viz: a drill point gauge in the handle. Point this out to your customers.

We have special Mr. Punch advertising sets for dealers who sell this tool.

Spiral Ratchet Screwdriver (on the right), with three intercheangeable tool-steel blades. You can sell this with Mr. Punch—the two go together. For right or left hand work. Can be used automatically or as a stationary screwdriver.

GOODELL PRATT
1500 GOOD TOOLS

All motorists are prospective customers for the socket wrench sets below. The handles are made of steel. Overall length of No. 378 is 8¼". Sockets are made in sizes of 11/16, ⅝, ¾ and ⅞-inch between flats.

The sockets of No. 380 are made the same size, but the handle is detachable and fits all the sockets, thereby condensing the outfit. Overall length 10¾".

No. 7 Breast Drill shown on the right has an improved bit brace chuck, with two sets of jaws, one for holding round, and the other for square shank drills. It has two speeds—fast and slow. No. 6 or 6A holds round shank drills only up to ½-inch.

Prospective GENCO Customers are coming into your store daily. Few perhaps ask to see your line of razors. But most every man would be interested if you made it known that you were selling GENCO Razors.

A GENCO Display Cabinet placed in a conspicuous position in your store will remind every man who enters of the GENCO Advertising he has seen in The Saturday Evening Post, Literary Digest and other National Publications.

GENCO Advertising is telling your customers that American Master Cutlers are now making a razor that is of uniformly higher quality than any razor ever made anywhere. It bears the trade mark——GENCO.

GENCO Quality has taken the guess work out of razor buying and selling. When you sell a GENCO to one of your customers you sell him satisfactory shaving service.

"Largest exclusive manufacturers of high grade Razors in the world."

ORDER FROM YOUR JOBBER—OR WRITE US

YOU
SHOULD SELL
WEED CHAIN JACKS

The most easily operated Jack on the Market

Weed Chain Jacks lift a car by a few pulls on a chain and lower by a few pulls in the opposite direction. The operator can stand away from the car, clear of the wheels, mud guards and tire carriers. This feature is especially noteworthy where cars are operated by women.

They are made of malleable iron, black enamelled; the base is extra heavy to prevent upsetting; the top is concave to prevent slipping of the axle. The lifting screw is cold rolled steel with square machine-cut threads. The gear housing is stamped steel, and the chain is heavily plated to prevent rust.

A Weed Jack purchaser is a pleased customer.

MEHASCO

Pocket and Household Cutlery

Mehasco Pocket Cutlery meets every demand of Prairie life. It is especially strong in Cattle and Punch Knives. These are made from Wardlow's English steel, the best obtainable, and are absolutely guaranteed. We'll convince you on your trial order.

Hart's Hollow Handle Household Cutlery with its high quality at medium price is just the thing for every day use in the home or for restaurants. Heavily nickel plated with blades of oil tempered shear steel. They can be left in boiling water for any length of time without soaking up any of the water, and they can be put on a stone and given a real edge. They are nicely put up in half dozens, each knife and fork wrapped in tissue paper individually, not in brown paper rolls.

FROST STEEL AND WIRE COMPANY, LIMITED

MANUFACTURERS OF

GALVANIZED AND BRIGHT WIRE, HAY WIRE AND BALE TIES, WOVEN WIRE
FARM AND ORNAMENTAL FENCES, GALVANIZED GATES

MANUFACTURERS' WIRE SUPPLIES

HAMILTON, CANADA

January 2nd, 1918.

To Hardware Dealers:

Many have been the surprises since the cessation of hostilities. Decided fears have been entertained that the sudden ending would result in enormous price reductions and chaotic conditions, but from present trend of events it is felt that big declines in the metal markets are not to be expected. Another surprise has been in the matter of labor. The release from munitions work has not developed any surplus—all are being absorbed in Peace-time manufacturing activities. Labor is still scarce, and wage reductions are most unlikely throughout the many months to come of high costs of living.

Munitions manufacturing has been generally stopped and the steel tonnage released, but producers of so-called "non-essentials" are making up for the months of time when they were denied materials. Automobile business has come back to Peace stronger than ever. The building of railroad equipment, railroad repairs, Government construction work, all of which have been at a standstill, are now being resumed.

There should be no danger in this country of serious business depression. Canada is so rich and prosperous, and our resources are so large that the indulgence of feelings of fear or doubt as to financial, commercial or industrial safety and progress would be wholly unjustified. Even if there should be some decrease in volume of business, we may look forward with confidence. We must not repose in the fancied security that we can forever sell everything and buy little or nothing. If such a thing were possible it would not be best for us or those with whom we deal. With the prospects of continued good farm produce markets there should be little hesitation in purchasing for farm requirements, and Farm Fence and Gates are likely to be in quite as good or better demand than ever, depending upon available farm labor.

Do not let your energy or your money lie idle. Be optimistic, and have confidence in your ability to make others optimistic, and very soon we will all help to create an atmosphere of action. Take stock of your needs, and continue "business as usual."

If you are not enjoying a substantial demand for Frost products and our goods are not on sale in your town, get in touch with us forthwith. Winter shipments take Spring dating, and our price is guaranteed against our own decline to April first, 1919.

A Happy and Prosperous New Year to All.

FROST STEEL AND WIRE CO. LTD.

Canada's National Hardware Weekly

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 31 TORONTO, JANUARY 4, 1919 No. 1

Canada's Future Was Never Brighter

Hardware Men and Manufacturers Looking Forward to Big Business This Year—Readjustment Problems Are Being Satisfactorily Met and Business Conditions Sound—Money Will be Plentiful in Opinion of Financiers

THAT Canada will prosper not only in 1919, but for many years to come, is the opinion of a number of manufacturers, and hardware men with whom HARDWARE AND METAL discussed the outlook for the coming year. These men are optimistic, not with the blind, unreckoning optimism that has no foundation, but after carefully investigating and weighing the facts. Varying degrees of optimism were expressed, some merely looking for a steadily growing business, while others predict big developments for the whole country. On one point all seem agreed and that is that spring will see the commencement of very marked activity, especially in the building trades, automobile industry and in the rural districts. Many factories already have orders booked that will keep them working to capacity for many months. Others are wondering if they will be able to get the materials they require to complete their output. In the case of some automobile firms it it stated there is little chance of securing sufficient quantities of raw materials to make anything like the number of cars required for this year's demands.

Big Expansion

An enormous demand for farming equipment of all kinds is anticipated, not only at home, but from France and Russia. Firms manufacturing these lines are preparing for capacity outputs.

Some manufacturers predict that construction work in new buildings alone will total half a billion in Canada this year. There are inquiries coming in, they state, from all over the Dominion for materials with which to construct homes, factory extensions and other work held up by the war. All this will offer a big opportunity for hardware men and this regular building will be still further increased by the Government's action in taking necessary measures to help solve the housing problems which have become acute in many sections.

Soldiers Returning

About 300,000 Canadians will return from overseas and according to the Minister of Militia they should return at the rate of 30,000 a month. "The Financial Post' estimates that $100,000,000 will be paid out by the Canadian Government as a result of the increases to be made in the post discharge pay of these men. In addition to this there is $15,000,000 at Ottawa which the men have saved up as a result of their own economy and which they can draw at any time they desire. These men will have a big buying power. A great many of them are married men and when they return will have a lot of work to do fixing up their homes, painting, and making repairs that have been standing since they marched away, two, three or four years ago.

Many thousands of the younger men are farmers and just as quickly as they can get back will be welcomed by relatives who have been working overtime to maintain production. There is little doubt that given favorable weather conditions 1919 will see perhaps the greatest production of foodstuffs in the history of the Dominion. There is a market for every pound of it at good prices so the farmers should be as prosperous as ever and experience has proven that when the farmers are prosperous business is good.

Lots of Work

While it may take some weeks to shift the thousands of men who were working at munitions to other jobs, there is not expected to be any serious unemployment. Skilled help continues as scarce as ever and the situation regarding unskilled help is not expected to cause anxiety. Aliens who have not been able to get home since the war started are leaving Canada for Europe at the rate of more than 10,000 a week. Most of these men are leaving firms who cannot spare them and are filling their places as quickly as possible with men from the munitions plants and other places.

The railways are very busy and with several big Government projects under way, a nine million dollar section of the Welland Canal, additional power development at Niagara Falls, good roads and railway extensions, it would appear that there will be plenty of work for all.

Export Business

Not for a long time have such numerous inquiries been received from overseas for Canadian products as have been coming in every week since the armistice was signed. Many firms are already working on shipments and a great volume of business is expected to follow as a result of the activities of the Canadian Trade Commission. One Western Ontario firm which handles building materials, it is stated, expects an order which will keep its plant working to capacity for months.

As far as the financial outlook is concerned bankers state that money will be easy and that there will be plenty for all legitimate enterprise and development.

Making full allowance for all the readjustments necessary in connection with the reconstruction period, those in closest touch with commercial activities see nothing but prosperity ahead for Canada. This is their view not only for 1919 but for some time to come. In the hardware business the future is regarded as particularly bright as trade in general has come through the ordeal of the past four years on a sounder basis than it ever was before and ready to make the most of every opportunity that offers in connection with the development of the Dominion.

Montreal Manager Looks for Prosperity

It may be six months and it may be eighteen, but that a great era of prosperity will extend over Canada is assured. Such is the opinion of C. W. Wiggin, Montreal, manager of the Canadian Fairbanks-Morse Co. Mr. Wiggin made it quite clear in discussing the outlook with HARDWARE AND METAL that he did not wish to befool himself or anyone else into ignoring the great problems immediately before us in this country. There are many problems of great moment to be solved and it is just a bit difficult at this time to make anything like an accurate fore-

cast of what will happen in the course of the year. It is just a question now (and this is a somewhat beclouded one) of how long the evolution from the war to the peace basis will take, and whether during this necessary process Canadian business will be able to absorb labor released from the war industries without the necessity of some Government action to provide employment on public works, such as roads, canals and so forth.

Readjustment Must Come

"With the manufacture of all munitions entirely eliminated the pre-war status of industry must naturally be re-established," he said. "In certain lines, this will be a slow process. In other lines, the process will be comparatively rapid. Indeed, for certain of our basic industries, such as pulp and paper mill business, we can probably look for a period of expansion.

It would appear that it will probably be a considerable period before prices will decline greatly on a large number of commodities. Take structural steel as an example. The demand at the present time exceeds the available supply, and the demand for structural steel from many widely separated centres will absorb a very large production for a considerable period, and the price is likely to remain fairly firm even with Government control abolished, as with active bidding in the open market there will be a continuous output for many months, and consequently employment for labor at good wages on steel production. Competition will in time reduce labor costs, but this will not be immediately, as the basic rate for labor is indissolubly bound up with the price of foodstuffs, and with the world facing a shortage of food, it would seem that no marked reduction in the cost of foodstuffs can be expected until after the next harvest, and possibly not then, depending largely on the size of the crops.

Back to the Farms

We should not overlook the fact that large additional areas have been placed under cultivation, this increased acreage having been stimulated during the last three years, and not only will a considerable number of returned men go on the land, but a considerable percentage of the munition workers who originally came from the farm will during the reconstruction period drift back to the farm, and this will result in increased production of foodstuffs, ultimately resulting in decreased prices. Lower prices on foodstuffs, however, must not be looked upon as a calamity, even to the farmer, as the prosperity of the country depends not on the prosperity of one class but upon the prosperity of all classes.

Means Just As Much

The increased production of foodstuffs even at lower prices means just as much money for the farmer and more money for the country. Take wheat for example as a base. If a farmer producing 6,000 bushels of wheat for which he receives $2 per bushel, can produce 12,000 bushels for which he receives $1.25 per bushel, his net returns should be approximately as much and the country is a good deal better off for a number of reasons. In the first place, more tonnage has been supplied for our railroads; more work has been supplied for our terminal elevators; the cost of foodstuffs will have been reduced, permitting labor to accept lower wages without lowering their living standards or reducing their savings, and this lower wage will permit our manufacturers to produce goods at a price which will enable them to compete in other markets.

Absorption of Veterans

In view of the fact that we are just entering on the winter months and that during winter months construction work in Canada is necessarily at a standstill, the Government is undoubtedly wise in providing the slow demobilization of the troops, or as we understand it, it is their intention to provide for their maintenance until such time as they can be absorbed into industry.

Construction work in this country has been greatly reduced during the last two or three years, and there is no question but that there will be considerable expansion as soon as weather conditions permit of the undertaking of building operations. Housing facilities in some of our cities are inadequate. Road work has not been pushed during the war and this is a question the increasing importance of which is being very generally understood by the public at large.

Both the Provincial and Dominion Governments will undoubtedly embark upon a program of road construction just as soon as the general public can be educated to the necessity of such work, and this will absorb a great deal of labor.

Basic Industries

Canada possesses certain basic industries the increasing development of which cannot but lead to increased prosperity. Among these basic industries are pulp and paper mill business. The pulp and paper mills of Canada are the most efficient in the world. Our pulp areas have as yet only been scratched, and our leading mills are through their Forestry Departments taking steps towards the re-forestration of cut-over areas on a basis that will perpetuate their limits. There will undoubtedly be a very considerable expansion in that industry.

The fostering of increased agricultural production is one of the most important things we have to do. Our flour mills have established an enviable position for themselves, and this industry should increase and remain in a highly prosperous condition for some years to come.

We control a large portion of the world's supply of asbestos and nickel and the production in both these lines is capable of decided expansion. The coal areas in the Northwest should be developed, as the lessons of the last two winters should have taught us the folly of depending to so great an extent as we did on the imported product.

Iron Industries

Our iron industries are capable of great expansion and in this connection the erection of a steel plate mill at Sydney is of great interest.

To sum up, the situation seems to be, that while we may suffer temporary setbacks, while during the coming winter it may even be necessary to take steps looking toward the support of certain classes of labor which cannot be immediately absorbed into our various industries, nevertheless in view of the tremendous richness of Canada's natural resources and the general business activity that will take place over the whole world with the cessation of war conditions, and above all perhaps the habits of thrift and investment which have been inculcated into large sections of our population during the last two or three years, thereby enabling us to finance our industries to a greater extent than ever before, as well as the purchases of our foreign customers, it would seem that the future can be viewed without misgiving and, in fact, that we are almost in view of a period of unprecedented prosperity.

Says Wise Buyers Will Place All Orders Now

A. T. Enlow, president of the Dominion Sheet Metal Company, Hamilton, Ont., expresses the following views:—

"The attitude of the hardware trade in general as to the future tendency in sheet metals is doubtless similar to that of the colored soldier in the United States army recently, who had taken out a Government policy of life insurance and the Captain had suggested that he make a "will." "Huh, Boss," he said, "neveh mine bout dat will—de only will dis coon is interested in is—Will I come back?"

"That's the way many of the users of sheets feel to-day—the only thing they really care about is—will the price come down?

"As a matter of fact that is the least essential point—what they really should consider is the question of supply, of transportation, of demand for their product."

Take Care of Itself

The price will take care of itself and no one in touch with the situation will predict anything more than a gradual transition from recent prices to those showing moderate reductions—but with this important phase in mind—the high premiums charged will disappear. During the last year or two the supply has not exceeded 20% of the normal demand, and the jobber's expense has been higher than ever, hence he asked and got premiums for service. Now with a return of fair supply his volume will increase and premiums will disappear so that dealers will buy considerably cheaper than recently.

It is well to remember, however, that any holding off in making purchases for spring needs may mean the old story of premiums for prompt service. The demand for export from Canada will con-

time as long as England charges $5 per ton export charge and pays $50 a ton more for spelter than we do.

Exports Increase

There is a large volume of export business in sheets already and prospects are good for more. The transportation problem is not apt to be acute this year, and there is plenty of labor available, especially as wages have not been reduced and probably will not be for a long time.

The Canadian producers of both black and galvanized sheets have reduced prices to jobbers and manufacturers along lines adopted by United States mills and this should reach the dealer and also the consumer during the coming season and thus stimulate the home demand. Any slackening can apparently be taken care of by resorting to the large export needs.

In our estimation the wise buyer will cover now for the first half of 1919.

Oil Firm Planning Extensions This Year

Very important developments are planned for 1919 by the Imperial Oil Company and it is stated to HARDWARE AND METAL that expenditures of several hundred thousand dollars will be made. New buildings, new equipment and largely increased facilities for distribution are planned. While considerable money will be expended in Ontario it is stated that the company's plans for extensions embodies work in other parts of the Dominion also. It is expected that if materials, especially steel, are available that the work will be proceeded with as early in the year as possible.

Drill Manufacturer Sees Good Year Ahead

F. R. Humpage, vice-president of the Wilt Twist Drill Company of Canada, Limited. Walkerville, Ont., discussing the outlook, was very optimistic. He stated that twist drills played an important part in the war, and would be equally important in the reconstruction period. The Wilt Twist Drill Company has received very few cancellations, and the new business which it has received, indicating that the work of reconstruction has really commenced, more than balances cancellations.

Mr. Humpage also pointed out the increased volume of business which the implement manufacturers would do. Also the fact that a very large amount of American capital was being invested in Canadian companies, the increase in shipbuilding which will continue for years, the necessity of the railroads putting their rolling stock and equipment in proper condition, etc., all of which naturally would increase their requirements for twist drills, cutters, reamers, etc.

Expects Firm Prices

It was pointed out to Mr. Humpage that while this might be true there was a possibility that there would be a tendency to a lowering of prices on drills, and kindred products, owing to there being less demand for them. Mr. Humpage stated that drill manufacturers have not until recently received a fair return for the amount of money invested in the business. In other words the percentage of profit on drills was very, very small and in consequence the price which manufacturers are asking does not represent an increase equal to other commodities. The high wages which prevailed and which apparently may continue for some time, together with the fact that most drill manufacturers found it necessary, in order to protect themselves and their customers, to purchase their raw materials considerably in advance of their actual needs, would not permit, he believed, manufacturers selling at any lower prices than at present. He called attention to an article which appeared in the November 12 issue of "Iron Age" to the effect that the American twist drill manufacturers advanced prices approximately 10%, effective as of that date.

Double Output When Labor is Available

The Studebaker Corporation of Detroit and Walkerville is planning the greatest output in its history. While the biggest production year of the firm was in 1916, when 65.885 cars were sold, an annual output of between 150,000 and 160,000 automobiles is now proposed. Production during the next few months is expected to amount to 10,000 cars only, but as soon as steel restrictions are lifted and the labor situation improved by the return to civilian life of men now in uniform, a new production schedule and possibly new sales prices will be established.

It is estimated the total 1918 production of Studebaker cars will aggregate about 25,000. None of the ordnance contracts of the corporation have as yet been cancelled, and the order recently received from the British Government for 5,000 chassis, will be completed. A large number of horse-drawn vehicles, all of which have standard equipment, are being made, for various Allied Governments, which means that this department will be able to resume quantity production for domestic and foreign commercial trade without delay.

Ammunition Stocks Low All Over Country

Dominion Cartridge Company, Limited. Montreal, writes as follows:

HARDWARE AND METAL,
Toronto, Ont.

Gentlemen:—

We are in receipt of your letter and gladly take advantage of your offer to convey our opinions through the columns of HARDWARE AND METAL to the hardware trade on the ammunition outlook for 1919.

In spite of the somewhat disturbed condition that has existed for over two years in the ammunition line, we believe that 1919 will prove very satisfactory to the retailer and jobber, and that the volume of sales will be large, subject, of course, to certain localities being adversely affected by game laws or game conditions.

Stocks all over Canada are exceedingly small, and the Orders-in-Council prohibiting, until recently, the import of ammunition have made an actual scarcity, as this company has only been able to manufacture commercial lines by hand to mouth methods owing to pressure of military work.

Learned to Shoot

From the declaration of war to the signing of the armistice there has been a continued migration from Canada to the front of men of the class who formerly bought ammunition, and the amazing way in which sales have held up during the war period can only be accounted for by the fact that patriotism and the martial spirit prevailing in Canada have brought forward a vast number of men, and even women, of all ages, who have felt it a duty to learn how to aim and shoot, and are now converts to the fascinations and pleasure of the art. In addition to this increase of ammunition users, Canada has trained an army of some four hundred thousand skilled riflemen who will quickly answer the call of the hunt, clay pigeon and target, so that the dealer who puts facilities in their way will make a host of friends.

Over 6,000 Members

Dominion Marksmen Association advises that they have over six thousand boy members shooting; organizations like the Montreal Amateur Athletic Association are considering taking up trapshooting, and civilian clubs could be easily formed and readily obtain members from officers trained to the use of a revolver with either hand, soldiers who have made their possible at the butts, and aviators coached into the eighty per cent. class at the traps.

In regard to prices, we do not think that the trade should be alarmed either over their purchases or their inventories. Ammunition is high, and we hope eventually it will come down as prices for material, and perhaps labor, recede, but the cost of Canadian ammunition has not been raised since early in 1916, and it is from thirty to forty per cent. lower than standard brands can be imported from the U. S. makers, compared to a practical equality in prices before the war. Materials are gradually becoming cheaper, but ammunition manufacturers must buy long before the finished article reaches the dealer; and manufacturing costs will not be helpful by the stoppage of war orders. Labor is high, but Dominion Cartridge Company is not going to be the first to reduce wages before the cost of living comes down; and we are sure our friends will approve of action such as we have recently taken in purchasing and fitting up a fifteen thousand dollar club for our workers.

Expected Big Increase

In wishing the trade a happy and prosperous nineteen nineteen, while we believe the coming year will see a large increase in the gross sales of sporting ammunition and would advise prompt purchases of any cartridges or shells for which there is a sure sale, we think that the present time is a golden opportunity to turn over a new leaf and resolve not to tie up money and litter up shelves with dead stock, but to use the utmost care and study in making up orders so as to insure a bright, clean and quick moving stock

Standard ammunition does not deteriorate, but boxes and cases do get shopworn, and with manufacture continually improving their quality, new ammunition is always the most saleable.

Yours truly,
DOMINION CARTRIDGE COMPANY, Limited.
W. PUTNAM.

Looks to Future With Greatest Confidence

The following expresses the opinion of the Canadian Yale & Towne Limited, St. Catharines, Ont.:—

Gentlemen:—

In answer to your letter I beg to reply to your inquiry under the following captions:—

1. Securing Materials.—We anticipate a considerable increase in supply of raw materials due to the discontinuance of the manufacture of munitions and other products used in the prosecution of the war, but cannot see where there will be any immediate decrease in prices; in fact, with Government restrictions removed, an increase in some lines would not surprise me.

2. Labor Situation.—A change in the labor situation was noted the day after the armistice was signed, applications from old employees that had left to work in munitions factories, began coming in. We are, at present, able to secure what labor is required and expect within a short time to be in a position to make reasonably prompt deliveries.

3. Future Prices.—It would take considerable courage to forecast what future prices will be on builders' hardware, but we cannot see where there will be, or can be, any immediate change. A reduction in prices is predicted on two factors—reduction in cost of raw materials, and reductions in the price of labor.

Cost of labor cannot go down until the cost of living shows a decline. Just when such a time will arrive is highly problematical.

4. Business Prospects.—We are very optimistic as to prospects for business in builders' hardware in the near future. We all know what the conditions have been during the past four years and the resultant, deferred construction (estimated at $500,000,000) we are confident that some of this work will be started in the near future, especially Governmental and residential construction.

5. Prospects For Export Business.—If Canada expects to pay its war debt with reasonable promptness, it must sell its products, both raw and manufactured, to other countries. To sell our raw material will be comparatively easy, but to market our manufactured products presents a rather complicated problem. To obtain our share of export business we must be in a position to compete with all comers, which means that our prices must be right.

To accomplish this is one of the greatest difficulties facing our manufacturing industries to-day. It is impossible to maintain costs at a proper level, without a much larger volume of business than it is possible to obtain in our country with its small population scattered over such a large territory. One solution would be a large influx of desirable immigrants.

Another that seems, according to many authorities, entirely probable, the Mother Country to establish a tariff for revenue, with preferential rates from and between her colonies.

We have every confidence that Canada will successfully solve her reconstruction problems irrespective of what they may be.

Yours very truly,
CANADIAN YALE & TOWNE, LTD.,
By O. N. PARENT.

Inventory Time is Here Again

Stock-taking This Year Involves Many Factors of Vital Importance to Future Business —Many Changing Conditions For Hardware Men to Reckon With — Stocks Lower This Year Than Ever Before—Business Prospects Bright

INVENTORY time is here again, and perhaps never in the history of the hardware trade in Canada has there been a period when accurate stock-taking is so essential as now. Coming after the greatest holiday business in five years and at the close of a year in which it was extremely difficult to obtain many lines of goods, January stocktaking will be unusually easy for many hardware men. It is estimated by many firms that owing to conditions bulk inventories this year will show stocks to be from 25 to 30 per cent. below normal. Hardware men have been buying conservatively, and while taking care of all the needs of the trade, are not loaded up with heavy stocks. They have learned many valuable lessons in the past four years and they have also been able to turn over at good profits a lot of goods which ordinarily would have been slow moving.

Business Indicator

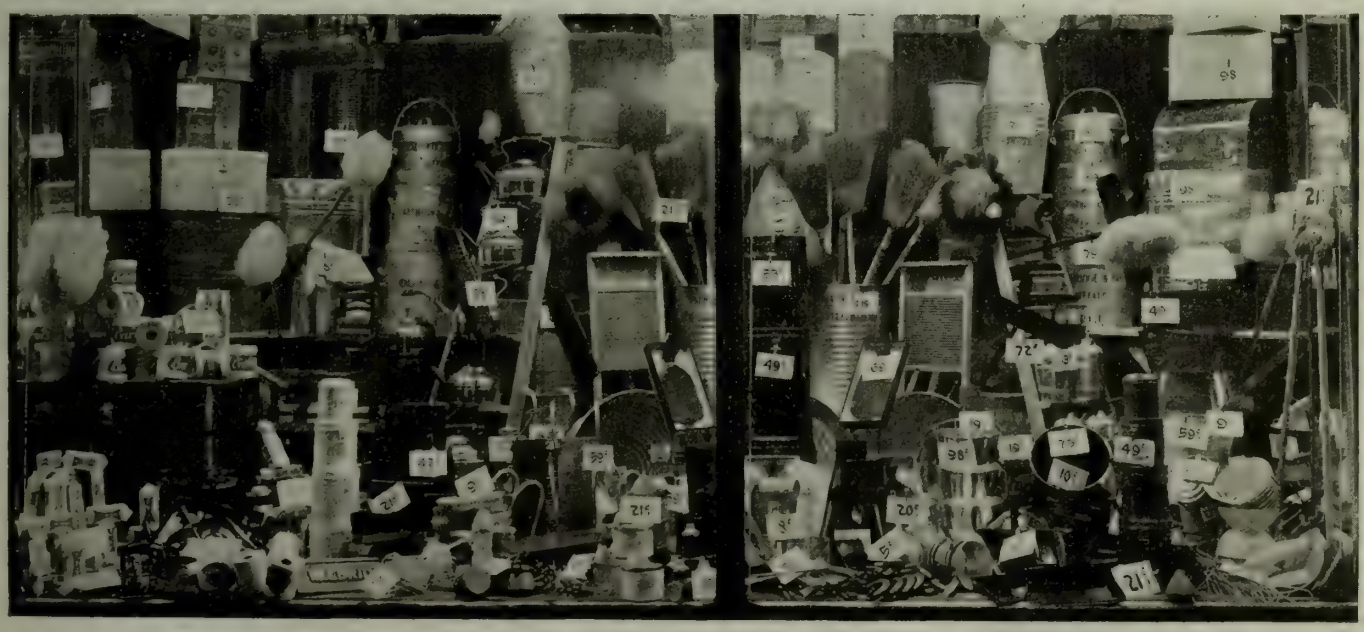
There is a lot to be learned in stocktaking. Aside from showing the actual turnover for the year and the profit and loss, stocktaking will reveal very often possibilities for pushing business in some lines. On the other hand it will also show lines which, because they do not move fast enough it may be advisable to discontinue handling altogether, or at least stock less heavily. Stocktaking, done carefully, is likely to disclose any weaknesses in both the buying and selling end of the business and from checking up these results the dealer may with considerable profit very often not repeat mistakes which have been made. Held-over stock, those slow sellers which grow dusty on the shelves because there is little or no demand for them, usually represent either poor judgment in buying or lack of energy and proper display in selling.

The Ideal Time

Because their stocks are usually lowest at this season of the year and also because business is quieter than usual after the holiday rush, many hardware men believe any time in the first two weeks in January is the ideal period for taking their inventory. This year particularly they want to know just where they stand. They want to know just how much they made on the past year's business, and lay their plans for 1919.

It is generally agreed that the hardware business of Canada was never on a more substantial basis than it is right now. Stocks are lower than for years and business has been good, but stocktaking is essential. The dealer must learn at once what goods he should hold no longer, what lines he should order to take care of his trade, and he must study market conditions and the future prospects of his customers as never before. He must, above all things, take care not to have depleted stocks, so that when business offers he cannot supply the goods. If he has slow moving lines purchased at high prices he has to decide whether to turn over as soon as possible at a special January sale, and make room for new stock, or to hold on and turn them over at his normal profits. Here is where a keen knowledge of the needs of his customers and also of the current markets will be a factor in determining profits and losses in the next few months. A survey of the situation indicates that Canadian hardware men have been "playing it safe." They are not understocked and they certainly are not overstocked.

Prospects for 1919



It would appear that during the first half of 1919 any price reductions will

Continued on page 68

Suggestions for Seasonable Windows

A window full of small articles always proves a result-getter. It will bring crowds of people into the store and many of them will see other things they want. The announcement of a "Clearance Sale" as shown above is also a drawing card that will attract many. Don't be afraid to make an announcement of this kind in large letters easily read across the street. Note in the above display the abundance of price cards.

Household necessities always appeal to a great majority of the buying public because the goods are so widely used. The above window contains many suggestions which the hardware dealer can adopt in arranging a window that will help clear many lines and be a big help in boosting business in January. The price tickets are a big factor in making people want to buy and should be used generously.

What is the Future of Prices?

Recession of Values Generally to Come Slowly—Sheet Situation Changed Rapidly—Declines Have Been Made— Heavy Slump in Rope—What Does the Future Hold?—What is Your Wish?

Written for Hardware and Metal By G. S. WILLIAMSON, Associate Editor

THE price question is undoubtedly one of great moment with the retail hardware trade throughout all of Canada. As a matter of fact it is not only of interest to the retail hardware man, but in every phase of the marketing process, wholesale, manufacturer, and producer of the raw material. If one knew definitely just what was going to happen there would be no need for the exercise of business acumen, which constantly attends the successful merchandising of goods. Some have felt that the end of the war meant the end of high prices; others again feel that the trend will be a gradually receding one, and that the pre-war levels will in very few instances ever be reached again. There is no question of doubt but that the end of the war will ultimately mean lower prices; however, that these will be brought about in the form of a general slump is far from what conditions would warrant. As a matter of fact practically two months have now elapsed since the signing of the armistice and there has been no general recession of values as yet, and this most certainly would have manifested itself by this time had any been under contemplation.

In HARDWARE AND METAL of August 24 and article dealing with the question of prices appeared, what had caused them, how extensive these were, and what the future might hold was covered. A full page panel of some leading hardware lines was shown illustrating pre-war prices along with prices after four years of hostilities. These showed advances in every instance, some of which were very substantial and others again which were very reasonable. Between August 1, 1918, and Nov. 11, 1918, when the armistice was signed, there were several lines which underwent further revision upwards, and it will be noted that in many cases these lines have since come down to the basis ruling prior to August 1.

The panel is reproduced again on the opposite page and what does this show? Mainly that there have been comparatively few changes in the last four or five months in the basic lines carried by the hardware trade.

Sheet Situation Changed Rapidly

The case of both black and galvanized sheets is different from many another line; as a matter of fact decided fluctuations are illustrated here. Twenty-eight gauge black sheets which were selling at $7.75 per 100 pounds on August 1, 1918, had advanced to $8.50 by the time the armistice was signed on Nov. 11. Declines, however, have been recorded since that date and to-day 28 gauge black sheets are selling at $7.50. A similar decline has been recorded in the other gauges, perhaps the most pronounced being in the 10 gauge, which on August 1 was selling at $10 and to-day is down to a basis of $7.50. Galvanized sheets were similarly affected, the 10¾-oz. and 28 gauge, which on August 1 were selling at $9.50 and $9.20 per 100 pounds respectively, advanced until, by Nov. 11, the date of the signing of the armistice, prices generally were up around $12 and $11.70 for these two gauges. Since the latter date prices have shown declines, with the result that 10¾ oz. is to-day quoted at $9.30 and 28 gauge at $9 per 100 pounds.

The situation to-day on galvanized and black sheets, perhaps more particularly the former, is along the line covered in recent issues of HARDWARE AND METAL. It has been shown that some jobbers' prices were very high when compared with mill values; this was perhaps quite alright in view of the very small supply and the abnormal demand, but there is no question of doubt that 10¾ oz. galvanized sheets at $12 per 100 pounds are fictitious value when mill costs are taken into account. As such, then, the fact that this price has declined now, until it is around $9.30, should be by no means alarming. There is no reason to believe that the average retailer has a sufficiently heavy stock of high-priced sheets to cause him any particular worry now that these are selling about $3 per 100 pounds lower. There also is no justification for the belief that all lines are going to decline proportionately.

Only Normal Advances Recently

In looking over the accompanying table it will be seen that since August 1 advances have been recorded in some items. In the majority of cases these are comparatively small advances which would seem to be justified in view of adverse manufacturing conditions which have had to be faced due to scarcity and high-priced labor and scarcity of raw materials. There is no indication that these adverse conditions which were really slow in coming will be overcome and a memory almost immediately.

Lace leather is one line which shows an advance since August 1. This amounts to about 20 per cent. and is the first advance which has been recorded in this line for about one year. Washboards show an advance of a straight 5 per cent. over prices which were prevailing on August 1, 1918. This would seem not to be any excessive jump, and there is no indication that better conditions will immediately develop and bring about declines here.

Cement has advanced 25c a barrel to $3.50. Cotton twine and cotton rope show a slight advance over levels which were previously ruling, the same being true also of building papers and some lines of roofings. Grindstones, nails, crow bars, clay picks and coal oil are other lines which have registered slight advances since the 1st of August, 1918. Perhaps one of the biggest advances which occurred since that period was in putty, which showed a jump of about $1.25 per 100 pounds, or 25 per cent. over preceding levels.

Declines Have Been Made

Since the signing of the armistice there have been quite a few declines recorded. The case of galvanized eavetrough and conductor pipe is one, the value of these being determined to a certain extent by the value of galvanized sheets. There is no question of doubt that when galvanized sheets soared to a basis of $12 per 100 pounds that the effect on manufactured lines must be immediate. Now that conditions have adjusted themselves to a little better basis, manufacturers have again readjusted their prices on eavetrough and conductor pipe and taken off the advance which followed the jump in the price of sheets. A slight decline is also noted in some quarters on common bar iron and mild steel. The new basis of quotations in some quarters show that values here are down about one-half cent per pound. Wire nails, however, and also cut nails have advanced over levels that were prevailing on August 1, 1918. The basis on wire nails to-day is $5.50 per 100 pounds and the undertone to the market is very firm. It is true there have been some declines in basic iron and steel provided for in the United States, but it is significant that wire rods are not included in the list.

The sharp declines in solder had started by the time the armistice was signed. From a price of 60c per pound on the guaranteed which was in effect on August 1, prices had declined to 50c by Nov. 11—the date of the signing of the armistice and to-day this can be bought for 44 cents. The lower levels in pig tin and pig lead are directly responsible for lower levels reached on solder.

Perhaps the most spectacular declines which have occurred in the hardware markets are those applying to ingot metals. These prices have changed so rapidly that it has been hard or would be hard to give a brief review. However, these have been covered from week to week in the markets of HARDWARE AND METAL, and it has been noted that tin, lead, spelter and antimony have

all registered quite substantial declines. The feeling prevails that lead and antimony may go somewhat lower, and a somewhat easier basis on tin would not come as any surprise. Copper is another item which would seem to be in for a slight decline at the beginning of this year.

Heavy Slump in Rope

There is another item which has declined this week very substantially. This is rope. Following on the heels of a decline of 2c per pound a couple of weeks ago a further sharp recession of 8½c per pound on pure manila and 7c on British manila has been recorded this week. The situation here is not a case of the manufacturers holding up for big prices. On the new basis established the majority of manufacturers will lose hundreds of thousands of dollars by having to make up high priced hemp at a figure which has been made to compete with the lower market on hemp to-day. Indications are that this action has been precipitated as the result of some manufacturers having cleaned out all of their high-priced hemp and being in a position where they could buy their raw material on to-day's market. This was fully covered in last week's issue of this paper, when the decline was predicted.

Adopt Carry-On Slogan for 1919

There may be other declines recorded, which will seem rather sensational, but there is no reason why the trade should become despondent. As a matter of fact the merchant who keeps his stock complete, buying goods as he wants them, and adopts a good "carry on" slogan will have nothing to fear from what may develop in the matter of price changes during 1919. There is every reason to believe that the recession in values which will come will be a gradual one, and one that can be taken care of without any material losses to the retail merchant. An extract from the article which appeared in the August 24 issue of HARDWARE AND METAL would perhaps not be amiss at this time. It shows how steps towards standardization were being taken and indications to-day are that these measures will in many cases be continued and enlarged on in the peace time program of many manufacturers. This article emphasized that careful buying was essential and developments are such that this policy if followed, and it would appear that it has, finds merchants generally in a good position for 1919 expansion.

Standardization Now Being Mooted

HARDWARE AND METAL said in part: "What are the effects of these objections to high prices—are manufacturers swinging along disregarding the signs of the time or have they their ears to the ground? What of standardization now being mooted—is it practicable, are steps being taken to work out some forms which will serve to stabilize the markets?

"Only recently automobile tire manufacturers met and decided to cut down the number of sizes and types to a fraction of their present basis. Manufacturers of tools of varying description are omitting the high finish from some of their goods. Manufacturers of boots are not to be allowed to buy any new lasts; the standard suit of clothes has made its appearance in the Old Country. When one considers the developments already under way and more to follow, it would certainly seem that standardization is on a fair way to being generally adopted.

"Ask any manufacturer what results may be expected under concentration and volume of output—he won't tell you higher prices. Under normal conditions the tendency would be downward, but to-day, labor, transportation, materials, are so uncertain that lower levels may not be reached, but then again the day of rapid advances is likely past. That many lines will go higher seems inevitable but standardization will stabilize the markets and tend to prevent undue inflation of values.

Careful Buying Now Essential

"It is true that unless a merchant has the goods he can't do business. However, in practically every line the basis of cost has reached such a high level that the merchant who loads up with merchandise at to-day's figures is taking chances of a serious break which may mean disaster. There are always the panicky type in any line of business and unless all former precedents are broken, a general rush to unload high-priced stock will be in order.

"Against the immediate return to pre-war values or even a reasonably quick return, many cards are stacked. Come back to labor and you will find a decidedly big factor in to-day's costs to be overcome right there. The railways will most certainly not drop their rates immediately war stops—transportation costs will be largely maintained. Another point to be borne in mind, too, is that merchants face a period from now until the end of the war of watching many lines on their shelves reach the vanishing point with no possibility of replacement. Goods for commercial or domestic use will be at a comparatively low ebb.

Peace Time Production

"It is possible though that this deficiency may be overtaken in a comparatively short time. When the energies now directed towards war production are turned to peace time pursuits, the capacity of present mills may be expected to catch up with business requirements with remarkable speed. The demands will undoubtedly be heavy when conditions right themselves again, but concentration on production results in volume and tends towards lower levels.

"The situation following the declaration of peace will be full of uncertainty. Merchants may be expected to stop buying—those carrying high-priced stocks will endeavor to unload and breaks of a substantial nature are more than likely to follow. These are conditions which must be faced, though how close this surmise may be to the actual truth only time will tell.

"Careful buying—an accumulation of reserve capital against the day when declines may come and losses may have to be met—and freedom from panicky sentiments are safe channels for every merchant to sail along.

"The day when war was declared presented a far darker outlook than the day when peace on Allied terms will be consummated. The merchant who has prepared for the days of peace should not be in as uncertain a position as he was when, without warning, war was declared."

What Does the Future Hold

The above was written in war days. Now the war is won and what the trade is concerned about particularly is — What does the future hold for us in the matter of prices? Is a big slump coming and if so how to face it? How can one know that conditions in 1919 will be good or otherwise?

Best informed authorities summarize the situation briefly in this way: Prices will come down, yes, but very slowly. A gradual readjustment to a basis which can be termed normal in face of changed conditions is the situation as they see it. Some lines may advance slightly and some break rather sharply, but the trade generally may look for markets that will not be disturbing and on which the exercise of care and good, sound business principles will carry them through with a balance on the right side of the ledger.

"Normal" Values Carries New Meaning

Elsewhere in this issue are shown figures on various items preceding, during and after another war period. It is in the after-war figures that the greatest interest centres — and why? Because they show that pre-war levels were not reached as a general thing and this would indicate that a new standard of values had to be reached. History should repeat itself in this age. It seems inconceivable that pre-war levels can be taken as normal to-day. Labor, the main factor in the manufactured goods, has tasted of affluence, their standard of living generally has improved and a return to 1914 conditions as a basis of cost does not seem possible nor even desirable. The point then is—what is normal to-day?—most certainly pre-war levels are not and it will take some years to determine "normal" values.

The Future?—What is Your Wish?

The question as to how to know that conditions in 1919 will be good or otherwise is hard to answer. The pessimist and calamity howler is always with us. He was around when the war broke out and dogged at the heels of everyone during that four years of hell in Europe. But he didn't stop Canada—the country went ahead in every way—faced days that were mighty dark and finally came out on top with the other Allies with a record of achievement abroad and at home second to none. Is it right or reasonable then that now when there is room for rejoicing, when great opportunities are open before everyone, that the pessimist should be set up on a pinnacle and listened to as his calamity uterances roll forth their message of

doom? Should he not be sat on, ground under foot and the message "carry on" dinned into his ears? Which is the better spirit—one of cheerfulness and work or one which calmly sits down waiting for blue ruin to come? An answer is unnecessary.

The opportunities of Canada are many—they are widespread—by taking full advantage of them Canada's peace-time achievements will reflect the glory and honor of her soldier sons on land and sea. Every merchant should resolve to carry on—the merchant can only do business when he has goods to sell. Stocks then should be kept complete and well-assorted. Heavy buying is not advocated, but to those merchants who are in a position to do business and go out after it, 1919 presents a splendid opportunity. Make the most of it—start now.

(Prices Changes in Another War appear on page 84.)

Standardization of Stoves Favored

Manufacturers State That Policy Which Was Brought About as a War Measure Has Been Most Successful, and They Plan to Continue it—American Manufacturers Will Likely Limit Styles Also

THE policy of standardization of stove styles which was adopted by Canadian stove manufacturers as a war measure to conserve materials and labor, has worked out so successfully that many manufacturers plan to continue it. There has been a big demand for stoves and heaters this season, especially for stoves which will burn either coal or wood. The general situation in regard to the fuel scarcity was responsible for this and also for the record demands for oil and electric heaters. The manufacturers expect a splendid business this year and are preparing for it. As stated in last week's issue of HARDWARE AND METAL prices are being guaranteed by the members of the Canadian Stove Manufacturers' Association until April 1.

What They Say

Here are the views of some of the manufacturers in regard to continuing standardization:

"In answer to yours in reference to standardization of stoves: Although this was done as a war measure, we consider it a move in the right direction and are endeavoring to concentrate on as few designs and styles of stoves and heaters as possible, which will have the tendency to reduce the cost of production by increasing the output of few lines rather than make smaller quantities of more extended lines, thereby benefiting all parties concerned from the manufacturer to the consumer."

The Thos. Davidson Mfg. Co., Ltd.

Expect to Continue

The D. Moore Company, Limited, of Hamilton, Ont., writes as follows:

"The policy of reducing the lines of heating and cooking stoves and ranges made has been a necessity with the larger Canadian manufacturers during the latter years of the war, and a programme of standardization accordingly has been necessary where the manufacturer has aimed to give service to the trade.

"There are so many good features in connection with the said standardization limiting the number of styles of stoves, heaters, etc., that we cannot help but feel that the Canadian stove manufacturers will continue in this policy as far as practical.

Simplifies Handling

"We believe that the trade appreciates the necessity of such limitation and we hear that now they are accustomed to same they appreciate the fact that it also simplifies the handling of heating and cooking stoves and that they in turn likewise do not have to carry such a large and varied stock.

"Further we believe that all concerned feel that this is the right procedure for the future and will be satisfactory to all that are interested in the stove trade where the said lines will supply their needs."

Will Not Change

Another manufacturer says:

"While recently in the United States we visited four of the largest American stove manufacturers, and all of them stated that they were going to stick to their programme of reduced lines and standardization as there was no real excuse for the immense number of styles that exist.

"We ourselves intend to follow this programme exactly without any addition for 1919.

"We know of several Canadian manufacturers who are cutting down their styles and sizes even lower than the 1918 standard, because they have found the benefit in increased production and diminished stocks that are necessary to be held by the manufacturer, jobber and retailer, besides the simplification of the selling programme.

Retailers Like It

"Many of our retailers think well of this plan, for the reason that they can throw all their selling force behind the standard line. The difficulty with the excessive number of styles and lines is that a salesman is at a loss which one to recommend to his customer because if he presses the claims of one he immediately admits that the other is not of the same value, which of course is not a fact. In a great many cases we have found that the standardization has operated in increased sales because each neighbor begins to want a stove exactly like that of another neighbor, and this unanimity of opinion in the neighborhood soon results in widespread buying, which is not the case where a dealer is endeavoring to introduce a number of styles in a neighborhood."

The Moffat Stove Co., Limited, Weston, Ont., writes as follows:

"So far as we are aware the Canadian stove manufacturers have not been asked by the Government to carry into effect any general system of standardization of patterns, styles, sizes, etc., of stoves and heaters. At the same time, nearly every stove manufacturer in Canada has found it necessary to do something along this line. So far as our firm is concerned we have been favored with practically no Government orders, and have had to work our plan of reconstruction and standardization without any outside help. The result has been that we have cut down our patterns and sizes from 40 to 60 per cent. and are well satisfied with the change.

"Our sales for 1917 and 1918 are the highest in the record of our company, and we are now in the unique position of having a complete line of standardized goods for coal, gas and electricity, and have no hesitation in stating that we are ready to compete on equal basis with any manufacturer in America making similar goods."

Getting New Views

In the United States the National Association of Stove Manufacturers is ascertaining the views of its members on the subject. The War Service Committee of the stove industry has devised as a measure of conservation during the reconstruction period the continuance of reduction in the number of sizes, styles, and finishes of stoves and ranges. A circular letter to this effect has been sent out to the trade by Robert S. Wood, secretary and cost expert of the National Association of Stove Manufacturers. It reads in part as follows:

"You will observe the outstanding recommendation of the Conservation Division is that the programme heretofore adopted for the elimination of styles, sizes and finishes of stoves and ranges be continued and your War Service Committee earnestly endorse such a procedure.

Endorse the Policy

"Many manufacturers have expressed themselves as being in thorough accord with this policy, feeling that it would be

Continued on page 68

NO CHANGE LOOKED FOR IN PRICE OF GASOLINE

WHILE the oil companies will not tie themselves up to contracts, it is stated that no changes in prices are looked for either in gasoline or oils. The flat rate plan which was put into effect by one of the large firms in April last will be continued as it has worked out to the satisfaction of all interested. Just what will be done towards establishing a flat rate for the Dominion remains to be seen. A number of firms handling gasoline, and oils have been urging the adoption of a standard rate. So far little progress has been made although committees have met and will again meet with the oil companies' officials to see what can be done. Some of the oil men are not inclined to regard the plan as feasible for the Dominion, basing their views on the long hauls to various points. In spite of the large falling off in fuel oil sales owing to the closing of munitions plants the price has only dropped a cent a gallon. The manufacturers are meeting the situation by lessening the output of fuel oil and increasing the production of gasoline. It is stated that the shortage of coal in many districts this season is causing much larger demands than usual for oil for fuel.

NEW BANKRUPTCY ACT MAY BE RECOMMENDED

WHILE no action has as yet been taken by the committee which was named to work out the details of a Bankruptcy Act that will be less cumbersome than the legislation that is at present in effect, it is expected that a meeting will be held shortly and that recommendations will be made to be presented at the next session of Parliament. The question is one that is of much importance, both to manufacturers and retailers who have been greatly inconvenienced by the lengthy processes of the law as it now stands. Considerable expense is attached to the present methods and it is expected that a quick working act that will reduce expenses to a minimum will be suggested.

FINANCING PURCHASES OF ALLIES IN CANADA

AN arrangement has been concluded with the British Government by the Canadian Minister of Finance whereby credits to the amount of nearly two hundred million dollars will be available for the coming year.

Flfty million dollars of this amount will be necessary to carry into effect the operations of the Imperial Munitions Board of Canada. Another fifty millions will be required for the purchase of this year's grain crop, for which purpose a large sum has already been arranged. The balance, one hundred millions, will be expended in the purchase of foodstuffs, which will include meats, lard and dairy products, and many other Canadian products.

An improvement in exchange conditions between Britain and America is anticipated in the near future, but until this actually takes place, Canada will likely continue to secure large credits for the purchase of our own products.

WAR BOARD REMOVES TIN PLATE RESTRICTIONS

THE United States War Trade Board announces in a new ruling (W.T.B.R. 446) that the restrictions hitherto existing on the exportation of tin and tin plate have been removed, as the necessity for strict conservation of tin and its products no longer exists.

NO MORE RESTRICTIONS ON SHELLAC IMPORTS

THE United States War Trade Board announces in a new ruling (W.T.B.R. 438) that the restriction placed upon the importation of shellac, button lac, seed lac, garnet lac, and Keerie or refuse lac, has been removed and licenses may hereafter be issued freely when applications are otherwise in order. This does not affect War Trade Board regulations governing the distribution of the above commodities in the States.

The War Trade Board also announces that the restriction placed upon the importation of varnish gums has been removed.

WHO WILL REPLACE THE HELP THAT IS LEAVING?

THE fact that aliens are leaving Canada at the rate of about 10,000 a month is causing many manufacturers and others to wonder where they are going to get the help that they need for business that is not only in sight, but future business. Steamship authorities state that every boat leaving for Europe is packed to capacity with foreigners who are going home to see relatives they have not been able to get to for four years. On many of the steamship lines it is stated that all accommodation is booked for weeks ahead. This situation is already making itself felt in many factories, especially across the line where aliens do a large part of certain types of labor. It is argued that the help from munitions plants and the soldiers coming home will fill all vacancies. It would appear according to those who are in closest touch with the situation that there will be plenty of work at good wages for everyone in Canada who wants to work. The exodus of aliens, it is stated, is steadily increasing. Thousands of Russians who were unable to secure passage to Europe via Montreal or New York owing to the rush of bookings are going home the long way, via Yokahama and Vladivostok. The majority of these men worked in steel or rolling mills and on account of their strength were especially in demand. Just who is going to replace them is a problem that has got some manufacturers guessing.

PRICE FIXING WILL BE REGARDED AS ILLEGAL

AN important decision was announced by the American Government when it was declared that concerted price fixing by any industry after the Government ceased to exercise price control. January 1, will be regarded by the Department of Justice as in restraint of free competition. The explanation was made officially in answer to queries

as to what would happen to war-time price fixing when the War Industries Board ceased to function on January 1.

WORLD'S SUPPLY OF FINISHED STEEL IS LOW

LATEST reports indicate that the world's stock of finished steel is lower than for many years. So little steel in proportion to normal requirements has been received by Latin America, Japan, China, Australia and Africa during the last four years owing to high prices and lack of ships that business to the extent of probably 25,000,000 gross tons of finished material appears to be banked up among them awaiting the arrival of conditions permitting its release. Europe itself will probably require steel and machinery from America for the repair and replenishment of equipment necessary to enable it to manufacture at home what may be needed for rehabilitation, but it is only reasonable to assume that the great steel industries located there will ask no more.

RETAIL TIRE DEALERS WANT STANDARD PRICE

AT a meeting of a number of retailers handling tires and other rubber goods with the manufacturers in Toronto on Monday a number of questions were brought up for readjustment. Two of special interest to hardware men were the proposal for a standard price and a request that the manufacturers cease acting as retailers. The question of prices received a good deal of attention especially in view of the reports that have been made about price-cutting in some Ontario cities and towns. The handling of seconds came up in connection with this phase of the situation also. The meeting was largely a get together sort of affair at which the representatives of both retailers and manufacturers presented their cases freely. While no action was taken, committees were named to draw up a schedule of recommendations that will cover the main points at issue. This will be considered at another meeting to be held probably next week. No further action has yet been taken by the retailers in connection with gasoline prices. It is reported that the fees have been returned to all those who sent them to Ottawa as a result of the order issued by the Fuel Controller.

CANADIAN COPPER MAY NOW BE SENT TO STATES

THE United States War Trade Board announces in a new ruling (W.T.B.R. 428) that the regulations governing the importation of copper ore and copper concentrates, announced October 4, 1918, have been modified and that henceforth they will consider applications for license to import copper ore and copper concentrates as follows:

1. For copper ore originating in and coming from Korea, Newfoundland, the West Indies, France, England, the west coast of South America, Cuba, Canada, and Mexico, irrespective of the content of copper.

2. For copper ore originating in and coming from Spain only when containing more than 2 per cent. of copper.

3. For copper concentrates from Cuba, Canada, and Mexico, irrespective of the content of copper.

4. For copper concentrates from any non-enemy country other than Cuba, Canada, and Mexico, only when containing 50 per cent. or over of copper.

There is no restriction upon the importation of copper matte or blister copper.

Current Events in Photograph

BLINDED SOLDIERS GETTING BACK TO WORK

The photo shows how broom-making is carried on at the Men's Industrial School, Canadian National Institute for the Blind, King St. west, Toronto. Thirteen men are being taught this work at the school, and the Institute finds employment for them after they have become sufficiently proficient. The man in the centre of the group of three has been blind since he was three years old. One of the things which strikes visitors to the Institute is the cheerfulness of the blind workers at all times.

EDITORIAL COMMENT

THE EDITORS of HARDWARE AND METAL wish all its readers a very Happy and Prosperous New Year.

* * *

DON'T take the attitude that business is a gable; a business man has to take some chances, but it is necessary to use judgment in taking them.

* * *

THIS is the time of year when the patrons of the mail order houses have the nerve to walk in and ask the home merchants for a New Year Calendar.

TAKING PERSONAL STOCK

IN the next couple of weeks many hardware merchants all over Canada will be taking stock. In doing this every merchant should not fail to take stock of himself, his assistants, his store organization and his store methods. Some proprietors have found on looking into the matter that they are neglecting executive work which needs their urgent and personal attention to take care of work that could be done just as well by cheaper help. Others have found that other methods than those they were using are being applied by leading firms to boost sales. Others have discovered opportunities for developing side lines which have turned out to be most profitable business builders. All these things are worth looking into. Are you a better or more efficient merchant than you were a year ago? Are you keeping as closely in touch with your community and its needs as you should? Can your store methods or the methods in any department be improved? Stock taking of this kind will often reveal points where improvements can be made that will make for increased business efficiency.

WILL THIS BECOME GENERAL?

A STEP that will be watched by retailers with special interest was taken this week by one of the greatest mail order houses in the Dominion. The firm announced that from now on its employees are to have every Saturday afternoon off and during the months of July and August all day Saturday. This may seem a radical step to take but it is one that may be followed before many years by many other firms, especially those employing large numbers of sales people. It is stated by many manufacturers who allowed employees afternoons off last summer on condition that the time be spent in war gardens, that the factory output did not decrease but showed a substantial increase. There is a general tendency on the part of large employers of help to better conditions and shorter working hours is one of the ways in which they are watching results with keen interest.

GERMANY'S LATEST PLAN

WHILE no attempts have as yet been reported since the signing of the armistice to unload German made goods in Canada, it is regarded as quite likely that some cleverly disguised plans for doing this are under way. It is believed that German agents are still very busy across the line and the American Defense Society has issued the following: "The subtle agents of Germany are here to place German goods on the market and ultimately undersell our own manufacturers. We have fought Germany on land and sea and now have to fight her at home. The cheap goods from Germany are made at slaves' wages. We must protect our own industries in order to give employment to our returning soldiers." Backing up this line of action several thousand stores, among them some of the largest in the States, are displaying signs which read "No German Made Goods Sold Here." In New York city alone, these signs are prominent in over 700 stores. There have been many rumors that German firms were not prepared to give up their foreign trade and would resort to every sort of scheme to unload their goods. It might be good policy for Canadian retailers to keep a weather eye open for German made goods.

CHANCE FOR EXPORTERS

THE date for the great fair at Bordeaux, France, has been set for May 16 to 31, and a special invitation to participate is extended to Canadian firms. All exporters and manufacturers who are interested in expanding their trade not only in France, but in French colonial territories, should find this big commercial fair an excellent opportunity to get in touch with buyers. The Canadian Government is securing a number of spaces which will be at the disposal of manufacturers. It is stated that prospects are for better shipping conditions in the spring than have obtained for three years. Reconstruction materials are not likely, it is stated, to prove a business-getting line. What France needs for reconstructing its damaged industries in the north and east are, first, labor; second, credit; third, raw materials to keep French indus-

tries going; fourth, such special equipment for iron and coal mines, steelworks, textile mills, and other industrial establishments as France itself is not in position to make in sufficient quantity at this time; fifth, ships."

There is, obviously, no need of exhibiting or calling attention to raw materials.

PLACE YOUR ORDERS EARLY

PROSPECTS for spring business are reported excellent and from all parts of the country orders are coming in steadily. Owing to the demands from overseas for foodstuffs, farmers are preparing to put in record crops and with help more plentiful than it has been for four years big yields are expected, provided the weatherman is kind. All this creates a big demand for farming equipment of all kinds. Firms handling automobiles are already advertising that they cannot get their usual allotments of cars and advising farmers and others to place their orders early. It would seem to be a pretty safe general policy for all those wanting goods to get their orders in early and hardware merchants whose stocks are low may well give this matter careful consideration, even though many have been inclined to hold off expecting lower prices. The home demands are likely to be large as a great deal of necessary work that has been held up for four years will proceed and every week sees steadily increasing calls for materials from overseas. When the Canadian Trade Commission gets into action, it is hoped that many substantial contracts will come to this country. Most of them will, it is expected, have to be completed within a time limit and factories working on them may have little time to devote to orders which come in later. Just now they are prepared to handle business and make deliveries in a reasonable time, but whether they will be able to do this in a month or six weeks from now no one can tell.

LOSING RAW MATERIALS

THE loss of a manufacturing industry no matter how highly developed is not nearly as serious as the loss of a supply of raw materials. That is the reason why Germany will feel so keenly the loss of Alsace-Lorraine. Without the iron ore deposits Germany obtained when she took Alsace-Lorraine from France in 1871, the astonishing development of German iron and steel industries would not have been possible. Aside from this, Alsace produced prior to the war, forty two per cent. of the total amount of crude oil produced in Germany and a great quantity of potash. The loss of all these important raw material supplies to Germany will be just as important from an economic standpoint as will be their restoration to France.

WHAT OTHER EDITORS SAY

SOME dealers are hesitating about buying their spring stocks because they fear that prices will drop. Why should they? While it is true that the price of linseed oil has lowered in the past month or two, the price of that product is no lower to-day than it was when the last advance in the price of paint was made by most of the manufacturers; and many of the other materials entering into paint manufacture are either out of the market entirely, are harder to get, or at higher price levels.

If there is the demand for paints and varnishes, which most prophets in the trade predict, prices will either continue at present levels or be advanced to keep pace with the demand which these men believe will speed up paint production and deliveries to a maximum output.—*American Paint and Oil Dealer.*

THE order of the Federal Trade Commission against lumber organizations carrying out their policies of combating mail-order competition did not touch the implement trades, since the latter have kept clear of any such policies. Notwithstanding the rule was regretted by implement dealers, who resent the unfair actions of the mail order trade. So the recent order by the commission citing a mail-order lumber concern to answer charges of unfair competition in misrepresenting the purport of the original order, will be greatly welcome by jobbers and dealers generally. Much interest will be taken in the outcome of the hearing at Washington on January 9. —*The Hardware Trade.*

THE apprentice boy is passing; in many trades he is a memory; in none does he receive the thorough training that makes the master workman. The practical experience gained in the shop and on the job must be supplemented by the technical knowledge to be had in the vocational school. These schools, properly conducted, will give boys and girls an opportunity to become proficient in their chosen vocations. Organized labor has approved the system and in many places is taking an active part in the management of the schools.—*Painter and Decorator.*

THE policy of long credits is as injurious and unfair to the customer as it is to the merchant. It stimulates the incurring of debt, which is a millstone to the man who is really honest and well intentioned at heart. For the sake of his customers, if he won't do it for his own sake, the merchant should take stock of his credit accounts and if he has not done it before, should put his collections on a systematic basis.—*American Artisian and Hardware Dealer.*

ONE of the publicity planks in the farmers' platform declares that "every claim for tariff protection should be heard publicly before a special committee of Parliament." Better than this, we believe, is the suggestion which has been frequently voiced by *The Financial Post* for a permanent tariff commission. However, the two suggestions would appear to be no more than different means to the same practical end.

The tariff commission, *The Financial Post* believes, promises the best means of negotiating the "no man's land" between the opposing industrial and agricultural factions.—*The Financial Post.*

UTILIZATION of hitherto waste products, as well as an enlargement of the field of Canadian industry, are the joint results that would accrue from a lifting of the excise tax on industrial alcohol. . . . . .

Granted favorable conditions for manufacturer, alcohol will be used very largely for fuel and power. Canada cannot afford to allow such an economic waste to continue when Great Britain, the United States, and other European countries enjoy the advantages that this country has been denied.—*Toronto Globe.*

EVENTS IN THE TRADE

Business Chances

Tottenham, Ont.—J. Albert Foucar will conduct the hardware business of L. P. Foucar, deceased.

Manitou, Manitoba. — Ridley Bros. have purchased the hardware business of Hoffman & Armstrong.

Lemberg, Sask. — Karl Mueller succeeds Landruth Bros., hardware.

Upton, Quebec.—Marin and Langelier, hardware, have dissolved partnership.

Obituary

A. R. Wilson, formerly with the Porteous Hardware Co., of Grande Prairie, Alberta, died at the military camp in Calgary after a brief illness with influenza. He was a plumber and metal worker and after learning his trade in Edmonton went to Grande Prairie in 1912 and resided there until his enlistment a year ago.

The death occurred at Woodruffe, Ont., of Honore Foisy, hardware.

A. H. Stillman, hardware, Warkworth, Ont., died following an operation for appendicitis. He was 38 years old. Burial was made at Campbellford, Ont.

Fire Losses

Fire which is believed to have started from spontaneous combustion caused a loss of $3,000 in the hardware store of W. H. Bridgeman, corner of Portage Avenue and Furby St., Winnipeg.

Personals

Samuel Penfold, of the Penfold Hardware Co., Peterboro', was elected alderman for 1919.

Hon. C. C. Ballantyne, Minister of Marine and Fisheries, is ill at his home with a severe attack of la grippe.

John G. Fraser has been appointed manager of the Hamilton Stove and Heater Company, Hamilton, Ont. He succeeds J. J. Carrick.

Frederick Moore, manager Benjamin Moore & Co., paint manufacturers, Toronto, leaves the end of this week for New York, where he will attend a convention called at the head offices of the company.

Frederick M. Baker, representative of T. S. Simms & Co., Ltd., St. John, N.B., and the Wm Cane & Sons Company, Limited, Newmarket, Ont, was elected as one of the aldermen for Ward 8 in the elections in Toronto.

Alex. McLean, of the firm of Mackenzie, Milne & Co., Limited, Sarnia, spent several days this week, including New Year's, in Toronto. E. Newman of the same firm was in Chatham, and Frank Ready at St. Mary's, Ont.

Jas. Arnold, well known in Imperial Munitions Board circles, and more recently with the Turnbull Elevator Mfg. Co., Toronto, has been appointed works manager of the Canada Foundries & Forgings, Ltd. (Jas. Smart Mfg. Co.), at Brockville, Ont.

In the municipal elections at London, Ont., Col. W. M. Gartshore, of the McClary Manufacturing Company, was returned by acclamation as a trustee of Victoria Hospital. F. G. Mitchell, of the London Engine Supplies Co., was returned to the Public Utilities Board without opposition.

Trade Notes

The Westmount Hardware, Osca Durand and Adolphe Viger, has been registered at Montreal.

Robert Campbell succeeds Edward G. Kelly, dealer in auto accessories and electrical supplies at Gleichen, Alberta.

The Thermos Bottle Company, Ltd., formerly of 12 Sheppard St., Toronto, has moved to 10 Adelaide St. E.

The Laurentide Pure Paint Co. has been registered at Montreal.

The Broom Manufacturers' Supply Co., Pacifique Guilmette, has been registered at Montreal.

J. A. E. Plante & Co., hardware, Mrs. J. A. E. Plante, has been registered at Montreal.

The No Dust Sweeping Compound Manufacturing Co., Homer N. Archambault and L. H. R. Messier, has been registered at Montreal.

The Toronto General Trusts Company has been appointed liquidators of the Port Arthur Wagon and Implement Co., Port Arthur, Ontario.

The Hughes Electric Heating Company, formerly of 364 Richmond St. W., Toronto, is now occupying new quarters on Carlaw Ave., on the third floor of the Wrigley Building.

The Royal Canadian Specialties Co., (Hamilton Whip Co.), Hamilton, Ont., has secured the selling rights for Canada of the auto paints and varnishes of Scarfe & Co., Brantford, Ont.

The W. S. Mahaffy Company, formerly of 10-16 Plymouth Avenue, Toronto, is now located on Trafalgar St., where it will continue the manufacture of warehouse and factory trucks.

Scythes & Co., 22 Church St., Toronto, have purchased a plant in Guelph which will be devoted to the manufacture of oil skin coatings. The firm plans to open a branch office in Winnipeg in February.

Montreal News

J. C. Dufresne, head salesman for Lewis Bros., Ltd., office division, is ill

Mr. McKendrick, Montreal manager of the Canada Metal Co., was this week in Ontario for the holiday.

W. S. Fallis, managing director of the Sherwin-Williams Co., Ltd., of Canada, was in Palmerston over the New Year.

A. Gibb, son of Alexander Gibb, manufacturer's agent, Montreal, who enlisted some months ago in the Royal Naval Service, is home again.

Most of the travellers have been in from their various fields over the holidays and plan taking up their work again during the coming week.

Fred S. Whittall, managing director of the A. R. Whittall Can Co., Ltd., Montreal, has returned from overseas. Mr. Whittall enlisted some months ago.

A. N. Creamer, advertising manager for Brandram-Henderson Ltd., was in Toronto this week addressing a conference of the Ontario representatives of his firm.

Border Cities News

The Lock Tile Patch Company, of Detroit, will open a manufacturing branch in Windsor immediately.

The Commonwealth Chemical Company, Walkerville, have purchased six acres adjoining their property, Kildare Road, and are erecting a number of new buildings.

The Square D Company, formerly the Detroit Lubricating Company, manufacturers of lubricators and appliances, have acquired a two and a half acre site in Walkerville, and contemplate the erection of a factory.

Manufacturers of the Border Cities, confronted with the problem of uncertain buying conditions and difficult situations in the raw material markets, have arranged for an address on buying by S. A. Linnekin, Wellesley Hills, Mass. He will address the manufacturers' section of the Chamber of Commerce January 8.

Announcement has been made through the branch factories of the Maxwell and Chalmers Motor Companies, in Walkerville, that present prices will be maintained until June, 1919. It is explained that no reduction in prices is possible for the reason that neither company advanced its prices during the war.

One of the latest to enter the tractor manufacturing field is Charles F. Redden, former manager of the automobile division of the Studebaker corporation in New York, and until recently general sales manager of the Maxwell Motor Company. The new corporation will market a tractor to be known as the Kill Toil Farm Tractor. Byron L. Baker will be associated with Mr. Redden.

Incorporations

The Connelly Company, Limited, capital $40,000, head office Toronto, has been granted a provincial charter and plans to manufacture and deal in leather goods and auto accessories.

T. G. McLaurin Company, Limited, head office Montreal, capital $25,000, has been granted a Dominion charter. The firm plans to make wall board, boxes, lumber, and deal also in oil and petroleum products.

Meetings Next Week

The annual sales conference of the Steel Co. of Canada is being held at the head office of the company in Hamilton on Tuesday, Wednesday and Thursday of next week, January 7, 8 and 9. Salesmen and managers from all branches are expected to be present. It is understood problems arising out of the termination of the war will be discussed and an aggresive sales campaign for 1919 adopted.

The annual convention of the Western Ontario salesmen of the Imperial Oil Company will be held at the Royal Connaught Hotel in Hamilton on January 7, 8 and 9. This is the first time the salesmen have met at any point except Toronto.

The Eastern Ontario salesmen of the Imperial Oil Company will gather at the King Edward Hotel in Toronto on January 8, 9 and 10 for their annual conference.

ALL DAY SATURDAY OFF FOR EATON EMPLOYEES

In connection with the jubilee celebration on January 2, which marked the fiftieth anniversary of the founding of the T. Eaton store, the announcement was made that the 20,000 employees of the firm are to have every Saturday afternoon during the year as holidays, and during July and August all day Saturday. The T. Eaton Company started business in 1869 in a store which had a frontage of twenty-five feet. It is perhaps interesting to note in connection with the firm's policy that it sells goods for cash only, and also that it is one of the largest, if not the largest user of newspaper advertising space in America.

McCORMICK RETIRES

Cyrus H. McCormick, president of the International Harvester Company since its organization in 1902, has retired from that office to become chairman of the concern's Board of Directors. Harold F. McCormick, his brother, was elected President.

Veteran Traveller Retires at Winnipeg

After 30 years' active association with the Merrick-Anderson Co., Ltd., Winnipeg, Geo. J. McGiffin, veteran traveller, retires on February 1, 1919, and will be pensioned by the company. Mr. McGiffin has covered practically all of the prairie provinces, in the early days over the prairie trails and latterly over the steel rails of the various railroads. It is understood Mr. McGiffin holds the distinction of selling the first carload of

GEO. J. McGIFFIN
Who is Retiring After Thirty Years Continuous Service With the Merrick-Anderson Co., Ltd.

shot which ever went into Edmonton, Alta.

Mr. McGiffin may move to British Columbia, his desire being to live in a country where climatic conditions are not quite so severe. It is understood he will still retain his stock in the Merrick-Anderson Co., Winnipeg, and that his activities at the coast may be devoted to agency lines.

PRESIDENT OF STEEL CO.

C. H. McCullough, formerly vice-president and general manager of the Lackawanna Steel Company, was elected president of the company to succeed E. A. S. Clark, who has resigned to become head of the North American Steel Products Company. Moses Taylor, formerly vice-president, was elected chairman of the Board of Directors, a newly created position.

DAVIDSON SALESMEN CONVENE

The Eastern sales force of the Thomas Davidson Manufacturing Company, Limited, were in session this week at headquarters in Montreal and had a general conference regarding the work for 1919. The Winnipeg and Western representatives were unable to attend. Mr. Edward Goodwill, the manager, presided.

ALL JAPANESE BRUSHES MUST BE INSPECTED

A new law relating to the export of brushes from Japan took effect on October 1, 1918. Brushes which were manufactured prior to September 1, this year, could, however, be exported without inspection, if shipped before October 1.

The regulations are:—

Article I.—The export of brushes for business purposes is prohibited unless they have passed inspection by the authorities of the Brush Manufacturers' and Exporters' Union.

This provision does not apply to cases where the export of brushes is specially permitted by the local authorities at the port of shipment.

Article II.—Any one who ignores the foregoing provisions is liable to a fine not exceeding yen 100.

DETROIT AUTO SHOW

Many hardware men handling auto and tractor accessories will likely attend the annual automomotive show in Detroit March 1 to 8.

With the elimination of the national shows in New York and Chicago the Detroit exhibit is expected to be one of the biggest events in automotive circles this year. Plans have been adopted by the management of the Detroit Auto Dealers' Association, not only to have a showing of passenger cars, but to include trucks, tractors, lighting outfits, accessories and practically every manufactured product in the gasoline motor field.

MADE BIG SAVING BY USE OF OIL ON STREETS

A remarkable decrease in the cost of cleaning the streets at London, Ont., has been effected during the past six years owing to the fact that oiling the streets has greatly improved the surfaces of the thoroughfares and made cleaning much easier. Another important factor in lessening the cost to the ratepayers is that now one cleaning, just before the oil is put on, is made to do, where formerly the streets were clean first thing in the spring and again just before the oil was put on.

Figures compiled by City Engineer Brazier show that in 1912 street cleaning cost $14,694.81, and in 1918 approximately $5,225. Figures for the intermediate years are: 1913, $12,603.91; 1914, $12,740.35; 1915, $10,575.93; 1918, $8,970.70, and 1917, $8,082.10.

TO MANUFACTURE ANTIMONY

According to newspaper reports antimony products are likely to be made from the Canadian Antimony Co. ores, located at Lake George, York county, New Brunswick, instead of having the ore or metal shipped out of the country, as has been the case hitherto. A representative of the American interests that control the mine stated that resumption of operations next spring was likely.

Why Handle Gasoline For Nothing Asks Western Canada Dealer?

A WESTERN Canada dealer writes as follows in regard to the gasoline situation:—

The Editor, HARDWARE AND METAL.

I have read with interest your article in HARDWARE AND METAL of December 21, referring to "Standard Price on Gasoline" and as the article is likely to cause general comment among the hardware dealers I wish to express my views. As far as I am concerned I have no objection to a standard price on gasoline all over the West, or all over Canada for that matter, provided the price was high enough to make it worth while handling gasoline. In the first place, why is it that everybody seems to expect the dealer to handle gasoline at a loss? Is it because it is the most dangerous commodity (except giant powder) in the catalogue? Or is is because it makes a slave of the man who dishes it out on account of the unholy hours he has to keep in order to satisfy his customers? Or, again, is it because of the heavy concealed loss by evaporation, spilling, dripping, etc., such loss generally remaining unchecked? Of course, the general plea has been that gasoline is kept as a drawing card to sell auto accessories, but why make Peter pay for what Paul buys?

Gone For Good

Of course nails and a few more staples used to be handled nearly at cost in the old days, but you will agree with me, Mr. Editor, that the days of retailing nails or anything else at cost are gone, at least by every progressive retailer.

At the present price of wages, rent, taxes, not forgetting costly gasoline equipment, the least margin a retailer should get to handle gasoline, is 8 cents per gallon, that is, for the gasoline pump to be self supporting. And if all the retailers would insist on such a margin they could afford to sell their accessories at a reasonable price instead of serving gas at a loss and letting the accessory business go to mail order houses.

Is Well Treated

I think the motorist should think himself pretty well treated when he gets free air for his tires, free water for the radiator, and distilled water for batteries, without getting gasoline handled at a loss by the retailer on the top of it all

Of course, there will always be people who will get their mail order house tires pumped up at your station. I have some customers that get free air service at our station regularly, and nothing else, and they are the kind of people that really think that you would have to shut up shop if you lost their custom. They are however, exceptions to the rule, and will always be with us, in fact we would miss them if they left us, but that is no reason why we should handle gasoline for fun; surely it is not so pleasant to handle as all that. All that is needed to put the gasoline trade on a sound basis is a little united effort mixed with common business sense.

Let us all draw a line and say 8 cents or nothing (west of the lakes anyway).

Don't soak Jones and let Smith go scot free.

Make every line pay for itself. Do it "NOW."

—Live and let live.

How Many of These Business Rules Are You Applying in Your Store?

THE National Association of Credit Men, which now has a membership of more than 20,000, recommends the following rules for merchants for figuring costs and profits:

1. Charge interest on the net amount of your total investment at the beginning of your business year, exclusive of real estate.

2. Charge rental on real estate or buildings owned by you and used in your business at a rate equal to that which you would receive if renting or leasing it to others.

3. Charge in addition to what you pay for hired help an amount equal to what your services would be worth to others; also treat in like manner the services of any member of your family employed in the business not on the regular payroll.

4. Charge depreciation on all goods carried over on which you may have to make a less price because of change in style, damage, or any other cause.

5. Charge depreciation on buildings, tools, fixtures, or anything else suffering from age or wear and tear.

6. Charge amounts donated or subscriptions paid.

7. Charge all fixed expenses, such as taxes, insurance, water, light, fuel, etc.

8. Charge all incidental expenses, such as drayage, postage, office supplies, livery expenses of horses and wagons, telegrams and telephones, advertising, canvassing, etc.

9. Charge losses of every character, including goods stolen or sent out and not charged, allowance made customers, all debts, etc.

10. Charge collection expense.

11. Charge any other expense not enumerated above.

12. When you have ascertained what the sum of all the foregoing items amount to, prove it by your books, and you will have your total expense for the year; divide this figure by the total of your sales, and it will show you the per cent. which it has cost you to do business.

13. Take this per cent. and deduct it from the price of any article you have sold, then substract from the remainder what it cost you (invoice price and freight), and the result will show your net profit or loss on the article.

14. Go over the selling prices of the various articles you handle and see where you stand as to profits, then get busy in putting your selling figures on a profitable basis and talk it over with your competitor as well.

THE RESALE PRICE QUESTION
U.S. Federal Trade Commission Discusses Question Pointing Out That Unlimited Price Cutting is a Bane Not a Blessing

In a special report to Congress on the subject of control of resale prices, the Federal Trade Commission says in part:

"The Supreme Court has made it clear that, in the present state of the law the maintenance of a resale price by the producer is a restraint of trade and is unlawful.

"Such being the judgment of the Supreme Court, the Federal Trade Commission has enforced the law, even though it may have appeared to operate inequitably in some cases. In its enforcement of this rule, the commission has been mindful that the cutting of a recognized resale price on well established and identified articles has been at times indulged in for unfair trade purposes. When so unfairly used, price cutting is attempted to be cloaked as lawful competition and justified by the Supreme Court decisions.

"There must be a common ground whereon the rights of producer, purveyor and consumer may each be fully secured and equity done to all. The search for such a ground has been a task of the commission and results in the following conclusions:

"(1) That producers of identified goods should be protected in their intangible property right or goodwill.

"(2) That the unlimited power both to fix and to enforce and maintain a resale price may not be made lawful with safety.

"(3) That unrestrained price cutting is not in the public interest.

"Bills now pending before Congress may well be made to meet the difficulties of the situation if amended to provide for a review of the terms of resale contracts and revision of resale prices, by a disinterested agency.

"Therefore, it is recommended that it be provided by law that if the manufacturer of an article produced and sold under competitive conditions, desires to fix and maintain resale prices, he shall file with an agency designated by the Congress a description of such article, the contract of sale and the price schedule which he proposes to maintain and that the agency designated by the Congress be charged with the duty, either upon its own initiative or upon complaint of any dealer or consumer or any other party in interest, to review the terms of such contract and to revise such prices and that any date and information needful for a determination be made available to such agency."

British Government Lifts Ban on Export of Manufactured Goods

CABLE dispatches received by C. T. Milne and F. W. Field, the British Trade Commissioners at Montreal and Toronto respectively, from the Imperial Department of Overseas Trade in London, point out that since the armistice was signed many restrictions on commerce have been withdrawn, while in the case of those which remain licenses are being granted much more freely than previously. Particulars regarding these relaxations will be published weekly in the "Board of Trade Journal," the official organ of the Imperial Government for notices regarding trade.

Orders placed during the war period now have good prospects of being executed, and arrangements for new business should be made without delay.

The following relaxations in particular should be noted:

1. Permits to manufacture and priority certificates in connection therewith are no longer necessary.

2. Firms are at liberty to accept civil or commercial orders for immediate execution, thus freeing the engineering industry among others for commercial work.

3. All the principal kinds of raw materials may now be used for the commercial manufacture of goods for export, but these raw materials themselves may not be exported in certain cases without licenses. Among those to which this condition applies are the following: Aluminum, brass, iron, nickel, steel, antimony, copper, lead, spelter or zinc, tin.

In general, restrictions on the export of manufactured goods have been removed, while they have been retained in the case of raw materials.

The following list indicates the most important items, the export of which was formerly prohibited to all countries, but are now permitted to be exported to any part of the British Empire: Articles of aluminum; articles, manufactures of asbestos; belting, cotton, including belting impregnated with balata or rubber; bicycles, complete; bicycle tires and parts; boots and shoes (except children's with soles or uppers of leather); brooms; brushes (except tooth brushes); copper and manufactures of, except wire bars, plates, rods, sheets, stripe tubes; galvanized sheets (corrugated or flat); grindstones; glass for optical instruments; hand tools for agriculture; hollowware, domestic, or iron or steel plate; iron and steel rivets, nuts and screws; iron and steel wire cloth; incandescent mantles and rings; jute cordage and twine, padding and webbing, twist and piece goods; linoleum; magnesite and magnesite bricks; nails (wire; magnetos and parts; photographic materials; rubber manufactures, except surgical gloves; surgical bandages and dressings; steel sheets (black); tools (small); wagons and carts, and parts; wool and hair, manufactures of not to include raw wool or yarns.

Certain factors will continue to hamper the export trade, notably (1) shortage of labor till the army is demobilized; (2) shortage of tonnage; (3) the need for reorganization of plants in certain industries before resuming normal work, but it is considered that the effect of these factors will diminish greatly in a few months.

Oils, Iron and Steel Removed From Export Conservation List

THE United States War Board announces in a new ruling (W. T. B. R. 424) the removal of the following commodities from the export conservation list, effective at once: Steel alloys, benzine (from petroleum), celluloid, and articles manufactured therefrom, ferrosilicon. Ingots as follows. Steel. Iron and steel, as follows: Billets, blooms, ferrosilicon, ingots, pig iron, plates (all classes, ¼ inch thick and heavier and wider than 6 inches or over 6 inches in diameter), rails (over 50 pounds per yard), scrap, shapes, 3 inches or larger (plain, i.e., not punched or formed), including angles, channels, beams, trees and zees, sheet bars, slabs, Spiegeleisen (frequently described as "specular iron" and "mirror iron"), lac and all varieties thereof, lubricating oils, naptha, nickel, chemical compounds thereof. Oils as follows: Aniline, axle and other mineral oil, greases, benzine (from petroleum), cod-liver, crude, cylinder, engine, fuel, gas, gasoline, hand-lantern, kerosene, lantern, linseed, lubricating, mineral, naphtha, paraffin, petroleum, paraffin, paraffin oils, petroleum Rubber, reclaimed and scrap. Shapes, 3 inches and larger, iron and steel (plain, i.e., not punched or formed), including angles, channels, beams, tees, and zees.

Merchants Disagree With Their Executive

Organized participation in the municipal elections as suggested at the regular meeting of the Border Retail Merchants' Association, Windsor, Ont., is an active issue in the organization. When the proposal was discussed prior to nomination day, a resolution to remain aloof from the contest was heavily voted down. No definite action was taken, although a number of prominent members, feeling that merchants, contributing as they do, a large amount of taxes, were entitled to greater representation on the various civic bodies, favored running a retail merchants' slate that would assure several members on the council and each municipal board.

The matter was referred to the executive for consideration, and the latter body decided to bring forward at the next general meeting, a resolution providing for such amendment to the by-laws as would render it absolutely impossible for the organization as a body to participate in any municipal, provincial or Dominion election. This was in direct opposition to the expressed will of the general membership and the two factions, approving of contrary policies are arranging to thresh out the matter and arrive at a definite understanding. In the meantime a number of retail merchants stood and were elected to the city council and the Board of Education.

Combination Screen and Storm Doors

Rhodes, Curry Co., Ltd., Amherst, N.S.—We would like to secure the names of manufacturers of combination screen and storm doors.

These are manufactured by Sanderson, Harold Co., Ltd., Paris, Ont.; Ham & Nott Co., Ltd., Brantford, Ont.; J. H. Gignac Ltd., Quebec, Que.—Ed.

Oak Heater

Haig & Burns, Lansdowne, Ont.—Where can we secure repairs for the Peerless oak heaters?

The Peerless oak heater is manufactured by the McClary Mfg. Co., London, Ont., and repairs can be secured there or from the Toronto branch.—Ed.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

974. **Linseed cakes.**—A Liverpool firm ask to be placed in communication with exporters of linseed cakes.

976. **Asbestos fibre.**—A Newcastle firm in a position to place orders for asbestos fibre in 50- to 100-ton lots, ask for Canadian offers. They also inquire for asbestos-cell and asbestos cloth.

978. **Doors.**—A Liverpool firm wishes to hear from firms in a position to offer yellow pine doors, four longitudinal panels, planted moulds. They are in a position to place orders for 1,000 doors.

984. **Hardware.**—A Manchester firm is in a position to represent Canadian manufacturers of general hardware, also any other commodities saleable by ironmongers.

985. **Machinery.**—A Manchester firm is open to represent manufacturers of machinery, machine tools and engineers' tools.

1001. **Doors and mouldings.**—A Newcastle firm asks to be placed in communication with exporters of doors and mouldings.

THE CLERKS DEPARTMENT

A STORY BY A CRIPPLE WHO IS NOT A CRIPPLE

Minnesota Banker Who Has Made His Life a Pleasure and Success Despite Terrible Handicap as Result of Being Maimed by Frost Bite

TO many of those heroes of the war who have to face the problems of reconstruction and readjustment with serious physical handicaps, there will be found inspiration in the story of the career of Michael J. Dowling, president of the Olivia State Bank, Minnesota, as it appears in the "Annals of the American Academy of Political Science," for November, which number is devoted to the rehabilitation of the wounded. Terribly maimed as the result of a blizzard experience when a boy, Mr. Dowling, has with splendid courage fought the battles of life with a confidence and cheerfulness which should prove helpful to other unfortunates. The story, which follows, is somewhat abridged, but gives a vivid picture of one man's triumph over heavy physical odds:

I was 14 years old, almost 15, when I was lost in the blizazrd in Minnesota, December 4, 1880, and up to that time there had not been much in life—since that time there has been a great deal. As a boy and before being overtaken by the blizzard in southwestern Minnesota, I had been making my own way from the time I was 10 years old, that is since my mother died. Among other things which I did in preparation for this experiment of reconstruction was to fill the positions of cookee in a lumber camp in Wisconsin, cookee on several Mississippi steamboats plying between St. Paul and St. Louis, water carrier on the Dalrymple Wheat Farm, Cottage Grove, Minnesota, and for a time a kid cowboy on a large ranch, known as Lord White House Ranch in Wyoming, where I learned to shoot, and ride any horse that had four legs. I am willing to put up a wager that there is not a horse on the ranch that I cannot ride to-day.

The Blizzard of 1880

The blizzard I faced on December 4, 1880, caused the thermometer to register 50 degrees below, and I was out from about seven in the evening until sunrise the next morning. The sun did come up the next morning, and so did I—out of a bed in a straw-pile and on getting up and trying to get to a farmhouse, I found that I could not bend my knees and I could not open my hands. The hands were frozen clinched and were like two chunks of clay, but after awhile I limbered up a little, in order to get on my feet and make for the house. I aroused the people. It was rather early even for farmers to get up. The good lady of the house filled a tub with cold water and some other vessels with cold water, and I put both arms up to the elbows and both legs up to the knees into this cold water, and then with this thawing-out process came a splendid opportunity to display courage. It is not a very pleasant occupation, watching the frost freeze the water around your hands and legs and form an ice coating all around as the frost comes out. However, the surgical operation was not performed until several days afterwards—some 16 days—and the line of demarcation appeared very plainly just above the ankle joints and just about at the wrists of the hands. The operation was performed by the doctors present, on a kitchen table covered with oilcloth in a little family home in the village of Canby. There were three doctors performing the operation, but in spite of having more than one operating on me I still succeeded in living.

Life Made Worth the Living

Since that freezing, as I have said before, life has been worth living, and to me it has been a splendid joy—not only in courting the girls and marrying one of them and having a son and three daughters; we have lost the son, but the three daughters are still alive to grace the household. One of them is a sophomore in college, one is a junior in high school and the other is in the seventh grade. I am happy to say that when a man has his legs frozen off—and I believe it is also true when they are shot off—he does not pass on to the next generation the same condition; in fact, I am the only one in our family who has been compelled to buy artificial legs.

About enjoying life—I think I have enjoyed every moment since the time the doctors got through with me, although there were a few days when I felt really stunned. I was a very active young man, pugnacious, full of fight, and I found myself suddenly with most of the fight cut off—at least, that part which I used to fight with successfully was not in very good shape—so I transferred my thoughts from those things that were gone to what was left.

Struggles With Adversity

It occurred to me without any reconstruction campaign on the part of our State University or other place of learning, that there was just one thing for me to do if I did not have any legs or arms, and that was to polish up the machinery above the neck. So I became an omnivrous reader, and—while I may be hurting the feelings of some people somewhere—I must confess I was also a carnivorous eater. I ate heartily, read ravenously, and got as much learning as I possibly could without the aid of teachers. I went to school just as much as I possibly could under the circumstances. You must know that when I was frozen in Minnesota, I had neither mother, brother nor sister to look after me or help me. I was the only child in the family. Mother died when I was 10, and father had all he could do to take care of himself, as he was just an ordinary carpenter.

I possessed, at the end of the season of 1880, five head of young cattle and a very intelligent pony with handwriting on his hips. The pony was the last to go. The five head of cattle were sold at once, since I intended to pay my way just as far as I could. The money received from the sale of the five head of cattle, with the little money I had saved up from the season's work, went into buying the necessary medicines. The good people of the town furnished the bandages from worn pillow-slips and sheets and wearing apparel that the ladies tore into strips and wound into rolls. Therefore, you will understand that I was not very wealthy and not in a position to buy any luxuries, and with that in view I tried to go just as far as I could with the money I received from the sale of these few head of young stock; but the springtime found me compelled to sell the dearest thing I had on earth—the pony. I cried all night at the time I sold that pony, and I still think of him with tears in my eyes. He was so intelligent and I thought so much of him, but he had to go, and when he had gone the demand still came for more money. I had none—and there is just one thing that happens to a boy or anybody else when that day comes, and that is, the local community assumes the burden. In this case it was the county. The county of Yellow Medicine, Minnesota, had to step in and furnish the money necessary to have me reconstructed and rehabilitated.

An Educated Pessimist's Suggestion

The Board of County Commissioners at that time consisted of three men—we now have five. There were two old Norwegians on that board. One of them was an old sailor and the other was an old farmer. Neither one of them had very much book-learning, but both of them had hearts so big their tunics could hardly hold them. The other member and chairman of the board was a Yankee bred in the purple in Maine; he was, in Maine, before going West, at the head of a seminary, and was a man of splendid educational attainments. When the question came up, "What will we do with Mike," this gentleman of excellent intellectual attainments said that he had partially made arrangements with a farmer who had a good home and would take care of him for the rest of his life for two dollars per week. But one of the old Norwegian members of the board, Mr. Ole J. Daley, who is still alive and hearty and with whom I had the pleasure of visiting this year, said, "Well, don't let us be in a hurry about this. Mike, what do you think about it?" Well, I smiled—used all the magnetism I possessed—looked into Ole's face and said, "Mr. Daley, if you will give me one year at Carleton College it will never cost this county another cent as long as I live to keep me going." "Well, but,"

he said, "you can't back that up; that is just your say so." "Well," I said, "I mean it."

The chairman of the board thought it might be well to think it over until the next day. The next morning the vote stood two to send me to college for one year, and one to send me out on the farm at a cost of two dollars per week for the rest of my life.

A Short College Course

Well, I went to Carleton and spent the year there. I did not loaf any, I can assure you. I did not have any money to spend on midnight suppers or oyster stews, or anything of that nature, like many of the boys had. I got some second-hand clothes from somewhere—I do not know where they came from—while I was at Carleton, and I had an opportunity offered me to come East and attend a certain school here and become a theological student, but I could not do that, simply because I was asked to make a statement that I would become a minister of the gospel if I would get this particular advantage in the East, and I said that I would be glad to get the education, but I could not accept anybody's money on false pretenses.

Active in Many Vocations

I taught school after getting out of Carleton, painted fences, ran a roller-skating rink, sold books by subscription, sold maps—and, in fact, I did everything and anything that would bring in an honest dollar. This painting job was naturally hard work, but it was lots of fun teaching. I enjoyed teaching very much. I taught for seven years—three years in the country, when I was promoted to a graded school, and the last three years I was superintendent of a high school, the first high school in Renville County, and that is the county in which I now live. I also started a paper, ran a weekly paper a number of years while teaching school, and did a number of other things. Besides running a paper and teaching school, among other things I did was to get into politics. I stirred up one of the large financial institutions of our State to such an extent that it became one of the greatest failures in the history of the Northwest. I made charges against it through the columns of my small country paper, verified same by examining their books at their own request, and then published the verification. That got me into politics. I was made assistant to the chief clerk of the House of Representatives the first session, and the next time I was chief clerk of the House of Representatives, and liking the work so well and thinking that I ought to have the vote next time, I became a candidate for member of the House, and was elected by a comfortable majority. I was also elected Speaker of the House, it being the first time that a new member had occupied that position, and also against the wishes of the combinations that usually controlled.

I get a great deal of pleasure out of life—in one way, by driving an automobile. My family for years have toured the country in our own car and I have been the driver.

Quality of Will and Mind Counts Most

I believe if I say nothing else in this article than that education is made too easy in most cases for boys and girls, I will have said a great deal. The teacher takes on all the work and makes a nervous wreck of herself, rather than put obstacles in the way of boys and girls in order to develop that boy and girl. Most boys and girls go to school much earlier than they should. My girls did not go to school until they were eight years of age, and the oldest one became the valedictorian of her class in high school and finished a year ahead of those who had started much earlier than she had.

Now, for a suggestion in this work—if you do not watch out you are going to do so many things for the crippled soldier that when he gets back home he will not feel the need of exercising his own muscles or his own faculties. You must put him in a position where he has to do the work. I know it is good for a man in that condition, because I have gone through the mill. There was no one to help me in any way, shape or form; and while I have said that a man is worth $100,000 a year—if he can make it honestly—above his neck, and, perhaps may not be worth over $1.50 per week below, I have not been able to earn that much money in one year, I must confess, but I am looking forward to reaching that point before I pass on; and in the meantime when anybody tells you that because a man loses a leg or two of them or an arm or both of them he is a cripple, just refer him to me and I will take care of him. The finest looking men in the world may have more cause to regret things that they have done and they may not enjoy life as much as the man who is despised as a cripple, because he has lost a leg or an arm. There is no such thing as a cripple, if the mind is right.

Points Out Dangers Of Misrepresentation

In retail advertising, declares a bulletin issued by the National Vigilance Committee of the Associated Advertising Clubs of the World, great harm has been done by the loose use of the word "value."

Inasmuch as nearly all of the states now have truth-in-advertising laws and in further consideration of the fact that courts have held that value is not a mere matter of opinion, but is a statement of fact, a Pacific Coast carpet sweeper case which the vigilance committee recently investigated will be of especial interest.

Would Be Harmful

The advertiser, a department store, announced that the sweeper which it declared was of "3.50 value," was on special sale at 98 cents. It did not profess that it was discontinuing the line, or that the goods were damaged. In the absence of any stated reason for such a cut in price, the local vigilance committee concluded that most people would not believe such a statement and that, therefore, the advertisement would be hurtful, even if true, and the committee doubted very much that it was true.

Investigation showed that it was not a $3.50 value, although an excellent value at 98 cents, which was below cost, apparently. However, the committee had in mind a Federal court ruling that an untruthful statement constituted a law violation even though the purchaser did get good value for his money, and the advertiser was warned against a repetition of the error.

For "Special" Sales

Carrying the investigation further, the National Vigilance Committee learned that the sweeper advertised is made for use of stores, and especially department stores for "special sale" purposes, and the matter has been called to the attention of local advertising club committees in other communities, who are also on the lookout for law violations in connection with it.

There is no objection on the part of the vigilance committee to the practice of buying articles for special sale purposes, of course, so long as the store tells the truth about the merchandise, but stores are warned and, when necessary, their owners are prosecuted for untruthful statements about values.

For Better Business

The members of the retail department of the Associated Advertising Clubs have adopted a standard practice in relation to such statements which is interesting because the members of the department framed this declaration both with the thought that adherence to it would avoid possible law violations and would, at the same time, result in advertising of a confidence-building, as against a confidence-destroying type.

These retailers have pledged themselves not to compare and adcertised price with a "former" or "usual" value unless they refer to the price obtained in their own store during the current season for identical goods, and many of them go a step further and do not use a statement concerning a former value unless there was a sufficient quantity sold at that value to establish the price very definitely.

Never Use Them

It is largely because of the danger of over-statement in such advertising that a number of important stores in the United States have entirely stopped using comparative prices, never stating what the former value or former price of an article was. They announce that the value is special, and they usually call attention to the reason—that the goods are slightly soiled, the line is to be discontinued, it is near the end of the season, or some other reason that will make the customer understand why special values might be expected.

They have found that such advertisements pull more business for each dollar invested than the old type of comparative price advertising, which made so many people doubt the word of the advertiser.

RESTRICTIONS ON GLOVES LIFTED

A cable from London, England, states that the British import restriction on leather gloves has been removed, and that they may now be imported without permit or license.

INVENTORY TIME IS HERE

Continued from page 52

be very gradual. This is a matter for important consideration in checking up the needs for restocking which the inventory will show. There has not been in a long time so many price changes as were made during 1918. Now that conditions are rapidly becoming more settled it seems reasonable to expect that with the exception of some articles of food, prices will go no higher. This may perhaps be a guide to hardware dealers in going forward and pricing merchandise according to the markets of the day. Some dealers have been wondering if they ought to discount values in this year's inventory. From the present market outlook there is nothing to indicate that this is advisable. With stocks in their present depleted condition the average inventory this year is likely to indicate the need for restocking many lines promptly if the needs of the trade are to be met, rather than to emphasize the need for special January clearance sales to clean up overstock. However, many inventories will show certain items, especially in the shape of seasonable goods, which should be moved as rapidly as possible. In some parts of the Dominion the unusually mild weather so far has retarded sales of lines which usually moved before this and a factor such as this requires prompt judgment on the part of the dealer regarding the disposal of the goods.

Get After Profits

There is going to be big money in some lines in 1919, that is, much bigger profits and more rapid turnover than in these same lines for four years. For instance, building has been at a standstill and all kinds of necessary repair work and painting has been held up. Items such as this should be checked up very carefully in connection with your inventory. There is every indication that the farmers will be bigger buyers than ever this year, especially of all goods that will help either to save or lighten labor. Manufacturers of automobiles and electrical goods are expecting a splendid business, and in stocktaking and post inventory calculations it will do no harm to keep this in mind. There is also the factor to consider that within the next twelve months more than 300,000 men who have been away from Canada for from two to four years will have returned. These men are going to be well provided for as far as money goes, and they will constitute a big buying power. A lot of them have become accustomed to out-of-door life and most of them have learned more or less about shooting. This would suggest that a lot of these men are going to be interested in sporting goods, guns and other lines more than they ever were before.

An Important Point

Stocktaking should include the selling force. It will nearly always pay a hardware merchant to devote a little time to sizing up his help with a view of developing their possibilities. In January a merchant generally has more leisure than at any other time in the year for this. A little consideration and comparison may show that Jones' weakness is that he does not know the goods. Brown may lack enthusiasm, while Smith perhaps could improve his methods of approaching customers. Without any scolding, nagging or fault-finding, a merchant can usually in a friendly, sympathetic and considerate way show each of these youths where he is lacking and what he should and can do to make himself a more valuable member of the organization.

Don't Forget This

Collections are always a vital part of business, and with conditions as they are just now it is worth while not only taking stock of your credits and accounts but taking stock of them most carefully. In the past, too many merchants have been timid about demanding what is rightfully their due, the prompt and regular settlement of accounts. As far as hardware men and grocers are concerned, the past twelve months has seen a considerable change in this state of affairs. The man who can't pay and won't pay cannot stop dealing with you too soon. The man who can pay and won't should be made to pay. Merchants face to face with conditions as they have been for the past four years have realized this as never before. That is why the commencement of 1919 seems more firms all over Canada either on a cash basis or as near a cash basis as possible than ever before. All your outstanding accounts should be taken in hand, and if you get after them and keep after them systematically you will have a lot more money with which to carry on than you would have otherwise.

Put it to Work

Your inventory may show you a lot of things. If it reveals that you have any dead stock, bring it to life and get it moving. If it shows that you have a lot of "dead" accounts, there is only one thing to do—get busy and apply the remedy. The longer you carry "dead" accounts the worse they get, and the longer you keep dead stock on your shelves the more it will cost you to bury it or get rid of it. Remember you have to pay rent, or insurance, or taxes, or other expenses on the dead stock just as much as on the goods which are turning over, and if you are not making money on them it would be better to get rid of them and stock lines which will show a profit.

ZINC PRODUCTION INCREASING RAPIDLY IN AUSTRALIA

Rapid and important development of new industries in connection with zinc production in Australia have been made by the Electrolytic Zinc Company of Australasia.

As the result of hydro-electric power being made available in Tasmania, the company started constructional and investigational work near Hobart, in January, 1917.

STANDARDIZATION OF STOVES

Continued from page 57

tail dealers, and result in larger profits good practice for manufacturers and refor all, and better jobs for the workmen.

"It would seem almost a crime, at least, show bad judgment in business conduct for stove manufacturers to go back to the former unwise and wasteful methods and attempt to again make the endless variety that was heretofore in vogue.

"This question was thoroughly discussed in the conference of War Service Committees and received the unanimous approval of the congress, pertaining not only to stoves and ranges but to all industries.

"Wire-fence makers reduced their production from over 1,000 styles to 54 styles, making a saving of over $1,000,000 a year.

A Big Reduction

"Safe and vault makers from 1,200 styles to 54 styles.

"The paint manufacturers have reduced the number of shades or colors from 200 to 32.

"The rubber manufacturers agreed to reduce their styles from over 180 to 9.

"The farm truck manufacturers had over 500 different styles of trucks or wagons, and have reduced them to less than 20.

"A copy of the original conservation regulations is herewith enclosed, and your particular attention is directed to the advantage of permanently discontinuing the manufacture of stoves and ranges with 9-inch covers, and hereafter using only 8-inch covers, except where the body of the stove is too small to permit the use of such size.

9-Inch Covers

"The abolition of 9-inch covers could quickly be brought about by ceasing to offer them for sale and by not listing them in catalogues. This course is earnestly recommended to all stove makers as of interest to the entire industry.

"Back-guards and tea shelves in high closets being wholly ornamental but serving no real purpose, may be used at the option of the manufacturer."

The members are asked to signify their approval or disapproval of the above in five days and replies already received indicate, it is stated, that a great many firms will continue standardizing.

COPPER PRICES FIXED

The Copper Export Association of the United States has fixed export prices at 23c a pound, and this it is believed will have a material effect in facilitating large orders which are expected from Europe. With the price at the former figure of 26c there was a tendency for buyers to hold off. The price reduction will have an effect in reducing prices paid to miners and the producers may have had this in mind recently when they refused requests for increases in wages.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A SUBSTANTIAL lowering of values on rope is the outstanding feature in the markets this week. As noted last week, hemp, which is the real basis, has been sagging materially the past few weeks. Whereas most manufacturers have been working on high-priced raw materials, when the decline started it was carried to its limit, with the result that pure manila has come down 8½c per pound; British manila 7c per pound; New Zealand hemp 7c per pound. Sisal rope remains unchanged at decline of 2c per pound recorded a couple of weeks ago. Lath yarn is also held steadily, while tarred hemp records declines of 3c per pound. The decline on manila ropes and New Zealand hemp follow on the heels of a 2c drop a couple of weeks ago.

Reports received from primary markets reveal a very strong market in turpentine and rosin. Southern interests report that in spite of the fact that munition industries are no longer big users of rosin, there is in sight a sufficient number of orders from South America alone to take care of available supply. It is expected that the price on turpentine will soar at least 10c higher than its present level, and with shipping facilities improving all the time, a heavy export movement is almost sure to develop. Already some 10,000 barrels of rosin have been loaded, and another 7,000 is loading, according to latest reports.

Some markets report a decline in plates and black sheets this week, and a similar movement in galvanized sheets is looked for. These declines follow on the heels of a similar movement already instituted at other points.

In line with predictions recently made, the improvement in supplies of boiler tubes which is now manifest has resulted in a decline in price amounting to 10 per cent. The new basis of net prices has not yet been worked out, quotations for the present being made at previous figures, less 10 per cent.

Manufacturers' packages, such as confectionery, jam, lard and pickle pails, have been advanced 5 per cent. Whether this is the forerunner of a similar move in other woodenware lines is a question, but washboards, clothes pins and wash tubs are firmer as a result.

Ingot metals are somewhat weaker again, tin dropping 5c per pound in some quarters, and a similar movement being reported in copper, with lead and antimony very weak. Solder has come down from 2c to 4c per pound.

MONTREAL MARKETS

MONTREAL, Jan. 2.—The most important change of the week is that of a big decline for rope. This applies to manila and hemp both, and the reduction on the former being 10½c and the latter 9c within the past three weeks. This is the result of much competitive activity among United States makers, along with a substantial sag in hemp values. Oilcloth binding is higher, and extension ladders are revised in price. The ingot markets are very unsteady, and lead and copper are weakening particularly. Steel black sheeets are quoted lower, and galvanized are tending to lower price levels.

The makers of axes are advising the trade that prices will continue to be firm and that there is no indication of declines being effected. The same applies to various lines of pocket and table cutlery. A few lines of auto accessories are up. Some further change is being made in the list of sandpaper, and this, some say, will mean a slight reduction of price. Trade is quiet.

Tool Cabinets Higher; Reamers, Hydrometers

Montreal.

TOOL CABINETS, REAMERS.—Stock cabinet No. 205 for auto tools is higher. The previous price was $31.50, and the new is $37.13.

Three-in-One aligning reamers are up also. The old price of $16.88 is changed to $31.50.

Breaknot hydrometers are quoted down a trifle. The price of 98c each in single lots is replaced with one of 94c and in dozen lots the price is 88c each.

Re-babbitting Jigs Up; Ignition, Books, Too

Montreal.

JIGS, IGNITION.—Re-babbitting jigs for Ford cars are higher. This applies to the line used for Ford connecting rod bearings and the old price of $2.93 is superseded by one of $3.15.

Dyke's encyclopaedia, which sold previously at $3.40, is now selling at $3.

Vibratorless ignition for Ford cars is quoted now at $31.50 for numbers 32044 and 32045. The previous price was $27.38.

Oilcloth Binding Up; Ladders Revised

Montreal.

BINDING, EXTENSION LADDERS.—An advance is made in the price of oilcloth binding. The zinc line is selling at $1.10 for 4x4; $1.65 for 6x4, and $2.20 for 8x4. For the comparative sizes in the brass binding prices are re-

spectively $2.50, $3.75 and $5. This represents an advance of about 5 per cent

Extension ladders are revised by one jobber. Twenty foot are quoted at $5.25; 24 feet, $6.50; 28 feet, $7.50; 30 feet, $8; and 36 feet, $10.50.

Pure Manila Rope and Other Grades Down

Montreal.

ROPE AND CORDAGE.—A very marked decline has been effected in the basis for rope. This applies to all grades of manila. Pure manila base is now 28½c per pound and British manila 24c. A curious fact is that British manila is based at 24c, while sisal is 25½c.

The explanation given for so heavy a slump in prices is that makers on the United States side have been after the business and in their desire to get it have cut very considerably, only to invite further reductions from others. The decline in hemp has also been very substantial and is a factor in new quotations. Locally, some of the makers state that they will not be surprised to see a reaction the other way.

Wares Quiet; Stoves Steady

Montreal.

STOVES AND WARES.—While this is the season of inactivity for actual movement of wares, the outlook is promising. There will be more available material for making up spring requirements and the makers are now preparing for the coming season.

Stoves and ranges are steady and unchanged, and the outlook is for a continued firm basis.

Oil Sales on Same Basis; Also Gasoline

Montreal.

COAL OIL, GASOLINE.—The basis is unchanged and a fair amount of gasoline is still selling. Price for motor grade holds at 34c per gallon. Coal oil is moving freely in the country and the basis of 19c for Royalite and of 22c per gallon for Electroline and Palacine still obtains.

Nails Are Held; Basis Quite Firm

Montreal.

NAILS AND WIRE.—The wire nail market is still holding steady and the basis is quite firm. Supplies are adequate for the time being, for there is not much movement. Basis for wire is held at $5.50 per keg and that for cut, $5.85. Smooth steel wire is rather slow and the base for this is still the same, $6.25 per 100 pounds.

Pipe Prices Hold; Boiler Tube Prices

Montreal.

PIPE, BOILER TUBES.—There has been some delay in getting certain sizes of pipe when wanted, jobbers report, but this condition has improved much. The market is steady and unchanged.

Boiler tubes are being quoted on the following basis here: Lapweld, 1¾-inch, 36c per foot; 2-inch, 36c; 2¼-inch, 40c; 2½-inch, 45c; 3-inch, 50c; 3½-inch, 60c; and 4-inch, 75c.

BRIEFS FROM THE WEEK'S MARKETS

Lubricating oils were revised this week, some up 1c, others down slightly.

* * * *

One often hears the expression "lowering the rope." That is what happened to the prices this week.

* * * *

Oil cloth binding went up somewhat this week.

* * * *

Boiler plate came down this week; black sheets are also lower. Galvanized sheets are to come down. This is the verdict in Montreal this week.

* * * *

Solder underwent another revision downward this week. Prices are 2c to 4c per pound easier.

* * * *

Tin dropped another 5c per pound to 70c in Toronto.

* * * *

Lead pipe and lead waste are weak and may sag another 1c per pound.

* * * *

Orders are being booked for loaded shells at firm prices up to July shipment. Metallics are being booked for Spring delivery.

* * * *

Boiler tubes came down 10 per cent. this week. The improvement in the supply is mainly responsible, two cars reaching the city this week with the promise of more.

* * * *

Rope furnished the sensation for the first issue of the new year. Pure manila came down 8¼c to 23¼c ha[illegible] pound; British manila and New Zealand hemp are down 7c to 24c; sisal is unchanged at 25½c; lath yarn is unchanged at 25½c; tarred hemp is down 3c all around.

Boiler Plates $7.50; Black Sheets Down

Montreal.

PLATES AND SHEETS. — Boiler plates are again available and the basis is now $7.50. Lower prices also are available for black sheets and the range will be found below. A revision downward may be expected for galvanized sheets, and the market is ruling with a much easier undertone. Business is fair, but on the quiet side.

	Per 100 lbs.
BLACK SHEETS—	
Boiler plates, ¼	$7 50
3-16	8 00

18 gauge	10 95
16 gauge	10 85

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Routine Business in Iron and Steel

Montreal

IRON AND STEEL.—That there will be a steady and held basis on these lines some incline to believe. Supplies have been none too plentiful, but as the season advances it is probable that the available quantities will be larger. The markets are unchanged.

Common bar iron, per 100 lbs.	$4 56
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 18
Spring steel	6 50
Single reeled machinery steel	6 50
Sleigh shoe steel	5 05
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Very Easy Tone in Lead Products

Montreal.

LEAD PRODUCTS.—Changes may be looked for on lead products in the immediate future. This will naturally follow the position attained by pig lead, and whether the bottom has been reached for this product as yet is not clear. There are no changes for the week, but there will probably be a new list within a few days.

Lead pipe, lb.	$0 14 - $0 15
Lead pipe (cut lengths)	0 15
Lead waste pipe, lb.	0 15 0 16
Lead traps and bends	Net list.
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12¾
Lead sheets, 4 to 8 lbs., s. ft.	0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.	
Solder, guaranteed, lb.	0 47
Solder, strictly, lb.	0 40
Solder, commercial, lb.	0 36¾
Solder, wiping, lb.	0 36¾
Solder wire (8 gauge)—	
40-60	0 48
45-55	0 62
50-50	0 58
Zinc sheets, casks	
Do., broken lots	

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Big Buyers Hesitate On Old Material

Montreal.

OLD MATERIAL.—The buyers of old material report that big users are not anxious to buy and that they will not make offers. This means that the busi-

ness is quite at a standstill and that little encouragement can be held out for those wanting to sell. Prices hold as herewith and it is expected that the market will be quiet for some time.

Dealers' Buying Prices:

Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 13
Red brass		0 21½
Light brass		0 08
Scrap zinc		0 06¼

Wrought iron, No. 1, per gr. ton	22 00	23 00
No. 1 machinery cast	35 00	36 00
Heavy melting steel	22 00	23 00
Pipe scrap	18 00	20 00
Stove plate, per ton	23 00	24 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 08	0 08½
Overshoes, lumbermen's rubber boots		0 06
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Copper, Lead Low; Spelter Weaker

Montreal.

INGOT METALS.—The ingot market continues to sag and copper and lead are the two lines receiving most attention because of their weakness. Prices are on somewhat of a nominal basis for most lines.

COPPER. — Trading in the United States has been conducted for the past week on a pretty free basis, and this has had the effect of weakening the markets here. Little is being done and prices are easy at from 25c to 29c per pound, according to grade.

TIN.—No new feature has developed, but there is a less fixed basis than for some time. Sellers are willing to make concessions, if there is any considerable business to be had. Prices range from 77-78c per pound.

SPELTER.—There is likely to be a reduced basis on this metal in the immediate future following the lower basis in the States. As yet quotations are made at 9½c to 10c per pound.

LEAD.—The market has gone down very considerably at primary points and weakness has developed here, but there is no change. There is likely to be a new price arrangement immediately. Local basis 9-9½c per pound.

ANTIMONY.—No new features and what limited business there is has been transacted at 11-12c per pound.

ALUMINUM.—Very quiet and uninteresting. Price unchanged at 43-45c per pound.

TORONTO MARKETS

TORONTO, January 2.—A sharp decline in prices on pure manila, British manila and New Zealand hemp rope occurred this week, and hemp values are also considerably lower. Tin has come down another 5c per pound in some quarters, while other ingot metals are quite steady. A lower basis for lead pipe and lead waste pipe would not come as any great surprise. Manufacturers' packages, such as confectionery, jam, lard and pickle pails, have advanced 5 per cent., and this may mean a similar move in washboards and clothes pins. Solder has again sagged slightly, and boiler tubes are 10 per cent. lower.

Sharp Declines Made in Rope

Toronto.

CORDAGE, TWINE. — In line with predictions made in HARDWARE AND METAL last week, the market on rope has sagged substantially as appplied to the better grades. Pure manila is quoted at a basis of 28½c per pound, which is a decline of 8½c per pound; British manila and New Zealand hemp have declined 7c per pound to a base price of 24c. Sisal rope is unchanged at decline of 2c put into effect a couple of weeks ago and to-day's base price is 25½c per pound. Lath yarn is unchanged while hemp records a drop of 3c per pound.

In covering the situation last week HARDWARE AND METAL stated: "From advices now at hand it seems quite within the realm of probability that further declines may be recorded about the first of the new year.

The main factor as far as rope is concerned is hemp. Supplies have been coming along very freely the last few weeks and prices have steadily gone to lower levels. Most manufacturers have been working on stocks which cost them very much higher figures than those now in effect and it was with a desire to equalize costs somewhat that lower prices were named last week.

However, there is always an element to be considered at this time which may crop up and work out in a substantial lowering of values. That is the possibility that some manufacturers may have disposed of their entire holdings bought at high levels and are entering the market on to-day's levels. Will an effort be exerted to bring about a gradual readjustment to the basis which the present hemp market would work out at or will the decline be recorded in one big drop? Indications seem to be that a pretty substantial decline is under consideration in rope values."

The situation in binder twine is dependent to a large extent on sisal fibre and prices on this are holding steadily and at the present time there seems to be no talk of lower levels than those named recently. This is shown also in the situation on sisal rope also which has undergone no revision from declines recently recorded.

Stoves Hold Steadily; Wares Too

Toronto.

STOVES, WARES.—The market on stoves shows no material change. The undertone is firm and indications are that a well maintained basis will be in effect during the next few weeks. A new schedule of costs now being completed may result in a slight readjustment to higher levels, but this will not be a big factor. Buying just now is light and little activity is expected until merchants have pretty well completed stock-taking. The outlook is considered excellent and manufacturers are preparing to take care of heavy business.

The situation in regard to wares shows no special feature. Booking business for spring has been good and whereas little movement is in progress now, manufacturers are busy making up stocks for 1919. All lines are ruling steadily.

Wooden Pails Up 5 Per Cent.

Toronto.

WOODEN PAILS. — Manufacturers' packages, such as confectionery, jam, lard and pickle pails have undergone revision upward this week, the advance amounting to 5 per cent., immediately effective. Whether this may have a bearing on prices of wash boards, clothes pins and kindred lines is a little uncertain, but the firming effect on these lines cannot be overlooked.

Nail Basis Holds Unchanged

Toronto.

NAILS. — In spite of the fact that many basic items in iron and steel have undergone slight revision downward, it is significant perhaps that wire rods have not been touched as yet and no immediate indication that a change is contemplated is in evidence. Wire nails are holding steadily at a base price of $5.50 per 100 pounds and cut nails are quoted at $5.85 per 100 pounds base.

No new developments are reported in smooth steel wire, little movement being in progress and price holding without change. The base is $6.25 per 100 pounds.

Oils and Gasoline Record No Change

Toronto.

OILS, GASOLINE.—No record of any change in the situation oils is noted this week. Lubricating oil is very firm and it seems possible that some motor grades will show an upward movement. Coal oil is steady, prices ranging from 18½c to 21½c per gallon with a very heavy demand in evidence.

Gasoline sales have been heavy and there has been by no means the falling off in sales which used to be in evidence during the winter season. Price has been steadily maintained at 33c per gallon

Iron and Steel Bars Are Quiet

Toronto.

IRON AND STEEL.—Iron and steel bars are quiet and little movement is expected in these till stock-taking has been completed and the demand opens up again. Indications are that supplies may improve with the new year and a greatly increased business is looked for during 1919. Range of quotations follows:

TORONTO—	Per 100 lbs.	
Common bar iron	$4 85	$5 25
Common bar steel	5 00	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50
Tire steel	....	5 75
Mild steel	....	5 50
Norway iron	11 00	13 00
Toe caulk steel	....	6 25
Sleigh shoe steel	....	5 50
Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Steady Market in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—A steadily maintained market is the situation as it exists in corrugated sheets. The demand is quiet just now, but it is expected business will open up nicely for spring and manufacturers are making preparations to take care of an increased volume of orders.

Eavetrough and conductor pipe are firm at declines recorded last week. Other manufactured lines are not being changed at once and there is no indication of an immediate recession in values here.

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Supplies Sheets Show Improvement

Toronto.

SHEETS, PLATES. — Much better supplies are in sight on both black and galvanized sheets and the trade, jobber, manufacturer and retailer are pleased with the prospect of better conditions in this respect. Tonnage already rolling and promised during the next few weeks will place the trade in a very satisfactory position. Prices have held firm and unchanged during the week and little variation from present basis is looked for for some little time. Quotations are given as follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$8 50
12 gauge	$6 85	7 35	8 35
14 gauge	6 90	7 20	7 90
16 gauge	7 00	7 25	8 00
18-20 gauge		7 30	7 80
22-24 gauge		7 35	7 85
26 gauge		7 40	7 90
28 gauge		7 50	8 00
3/16-inch plate			7 40
¼-inch boiler plate			7 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$9 30	$9 75
U.S. 28	9 00	9 25
U.S. 26	8 70	8 95
22 and 24	8 55	8 80
18 and 20	8 40	8 65
16	8 25	8 50
12 and 14 gauge	8 15	8 40

Boiler Tubes Down 10 Per Cent.

Toronto.

BOILER TUBES.—Lower prices have been named on boiler tubes. This amounts to 10 per cent. and is in line with predictions made in these columns during the past two or three weeks. Supplies show material improvement, two cars arriving this week with indications that ample stocks will be available for the future. New net prices have not been figured out as yet, quotations for the present being at list herewith, less 10 per cent.

Boiler Tubes— Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$.....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Prices shown subject to a discount of 10%.

Solder Reaches Lower Levels

Toronto.

LEAD AND ZINC PRODUCTS.—The feature in this market this week is a further recession in values on solder. Prices have declined from 2c to 4c per pound, guaranteed now ranging from 40c to 45c per pound; strictly from 38c to 43c; commercial from 33c to 39c; wiping from 31½c to 45c and wire from 47½c to 54c.

Lead products have recorded no change this week, but a revision to lower levels would not come as any surprise in view of the weakness of pig lead. That lead pipe and waste pipe will come down another 1c per pound at least seems an early probability. Quotations this week range as follows:

Lead pipe, lb.		$0 14
Lead waste pipe, lb.		0 15
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sqr. ft., in rolls, lb.		0 12½
Cut sheets, ½ to ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	0 40	0 45
Solder, strictly, lb.	0 38	0 43
Solder, commercial, lb.	0 33	0 39
Solder, wiping, lb.	0 31½	0 45
Solder wire, lb.	0 47½	0 54
Zinc sheets, lb.		0 26

Stagnant Conditions in Old Materials

Toronto.

OLD MATERIALS. — There is absolutely nothing new to report in old materials. The market is stagnant, no buying or selling interest being apparent and quotations shown below can only be termed nominal.

Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13
Red brass	....	0 21
Light brass	....	0 09½
Heavy zinc	0 05½	0 06
Heavy copper	0 22	0 23

Old cast iron, per ton	....	30 00
Overshoes, trimmed Arctics	....	0 06½
Auto tires	0 04½	....
Bicycle tires	0 03½	....

	Per gross ton.	
No. 1 railroad wrought	26 00	27 00
No. 2 railroad wrought	15 00	16 00
Pipes and flues	....	12 00
No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Steady Market Shown in Brooms

Toronto.

BROOMS.—A fairly steady market seems to me the outlook in brooms. Broom manufacturers generally express the opinion that there will be no further advances and there seems to be some prospect of a little easier feeling. Supplies, in view of the demand, are considered fairly ample and outlook for 1919 is considered quite satisfactory.

Tin Sags a Little; Markets Quiet

Toronto.

INGOT METALS.—There is comparatively little interest in the metal markets these days. Tin shows an easier tendency in some quarters, resulting in a decline of 5c per pound. The other metals on the list are held without change and trading is confined to fairly narrow channels.

TIN.—One source reports a decline of 5c per pound this week, bringing quotations down to 70c per pound. The prices range as high as 80c, though there is limited trading noticeable, the declines generally failing to stimulate any material buying interest.

COPPER.—The market locally holds around 30c per pound, but as lower prices have been mooted at United States points, this condition may be reflected here. A basis from 2 to 3c below present one may be established early in the year.

SPELTER.—Supplies locally are none too plentiful, but no one seems to be suffering through lack of the metal to work with. The price has held steadily at around 9½c to 10c per pound.

LEAD.—This metal shows considerable weakness though no further change in price has been recorded, 8¼c to 9c per pound being the range generally in effect. Heavy supplies are available and this may be the big factor to bring about lower prices.

ALUMINUM. — There has been no change recorded locally in this metal. Lower prices are reported in some markets and this may be reflected here. Commercial interests hope to be in a better position as regards supplies and a price lower than 50c per pound, that now nominally held, would be welcomed.

ANTIMONY.—No new developments are recorded and the situation remains one that is dull and uninteresting. Price holds around 10c per pound wth little trading being reported.

LONDON MARKETS

LONDON, Ont., Jan. 2.—The most important change for the week is undoubtedly that affecting rope, pure manila, British manila and New Zealand hemp declining substantially, the former 8½c, and the two latter 7c per pound. Lower-priced hemp is responsible.

Good sales are reported on horseshoe calks, logging chains and splitting wedges. Activity also is noted in skates, skate straps and hockey sticks, with the market reported very firm. Stock-taking is in full swing and little heavy movement of goods is expected for a couple of weeks.

Rope Prices To Lower Levels

London, Ont.

CORDAGE.—Undoubtedly the most important item in the list this week is that of rope. Very substantial declines have been recorded, pure manila dropping 8½c, British manila 7c, and New Zealand hemp 7c per pound. This is in line with information given out last week in HARDWARE AND METAL, when the situation as related to hemp was outlined, and how this might be expected to affect prices. The new range of quotations is as follows: Pure manila, 28½c per pound base; British manila, 24c; New Zealand hemp, 24c; sisal, 25½c; sisal lath yarn, 25½c per pound base. It will be noted that sisal rope and lath yarn have shown no further change from 2c decline recorded a couple of weeks ago. Tarred hemp has declined 3c per pound.

Skates Active; Straps, Sticks, Too

London, Ont.

SKATES, STRAPS, STICKS.—There has been a good sale of skates and dealers report the activity extending right into the new year. The market remains firm, with the Starr line being quoted at a discount of 30 per cent. from list.

Skate straps are also enjoying a very good sale and indications are that jobbers' stocks are getting pretty well cleaned up. Quotations have held firm and unchanged at following levels: Split leather, tan, 21-inch, $1.10 doz. pr.; solid leather, black, 21-inch, $1.85 doz. pr.; canvas or web, 22-inch, $1.60 doz. pr.; 27-inch, $1.75; 30-inch, $2.00; 36-inch, $2.25.

Sales of hockey sticks have been fair and no change in quotations to the trade is reported. The range of prices is repeated herewith: Boys', red, $1.25 dozen; boys', white, $1.25; men's, rock elm, $3.20; Spalding, $5.75; Rex, $7.25.

Skate screws start off the new year without any change being made in prices, lists and discounts ranging as follows: O.H. or R.H., ⅜-inch x 6, list 78c gross; ⅝-inch x 6, list, 82c; less 67½ per cent.

Horse Shoe Calks Selling; Creepers

London, Ont.

HORSE SHOE CALKS, CREEPERS. The coming of snow has stimulated sales of horse shoe calks materially and activity is the keynote in this line just now. Prices have held at firm levels, which are shown as follows for the Neverslip line: List per 100: 5-16-inch, $2.60; ⅜-inch, $2.60; 7-16-inch, $2.80; ½-inch, $2.80; ⅝-inch, $3.00; 9-16-inch, $3.00. All subject to a discount of 15 per cent.

Ice creepers for men or ladies are also in demand, the featherweight being quoted at $3.00 dozen pairs, an unchanged figure.

Activity in Log Chains, Split Wedges

London, Ont.

LOG CHAINS, SPLITTING WEDGES —Indications are that a very satisfactory season in logging chains has been experienced, and sales of these are still being made in very satisfactory numbers. Prices have been steadily maintained, the electric weld holding at following figures: 5-16 x 12 ft., 16 ft., 18 ft., $15.00 per 100 lbs.; ⅜ x 12 ft., 14 ft., 16 ft., 18 ft., $13.75; 7-16 x 12 ft., 14 ft., 16 ft., 18 ft., $13.50

Kindred lines, which are moving well, are splitting wedges and prices on these are steadily held at the following levels: Common pattern, assorted weights, 13½c per lb.; Truckee pattern, assorted weights, 14½c per lb.

Ash Sifters Move; Weather Strip

London, Ont.

ASH SIFTERS, WEATHER STRIP. —A splendid volume of business has been done all fall and winter on ash sifters and this is extending into the new year. Prices have been steadily held at unchanged figures, the Daisy selling at $15.00 per dozen; the Banner at $3.45 each, and Rocker No. 1 at $5.50 each.

Stocks of weather strip have been pretty well cleaned up in jobbers' hands and movement to the trade is still fairly good. Prices range as follows: Swan, hardwood, 75c set; wood and felt, 60 per cent. off list; Frost King, $4.40 dozen packages.

New Sandpaper List; Wash Machines

London, Ont.

SAND PAPER, WASH MACHINES

Racey, in "Montreal Star"

DROPPING THE PILOT

—It is understood that a new list and discount is being prepared on sand paper. This has not come to hand as yet. The trade do not expect any material change in price; it is said the new list will be easier to figure.

Christmas business on washing machines and clothes wringers has been good. The outlook for 1919 is considered excellent, manufacturers hoping that the shortage of supplies so manifest the past year or so will show betterment and that they will be able to enlarge their selling program. The discount on washing machines of 30 and 10 per cent. and on clothes wringers of 30 and 5 per cent. is unchanged.

White Lead Weak; Putty, Glass Quiet

London, Ont.

WHITE LEAD, PUTTY, GLASS.—The undertone to the market on white lead is somewhat weak in view of the declines in pig lead and linseed oil. The bigger factor is pig lead and there are indications that even lower levels will be reached on it. No change is yet apparent in the price of white lead in oil, however, pure in ton lots being quoted at $17.80 per 100 pounds, and less than tons at $18.15.

Putty is moving forward but slowly. The market seems steady with quotations very well maintained at following levels: Standard, 100 lb. drums, $6.75 per 100 lbs.; standard, 25 lb. drums, $7.00; pure, 100 lb. drums, $8.75; pure, 25 lb. drums, $9.00.

Glass shows no change. The movement is light and discounts held, single diamond selling at 25 per cent., and double diamond at 25 per cent. discount in full boxes. Cut lights are quoted at 10 per cent.

Linseed Oil Holds; Turpentine Steady

London, Ont.

LINSEED OIL, TURPENTINE.—The market on linseed oil holds without change this week. The seed market shows a somewhat firmer trend, but there is really little activity over the holiday season. Quotations locally are being made on the following basis:

1 to 2 bbls., raw, $1.70; boiled, $1.73 gallon; 3 to 5, raw, $1.69; boiled $1.72; 6 to 9 bbls., $1.67; boiled, $1.70. Less bbls. add 10c gal.

Turpentine remains quiet without any special feature to report. The demand is light, supplies ample and prices steady at following figures:

1 bbl. lots, $1.10 Imp. gal.; 2 to 4 bbl. lots, $1.09; 5 gal. lots, $1.20

WINNIPEG MARKETS

WINNIPEG, Jan. 2.—Markets during the past week show advances and declines in several of the staple lines. Among those to advance appear the following: Mirrors and oils, while ropes, linseed oil, lead waste and lead pipe register declines. Bamboo poles have undergone a slight revision. Price changes on shelf hardware, however, are very limited and will, it is thought, be only nominal till some activity begins to manifest itself in the new year.

Business for the past week is reported as very good for this season of the year, being mostly sorting orders to keep stock up until spring shipments begin to move.

Oils Revised; Up and Down

Winnipeg.

OILS.—A slight revision is recorded during the week on a couple of lines of oils, Buffaloite moving up 1c per gallon while Standard gas engine oil shows a drop. Prices now ruling are confirmed as follows: Buffaloite, 25c; Ideal thresher 50c; B. castor machine, 41c; Buffalo engine gasoline, 37c; Buffalo A gas engine oil, 55c; Royal gasoline, 37c; Family Safety coal oil, 24½c; Summer black oil, 24½c; Kelso engine oil, 60c; Electro dynamo oil, 45c; Royalite oil, 21c; Standard gas engine oil, 51½c; Prairie Harvester Light, 58c. All above prices per gallon in full barrels.

Prices Loaded Shells Out; No Change

Winnipeg.

LOADED SHELLS.—Following the advice from the Dominion Cartridge Co. that they will accept jobbers' orders for shipment up till July at present prices, Winnipeg jobbers will now accept, booked orders for Dominion loaded shells at to-day's prices. Regarding deliveries, the manufacturers advise that orders placed in January or February will be filled by date promised, but orders after that date delivery cannot be guaranteed, therefore dealers who require stocks will be well advised to order their requirements early. Bookings are also being accepted on Eley's loaded shells, subject to stocks now on hand as further supplies are not now available. Prices now ruling are quoted as follows:

Dominion Loaded Shells

	M
"Crown" Black Powder, 12 ga.	$31.00
"Sovereign" Smokeless Powder, 12 ga.	38.00
"Regal" Smokeless Powder, 12 ga.	38.00

Eley's Loaded Shells

	M
"Grand Prix" Black Powder, soft shot, 12 ga.	$28.75
"Grand Prix" Smokeless Powder, 12 ga.	34.50

Shipments Jan. 2 to Apr. 1, take Apr. 1 dating.
Shipments Apr. 1 to June 1, take regular dating.
Shipments June 1 to Sept. 1, take Sept. 1 dating.
Shipments Sept. 1 to Dec. 31 take regular dating.

Bamboo Poles Revised Slightly

Winnipeg.

BAMBOO POLES.—Prices on bamboo poles which were advanced in last week's issue of HARDWARE AND METAL, show a slight revision. A reduction of 25c per 100 on the smaller sizes and a slight advance on the larger sizes has been effected, which makes to-day's selling price to the trade as follows: Bamboo poles, 12 ft., $14.50; 14 ft., $19; 16 ft., $28; 18 ft., $37.50; 20 ft., $50 per 100. For less than 100 of a size add $1.

Mirrors Move Up 10 Per Cent.

Winnipeg.

MIRRORS.—Due to the extremely high prices ruling on glass, together with the shortage of supplies caused by the reduction in output ordered by the United States War Board, higher prices have recently been announced on mirrors. These move up approximately 10 per cent. over former quotations and are now quoted at the following figures:

Earl—6 x 9 inch, $5.25; 8 x 10 inch, $6.75; 9 x 12 inch, $8.15 dozen.
York—5 x 7 inch, $2.75; 6 x 9 inch, $3.50; 8 x 10 inch, $4.80; 9 x 12 inch, $6.00; 10 x 14 inch, $7.50 dozen.
Alexandra—9 x 12 inch, $9.45; 10 x 14 inch, $11.30; 12 x 18 inch, $16.10; 14 x 24 inch, $22.25 dozen.

Spring Orders on Metallics Sought

Winnipeg.

METALLICS.—Orders are being accepted for Dominion 22-cal. Metallic ammunition for spring shipment at present prices, which are herewith confirmed. Dominion ammunition: B. B. caps. $2 80; C. B. caps, $3.50; 22 short black or Lesmok, $4; 22 long black or Lesmok, $4.80; 22 short smokeless. $4 30; 22 long smokeless. $6; 22 long rifle black, $5.60; 22 long rifle smokeless, $7 per m.

Rope Down 2c; To Go Lower

Winnipeg.

ROPE.—Rope manufacturers during the week have announced a reduction of 2c per pound on all grades of rope. However, the fact that more ocean tonnage is now available will play an important part in market prices on rope, and with the declining market noted in hemp during the past few months, accentuated during the past few weeks, it is almost certain that even further reductions may be expected. Prices now ruling are given herewith: Pure manila rope, 37¾c per pound base; sisal rope. 26¼c; British manila and New Zealand hemp rope, 31¾c; last yarn, 26¼c.

Lead Pipe and Waste Down 1c

Winnipeg.

LEAD PIPE & WASTE.—Owing to the recent drop in the price of pig lead

lower markets are recorded during the week on lead pipe and lead waste, which show a reduction of 1c per pound. The weakness of the metal may result in even lower prices being reached. To-day's prices are as follows: Lead pipe, $14.40 per 100 pounds; lead waste, $15.40 per 100 pounds.

Linseed Oil Drop 10 Cents

Winnipeg.

LINSEED OIL.—Following drop in the price of flaxseed, lower prices have been registered on linseed oil which shows a reduction of 10c per gallon over former quotations. The demand is reported as light, with stocks generally considered normal. To-day's ruling prices are as follows: Raw linseed oil, $2.10 per gal.; boiled, $2.13 gal. in single barrel lots.

Turpentine Holds Without Change

Winnipeg.

TURPENTINE — Turpentine prices continue firm on the local market at former quotations despite reports of slight reductions in Eastern markets which have taken place. A heavy demand for export is expected and this demand, when shipping space is provided, will no doubt have the effect of at least holding prices firm, if not advancing them. Prices now ruling are as follows: Barrels, $1.20 gal.; ½ barrels, $1.23 gal.; 5-gal. lots, $1.25; 1-gal. lots, $1.25 gal. plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Jan. 2 — Practically all branches of the iron and steel market have been dull, if not stagnant, with the exception of sheets, in which line there has been such a demand, chiefly against old contracts, that the mills expect to be able to operate at about 85 per cent. of capacity during January.

The past fortnight has not, of course, furnished any rigid test of the market, because the market is always quiet over the holidays. Buyers have been busy with inventories and various other accounting affairs and would hardly figure in the market no matter what the basic conditions might be. The same condition normally obtains during the first fortnight of January, and thus the real test of how active or quiet the market is going to be for a while will come after the middle of the month.

Finished steel prices are quotable firm at the recent reductions, which averaged about $4 a net ton, considering that while the reductions were fairly general they did not include wire products. The reduction was, of course, a very small affair, considering that the Government prices were about $40 a ton above the average prices quoted during the ten years before the war, 1904 to 1913 inclusive. It is clear that the reductions are a factor chiefly by way of furnishing a basis on which invoice prices can be adjusted when shipments are made under old contracts, such as tacitly or by specific arrangement involve a guarantee against price decline.

Pig Iron Prices Are Firm

Pig iron prices have not come down to any extent. It will be recalled that the steel price reductions occurred after the publication of a schedule of reductions that had been prepared on the basis of their being submitted to the War Industries Board December 11, but which the board refused to consider as it did not intend to set any prices for the first quarter of the new year. That schedule included a blanket reduction of $3 in pig iron. No general reduction has occurred. Some of the Alabama furnaces have reduced prices $3 a ton, to $31, Birmingham, for No. 2 foundry, but that does not mean that northern iron in general has any occasion to come down from $34 at furnace, when the freight Birmingham to Pittsburgh is $5.70 and to Chicago. $5.00. A reduction in the Ironton district will probably be forced, however, by southern competition. freight to Cincinnati being $3.60 from Birmingham and $1.80 from Ironton, so that Ironton would have to come down to $32.80 at furnace to equalize at Cincinnati with Birmingham at $31. Some resales of iron are being made in this territory at various cuts, usually $3, but such transactions can hardly be regarded as making a reduced market, since in many, if not all cases, the iron is being sold in order to have the loss fall before January 1, when inventories must be made up and with no open market to make an inventory price below the Government level it is better to get the loss established at once, since taxes for 1918 will doubtless be higher than for 1919.

Cycles of Activity

Generally speaking, the iron and steel market, despite the fact that the occasion is the ending of the greatest war in history, is in much the same position as has existed at the close of every period of great activity in the past. There was the "boom" of 1899, with a collapse in 1900. the activity beginning late in 1901 and lasting until early in 1903, with dull times thereafter until late in 1904, the protracted period of activity lasting until nearly the close of 1907, with very light demand thereafter, while the "Gary dinner movement" held prices fairly well until buyers were ready to take hold again in a large way, the rise of 1909. with very slack demand in 1911 and finally the rise of 1912. which kept the mills busy until the latter part of 1913, when buying became light until in 1915 the war demand took charge of everything.

In all these cases buying had run its course, and buyers even for moderately early delivery were not willing to take hold, while investors, those who engage in works of permanent construction, were absolutely out of the situation, waiting for more settled and promising conditions. In each instance the blast furnaces and steel mills had large quantities of contract business on books, and by maintaining prices they could squeeze a great deal of tonnage out of these contracts, while by letting the market break they would book very little business as everyone would be all the more disposed to wait for the bottom to be reached. In all these historic cases the deliveries on old contracts greatly exceeded the new buying, and when the contracts had been worked to the limit and at the same time it looked as if a fresh buying movement could be started, prices fell, a bottom was found, and then recovery started, each price advance encouraging buyers to take hold still more freely.

Labor Efficiency is Low

There is no particular reason for supposing the general order of things will be different at this time, except that there are more readjustments to be made before investors will be disposed to take hold. The reference is not to steel prices, as the steel mills would meet any situation as presented and would not hold prices up if they saw they could do more business by reducing them. The reference is rather to the general prospects for investments, in bridges, buildings, hydro-electric development projects and a wider range of construction jobs, and also to the cost of carrying through such projects. No matter what the cost of the steel, it costs money to put it into employment, and the investor considers the cost of other building materials that are needed besides steel, as well as wage rates and the amount of labor one gets by paying for an hour's time or a day's time. It is generally asserted that at present labor efficiency is very low. That must be adjusted even if wage rates are not going to come down, but there will probably be some declines in wage rates on construction work, though it seems unlikely that there will be any general reduction in basis wage rates in the iron and steel manufacturing industry proper.

The trade is rather optimistic, and looks for a period of great and protracted prosperity, to start in the not distant future. The common guess, when one is made, is that this will start, "in from three to six months." This means that April, being a spring month, is a favorable time for construction jobs and other undertakings to be inaugurated, and that if things do not open up in the spring expectations must be deferred over the summer until September or October. Meanwhile it is a question whether the mills will be able to keep up their present rate of operation, since some of the demand now being experienced is by way of the accumulation of

(Continued on page 84)

Turn Dead Stock Into Cash

If You Have Any Slow-Selling Lines, Old-Timers and Stickers, Now is the Time to Turn Them Into Money—Various Successful Plans Used By Dealers

SHIFT your paint cans around and look them over when taking stock. Sort out the old-timers and stickers; don't put them back with the best sellers. Pick out the shop-worn cans and set them aside. Turn all such deadwood into cash. You want the money in these goods more than you do the cobwebs that will gather on them if left on the shelves.

Stock-taking is too frequently a dead-weight job. It can be livened up by looking for opportunities to get rid of such stocks. By shifting the goods about selling suggestion will frequently come to mind for more rapid disposal of even the best sellers. While stock-taking is an essential routine of business, it can be made of vastly greater value by keeping on the alert for sales opportunities that can be made to arise out of it.

Cleans Them Out

One hardware store that is sufficiently large to be divided into departments has found that by shifting one or more departments in the store at stock-taking time, it is able to collect and clean out all accumulations of old stock. Poor sellers, stickers, and shop-worn goods are set aside and not permitted to be placed on the new shelves. In making such shifts new arrangements of stock and selling methods are sought which have the effect of producing constantly freshened interest in the store on the part of their customers. While it means hard work, these frequent changes produce the impression on the trade that this store is alive and constantly endeavoring to make improvements. When changes of this nature are undertaken improvements of many kinds suggest themselves, all of which keep the staff on the alert. It keeps them out of the rut. It stimulates them to look for, and suggest new ideas and methods. The old adage, that if we rest we rust and if we rust we bust, gets a decided setback in such a policy.

Get New Labels

In the paint department, a list of the shop-worn and shabby cans amongst the best sellers is made up and sent to the manufacturer with a request for new labels. The manufacturers are always glad to supply these without charge. When the old labels are taken off and the new ones put on, this stock is then permitted to go back on the shelves with regular stock. Keeping the stock in a fresh and neat condition has its own selling advantages.

A similar list is also made up of the poor sellers and stickers and new labels put on these where necessary, which makes them look clean and new. This stock is put on special shelves by itself, and the staff are given instructions to concentrate their efforts on getting rid of it.

Don't Cut Prices

Rather than cut prices on such stocks, the head of the department decided that it would be better to give the staff a small "spiff" or extra selling commission on all cans sold. This induces extra effort to clean it out. One of his clerks picked out the color slats of these shades, mounted them on a separate board finished with varnish stain, and hung it above the counter in front of the paint shelves. He then took the color chips illustrating these shades from two color cards, and mounted a set of each on two pieces of white Bristol board. These he placed in frames under glass, and kept them constantly on the counter. As soon as a shade was completely sold out both the slat and the color chip were removed from these selling helps. This indicated in tangible form how rapidly the stock was moving, and the extra commission was found to be a much better stimulus to selling effort than cut prices.

Wherever sacrifices are to be made turn these to the advantage of your staff if you possibly can. They appreciate it in extra effort to help you out. They exert extra energy in their salesmanship, and conquer otherwise seemingly impossible obstacles.

Listed Odd Lines

Frequently odd lines of stock for special purposes accumulate, and only an occasional call comes in for them. One paint dealer listed quite an accumulation of such lines and sent it to the manufacturer, requesting hints and suggestions for disposing of them. The manufacturer quickly responded by giving a list of uses that such stocks could be put to other than those indicated on the can. By this means the dealer was able to realize on goods that has been carried over on his stock sheets from time to time.

Another dealer, after taking stock, and finding that he had a lot of such odd lines on his shelves, went to his neighboring store keepers and offered these at advantageous prices for such purposes as he saw they could use them. While he was obliged to realize on them at reduced prices, he found that this method had greater advantages that making cut rates to his trade in general. Besides he did nto have to wait so long for the disposal of them nor take up a lot of valuable time in explaining uses for each line.

Turns Them Over

Getting rid of odds and ends in this manner keeps stocks down to the necessary minimum. It frees tied-up capital and shelf space. It increases the frequency of turnover.

Moore's Ready Mixed Paints

Moore's Paints represent true value in house colors.

It's a paint that works easily, spreads far, covers well and is lasting. It is an excellent wood preservative which leaves an excellent surface for repainting.

Altogether *Moore's* is a good satisfactory paint to use and just as satisfactory for the hardwareman to handle.

The profits are liberal and the satisfied customers mean a big turnover—an ideal combination.

It will pay you to get the agency for *Moore's Paints*.

WRITE TO-DAY

BENJAMIN MOORE & CO., Ltd.
WEST TORONTO -- ONTARIO

The recent determination of the paint manufacturers to cut down the number of shades on their color cards will very materially assist in eliminating slow selling shades. Naturally in making this elimination, they have culled out all the slow sellers on their cards.

They have also kept in mind the fact that such a concentration of stock will do away with tying up unnecessary capital and shelf space, and will promote more rapid and frequent turnover.

During stock-taking, every paint department should use its manufacturers' new condensed color card, as a guide in sorting up paint stock. Keep only the shades shown on this card and turn the balance into cash, as already suggested.

Not the Best Way

Many paint dealers have fallen into the habit of letting the manufacturers' travelling salesman take their stock once or twice a year. The salesman lists what he thinks they will need, submits it for their approval and it becomes an order.

This is very nice in its way, but if the salesman only has an hour before the next outgoing train, to take this inventory in, he will not have much time to trouble about old stocks; he is mostly concerned about the new stock he can put in.

Keep an eye on your own stock. Having it up to date, and in sufficient quantity to meet the demands of your trade is vitally important, but too often there is an old can resting on your shelves that's cheating a liquid dollar from its rightful place in your cash register. You can probably use that dollar to greater advantage elsewhere than allowing the spiders to gloat over it on your shelves.

Should Clean Up

Cleaning up your paint stock in this way is more important than ever this year. The uncertainty of what trend prices may take before the spring is over should be an added incentive to turn everything possible into cash. Where there exist old stocks that have been bought when prices were lower, an effort should be made to realize on them at present price levels. It will be much easier to obtain good money out of them than when prices reach a more normal level.

There is also, always an advantage in selling paint stock as fresh as possible. Varnishes become better conditioned the longer they stand, which is an advantage when one is not forced to consider the tying up of money and shelf space; but keep the pigment stock always on the move. Every manufacture has identification marks stamped on the lids of his can, telling the exact date when each particular can was made. Dealers can soon learn, through the manufacturers' salesmen, how to read these marks, and thus keep track of how long stocks are on hand. Special attention should be given to getting clear of any stock that is more than a year old.

Keep Them on Move

Make stock-taking an opportunity to keep things on the move. Merely counting over the number of cans on your shelves, and wielding a dust-cloth annually has put the bogey into stock-taking that everybody dreads. Stirring up the stock, and starting the stickers on their way to real money, puts "pep" into business. Separate the sheep from the goats. List the goats and make special effort to get rid of them. Stock-taking then loses its terrors and makes more music for the cash register. In this year of peace, bringing with it an era of reconstruction and new problems in merchandising, make your stock-taking in your paint department an effort to place this department on a good sound basis for more frequent and profitable turnover.

Discount and cut-rate sales on old stocks makes the dollar you ought to have for them only worth anywhere from 99c downwards; these rob the dealer of his full and legitimate profit. Getting rid of such stocks before it becomes time to discount their normal retail value is the better class of business. Stock-taking time is a good time to rescue them from sacrificing methods.

R. H. Monk Honored By Brandram-Henderson

On Saturday evening, December 28, a dinner was given at the St. James's Club by Mr. George Henderson, president of Brandram-Henderson Limited, and executive officials, to Mr. R. H. Monk, manager of the lead works division, on the occasion of his severance of his long association with the company.

The executive staff of Brandram-Henderson were present, including divisional managers with headquarters outside the city of Montreal.

After the toast to the King had been honored, Mr. Henderson, in presenting to the guest of the evening a case of silver as a remembrance from his former fellow executives, spoke in glowing phrases of the value of the services of Mr. Monk to Brandram-Henderson Ltd. during the twelve years of his association, recalling the pleasant relations which had always existed between Mr. Monk and himself, and expressing his own regret and that of the staff that Mr. Monk, so long regarded as one of the Brandram-Henderson family, should be now leaving "the parental rooftree" for other fields of endeavor, and in most kindly and enthusiastic words expressed sincere and hearty wishes for his future well-being and success.

Messrs. J. M. C. Muir, W, S. McLennan and C. H. G. Short, each in turn endorsed and reiterated the expressions of goodwill entertained by the entire staff toward Mr. Monk in the past and for the future.

Mr. Monk, in responding, warmly thanked Mr. Henderson and his former colleagues for the eulogies and good wishes, and following Mr. Henderson's theme expressed his pride in being a member for so long of the Brandram-Henderson family, adding that his long affiliation with that family would never permit him to regard himself other than as a son who had left the parental roof, knowing that he carried with him the paternal blessing, and that he would retain a filial regard and affection.

A memorable evening was brought to a close after the exchange of many pleasant and humorous reminiscences, and the consumption of much tobacco.

RICHARD ROSENBERG SUCCEEDS HIS FATHER

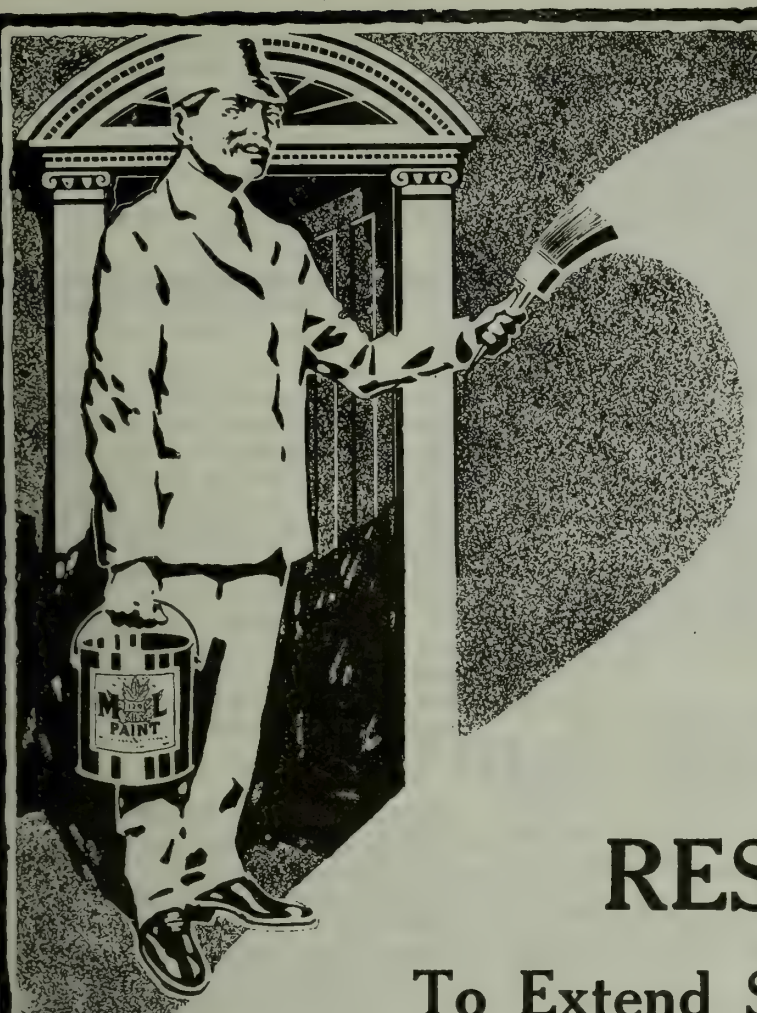
At the annual directors' and stockholders' meeting of the Standard Cooper-Bell Co., Richard D. Rosenberg was elected president, W. Burchard Day secretary and general manager and L. K. Miller, treasurer.

The new president, Richard R. Rosenberg, has been active in the business under the direction of his father, the late Oscar Rosenberg, and for the past year has acted in the capacity of vice-president. Messrs. Rosenberg were well known in Canadian paint trade circles, having operated a plant in Canada, which was taken over some time ago by the Martin Senour Co. of Canada, Ltd.

TRADE COMMISSION CITES LINSEED PRODUCTS CO.

Declaring it has reason to believe the concern has misrepresented, through false and misleading advertising and otherwise, certain of its products which has been adulterated with low-grade mineral oils, as "linseed oil," the Federal Trade Commission "in the interest of the public" issued formal complaint against the North American Linseed Products Company, Wheeling, West Virginia.

The concern was cited to appear before the Commission in Washington, February 4.



CIVILIAN DEMAND TAKES ENGLISH CLOTH

One of the great problems of demobilization in Britain will be the provision of civilian clothes for the millions of young men who for the last four years have appeared exclusively in khaki.

Production of military clothing is to be curtailed without delay, and mills which had been turning out khaki by the mile for four years will be able to devote more attention to the production of "mufti."

Whether there will be enough to go round really depends on the length of time demobilization will take. A heavy rush back to civilian life would mean short supplies, to say the least.

Already there has been a large increase in the demand for civilian clothes. The head of a West End business house stated yesterday that for the last four years his trade has been 85 per cent. military and 15 per cent. civilian. Since the armistice the percentage is 90 civilian and 10 military.

Says Glass Prices Will Be Firm, With Light Stocks and Big Demand

GLASS is not going to be cheaper says a notice sent to the trade this week by the Johnston Brokerage Co. of Pittsburgh, Pa. The notice in part is as follows:—

"After inventory you may find need to replace certain stock and fill up holes; if so, send us along your orders. At present we have but small production, as only two of our factories are operating and our stocks in the idle plants, as you know, are limited. Perhaps with the small amount of glass in the warehouses of the idle plants and the small quantity we are producing we can take care of a reasonable amount of your business.

"Glass is not going to be cheaper. The operating period will not exceed that of 1917-18, and with the increased demand abroad and with better shipping facilities to handle this export trade there will be no surplus stocks in the domestic market. While this is not a speculative market, we consider it quite safe to purchase your needs for spring and summer, and you need have no fear in carrying your normal requirements for the period mentioned.

"We anticipate considerable activity in building lines very early in 1919 and expect to see the demand increase as the year advances. The price of glass for the season of 1918-19 will be firm and all distributors and sash houses should so calculate.

"An analysis of the market given briefly is: extremely light stocks, larger foreign demand, firmness in discounts and expectation of great prosperity. This prosperity may come much ahead of our expectations. There will be enough business in 1919 to go around."

NAVAL STORES PASSING THROUGH DEPRESSION

Expected That With Outward Movement of Surplus of Supplies There Will Be an Upward Trend in Prices

Naval stores, according to the "Naval Stores Review," of Savannah, are regarded as passing through the period of depression and uncertainty, resulting from the cessation of war activities and the transition to a peace basis, in quite a satisfactory way. True, there have been considerable declines on rosins and turpentine slumped off from its top price, but the basic strength of both commodities is fully realized and there is a keen appreciation of what may happen as soon as the outward movement to other countries begins in earnest. This movement is apparently not going to be delayed as long as was expected. So far as South America is concerned there is a promise of a very decided improvement in exports with the new year. A heavy tonnage has been placed at the disposal of the trade with that continent and as the several consuming countries are very short on rosins some heavy drafts on the supplies in this country may be looked for in the next two months. Eighteen steamships, two barks and two schooners were reported this week as having room open for rosins at New York for Argentine, Brazil, etc., and the Government is showing a very evident desire and willingness to expedite exports in all directions as quickly as possible. In the allocation of space to various countries naval stores are not apt to be forgotten. The needs of the consuming countries are great and the pressure of manufacturing interests on their Government for stocks of both turpentine and rosins will compel attention. Every barrel of rosins in the United States could be quickly disposed of to foreign interests and moved out in thirty days if the freight space were available. This shows the remarkably strong position rosin holds.

INTERNATIONAL ULTRAMARINE CO. SOLD BY PALMER

The entire capital stock of the International Ultramarine Works of State Island, New York, which was seized by Alien Property Custodian A. Mitchell Palmer, was sold at public auction for $255,000.

Director of Sales Joseph P. Guffey disposed of the enemy shares, 1,500 in all, for $170 a share. This was the highest bid and was made by Frank A. Meyer, president of the company, who has been associated with the concern since its inception, and who has been conducting it.

Mr. Meyer, who was associated with the American founders of the company, prior to the time that it was taken over by the German interests, is a reputable American citizen and, it is said, is fully qualified to conduct the business.

That the concern has been in a flourishing condition is indicated by the fact that the bid for a share of stock was $170, which is seventy dollars above par value. The company manufactures dry colors.

HOLD BUSINESS MEETING

Sales Force From Toronto Branch Brandram-Henderson, Ltd., Get Together

An even dozen, representing the sales staff of Brandram-Henderson, Ltd., Toronto branch, met on Monday, December 30, 1918. The meeting was held in the Blue Room of the Carls-Rite hotel, Toronto, where dinner was served also.

The meeting took on the form of a discussion from the sales, advertising and service standpoint, the principal speaker of the evening being A. M. Creamer, advertising manager from the Montreal office. It is stated that 1919 prospects were a matter of enthusiastic comment by the salesmen themselves.

W. J. Chambers, who has been city salesman for some years and is severing his connection with the firm, was presented with a case of pipes. S. W. Smith, Toronto manager of the company, made the address and presentation, Mr. Chambers making suitable reply.

RECONSTRUCTION ISSUES DISCUSSED

Canadian Salesmen Benjamin Moore & Co., Paint Manufacturers, Toronto, Met Friday of This Week

A meeting of the Canadian salesmen of Benjamin Moore & Co., Ltd., paint manufacturers, Toronto, was held at the offices of the company on Friday of this week. Problems arising out of the termination of the war were taken up, reconstruction issues discussed, and it is understood that a very liberal and aggressive sales program is being undertaken for the present year. Reports made by the salesmen show, it is said, every confidence in the outlook, and the salesmen go forth with enthusiasm to drum up new business and increase the volume from old accounts.

FIRST CANADIAN TRADE GUILD

The formation of the first Canadian trade guild for scientific and industrial research purposes is now in process. As a result of a conference at Amherst, NS, last week of the Maritime Provinces Canners' Association, Dr. A. B. McCallum, administrative chairman of the council for scientific and industrial research, the association decided to form a federally incorporated research guild. Some twenty-five canning firms were represented at the meeting, which was held under the chairmanship of Hon. Senator John McLean, of Souris, P.E.I. A committee headed by R. O'Leary, of Richibucto, N.B., was appointed to arrange for the organization of the guild, and $5,000 was voted towards research work in co-operation with the research council at Ottawa.

SEEKING GLASS SAND

Investigations into British supplies of sands suitable for glass making have been rendered necessary by the almost complete cessation since 1916 of imports from France, Holland, and Belgium of those sands which many British manufacturers employed as materials for glassware of both fine and medium qualities. The sand imported from Belgium in 1913 amounted to more than 230,000 tons, but barely 25,000 tons were received in 1915.

There is no deficiency in Great Britain of materials suitable for common bottles (clear or colored), window glass, electric light bulbs, etc.; the problem has been to obtain fine pure sands to take the place of the foreign ones which are valued so highly by makers of optical lenses used in military and scientific instruments.

Varnish Efficiency

Varnishes vary greatly in quality. Good varnish makes a finish of lasting beauty, poor or unsuitable varnish does not. They cost the same to apply, and the difference in the price per gallon is nominal. Cheap varnish is costly economy.

For architectural work and every other purpose for which varnishes and their allied products are used, Berry Brothers' varnishes, enamels and stains are 100 per cent efficient. The name of Berry Brothers guarantees the utmost in quality and dependability.

It pays to make a leader of "Berry" brands because the label is an effective selling argument.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 2.—The feature of the paint markets this week is that of a further reduction in price of linseed oil. The flax market is actually stronger than it was a week ago, so that the only reason that can be assigned for a lower oil price is that of the desire for orders. These are not plentiful and there is active bidding for them. Turpentine is somewhat easier in tone and the position indicates that a more favorable basis may soon obtain. White lead in oil is unchanged, but owing to the lower basis for pig lead a change to lower levels will not be a surprise.

Seed Market Firmer; Linseed Oil Lower

Montreal.

LINSEED OIL.—With spot seed markets ruling 10c to 12c a bushel higher, linseed oil is nevertheless lower. Quotations this week range from $1.57 to $1.62 for raw, and a $1.59½ to $1.65 for boiled. Lack of orders and a desire to secure them appear to be the factors responsible for the lower prices, and a basis at somewhat above the present levels is looked for in some quarters. There is little doing.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 57	$1 62
5 to 9 bbls.	1 56	1 62
10 to 25 bbls.	1 55	1 62
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 59½	1 65
5 to 9 bbls.	1 58½	1 65
10 to 25 bbls.	1 57½	1 65

Turpentine Easier But Still Scarce

Montreal.

TURPENTINE.—While some dealers state that they have ample stocks of turpentine to take care of present requirements others are not making any offerings at all. The tendency is easing somewhat and the spread now stands at $1.05 to $1.15 per gallon for single barrel lots. The small quantity price has also been shaded in some quarters.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 05	$1 15
Small lots	1 17	1 24

(Packages extra)

Putty is Inactive On Steady Basis

Montreal.

PUTTY.—The basis is unchanged and very little stock has moved the past week. The season is generally considered as finished here, and with the exception of odd lots no movement has transpired. The following basis obtains in this market.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Holds; May Change

Montreal.

WHITE LEAD IN OIL.—While a free pig lead market is obtaining now, no new basis of price has been arranged for white lead. The season is an inactive one, but in view of the fact that restricted trading has not been continued, it is probable that some change in this market may come ere long. The basis at present is as follows for standard white lead in oil: Five ton lots, per 100 pounds, $17; ton lots, $17.50, and less quantity per 100 pounds, $17.85.

Mixed Paints Will Move Quite Soon

Montreal.

MIXED PAINTS.—That there will be a normal movement of paints to shippers within a few weeks seems assured. The bookings have come to hand in good volume and that there will be a good season none deny. Manufacturers are now making ready their winter's output and deliveries in all sized packages are promised within usual delivery dates. The market is unchanged.

TORONTO

TORONTO, January 2.—Linseed oil is down 2c per gallon for the week in some quarters, which represents an advance of 3c from low point reached since last issue. Turpentine shows further strength at primary points, though this has not resulted in any change in prices locally. White lead in oil rules at unchanged levels, though the weakness of the pig lead market may have a bearing ultimately on quotations. Putty is steady and glass interests expect a very firm market till well into the summer. Mixed paint has held unchanged and volume of business received for Spring is considered good.

Linseed Oil Shows Variation

Toronto.

LINSEED OIL.—The market seems to be showing considerable variation. For the week a decline of 2c per gallon has been recorded, and to-day's prices represent an advance from lowest point reached since last issue of 3c. The seed market seems to be showing a fairly steady tone with an upward trend noticeable. However, there is comparatively little doing and interest in the markets generally has lagged somewhat during the holiday period. Manufacturers of paints are buying quite freely for 1919 and the outlook all along the line in paints is encouraging for big business. Range of quotations this week follows:

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1.62	$1.70
3 to 5 barrels, gal.	1.61	1.69
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1.64½	$1.73
3 to 5 barrels, gal.	1.63½	1.72

Add 10c gallon in smaller quantities.

Steady Tone to Turpentine Markets

Toronto.

TURPENTINE.—There is a steady tone manifest in turpentine locally with primary points showing strength in the face of only a fairly active demand. Business is expected to show steady improvement with the beginning of the year and when shipping space for overseas is allotted, movement to European points will, it is expected, be heavy. Already about 10,000 barrels of rosin have been loaded for overseas and another 7,000 is loading, according to reports, and this has tended to hold market on rosin steady. Shipments, it is understood, have been made from stocks held for European interests and means that this will not be unloaded on the markets. The turpentine market shows an advance in the South of between 2 and 3 cents during the week. Locally prices range at following unchanged figures:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.10
2 to 4 barrels (barrels included)	1.06- 1.09
5 gallon lots	1.17- 1.20

Outlook in Mixed Paints Good

Toronto.

MIXED PAINTS.—Manufacturers report the outlook in mixed paints as de-

OUR customer can save on those big jobs by using the Jamieson line of Prepared Paints and Varnishes.

And on the small job, too. Jamieson's are pure and uniform in quality and color—most for the money.

JAMIESON'S

PURE PREPARED PAINTS

cidedly good. Salesmen have been attending headquarters the past week or two and it is indicated are enthusiastic over prospects for 1919 business. Reconstruction issues have been taken up and an aggressive sales policy is being adopted by all manufacturers, which, it is thought, will help themselves, jobbers and retailers.

White Lead in Oil Unchanged; Weak

Toronto.

WHITE LEAD IN OIL.—There are no new developments to report in regard to white lead in oil this week. The market is holding at unchanged levels, though the undertone is rather weak in view of the situation in pig lead. The metal is very weak and further declines seem imminent, which in time must be reflected in the situation on white lead in oil. Corroders, it is understood, are working on high-priced raw materials and may want to reduce these somewhat before revising their quotations. The price on pure white lead in oil is steady at $17.80 per 100 pounds in ton lots and $18.35 in smaller quantities.

Glass Very Firm; Putty Unchanged

Toronto.

GLASS, PUTTY.—Latest advices received indicate that the market on window glass is very firm. No change from present scale is expected, unless it is an advance, prior to midsummer, and with the small production and heavy demand expected, a revision to higher levels would not come as any great surprise.

Putty rules without change. There is very little moving to the trade and the market is steady at following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Brushes Hold in Strong Position

Toronto.

BRUSHES.—Indications are that the market on brushes is one of decided strength. There is a feeling that white fibre brushes may come in for further revision, an advance of between 10 and 20 per cent. being talked of as a possibility. It would seem that some manufacturers are very short of bristles, one Canadian manufacturer being reported as having sold one line on which he had a surplus at an advance of 40 per cent. over his cost. Best informed authorities look for no relief from the present difficulties for some months.

The outlook for Spring business is good. Booking business on the manufacturers' files has been heavy and all along the line the outlook seems to be that the volume of sales for 1919 will represent a very satisfactory total.

Every Indication That Banks Look For Business to Remain Good

BECAUSE Canadians as a whole are a thrifty, hardworking people, producers in the real sense of the word, the Dominion is in excellent shape to meet the problems of the reconstruction period. Comparatively little commercial disturbance is anticipated. Canada is strong financially, and is prepared to take care not only of all her own needs, but to help supply the world shortage. Canadians will not, in doing this, become any less prosperous, in fact, the indications are that the producers, especially the farmers, will find a ready market for everything. This will help to keep everything on a sound basis.

The banks it is stated are confident that business conditions in Canada will remain satisfactory. There are no indications of any unusual tightening up of credit and while there has been some inflation due largely to war conditions, everything is sound. The banks' attitude is of especial importance to manufacturers and retailers. Bank credit when granted by commercial institutions upon the strength of, or for the purpose of, liquidating commercial transactions of early maturities, serves as a means of facilitating the flow of commodities from producer to consumer and the return of purchasing power from the consumer to the producer through the various channels of circulation.

This process enables goods to act as a means of purchase and payment for other goods, and when the maturity of the average loan granted (or "credit" allowed) is no longer than that of the productive processes in which the community is engaged, the effect of it is only that of facilitating and promoting production and distribution. When the loans granted or credit extended by the banks are in excess of the normal value of the goods offered for exchange, there is brought into existence an additional or surplus volume of purchasing power which has the same effect upon the prices of commodities as does a corresponding addition to the money supply, inasmuch as it may be offered for commodities and may thus create a demand for them. Credit expansion becomes inflation when the increase of prices it produces brings no commensurate or offsetting increase of production.

The reason why the public, and especially the banking community, looks with so much interest to the reserves of the banks is understood when the nature of credit inflation is carefully considered. Ordinary extension of credit made for the purpose of facilitating the exchange and circulation of goods require little or no addition to the reserve funds of the banks, because the credits thus granted in the main offset and cancel one another, leaving an unimportant margin to be redeemed in cash.

PITTSBURGH MARKETS

(Continued from page 75)

wants during the period of steel delivery restrictions. This may possibly be worked out in a few weeks to such an extent that the mills may drop to a 70 per cent. or even a 60 per cent. operation. There might be an accident and a break in the market, but the mills would hardly be disposed to reduce prices merely because they were operating light; they would have to see that reducing prices would stimulate demand.

Price Changes in Another War

THERE has been so much written upon the question of the effect of war on prices, and the probable effects of peace, that the evidence of comparative prices, prior to the American Civil War at its conclusion and some years later, should be interesting reading. The prices are derived from "Hunt's Magazine" of January, 1868, and represent New York quotations at the beginning of the years given. The price of gold is also given so that it is possible to measure the depreciation in currency:

	1861	1865	1868
American gold	Par	$ 2.27	$ 1.33½
Ashes, pots 100 lbs.	$ 5.00	11.75	8.25
Wheat flour, state, bbl.	5.35	10.00	10.00
Wheat flour, best Gen.	7.50	15.00	14.50
Cornmeal, Jersey	3.15	8.80	6.15
Wheat, white Ohio	1.45	2.60	3.00
Wheat, red Western	1.38	1.06	2.40
Oats, state	.37	2.45	.80
Corn, Western	.72	1.90	1.35
Cotton, mid. up	.12½	1.20	.16
Fish, dry cod, 100 lbs.	3.50	9.00	5.50
Fruits, currants, lb.	.04½	.21	....
Bunch raisins, per box	1.75	5.85	3.80
Hops, per pound	.25	.40	.65
Iron, Scotch pig, ton	21.00	63.00	36.00
Iron, English bars, tons	$52.00	$190.00	$85.00
Laths, per thousand	1.30	2.40	3.00
Lead, Spanish, per ton	5.25	15.00	6.50
Leather, hem., sole, lb.	.10½	.42	.28
Lime, per barrel	.75	1.15	1.85
Molasses, New Orleans	.37	1.43	.85
Oil, crude whale, gal.	.51	1.48	.70
Pork, old mess, bbl.	16.00	43.00	21.15
Horns, per lb., pickled	.08	.20	.13
Butter, state	.18	.55	.45
Rice, good, 100 lbs.	4.00	13.00	6.50
Salt, Liverpool, gr., etc.	.65	2.27	.50
Sugar, Cuba, good	.06¼	.19	.11⅞
Wool, fleece	.30	.95	.60

It will be noticed that the declines as a rule were gradual, being higher in most instances in 1866 than at the beginning of 1868. In 1866, with gold at $144½, cotton was quoted at 52 cents a pound, English bar iron at $130 a ton, laths at $5 per thousand, Spanish lead at $10 per ton, old mess pork at $28.50 per barrel, sugar at 13 cents a pound and fleece wool at 75 cents a pound. Wheat and corn, however, were cheaper in 1866 than in 1868, white Ohio wheat being quoted at $2.63 at the beginning of 1866.

Lowe Brothers Paints

Make Your Paint Department Pay in a Big Way During 1919

The present year promises to be a big one in Canada for all lines of trade. Canada has prospered in spite of unsettled war conditions and now that those uncertainties are past, what may we expect of the future? Be prepared for the good times that are almost here. Put your paint department on a solid, certain, greater money-making foundation by accepting a Lowe Brothers' agency.

Make this decision one of your New Year's resolutions. The noticeable increase of your paint sales throughout the year will prove the wisdom of your choice.

Get ready to **"do things in a big way"** by writing us for our agency proposition to-day.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

The Best Costs No More

Cheap Varnishes are the most expensive.
They are liable to crack and peel and blister.
They are a very poor investment.

Dougall Varnish Lasts Longest

and besides it covers far more per gallon than other varnishes. It is the best proposition from every standpoint. It costs less in the long run to buy Dougall Varnish in the first place.

Liberal discounts to the dealer—write for them.

The Dougall Varnish Co., Ltd., Montreal

Conserve Time!

Time is an all-essential element. Napoleon was defeated because his expected reinforcements were behind time. Millions of dollars and thousands of lives are lost every year because men do not properly reckon with time.

At the present as never before in history, time must be conserved to the utmost degree. Every minute must yield its greatest possibilities.

BOWSER ESTABLISHED 1885

SYSTEMS

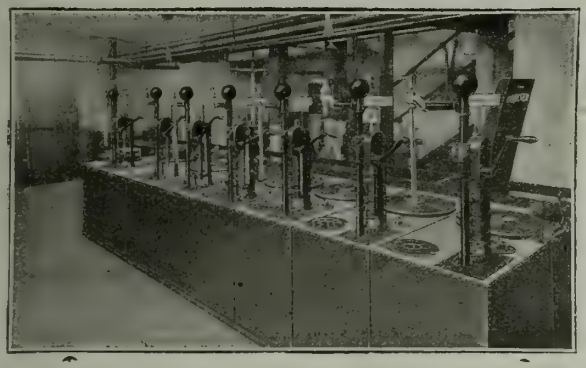

Figure 115. Battery for Paint, Oils or Lubricants

for the storing and handling of oil, conserve more than half the time expended by less efficient methods. They also conserve:—

Labor Capital Space Lives
Property Machinery Material

BOWSER SYSTEMS are leakproof, fireproof, lossproof, dirtproof, deterioration-proof, evaporation-proof, rapid, economical and efficient.

A System for Every Requirement.
Write to-day.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

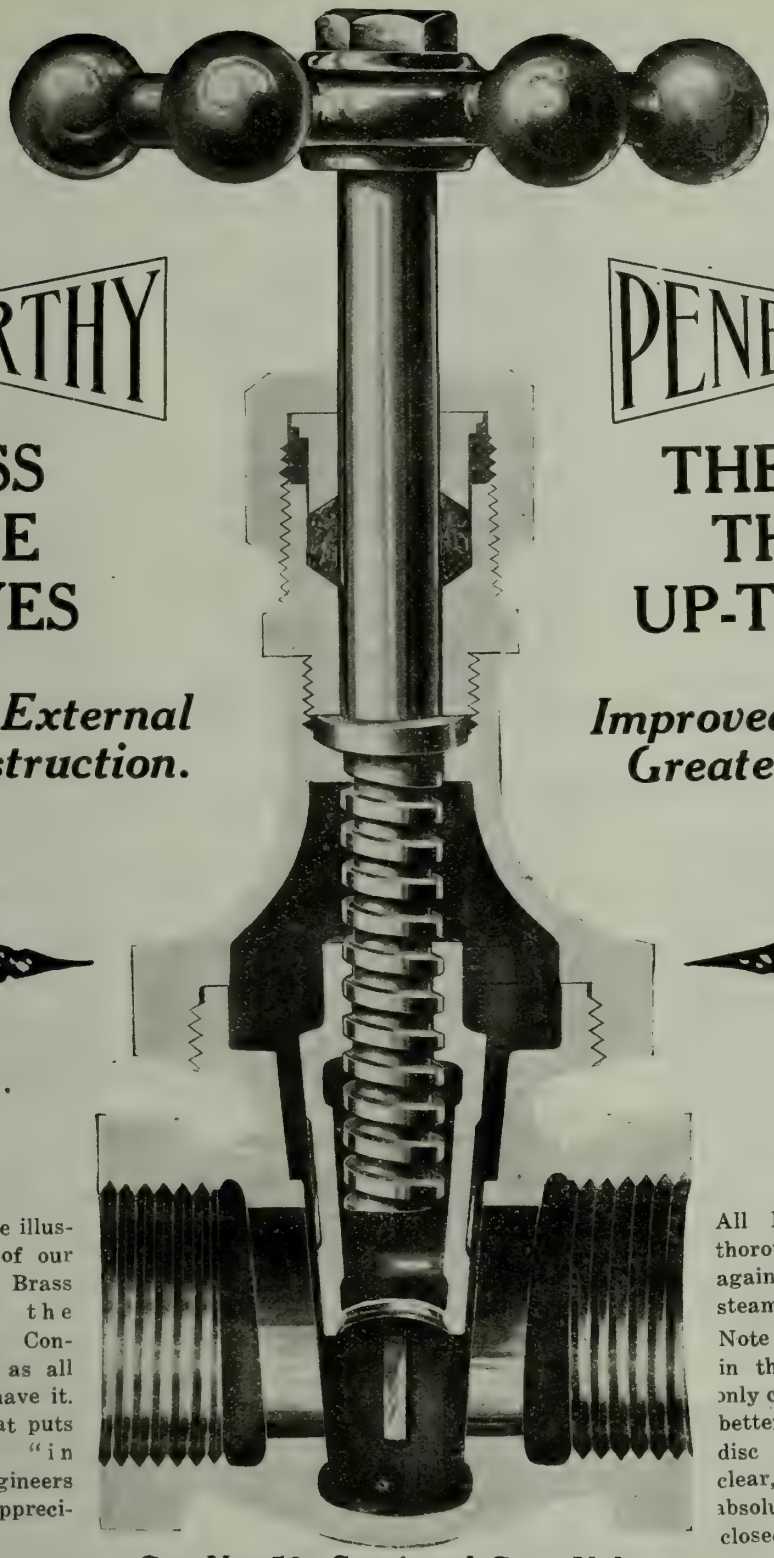
TRADE PENBERTHY MARK



BRASS GATE VALVES

Up-to-Date External Thread Construction.

TRADE PENBERTHY MARK

THE GATE THAT'S UP-TO-DATE

Improved Design with Greater Efficiency

The Gate Valve here illustrated is but one of our many types of Brass Valves possessing the "External Thread Construction" feature, as all Penberthy Valves have it. It's the feature that puts Penberthy Valves "in strong" with engineers everywhere who appreciate a good valve.

All Bonnet threads are thoroughly protected against corrosion from steam and water.

Note the solid-wedge Gate in this valve. It's the only correct method. Much better than the Double-disc type. Allows for a clear, quick opening and is absolutely leak-proof when closed.

Cut No. 567 Sectional Gate Valve

We are pioneers in the manufacture of Brass Goods in Canada. Leading jobbers from coast to coast sell Penberthy Valves. Every valve has the Penberthy Guarantee back of it, and bears the Penberthy Trademark, your proof against substitutes. Our prices are reasonable. If your jobber cannot supply you, write us for information.

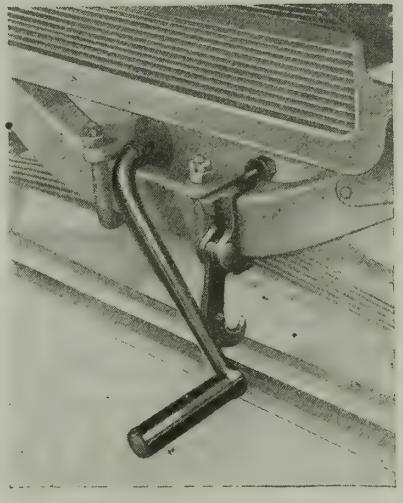
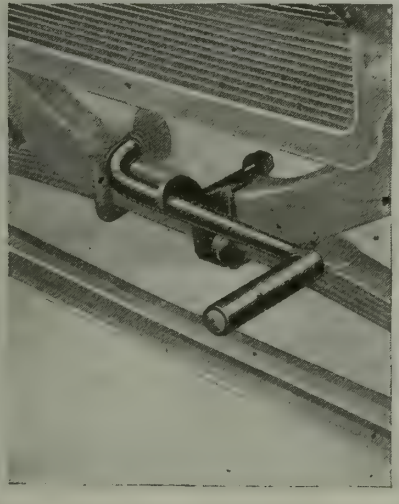
HARDWAREMEN!

Here is Something You Can GET and SELL!



THE exigencies of the times demand greater requirements of the products offered for sale. Nowadays products are valued in accordance with their ability to conserve. Measured by such exactions the device here described proves to be of the greatest intrinsic value. Because it offers absolute safety against back-firing injuries to every Ford owner.

THE KETCH-A-KICK



Catches the Crank When Engine Back-Fires

Every time a Ford Engine is cranked you are liable to serious injury—usually a broken arm, which means severe pain, loss of work and loss of money in large doctor bills. The Ketch-a-Kick, a little device as shown in cut,

Eliminates all Possibility of ACCIDENT or INJURY

The Ketch-a-Kick attaches to the cross bar, as shown in the cut at the right. It offers no hindrance to cranking, moving down out of the way as the crank passes over it. As soon as the crank has passed on the downward stroke the hook of the Ketch-a-Kick springs back into position ready to catch the crank in the event back-firing occurs.

The lower cut shows how the crank is caught and held by the hook when a kick-back occurs.

The Ketch-a-Kick is simple, easy to attach, and lasts indefinitely. Hardly noticeable, adds only a few ounces weight, does not rattle. Every Ford owner should have one, and most all owners of Ford Cars will buy one because it

Costs so little

And Ketch-a-Kick offers absolute safety against painful, costly injuries.

Our Big consumer Advertising Campaign starts at once. Get your share of the results. Write us to-day for prices.

SAVE COAL

BY USING

BUILDING PAPER

SIMMS SET IN RUBBER

BRUSHES

GUARANTEED

FOR USE IN ANYTHING

Soaked in paint remover or boiled in water, the setting composition in these brushes remains as solid as concrete.

Try this test on some of the OTHER kinds.

Why sell your customer CEMENT-SET brushes or those set in some imaginary SECRET COMPOSITION that won't stand use in alcohol, spirit varnishes, lacquers, paraffine, crude oil, grease, paint removers and a dozen other things, or

A GLUE-SET brush that cannot be used in water, kalsomine, paste, glue sizing, etc., and dries out if carried on the shelves over the season?

Why not sell him a

SIMMS

SET IN RUBBER

Brush and tell him to use it in any old thing? He can drive nails with it if he wants to; he can't harm the setting.

Samples and Prices through our jobbers on request.

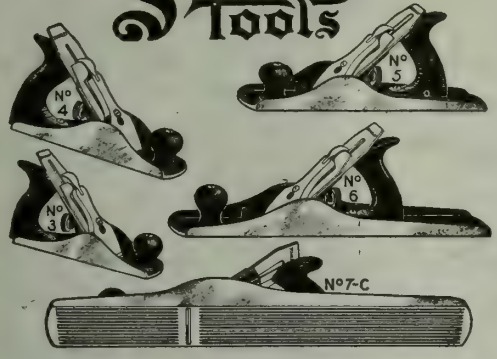
Talk No. One Hundred and Eighty



"PREMIER" SHEETS have everything in their favor—Quality—Cost—Service, and besides—they're made right here in Canada. Now honestly, Old Man, don't you think you should say "PREMIER" when ordering?

—TINKER TOM

Look for Talk No. 181 next week

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

Stanley Tools

THE "BAILEY" IRON PLANE has been the STANDARD for over FORTY YEARS and has always maintained the leading position.

We are the sole manufacturers of the "BAILEY" PLANE. Every Plane has the name "BAILEY" and the number cast in the bottom and the name "STANLEY" is stamped on each cutter.

Always insist that your stock consists of Planes made by THE STANLEY RULE & LEVEL CO., which carry with them a GUARANTEE backed by a Company that has been manufacturing Carpenters' and Mechanics' tools for over half a century.

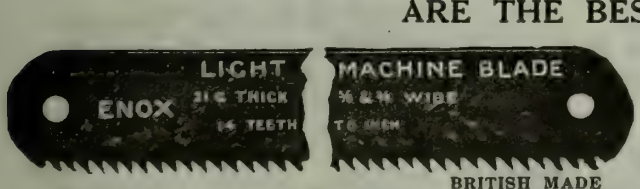
Made in Canada

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*



There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

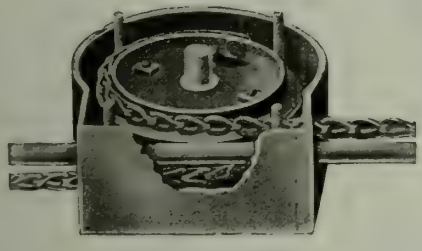
A New Year's Resolution



to include the NOISELESS washer with your up-to-date, quick-selling lines of household labor-savers will be profitable and satisfactory.

The NOISELESS is the easiest running dolly-type washing machine on the market. There is not a gear, spring, rack, pinion, fly-wheel or piece of intricate mechanism about it. It washes quickly without effort.

So easy a child can operate it.

Also is moderately priced.

Note the NOISELESS in your order book and get them from your jobber or direct from us. Special descriptive folder on request.

National
ELECTRIC

RECONSTRUCTION PERIOD

The past four years have been strenuous and trying ones for everyone. Scarcity of raw material and labor and the fact that most of our plant was utilized for war work seriously handicapped our service to our customers. With it all we have done a bigger business each year and therefore must have given fairly good service under these circumstances.

Now for 1919

We have a bigger plant—bigger stock—bigger line—and better equipment. As for our appliances they have an AA1 Rating.

Our Service Policy will be—Ship from Stock.

TRY US

If you have not received a copy of our latest Catalogue C.

The National Electric Heating Co., Limited
TORONTO CANADA

Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They are mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Cataract Electric

"1900" Agitator Electric

Extensively Advertised And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory, resulting from our twice-a-year advertising campaigns.

If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

THE "1900" WASHER COMPANY
357 Yonge Street Toronto

HORSE SENSE!

On every hand we hear this expression used. Not in every case does it have a direct connection with horses. Man is said not to possess even the sense of a horse at times.

Many horse-owners fail to realize the needs of their horses. It's false economy—saving the price of necessary equipment to keep a horse in good working condition. You do the sensible, sane and logical thing when you recommend to your customers

TRADE MARK Ventiplex PADS

VENTIPLEX COLLAR PADS, HOUSING AND SADDLE BLANKETS cure and prevent Gall Sores and are a necessity to the welfare of every horse in your community.

Sweat Pads

Increase your sales by boosting this quality line. Guaranteed to give absolute satisfaction. Include **Ventiplex** in your next order.

Made of a patented fabric—very durable and easily washed. Retain their shape and comfort qualities, no matter how often washed. Will not bunch up under the saddle or collar.

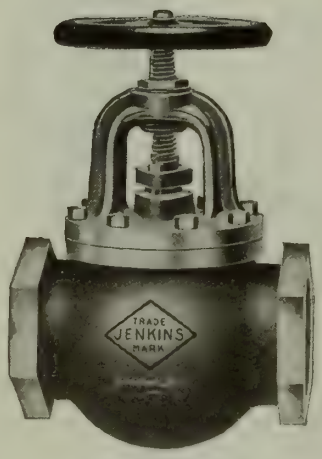

FIG. 141

JENKINS BROS.

Standard Pattern Iron Body Globe Valve Screwed with Yoke.

For use under steam service there are no valves quite as satisfactory as

JENKINS BROS.

Globe and Angle Valves

Fitted with Jenkins' No. 119 Discs

The composition of the disc is very hard, but becomes tough and flexible in service when under steam pressure.

It shows remarkable freedom from cracking and flaking and unrivalled durability in working steam pressures up to 150 pounds.

PARLIAMENT BUILDING, OTTAWA

Tenders Wanted for "Register Faces and Grilles"

SEALED TENDERS will be received by the undersigned until **noon, January 9, 1919,** for the Register Faces and Grilles required in the construction of the above building.

All tenders to be based on the manufacture, supply and delivery complete of the Register Faces and Grilles as shown and described by the plans, specifications and schedule.

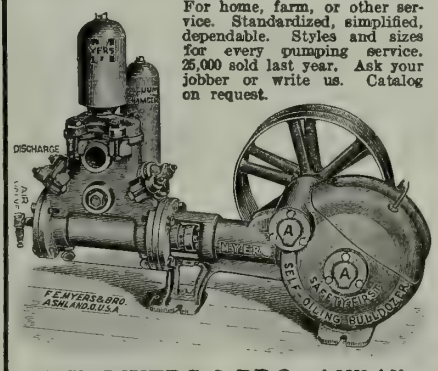
The work of this contract shall be proceeded with immediately upon the signing of the same and continued as may be directed and in such a manner as to ensure the completion thereof by **March 31, 1919.**

Plans, specifications, and any other information required can be obtained at the office of the General Contractors, P. Lyall & Sons Construction Company, Limited, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, for a sum not less than five per cent. (5%) of the amount of the tender, which will be forfeited if the parties tendering decline to enter into a contract when called upon to do so. If the tender is not accepted the cheque will be returned. If the tender is accepted an additional cheque for a sum equivalent to five per cent. (5%) of the tender must be deposited before the contract is signed. The total security will be forfeited if the contractor fails to complete work contracted for.

Payments for material will be made monthly.

The lowest or any tender not necessarily accepted.



Envelopes containing tenders to be marked: "Tender for Register Faces and Grilles," and addressed to the undersigned.

The Financial Post on Activity in Canadian Industry

"FOLLOWING the reorganization of the Canadian Manufacturers' Association there are indications of a new era of activity, to commence with the opening of another year, under the general managership of J. E. Walsh. Already constructive steps are being taken towards the arrangement of a comprehensive program to deal with such problems as standardization of output, export marketing and attendant financing, relations of capital and labor, social welfare in industry, rail and water transportation, inland and overseas, informing of the public, etc. The opportunities are great and the time ripe for action along the right lines to put Canadian manufacturing in its rightful place in relation to national prosperity and to strengthen that position by developing export trade which will bring the highest possible return for those natural resources and products which represent our greatest assets."

Besides the important article of which above is the opening paragraph,

THE POST

THIS WEEK CONTAINS:

How Marconi Has Weathered War Conditions.
Southern Power Higher Earnings—Wider Field.
Trade Total Less for Current Year
Developments in Railway Affairs of Hamilton Co.
Uniform Laws Would Be Boon to the West.
Big Export Order for Canadian Paper.
Bank of Ottawa Aided the Nation.
Selling Safety Deposit Boxes to Customers.
The Skidmore Affair (Editorial).
Need for Tariff Commission (Editorial).
Bond Market Has Christmas Lull This Week.
Will Exchange $50 Bond Lots to Uphold Price.
Thrift Organized in Quebec Province.
Money Bylaws More Numerous This January.
Sir Thomas White's Taxation Offer Criticized.
Various Plans Advocated to Stop Fire Waste.
Insurance Tendencies Discussed by Supt. Finlayson.
Important Property Transfers Made in Montreal.
House Shortage Declared to be Only Temporary.
Bank of Commerce Plays Big Part in Foreign Trade.
Bank of Toronto Increased Profit, and Its Service.

Above mentioned are a few of the more important contents of this issue of THE FINANCIAL POST. Send a subscription to THE POST and note its business value to you. Use this form in sending subscription which is $3.00 per year.

The MacLean Publishing Co.,
153 University Ave., Toronto.

Send me THE FINANCIAL POST every week till further ordered. I will pay subscription price $3.00 per year on receipt of bill or you may draw on me for this.

Say You Saw It In Hardware and Metal

FIRST AID IN THE KITCHEN

Tell your customers about Vol-Peek. Tell them how easy the mending of leaky pots, pans, etc., becomes when Vol-Peek is used. No tools necessary. And the mended vessel is ready for use in two minutes or less. Vol-Peek is put up in very attractive display cartons. Your wholesaler can supply you.

H. NAGLE & CO., BOX 2024, MONTREAL.

VOL-PEEK

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

MONTREAL

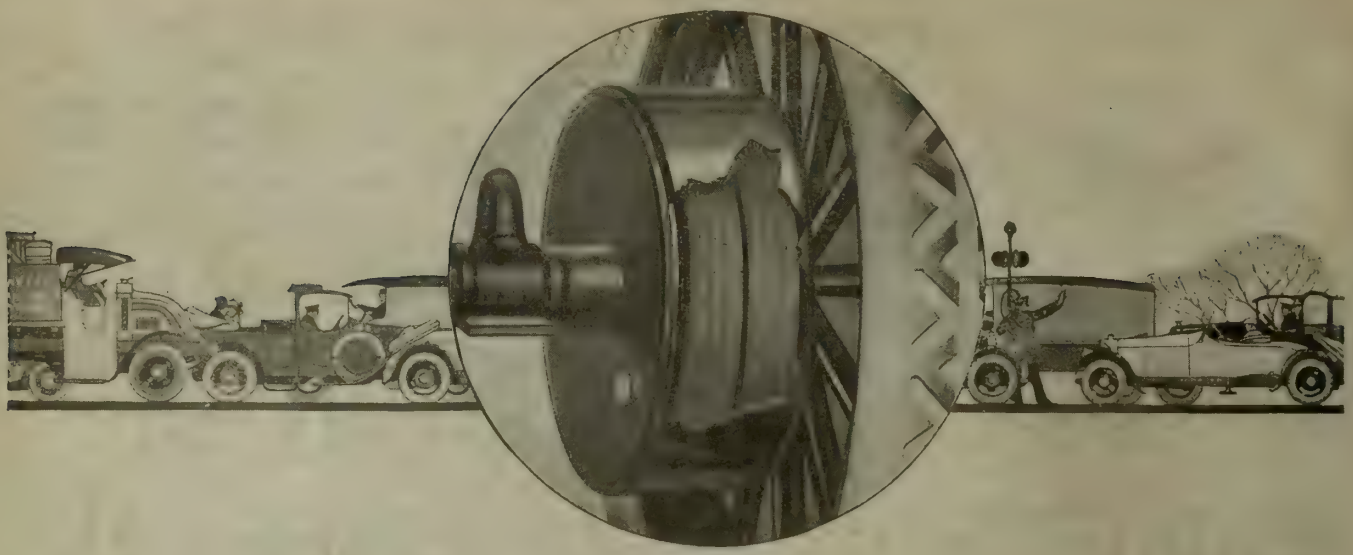
Established 1888

The Year 1919 will be the Greatest Paint Consuming Year in History

With peace assured, construction work, which has been at a standstill for some time, will be revived. Home-owners who have put off painting during war times will now be ready to use paint. Good paint, with an established reputation for high quality, will be in greatest demand.

MARTIN-SENOUR PAINTS AND VARNISHES

MADE IN CANADA—SOLD ON MERIT



are known throughout the length and breadth of Canada — through years of service they have established a reputation for *High Quality* that is second to none. The merchant, therefore, who carries in stock the Martin-Senour full line will be in the best position to take care of this increased business.

The Martin-Senour publicity campaign for the coming year will be on a larger scale than ever before and will include newspaper and magazine advertising, mailing campaigns direct to consumer, poster showings, painted bulletins together with many selling helps in the way of window trims, show cards, outdoor signs, etc., that are very helpful to the dealer.

If you are not already with us, drop a line at once for full particulars. Do it now.

PIONEERS OF PURE PAINT

12,000,000 brake bands

Why your brake lining business will be bigger in 1919 than ever before

THE coming year will be the biggest year ever known for the sale of brake lining. According to offical registration figures there will be approximately 6,000,000 passenger cars and trucks in service which have been run at least one season. The brake linings of these cars are worn and the owners of every single one of them is a prospect for new brake lining. Altogether 65 million feet of brake lining will be needed.

Here is an opportunity for you to increase your business. Make these winter months, ordinarily so dull, pay you a profit. Get a list of the cars in your territory. Go after the owners hard this month and persuade them to have their brakes relined before the season opens.

We are backing up your efforts by starting our big spring advertising drive in all the leading publications. We are convincing these 6,000,000 owners of the need of new brake lining and the value of Thermoid We are showing them the difference be tween Thermoid Hydraulic Compressed Brake Lining and the ordinary woven kind.

Start right away to get your share of this big market. Recommend Thermoid Hydraulic Compressed Brake Lining to every customer. Thermoid will build good-will for you by giving your customers longer, surer service.

Every foot of Thermoid which you put on is backed by ***our Guarantee: Thermoid will make good—or WE WILL.***

THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE: TORONTO, CANADA

January 11
1919

THERE'S always plenty of use for a handy, reliable Remington UMC .22 Rifle and metallics about every house. Small game and good sport at the targets is always available. Suppose you make a display and see the business it will pull. Another thing—many an old-timer broke into the shooting game with Remington UMC .22's—they'll take as keen an interest in it as the boys, and probably help many a boy to an outfit. We can send you some nice window material.

Remington U.M.C. of Canada, Limited
WINDSOR, ONT.

Face the New Year With Confidence

As a Hardware merchant, you must look forward hopefully to 1919 business.

Some of the restrictions which have hampered you so badly during the war period have already been removed—others are about to be rescinded. Before the close of 1919 it is almost certain that your buying and selling will be quite untramelled by "Orders-in-Council."

The War's insatiable greed for steel is past. The products of the mines and blast furnaces will go into the manufacture of merchandise—such goods as you have not been able to buy satisfactorily for months past.

Then, consider the demand for hardware that has been accumulating during these war years. Much necessary building has been deferred, on account of the scarcity of labor and material. It will go on now, and every new building erected or old one repaired means more business for you.

Altogether, dealers in hardware have every reason to feel confident of the immediate future. But your own confidence should be passed on to others. In the weeks to come see that your store radiates hope and cheer. Train every member of your staff to take all possible opportunities of "cheering up" your customers and generating in them the same confidence that you yourself possess.

You know what the effect would be if half a dozen friends in succession told a healthy man that he looked sick? In a short time he would really **be** sick.

You know the effect on business if a few retailers made it a point to talk to their customers in a doleful strain about the unsettled condition of Russia? That would help to unsettle conditions right here in Canada.

It is your plain duty to speak confidently of the future. Do not let up in your selling efforts, but rather redouble them, because it is becoming easier for you to keep up your stock.

And do not forget that every customer you have is using or should be using

O-Cedar Polish

Every time your front door opens or your phone rings, there is a chance for you to sell O-Cedar. There's good money in every sale, so do not let any of this business get away from you.

UNIVERSAL ELECTRIC HEATING PAD

For Homes Wired With Electricity

Hot Water Bottle Comfort with the annoyance of Constant Changing left out

A HEATING PAD OFTEN SAVES A DOCTOR'S BILL

Do not wait until Influenza and Pneumonia, which have spread their destruction of life from one end of the country to the other, reach your very door before you find a means which will help stamp out this dreadful disease from your homes.

The UNIVERSAL Heating Pad will help a great deal towards the relief of that starting cold, which is the foundation from which the influenza starts.

The use of the Heating Pad when chilly or whenever an ache or pain starts will often check it before it develops into a cold which at this time is pointing to this dread disease.

The UNIVERSAL Heating Pad will help toothache, headache, backache, sprains or bruises. Ready relief is obtained by using this Pad, which is a stitch in time when trouble of this kind arises.

The only 3 Heat Electric Pad which positively maintains the temperature on each degree of heat, the changes being made by a simple pressure of the finger, can be changed in the dark.

This Pad is ideal for sleeping porches. It weighs but fourteen ounces, is covered with gray eiderdown and can be folded, laid flat or wrapped around any part of the body. Nowadays the finest of arts is to keep fit, so give this wonderful Heating Pad a chance to do its Bit for you. See your UNIVERSAL Jobber to-day, he always has a supply on hand to meet your demands.

Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew

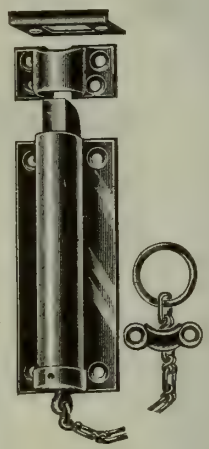
No. 88
Adjustable Storm-Proof Door Hanger

It would be a false assumption on the part of a Hardware Dealer to suppose that a customer buys such a thing as a Door Hanger on its good appearance only. But when **"good appearance"** is combined with **"good qualities"** and necessary features to make that Door Hanger just the thing he is looking for, then you can understand his preference. That's exactly how our **No. 88 Adjustable Storm-Proof Door Hanger** makes sales for the Hardware Dealer.

The fine appearance of a **No. 88 Adjustable Storm-Proof Model** in your store will arrest your customers' attention and the very simple and easy manner in which the two special adjustment features can be operated will create a desire to buy. This type of hanger is manufactured with the same painstaking care common to all **"National Products."** Has many features unknown to other makes and a reputation for service back of it that's your guarantee of many sales.



Write us for further information.

NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was

CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.
HAMILTON, CANADA.

VICTOR HACK SAWS Get a Box and Try 'em

Starrett Hack Saws

The Kind You Should Sell---

because they have more stamina, "punch" and endurance. The blades are of the finest tempered tungsten steel with milled teeth, properly set; flexible or hard backs. They can take a lot of punishment without calling "halt" or breaking down.
Show your customers that these are the true economy saws because they give the maximum of service with the minimum of cost.

Send for Catalog No. 21MA

LITTLE WORDS WITH BIG MEANING

Quality

According to "Webster," Quality is "an excellence of character; natural superiority."

Service

Webster's definition of "Service" is; "The performance of labor for the benefit of another."

We use these words advisedly—fully understanding their definitions—and realizing the obligation we place upon ourselves by their continued use in connection with our products of Iron and Steel, and our attitude to the people we serve.

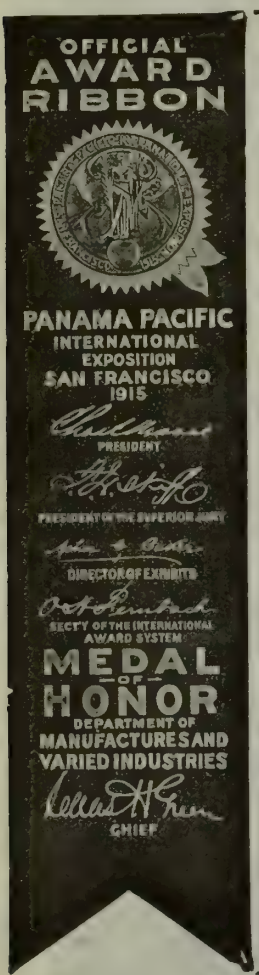
Williams' "Agrippa" Tool Holders

FOR nearly half a century we have been designing and making drop-forgings and drop-forged tools. Our trade-marks, "Vulcan" and  and "Agrippa" are known throughout the world wherever machinery and tools are used; they represent our constant endeavor to maintain and improve quality—to put *Superior* into our product—to make it individual and worthy of the high standard long established for Williams' goods.

Williams' "Agrippa" Tool Holders are a case in point. They embody all the improvements in design, material and practice suggested by experiment with former models. No pains or expense that will add to their efficiency is spared in their manufacture. Many of their features are unique and make for economy and convenience. A full line in a wide range of sizes is carried for various classes of work, including



Turning	**Boring**	**Threading**
Planing	**Cutting-off**	**Knurling**
	Side Work	

These tools, as well as Lathe Dogs, Clamps, Caliper Gauges, etc., are all described in our Machinists' Tools Booklet—free on request.

D.S.S.

Doctor of Sick Systems

If it were customary to confer titles upon Hot Water Heat Generators this would be a most fitting one for the

KNICKERBOCKER AUTOMATIC HEAT GENERATOR

That's exactly the service it performs. Puts the poor, sluggish circulating, fuel wasting, Hot Water Heating System upon an economical, comfort producing basis.

There must be numerous Hot Water Systems in your locality that are not just **"up to scratch."** A radiator here does not heat well or a radiator there seems too small. On one system the piping may be wrongly installed with resultant slow circulation over the whole system; on another the boiler may be at fault—being underrated for the size of the system.

These and many other difficulties can be overcome by installing a **KNICKERBOCKER AUTOMATIC HEAT GENERATOR. It increases radiation 25% to 50%. Saves fuel and produces a better working system.** The only Automatic Hot Water Heat Generator operating on either a closed or open system.

Many Retailers Favor Standardization

Lots of Room For Curtailment of Unnecessary Lines Say Dealers—Up to Manufacturers to Take the Lead, Says Member of Galt Firm

VIEWS given to HARDWARE AND METAL by various retailers indicate that many of them are in favor of continuing the policy of standardization which was adopted during the war. In their opinion it makes for better and easier selling and they point out that from the manufacturers' standpoint it should lessen the cost of production.

"I think the policy of standardization that the stove manufacturers have undertaken is a mighty good policy and I sincerely hope that they may continue it," said J. C. Wanless, of Chatham, Ont. "I really believe it will enable us to sell at least as many goods with considerably less money invested. I believe many other lines can be worked along the same way, having in mind the paint proposition. It is a certain fact that our investments in ready mixed paints have been heavier than has been necessary and for our trade the manufacturers have wiped out a lot of unnecessary colors, showing to my mind rare judgment in their selection."

Up To Manufacturers

That standardization is a good thing for the retailer but that it will have to be carried out by the manufacturers as a unit to be a success, is the opinion of Messrs. John A. and "Dick" Fraser, the younger members of the Fraser Hardware Co. of Galt. One reason they gave for the necessity of the manufacturers taking the necessary action was that as long as there is the wide variety of articles there would be the demand, and if one firm did not carry a certain variety, another would, and then there was the competition.

"It is a most timely subject this and worthy of a full discussion, but to be a success it would have to have the unanimous support of the producer," said J. A. Fraser.

Too Many Patterns

"While it is a very big question it no doubt could be carried out very successfully to the benefit of both the retailer and manufacturer," said Richard Fraser. "For instance, there is positively no need for the great variety of cutlery and pocket knives. I was talking to an American traveller the other day who said that they had 1,400 odd lines of knives, but that they were reducing as a result of the war the number of lines by 75 per cent."

This one example of where standardization would be beneficial to both retailer and manufacturer reminded J. A. Fraser of the cutlery market and he remarked: "In this connection I might mention the new lines of cutlery brought out every year by the firms, instead of their standardizing their good lines. These are kept in open pattern and every year there's a new line added and it is advertised through the papers until there is a demand and the result is that in a few years a dealer has a shelf full of broken lines. This is a wonderful chance for standardization, as the cutlery market is now swamped with patterns."

Favors It Generally

T. A. Keating, manager of the Bond Hardware Co., of Guelph, Ont., expressed himself as being very much in favor of other lines of hardware as well as stoves.

"I have not handled stoves for some time," said W. F. Macpherson, of Prescott, secretary of the Ontario Retail Hardware & Stove Dealers' Association.

"Regarding other lines such as finishes on builders' hardware and number of designs manufactured there was much room for curtailment and I hope that the varieties for the future will be fewer. This also will apply to dropping of different colors of paint. I trust that the plan the paint makers had agreed to on that score will be carried out."

"There is no doubt in my mind that there have been, and are yet, too many styles and patterns of many lines manufactured, for instance stoves," said D. A. MacNab of MacNab Bros., Orillia, Ont., president of the Ontario Retail Hardware and Stove Dealers' Association. "Why all different styles and sizes? In paints, there have been too many shades and too many about the same color, and also many other lines. If the sizes were concentrated it would be a boon to dealers, as they could carry a larger stock of the goods and yet not be loaded up to the extent they are when it is necessary to carry the same thing in so many different forms. Standardize and concentrate."

Can They Continue

A wholesale hardware dealer discussing the situation, stated that there is no excuse whatever for a great number of the sizes and styles, yet he questioned whether after a short time the lines that have been eliminated will not only all be replaced, but others added.

"The manufacturers are to some extent to blame for this," he said. "In their efforts to outdo one another and offer the public something new, they have disregarded caution in many cases. As a result there were innumerable sizes and styles manufactured and the travellers talked retailers into stocking them. In many instances it was unquestionably poor business for the merchant. Half the styles, in many instances a quarter or one-fifth, or even less, would have been ample to take care of all their needs of his trade. Many retailers welcomed most warmly the cutting out of a lot of these goods. A great many merchants have, owing to opportunities offered by the scarcity of goods in the last two years, cleaned out stocks, which under ordinary conditions would have been very slow moving. Many of these merchants will not be so easily talked into buying a lot of unnecessary lines again. Notwithstanding this, it is very likely that within a comparatively short time manufacturers will begin to vie with one another in making something a little different and endeavoring to market it."

Stove manufacturers have already intimated that they are going to continue the policy of standardization they decided on some months ago. Many other manufacturers are considering working more or less along new lines. This may only be a temporary situation. If they find retail hardware dealers will handle new styles it is likely that sooner or later they may change their minds. As a retailer, how have you found standardization to work out? Does it make for better business and easier merchandising? Send in your views on the matter to the editor of HARDWARE AND METAL. It may help considerably in influencing the decision of manufacturers.

Says "Cash" Plan is Best For All

Manager of Alberta Hardware Firm Tells Results of Important Business Change Made Six Weeks Ago—Holding All Customers Because Firm Can Make Better Prices Than Competitors

ON December 2 the B. F. Morris Hardware Co., Ltd., of Leduc, Alberta, put its business on a "cash basis." The firm was asked for its comments after the plan had been tested out for a month and here is what H. D. Strong has to say:

"The new plan is working out to our entire satisfaction. We are also thoroughly convinced that November or December is the right time to put a business on a cash basis. At that time the farmer has money and is at no inconvenience to pay cash for his goods.

"Since going on a cash basis, our collections for past due accounts have been exceptionally good, as it provides a motive for our customers to get all accounts fixed up. We have had no trouble with any of our customers. We have had two or three instances of men who had to go without the goods on account of not having the money, but in each case they have returned and paid us cash for the goods. When turning on to a cash basis we immediately remarked our staple lines of goods in order to make it worth while for a customer to pay cash. If a man went to another store he invariably found that he could do better with us for cash and naturally came back to get the goods.

Let Customers Know

"About ten days before going on a cash basis we began preparing the general public for the change of methods, and forwarded to each of our customers a circular giving details. We also placarded our windows and the public places in town with large posters such as were reprinted in a recent issue of HARDWARE AND METAL. Inside of our store we have about thirty large cards nicely lettered bearing different wordings concerning our cash system.

"In conclusion we might say that we thoroughly believe that no hardware merchant in any country town can make a success of the hardware business on the credit plan. More especially where the competition is strong and consequently margins of profit very small."

The Circular

The following notice was sent out by the firm to its customers:

TO OUR CUSTOMERS

Leduc, Alberta, Nov. 23, 1918.

Since commencing business in Leduc we have been constantly on the lookout for a better way to serve you both with price and quality.

Under our present system of doing business we cannot possibly give better prices and still stay in business owing to the fact that too much money goes on the books, making unnecessary work and expense. The merchant who has from ten to twenty thousand dollars on his books must naturally use that much more money to run his business and, therefore, has interest to pay on that amount. Unless the merchant is exceptionally wealthy, this condition makes it impossible for him to buy for cash. We can buy better when we pay cash, and so will you be able to under our new money-saving plan.

There is a very important point at issue in the proposal made by the railways recently. The statement given below presents a most interesting sidelight on the situation. Other hardware firms and manufacturers may have had experiences with the railway companies which would not only make interesting reading, but would give the committee investigating some splendid facts upon which to work. If you have any information bearing on this matter send it to the Editor of HARDWARE AND METAL.

On and after December 2 no goods will be allowed to go out of our store unless they are settled for either by cash or a bankable note bearing interest. We will not keep any books; all will be treated alike.

Remember—When We Buy Better, You Buy Better

We are not doing this because we mistrust you, but in the best interest of yourselves and ourselves. Our prices will be reduced on practically every line of goods from five to twenty per cent., which will naturally make your dollar go further.

The prices will be marked plainly so that you can see them, and a visit to our store will quickly show you that it pays to deal with us on our new money-saving plan. We have given good prices in the past, but from now on they will be still better by the new method.

We thank you for your business in the past and hope that we may be favored with your future business, which we are sure will be to our mutual benefit.

Yours for business,

B. F. Morris Hardware Co., Ltd.

OPENING IN JAPAN FOR CANADIAN GOODS, ESPECIALLY IRON AND STEEL

CANADA'S opportunities for exportation of iron and steel products and automobiles, and practically all manufactured articles, to Japan, are outlined in a letter received by Industrial Commissioner Sclanders, Windsor, Ontario, from the Canadian Trade Commissioner, Yokohoma, Japan.

"Japan," he says, "is branching out widely into the industrial field, and is rapidly assuming the position of a competitor of the Canadian and American manufacturers. However, owing to a lack of ore Japan will be dependent upon North America for iron and steel, and this presents a great opportunity for Canada, if taken advantage of, immediately."

Regarding the automobile market in Japan, the Trade Commissioner says:

"If companies can ship good Canadian made automobiles to this country there is no better time to tackle the market than the present. On account of the sudden prosperity of this country during the war, wealthier classes are purchasing automobiles which, for the most part, are coming from America. There are probably more Buick cars here than any other and I certainly would be glad to see McLaughlin cars coming in also. Perhaps when the new plant at Walkerville is completed they will be able to do so."

In spite of the war, he says, Canada has greatly increased her business in Japan during the past few years.

PREDICTS GREAT FUTURE FOR IRON

In an address before the Staffordshire (England) Iron and Steel Institute G. Carrington, its president, spoke with enthusiasm and conviction of the great future which he predicted for iron. He dwelt upon the greater suitability of iron over steel for sheets, whether black, painted, or galvanized, as generally conceded, its life being fully five times that of steel. Even in present conditions, Mr. Carrington said, iron is ousting steel for railway and colliery work, ships' decks and hatches, and where there is exposure to severe weather or to acidic liquids. Then there are plates, girders and bars for bridge building and constructional and agricultural purposes, and particularly for ships, and Mr. Carrington expressed the conviction that, given the material at a reasonable price (not the same price as steel, because it will always command a better price for these purposes than steel), we shall in our time see the all-iron ship.

Are the Railways Playing "The Hog"?

Montreal Hardware Firm's Experiences Would Indicate That Companies Are Asking Manufacturers and Retailers to Adopt a Policy That They Are Not Following Out Themselves

THAT the proposal of the railway companies to make all shippers pay cash has another and a very interesting side is shown by the following letter. It would indicate that the railways, or at least one of them, while demanding cash from wholesalers and retailers, are not prepared to pay cash for goods purchased. As stated in former issues of HARDWARE AND METAL the railways planned to demand cash from all shippers on January 1. The proposition as outlined by them raised so many protests that a meeting was held in Toronto recently at which manufacturers and others made counter demands. These were outlined in HARDWARE AND METAL of December 28 and resulted in the plans of the railways being postponed until March 1. In the meantime a committee of manufacturers and other shippers will go into the whole question thoroughly and are expected to bring in recommendations that may result in some important modifications of the original proposal. These, it is expected, will be much less drastic as far as shippers are concerned.

Says It Is Unjust

The views of the James Walker Hardware Co., Limited, of Montreal, will be sent to the committee which is investigating the railway's proposal. Their letter follows:

HARDWARE AND METAL,

Dear Sirs,—I note that your journal has been touching upon the question of the railway demanding cash on freight shipments and it appears to me as being, without exception, the most one-sided, unjust proposition that I have come across in a long time. Contrast demands in connection therewith, with their own methods of financing, that they expect the public, through the commercial houses, to do all their financing for them. To-day the requisitions that are sent to the various manufacturing houses for quotations clearly state that you are to make your quotation on the basis of 2% 30 days or net four months.

Makes it Worse

To make conditions worse there is, from our own experience, a lack of coordination between the purchasing and treasury departments, with a result that instead of giving four months (for the railways have stopped discounting their invoices) the time is extended to six and seven months. The reason for this delay seems to be the difficulty of forwarding the invoices from the purchasing department for payment — whether this is intentional is beyond us to say, but I feel confident that all concerns doing business with the large railways will stand witness that such is the case.

Our own experience is, that when we correspond with the treasury department the reply is made that they have issued cheques for all invoices that have been vouchered through to them. We then take it up with the purchasing department, and they claim that they have vouchered everything or else ask for duplicates of invoices, thus gaining additional time.

Refused To Accept

One railway system became so bad in their payments that we not only stopped soliciting but refused to accept business from them. The two main railway systems have been notified by us (it surely took some nerve for a concern of our standing to do so) that our regular terms were 2% 30 days, net 60, and that all our quotations were made on that basis and that we could not consider their terms for one minute.

We would welcome concerted action on the part of all manufacturers and merchants whereby we could force railroads to be as businesslike as other concerns, and to stop demanding from us what they are unwilling to give themselves. We hope that your paper will take this up very vigorously and that further, some of the larger merchants and manufacturers will follow the lead of our concern and insist that reasonable terms be put into force or else quotations will not be made.

Yours very truly,
THE JAS. WALKER HRWE. CO., LTD.
F. Max Hill.

INCREASE BUSINESS 100 PER CENT. IN 1919 IS AIM OF WALKERVILLE FIRM

PREPARATIONS for the biggest year in their history are being made by the Walkerville Hardware Company, wholesale and retailers, Walkerville, Ont. With the return to normal conditions, and resumption of the manufacture of pleasure and passenger cars by the many industries located in the Border Cities, and the developments in the various housing schemes now under consideration by the City Council, Chamber of Commerce, Real Estate Board and the Government, a brisk business in all lines is anticipated.

Plan Big Increase

Agency for all the Goodyear Rubber Company's products in Western Ontario, west of London, is controlled by this company, and in keeping with their policy for the past four or five years, an attempt will be made to increase their business by one hundred per cent. during 1919. Where the aggregate sales of mill and factory supplies, truck, cord, automobile, bicycle tires and tubes, accessories, repair material, hose, belting, and Neolin products as well as high-power belting, in 1918 amounted to $125,000, business involving double this amount is expected during the coming twelve months.

Loss is Offset

Cancellation of war contracts has, to some extent, indirectly affected the sale of high power belting, but this loss is compensated in the increased demand for other rubber, and semi-rubber products, brought into demand with the corresponding increased output of automobiles and other domestic products.

Sales of stoves have been retarded by the open winter, and paints and brushes have been moving slowly also.

"We are exceedingly optimistic regarding the outlook for the hardware business in Canada and particularly in the Border Cities during the coming year," declared manager J. R. Coate, to HARDWARE AND METAL. "With the resumption of normal business conditions, the construction of homes to meet the housing shortage, there will be a consequent heavy demand for practically all lines of hardware, and we are preparing to meet it."

Got the Money For Accounts 9 Years Old

A new schedule of commissions has been announced by the credit collection department of the Border Cities' Retail Merchants' Association, which, since its establishment has accomplished splendid results. In future, accounts outstanding one year or less will be collected at a cost of ten per cent.; two-year accounts at 15 per cent., and over that time, 25 per cent.

At this week's meeting Secretary T. C. Ray, who is in charge of this department, distributed checks aggregating $621, representing accounts, which, in many cases, had been regarded as hopeless by the merchants who turned them over to the credit department. A number were from five to nine years old.

WAS FINED $50 FOR FALSE ADVERTISING

AN interesting case was decided in Toronto when Edward Tully, charged with using false advertising matter in connection with the sale of shaving sets, was convicted and fined $50 and costs or thirty days in jail. An advertising card in a window on Yonge St. announced that a $5 shaving set was on sale at 98 cents. The police got busy and in court it was claimed that the real worth of the set was 98 cents. Tully, it is claimed, admitted to the police that he bought the sets for $9 a dozen.

"The point is," said Magistrate Kingsford, "that the advertisement said this was a $5 set whereas it was only worth 98 cents. I fine Tully $50 and costs or thirty days."

Joseph Tully, a brother of the accused, selling the same outfit in another store, avoided a conviction by having the words "$5 Value" on his advertising card.

MAY BE BIG BUSINESS IN SPORTING GOODS THIS YEAR

"ORDERS with us for fishing rods must now be placed at least four months in advance," writes a British firm manufacturing these goods. "In consequence of the war our depleted staff cannot cope with the mass of orders we have in front of us." This is merely another indication of the business prospects for sporting goods. Manufacturers are expecting that, as a result of the outdoor life they have been leading, thousands of men will be more than ever interested in shooting, fishing nad other outdoor sports. This, they declare, means a big opportunity for hardware dealers. Many firms state that this winter they have sold more skates than ever before.

FIRST DROP MADE IN HIGH EXPLOSIVE PRICES

AS a result, it is stated, of raw materials being available at lower prices, a drop is announced this week in the prices of high explosives which are used extensively in mining operations. This is the first drop made in powder prices since the signing of the armistice and it is stated to HARDWARE AND METAL that no further change is expected for some time. The new prices are from one to two and a half cents a pound cheaper than formerly. The high velocity powders used for sporting purposes are not affected by the price change. It is stated that a big development is looked for in mining all over Canada and that the demands for high explosives will likely be very large.

STEEL MILLS TO FIGURE ON RAILWAY CONTRACTS

IT is reported this week that Canadian steel mills are about to figure on rather large tonnages for Government railway work. Such orders would be very acceptable just now as there is not a great volume of new business offering yet. A new list of prices for scrap material given out this week shows an all round reduction that will amount to an average of about thirty per cent. Reports from Montreal indicate a slight revival in the demand for machine tools, particularly from the railroad shops. According to the latest news from Pittsburgh, a decline in steel production is looked for there. Some experts believe this may run as high as 40 per cent. of the high mark recently attained. It is not thought that steel prices in Canada will be at once reduced to meet the cuts announced across the line. Many warehouses have stocks on hand that cost them much more than the present base prices. Holders of such stocks are running it off at prices very close to their actual cost figures. "Every price concession made now," says *Canadian Machinery*, "has a tendency to reduce the list of those waiting for lower levels before making purchase. This means that buyers and sellers are getting closer together."

MANY SALES CONFERENCES WERE HELD THIS WEEK

CONFERENCES attended by travelling salesmen, department heads, and buyers have been held by many firms this week. A rather important feature in which this year's conferences differ from those of former years is that there is little new merchandise, that is new styles or types, to be discussed. This is one of the important results of the general policy of standardization which went into effect as a war measure. The discussion of new lines was often an important feature at former annual sales conferences. This week, however, there was another feature that occupied just as prominent a place and occasioned just as much, perhaps more discussion and that was the outlook for business, trend of prices, question of delivery, export business and best methods of merchandising during the next six months. It is rather an important fact to note that the impression at the sales conferences was that business will be good. The road men will go out, it is stated, with a feeling of confidence and with every prospect for a good year.

BUSINESS PROFITS TAX YIELDS OVER $65,000,000

THE total amount of assessments made under the Business Profits War Tax Act to date is over $58,000,000, of which over $54,000,000 have been collected. It is estimated that by the end of the present fiscal year about $65,000,000 will be realized. This is more than double the estimate made in the budget speech in which the Business Profits War Tax Act was introduced.

MAY MAKE CHANGES IN FIRE INSURANCE RATES

IMPORTANT recommendations in regard to insurance rates and matter in connection with the regulation of the fire insurance business generally are expected to be made shortly by Mr. Justice Masten. He has returned from New York after conferring with a number of officials. Some time ago he was commissioned to make a full investigation into the fire insurance question and his report and recommendations will likely be presented to the Ontario

Government in time for any changes which it may be decided to make in the present legislation. The enormous losses which have been sustained by the fire companies has been a subject of much discussion and measures aimed to reduce these to a minimum may be undertaken.

WOULD ASK COMPANIES FOR DETAILED REPORTS

ON the ground that many companies are withholding from the public important details which individuals have a right to know a move is under way to have full reports made. In some quarters a plan is favored by which the statements submitted to the Government in connection with the business tax should be presented to the shareholders and to the public. The allegation is made that people may be paying higher prices for some products than are justified and also that the profits of some firms may be larger than are submitted, thus resulting in an injustice to shareholders.

TIN LOWER IN LONDON HARD TO GET LICENSES

WHILE the London tin market has been registering declines for some time past, it appears to be impossible to get license permission to import. This is the result of the Government's desire to have supplies further cleaned up on this side of the Atlantic. It therefore is necessary to adhere to the basis more closely as applying at present, for, if importers were able to get supplies forward from the London market they could quote on the basis of London price plus carriage and usual changes. It is just a bit uncertain when the restrictions will be lifted. In the meantime prices have held up fairly well and undoubtedly will not show stiff declines until import is permitted.

GARDEN TOOLS NEEDED IN DEVASTATED EUROPE

IT is expected that large purchases of garden tools for France, Belgium, Roumania and other European countries will be arranged for in Canada shortly. Already a number of inquiries have been received and it is expected that the special commissions representing the various Governments will complete the details of arranging for the necessary supplies before long. As a result of the German invasion in many of the best agricultural sections of the war zone practically not an implement of any kind suitable for farming or gardening remains. In order that the people may resume cultivation of the soil as quickly as possible and become more or less self-sustaining it will be necessary to provide them with tools and implements. Premier Borden, it is stated, and the Canadian Trade Commissioners have this matter in hand with a view of securing a share of the business for Canada.

TURPENTINE SUPPLIES GETTING LOW IN SOUTH

LATEST reports from the South in regard to turpentine are as follows: "Approximately 92½ per cent. of the turpentine crop had been marketed at the close of the year.

"Turpentine has been gathering strength for some days. Receipts are getting down to the lowest level known in many years for the last three months of the season and conditions altogether play in favor of a bull movement, stocks being strongly held. True, there is the old threat of a use of cheaper commodities that can be substituted for turpentine, but experience in former years has demonstrated that there is a considerable quantity of turpentine consumed in this country even when it gets between 65 and 70 cents."

Current Events in Photograph

POURING BLISTER COPPER FROM A BIG CONVERTER

The photo shows the molten metal being poured into a casting ladle after separation from the nickel. This is part of the process of refining that goes on at the huge new plant of the International Nickel Co. of Canada, Limited, at Port Colborne. Canada controls the nickel output of the world and the Port Colborne plant which has only been in operation a short time was the first refinery built in the Dominion.

EDITORIAL COMMENT

BRIEFS

GOOD business policy: buy wisely, pay promptly, sell prudently, collect systematically.

* * *

GOOD WILL is an option on opportunity. Maintaining good will is one of the surest means of building a steadily growing business.

* * *

ASSOCIATION with fault-finders is generally harmful to a business man. It often narrows his view and lessens his confidence in himself.

* * *

STOPPING an advertisement to save money is like stopping a clock to save time. Advertising is an insurance policy against forgetfulness—it compels people to think of you.

GOOD NEW YEAR RESOLUTIONS

IF you make the following a part of your business programme this year, you will tackle every problem with a vim, your mind will be free and you can look for a fair measure of success:

Don't fail to make collections promptly.

Don't fail to maintain your credit standing.

Don't fail to keep your business engagements promptly.

Don't fail to read your trade papers.

Don't fail to keep your name before the public.

Don't fail to keep a bright sign before your shop.

Don't fail to do as you advertise to do.

Don't fail to introduce new lines worth while.

SECOND HIGHEST ON RECORD

RETURNS just completed show that the loss by fire in the United States and Canada during 1918 reached the enormous sum of $317,014,385. With the exception of 1906, when the catastrophe at San Francisco brought the losses up to $459,710,000, 1918 is the highest year on record. The losses were greater than in 1917 by fifty millions. While this increase is very large it is to some extent due to the higher values prevailing. The whole question is a most important one for merchants and manufacturers as well as for the general public. Every fire loss and all insurance that has to be paid directly, affects every individual pocket. This is not generally realized. Nor is the importance of stopping this enormous annual waste appreciated. Drastic action by the Fire Underwriters and more stringent legislation before long will, it is expected, do much to check this huge unnecessary loss.

NOT SO SLOW AFTER ALL

BRITISH manufacturers who have been working to their utmost capacity for over four years on war products are turning to peace production with a rapidity that is causing those who are inclined to regard John Bull as slow going to sit up and rub their eyes. Here are just a few of the reorganizations already well under way:

Three munition firms at Leicester, Ilkeston, and Nottingham are taking up the manufacture of hosiery needles, which in pre-war days were practically entirely imported from Germany, and they hope to turn out a million, and later on two millions a week. Three Loughborough firms are devoting themselves entirely to the manufacture of hosiery bearded needles, heretofore imported from Germany. A Leicester firm which before the war was engaged in importing typewriters and selling and repairing them, now proposes to manufacture them. Another firm in the same town which formerly made vulcanite pressings for magnetos will now make fountain pens, which were imported from America before the war. A third Leicester munition firm is laying out plant for producing hose-suspender fittings, which in pre-war days were almost wholly imported from Germany.

In the munitions area of Hebburn-on-Tyne a firm previously engaged in the manufacture of areoplanes is turning over to the manufacture of heavy toys and furniture, giving employment to 500 people. A Newcastle-upon-Tyne firm from producing aeroplanes is turning over to household furniture making, and will give work to 500 people. Another firm in the same town is changing from guns to the building of locomotives, a new industry, which will find employment for 5,000 people. A firm at Burnley which was manufacturing fuses is turning over to the manufacturer of electric fittings. At Leigh, in Lancashire, a firm is going to produce presses for brickmaking, and it is estimated it will employ about 1,000 persons. A Sheffield firm is turning over from the manufacture of shells to files and springs, and expects to employ 1,000 persons. At Leeds one firm will cease to make steel pressing for mines and copper

bands for shells and make dairy utensils, while another which was engaged in assembling aeroplanes will devote its buildings to the making of iron valves as an adjunct to their brass valves department. One Birmingham firm is changing from the production of fuse components and aeroplane parts to the manufacture of motor accessories.

These are merely a few instances and show that John Bull is not only out to get a great deal of the trade the Huns lost, but to extend his markets in all parts of the world.

RESULTS OF THE FLU

WHILE everyone has been aware of the seriousness of the influenza epidemic and the wide area swept by the scourge, the actual figures bring home the enormous losses as nothing else can. Up to January 1, more than 150,000 deaths had occurred in the United States and Canada. These resulted in insurance claims approximating $75,000,000. Some of the companies have been so busy filing and tabulating death claims from pneumonia that only approximate figures could be given by officials. The losses to some insurance companies have been the greatest in recent years. The loss to business men in Canada has been very great also, not alone from the general disorganization of business, but by the removal of hundreds of promising young men and women whose careers were just commencing.

FOLLOWERS OF THE FAITHFUL HOUND

OUR democratic cousins across the line, are tireless in organizing all kinds of "Exalted Societies" for all manner of purposes. The latest of these is a national Association to be known by the grandiloquent title "The Exalted Society of Order Hounds." The society is to draw its membership from the order salesmen of all branches of commerce and industry. It is of a semi-secret and fraternal nature, and is formed with the intention of developing scientific selling methods and higher ideals in the lives of its members.

With that somewhat strange complexity of character that makes the sturdily democratic plain John Smith of the daytime yearn to be grand high potentate of something or other in his moments of leisure, the society has not only chosen the non-conventional name given above, but have designated their lodges as Kennels, etc., and their officers as: Senior Watch Dog, Junior Watch Dog, Official Growler and Big Barker.

There is a certain uniqueness about the nomenclature, but the ideals of the society are sound and good. Good luck to the apostles of the faithful hound.

WHAT OTHER EDITORS SAY

TOO much caution in the matter of replenishing stocks for the first quarter of the new year is certain to result in loss of profits. It requires no clairvoyance to predict a continuance of present prices for six months at least. The hardware retailer, therefore, who has the foresight to purchase wisely and who does not let himself become panicky under the influence of calamity howlers will be in a position to take care of his trade and to extend his business. The customers of the dealer who is not able to supply their demand because he has not kept up his stocks, will naturally gravitate toward the hardware store of the wise merchant who has an ample assortment of goods to satisfy their needs.—"American Artisan and Hardware Record."

AMERICAN copper producers are quoting a lower rate for shipment abroad than to home consumers of copper. As copper is a raw material of many important industries home manufacturers of copper goods are placed at a disadvantage in competing in the world markets. That is a danger of syndicate selling during the reconstruction period which should be averted.—Toronto *Globe*.

LOCAL drygoods men have decided to close their stores at 9 o'clock Saturday evenings for the balance of the winter. We think this is a move which might well be followed by all places of business in town. The habit of keeping open until 10 and 11 and often later, while in some cases a convenience is often a temptation for people to postpone shopping until the hour is unusually late. The public might just as well do its shopping early and our business people get home to have a needed rest. We would suggest that local business men try the plan for three months at least.—Goderich *Star*.

HARDWARE journals announce a decline in the price of rope, which will be a sinister piece of news for ex-Kaiser Bill when he hears it.—Toronto *Star*.

WHEN Henry Ford adopts a minimum wage of $6 a day for his employees, when a great Canadian store decides to give its employees an entire Saturday to themselves during the summer months, when a large American concern voluntarily agrees to adopt the six-hour day without reduction of wages, can it be said that the world is working toward a less frantic and more harmonious system of existence? At least we can point to these humanitarian tendencies and realize that they will be the things more talked about and more advertised than any other things in the home circles of the workers. And the manufacturers and other employers will not find it such unpleasant reading, if they can realize what a great satisfaction must come through extending positive benefits to a large class of people.—London *Advertiser*.

THE mail order man won't sell the farmer 2 cents' worth of goods on one day's credit no matter how badly the farmer may need the goods or how little ready cash he has to pay for them. If the farmer's house burns down the mail order man is not going to build another home. He will take what cash he can get the farmer to send him and there his interest in the farmer ends. If the farmer has no money to pay for what he needs, the mail order man will find others to help swell the stream of dollars which is building up his great fortune and helping build up the great city in which he lives.—Walkerton *Telescope*.

EVENTS IN THE TRADE

Business Changes

Belgrave, Ont.—J. A. Geddes has purchased the hardware business of Duncan McCallum.

Fort Saskatchewan, Sask.—P. D. Gordon is retiring from the firm of Gordon & Dubuc hardware and the partnership has been dissolved.

Moose Jaw, Sask.—Helliwell & Carter have sold their hardware business to A. J. Silcox.

Obituary

The death occurred at Dutton, Ont., of F. J. Small, hardware.

Walter K. Greenwood, B.A. Sc., aged 37, engineer of the electric and power plants at Orillia, Ont., died of pneumonia, which followed influenza.

The death occurred at Ribstone, Alberta, of P. O. Lawrence, hardware.

Sgt.-Major Walker, formerly accountant with the Steel Company of Canada at Hamilton, Ont., died at the Lake Edward Sanatorium, St. Agathe, Quebec. After enlisting in 1914 he went to England in 1915 but owing to ill health was invalided home. Burial was made at Hepworth, Ont.

Joseph L. Carleton, for many years a valued member of the staff of Foster, Robertson & Smith, Ltd., St. John, N.B., died after a short illness with pneumonia.

Hugh F. Murphy, foreman of the wire mill in the James Pender & Company works, St. John, N.B., died recently.

W. A. Dixon, a member of the staff of W. H. Thorne & Co., Ltd., St John, N.B., before he enlisted in the 26th battalion, who was invalided home a short time ago, died of pneumonia while in British Columbia.

Personals

W. H. Parker, of the Wood Hardware Co., was in Winnipeg during the week on business.

John McClary, of the McClary Mfg. Co., London, celebrated his 90th birthday on January 2.

W. H. Gurney, of the Gurney Glove Co., was elected mayor of Wingham in the election contest of this week.

E. J. Horsman, formerly with Wood, Vallance, has joined the traveling staff of Merrick-Anderson Co., Winnipeg.

W. H. Bartlett and Emerson Knowles, of the St. Mary's Hardware Company, St. Mary's, Ont., who have been ill with the influenza, are much improved.

A. H. Fraser, of Brown, Fraser Co., Ltd., Vancouver, has left for the East, where he will call on manufacturers. He will be away about two months.

John Douglas, hardware, was honored in the recent elections by being returned as reeve of Wroxeter, Ont., for the second time by acclamation.

James Armstrong, of the Armstrong & Robinson Foundry, Orangeville, Ont., was taken seriously ill while on his way to Hamilton and had to return.

J. A. Connor, of Toronto, formerly of London, Ont., for some time division manager of the Canadian Consolidated Rubber Co., Limited, has been appointed manager for Ontario for the Dominion Rubber System (Ontario), Limited.

John J. Foote, assistant vice-president of the McClary Manufacturing Company, of London, Ont., is leaving for Winnipeg, where he will be "Western Executive" for the firm and have supervision of that territory.

W. F. Kelly, Ontario sales manager for the Canadian Tungsten Lamp Co., and the Ontario Lantern and Lamp Co., Hamilton, Ont., left on Wednesday for Winnipeg and Vancouver. He will cover the territory of Frank Down, Winnipeg and Western sales manager of the company, who has been called to England owing to the serious illness of his mother.

Trade Notes

The H. Lambert Company, hardware, has been registered at Montreal.

The J. H. Ashdown Hardware Co. have been holding their salesmen's convention during the past week.

Buller & Brebner, Holstein. Ont., will shortly rebuild broom and handle factory destroyed by fire.

The Western Ontario Electric Co., London, Ont., has purchased the Canadian Electric and Mfg. Co., Ltd.

The Canadian Wood Products Company, Toronto, will erect immediately a $40,000 factory to replace portions of its plant destroyed by fire some weeks ago.

The Flexible Metallic Packing Company, capital $25,000, has completed arrangements to locate in the Border Cities and is now negotiating for a site.

Many inquiries relative to Canadian tariff on articles manufactured in the United States are being received by Dr. J. A. Smith, customs collector. He believes the commercial outlook for the Border Cities, as well as for all Canada, is particularly bright for 1919.

D. M. Poirier & Co., Waterloo, Quebec, tinsmith and plumbing, have dissolved and the business will be continued by Charles F. Poirier.

John Nichol, manager of the Massey-Harris Co.'s branch at Swift Current, Sask., has been transferred to Saskatoon as manager.

The annual conference of the salesmen of the Imperial Oil Company, Eastern Ontario Division, was held on Wednesday, Thursday and Friday of this week in Toronto. The Western Ontario salesmen met in Hamilton on Tuesday, Wednesday and Thursday.

Montreal News

Jas. G. Lewis, vice-president of Lewis Bros., Ltd., has been indisposed for a few days.

Raymond A. Catlin, of Corbin Cabinet Lock Co., New Britain, Conn., was in Montreal this week.

A. T. Black, manager of the Martin-Senour Co., was confined temporarily to the house this week.

O. B. North, representing O. B. North and Co., Ltd., of New Haven, Conn., was in Montreal this week.

F. O. Barber, representing P. F. Corbin, New Britain, Conn., was a Montreal visitor early in the week.

R. W. Pain, sales representative for the American Ring Co., Waterbury, Conn., was a Montreal caller this week.

Jack Bennett, of the retail hardware firm of Bennett Bros., 371 St. Antoine St., Montreal, has just returned from his honeymoon.

H. Fraser, representing Direct Agencies, Ltd., St. Johns, Nfld., and agent there for the Thos. Davidson Mfg. Co., was this week in Montreal.

The sales representatives of Lewis Bros., Limited, Montreal, this week met in convention at the Queen's Hotel under the direction of their sales manager, John A. Fraser.

Jos. Dowling, president of the Canadian Wholesale Hardware Association and manager of Caverhill, Learmont and Co., has been ill for a few days, but is expected back this week.

GOES TO MONTREAL

D. L. Scott has been appointed as manager of the Montreal branch of the Canada Metal Co., Ltd. Mr. Scott comes from the Toronto field, where he has been connected with the sales staff. This company expect soon to move into new and larger quarters in Outremont, in the immediate future.

Municipal Honors

J. M. Dobbie, of the hardware firm of A. G. Dobbie & Co., Brockville, Ont., was elected as councillor.

E. F. Martindale, of the firm of Martindale & Co., Alliston, Ont., hardware, was elected as a member of the town council.

Captain John McKinley, who was elected as one of the aldermen for the Centre Ward in Ottawa is a son of John McKinley, of the firm of McKinley and Northwood, plumbers and hardware.

W. H. Manning, hardwareman of Coldwater, Ont., was elected reeve.

At Stratford, Ont., C. R. Myers, of the firm of J R Myers & Co., hardware, was elected as alderman.

E. F. Earl, tinsmith and stoves, was elected as mayor at Milton, Ont.

Incorporations

Burlington Steel Company, Limited, capital $1,000,000, head office Hamilton, Ont., has been granted a provincial charter and plans to manufacture and deal in iron, steel and copper goods, hardware, tools and implements.

Burns & Roberts, Limited, capital $40,000, head office Toronto, Ont., plan to carry on the business of brokers and dealers in metals and metal goods.

Hartley Foundries, Limited, capital $100,000, head office Brantford, Ont., plans to manufacture and deal in hardware, brass, iron, steel and wood articles.

New Brunswick Notes

James Robinson, of Millerton, is building a lumber mill with a capacity of 60,000 feet daily at Newcastle, N.B.

M. E. Agar has been appointed chairman of the newly constituted committee of the St. John Board of Trade on labor problems.

Peter Campbell, of P. Campbell & Co., St. John, and Mrs. Campbell recently celebrated the fiftieth anniversary of their wedding.

W. S. Fisher, of Emerson & Fisher, St. John, who is an authority on art as well as hardware, has been elected president of the St. John Art Club.

Business men in Charlottetown, P.E.I., are considering the formation of aerial transportation company to provide connection between the Island and the mainland. The project is to carry passengers and mails at first and heavier traffic later as the system would develop.

Building in St. John was very slack during 1918, the total value of permits issued being $351,320. A great increase in building operations, with the natural result on the building hardware demand, is expected when conditions return to something more like normal.

W. H. Thorne & Co., Ltd., St. John, will close their stores at one o'clock on Saturdays, during January, February and March. The hardware merchants were the first to introduce the summer half holiday for retail stores in St. John, many years ago.

John Thornton, manager for the Consumers' Cordage Co., Ltd., has been elected as one of the five commissioners who form the city council of St. John and during his term will devote his entire time to civic affairs.

The new plant of T. McAvity & Sons, Ltd., which has been devoted to shell making, has ceased operations. It is the intention of the company to remove other branches of their business from the older premises to the new plant, but plans for this have not yet been fully worked out.

A handsome gold watch was presented to William F. Knoll, superintendent of James Pender & Co., Ltd., St. John, by the staff recently. The watch was accompanied by an address of appreciation.

The Retail Merchants' Association of St. John has adopted a resolution pledging the support of the merchants in the sale of Thrift Stamps, both as a patriotic duty and for the purpose of encouraging thrift among their customers.

Commercial travelers residing in Fredericton have organized a social club and intend to open a club room which will be at the disposal of visiting commercial men.

J. A. McAvity and W. S. Fisher are among the speakers who will address a public meeting in St. John under the auspices of the Board of Trade in the interests of a peace programme of civic development.

Major Ronald A. McAvity, of T. McAvity & Sons, Ltd., St. John, has returned from the front. He went overseas with the first contingent as an infantry officer, was transferred to staff duties and afterwards secured his transfer to the air force.

Lance Sergeant W. A. Alward, employed with James Penders & Co., Ltd., St. John, before enlisting, has been awarded the military medal for services at the front.

William Bishop, formerly employed with W. A. Steiper, St. John, is reported suffering from gunshot wounds in the head and hand, received in the closing days of the fighting on the Western front.

The International Shipbuilding Company of Rosebank, Newcastle, N.B., which has been engaged in shipbuilding, machine and foundry business, is being wound up by the courts. J. A. Grant, of St. John, and A. A. Davidson, of Newcastle, have been appointed liquidators.

On the eve of his departure for England in the interests of the newly organized Canadian Avro Company, Ltd., S. E. Elkin, managing director of the Maritime Nail Work, Ltd., St. John, received a fine case of pipes from the bond men of the city in recognition of his services as chairman of the St. John district Victory Loan committee.

Will Help Trappers

Canadian trappers are provided with a market for their furs, and manufacturers in the United States are given a new source of supply under an order just issued by the United States War Trade Board. It permits the granting of general import licenses to firms agreeing to report the receipts of furs from sources other than Canada and to hold them subject to the disposition of the board.

Border Firms Going After Italian Trade

Taking advantage of the many trade inquiries from Italian manufacturers and wholesalers, the Wilt Twist Drill Company, Walkerville, Ont., are preparing a catalogue and price list, in Italian, and will send it to all Canadian Trade Commissioners, Boards of Trade, and prominent manufacturers and wholesalers in Italy. An Italian interpreter secured from the Italian embassy in Detroit is engaged in the work.

It is probable that manufacturers located in the Border Cities of Ford, Walkerville, Windsor, Sandwich and Ojibway, will co-operate through the Manufacturers' Section of the Chamber of Commerce in the publication of one large catalogue or a number of separate ones to be published in Italian, and circulated in Italy, as a means of taking advantage of the opportunity for export trade, particularly in manufactured metal products that exists in that country.

War Contractors Ask Settlement of Claims

More than 200 war material manufacturers from all parts of the United States and Canada in an all-day session at Cleveland organized the Association of Manufacturers of War Materials, and will ask Congress to enact legislation which will permit payment by the Government of obligations arising from informal contracts entered into under the stress of war conditions.

Unless speedy discharge of these obligations, aggregating over $1,500,000,000, is made possible, serious disturbance of the country's industrial conditions was predicted.

The manufacturers adopted a resolution recommending the immediate passage of the Dent Bill with necessary amendments to meet the situation; asking Secretary of War Baker to take steps immediately to check the claims of sub-contractors, and urging immediate payment of such amounts as "may clearly appear to be due."

The contractors unanimously opposed the plan of Senator Hitchcock, legalizing the contracts in question, but placing adjustment of the obligations in the hands of a "non-interested commission." They contend the Hitchcock method would interminably delay instalment of their claims.

Regina News

John S. Bates, who returned from overseas recently, has resumed his position as salesman with Armstrong, Smyth & Dowswell.

Peart Bros. have leased their block on the corner of South Railway and Rose street, to Champ Bros., to be remodeled for hotel accommodation.

Frederick Ham, of Armstrong, Smyth & Dowswell, while on holidays at his home in Portage la Prairie, was stricken with influenza and will not be able to work for some time.

Are You Giving Your Advertisements Really Careful Preparation?

THE most enterprising and progressive business men of to-day are advertisers, says the "Free Press," of Forest, Ont.

It's the successful business men that most communities want, for they not only benefit themselves, but contribute largely towards the general prosperity of the place in which they live.

To-day the mail-order houses are more on the alert than ever. They are taking advantage of every opportunity to lure the town and country trade their way, and to a large extent meeting with success.

To offset this the local merchant must be wide awake and equally active in his efforts to induce the people to buy at home. With this point in view he should grasp every opportunity in his reach. He should be as accommodating and obliging as is in his power. The mail-order houses, with their cleverly gotten up catalogues, make it easy to buy—why shouldn't the home merchant make it easy?

And no advertiser need expect results unless he is prepared to carry out his part of the contract. He must take pains in putting his advertisements together. Time spent in writing a good "ad." is not wasted, but it's just here where many a local merchant falls. The tendency is to sling the "ad." together any old way and even to forget to back it up. There is much of education in advertising to be done along this line.

Big business houses pay large salaries to advertising managers. These men realize that newspaper space costs money and spare no pains in the preparation of the copy. If they did their work like some town merchants they'd be fired the first day.

Just keep this thought in mind when writing your next "ad." and consider how it will look when it appears.

Six Day Special Sale Held by Firm at Galt

The Fraser Hardware Co., of Galt, Ont., plans to continue and possibly extend its policy of special sales in 1919. The firm states that these proved most successful last year. This week the firm held a six-day sale from January 6 to 11 and reports it was a big business booster. In the local paper on Saturday in a three-quarter page advertisement the firm announced its sale featuring galvanized ware at old-time prices. One idea of the sale is to dispose of a lot of stock to make room for new purchases and to make a quick turnover, real bargains are offered. In the advertisement practically every article featured in the sale was illustrated and the prices in odd figures stood out prominently. Here are a few samples of the bargains offered: Wash tubs, $1.39, $1.59 and $1.79; wash boilers, $1.69 and $1.89; galvanized garbage cans, $1.29, $1.50 and $1.89; pails from 49c to 99c; Perfection heaters, $5.95 and $6.75; nickel-plated tea kettles, $1.97; Jubilee washing machines, $6.49 and many others.

URGE CANCELLATION OF ORDER-IN-COUNCIL

Retail merchants of the Border Cities of Ford, Walkerville, Windsor, Sandwich and Ojibway, are greatly concerned over the action of the Government in amending Order 2461 under dates of November 10 and 20 making it illegal for anyone to "conspire, combine, agree or arrange with any other person . . . to prevent, limit or lessen the manufacture or production of any necessity of life or to enhance or maintain the price thereon." At an executive session of the Border Retail Merchants' Association this enactment, regarded locally as an example of discrimination against the retailer, wholesaler and manufacturer, and as a product of class legislation, was fully discussed and it was unanimously decided to forward a strong protest to Ottawa, urging its cancellation.

CHALLENGING HUDSON BAY CO.?

Considerable interest has been aroused in Northern Alberta by the following newspaper report:

"Capt. L. L. Lane, who recently completed a long trip through Northern Alberta, announced in Seattle that the Lamson & Howard Co., of Boston, will establish a number of trading posts in the north. They will endeavor to compete with the long established Hudson's Bay Co. Supplies will be shipped to Herschel Island during the coming spring."

FOUNDRY COMPANY REORGANIZED

Reports from Port Huron state that the Romeo Foundry Company has been reorganized and capitalized at $1,250,000 and will continue business under the name of the Holmes Foundry Company. This firm is affiliated with the Holmes Foundry Company of Sarnia, Ont., having the same officers and management. It is stated that the firm has large orders on hand from the General Motors Company. The firm's business has been exclusively the casting of automobile trucks and tractor parts. Land was purchased in Sarnia some time ago with a view of locating a branch factory there and it is rumored this may be proceeded with shortly.

OFF RESTRICTED LIST

The United States War Trade Board has removed garden seeds from the export conservation list. The ruling is now in effect.

GIVEN ACCLAMATION

Honor has been bestowed on a Kingston hardware man in the person of Frederick Simmons, a member of the firm of Simmons Bros., who was elected as alderman by acclomotion for Cataraqui ward, which he has represented in the City Council for the past two years. Mr. Simmons has served on the board of works and the fire and light committee, and has at all times proven himself a most able representative for the people.

BUYS KINGSTON BUSINESS

A change has been made in one of the leading hardware stores here. George Botsford, who for the past four years has conducted the hardware business of Botsford & Nicol, at the corner of Princess and Wellington street, has been compelled to retire on account of ill health. The business has been purchased by a young Kingstonian, W. H. Cockburn, who has been employed as a clerk in this store for many years. He started in the business under the late John Corbett.

TOOK NO ACTION

In the presentment of the grand jury at the Fall Assizes in Toronto this week attention was drawn to the ease with which revolvers could be imported by private individuals from the United States and the illegitimate trade in small arms carried on by second-hand dealers. No action was taken in the matter.

NOW IS A GOOD TIME TO GET AFTER ACCOUNTS

Don't let your accounts lag. There is no better time than the present to get in any money that may be owing to you. All the cash you can put into new stock and into your business makes it just that much better. A nice way of reminding customers who owe bills that a settlement would be appreciated is that taken by Dan Shannon, hardware dealer at Marmora, Ont., who on the front page of the home paper this week has the following:

"As we are starting in a new year with a good stock on hand to supply all our customers' wants, and in order to keep this stock up to the standard, we take this as the proper time to ask all our customers to come in and settle all 1918 accounts during the next thirty days."

DAN. SHANNON,
Marmora's General Hardware Store.

PRICE OF RADIATORS CUT

A cut of 25 per cent. in price of radiators, boilers, and other staples of its manufacture is announced in Chicago by the American Radiator Co. In an announcement to the trade Vice-President Busch said he hopes the reduction will assist builders to resume the full volume of their operations. Mr. Busch said the war sent their prices up about 45 per cent.

From the Executive of the Ontario Retail Hardware and Stove Dealers' Association

To the Hardware Dealers of Ontario:

Dear Sirs:—

The executive of this association desire to extend to you and your staff their best wishes for a Happy and Prosperous New Year.

During the past four years we have been living under the dark shadow of the world's greatest war—many of us with loved ones in the battle lines, consequently filling our hearts with a constant anxiety and suspense, but now the shadow is lifted. Right has triumphed over might, and the freedom of all liberty-loving nations for which our soldiers fought so gloriously, stands assured.

Many have made the supreme sacrifice, and we must always keep their memory sacred as having given their best for their country's good.

During the years of war, we as business men have had many problems to work out in the conduct of our business which, we in a large measure have met in a fair win-the-war spirit, and have also given freely of our means and time to war work here at home.

With the advent of peace, other problems now present themselves, problems which we must be prepared to solve in an intelligent way or suffer losses in consequence.

With this in mind, in the preparation of programme for the annual convention of this association, we have invited some of the brightest and best informed men in Canada to speak to us on outlook for the immediate future. These talks will better equip any hardware dealer with knowledge to cope with his difficulties as they arise.

Other highly qualified speakers will treat of subjects of interest to every merchant, such as business methods, advertising and window dressing, cash versus credit, etc. There will also be a large number of first class exhibits at the convention, over thirty manufacturers having already applied for space for exhibits.

We would invite and urge every hardware man in Ontario to lay his plans to spend full three days at the convention. The information provided, the contact with business men and the other features provided in the programme, will keep the memory of the 1919 Convention, bright in the minds of all those who attend, for many months to come.

We trust that you will join us in Hamilton, February 18, 20, and take part in what we believe will be the brightest and most helpful convention since our organization.

With best wishes for your prosperity in the coming year,

Sincerely yours,

Executive of Ontario Retail Hardware and Stove Dealers' Association.

D. A. Macnab, president.
W. F. Macpherson, secretary.

Competitive Advertising Will Be Accepted By Windsor Paper

ANNOUNCEMENT was made by Clarence Lanspeary, of the advertising committee of the Border Cities Retail Merchants' Association, at the regular meeting this week, that the Border Cities "Star," Windsor, had decided to follow the policy of the Windsor "Record," which it succeeded, and accept advertising from Detroit merchants.

When the subject of a new paper in Windsor to compete with the "Record" finally reached a concrete basis during the summer of 1918, representative merchants of Windsor waited upon W. F. Herman, proprietor of the Saskatoon "Star" and the Regina "Post," and interested him in the project. Advertising contracts providing for the use of approximately $50,000 worth of space to be used in six months by Canadian retailers were secured by a special committee of the association, and on the understanding that Windsor merchants would support a new paper, Mr. Herman consented to open negotiations.

Bought the Paper

After unsuccessfully attempting to secure a franchise, Mr. Herman finally purchased the "Record" from John M McKay at the large figure of $150,000. He took possession September 1, 1918.

Newspaper publishers and advertisers throughout Canada and the United States watched with interest the experiment of a group of small communities, located on the border, with the assistance of the local newspaper excluding Detroit advertising, entering into competition with larger stores in close proximity that could, in many cases sell various lines of merchandise at a much lower figure than the same goods could be purchased in Canada.

Did Not Support It

The advertising rate was increased from 25 cents per inch to 50 cents, and this advance, although they themselves unanimously admit that a much larger circulation, a much better paper, and increased operating expenses, and the purchase of new equipment justified such action, the merchants, in the majority of cases did not use the space they had contracted for, and the paper lost money, with the result that its columns will now be open to competitive Detroit advertising.

Discussing the situation, Clarence H. Smith, president of the association, declared:

"Gentlemen, there is little use discussing the matter. Mr. Herman has definitely made up his mind. Frankly, we have had our opportunity, we lost it and now we must pay the penalty. Mr. Herman has lost money here and we could not in fairness ask him to delay his decision and give us another chance as every day lost means considerable money to him."

Starrett Book in Its Fourth Edition

The fourth edition of "The Starrett Book for Machinists' Apprentices," published by the L. S. Starrett Co., of Athol, Mass., has just been issued. The book, now in its thirty-fifth thousand, is a well illustrated volume of 176 pages, bound in red Athol leather and designed to answer in an authoritative manner questions as to how to do the every day work of the average machine shop. The different classes of work are taken up separately, the most common errors pointed out and the correct practice indicated. Much attention is given to proper use and care of tools, reading of micrometers and verniers, bench work, lathes and lathe tools, grinding, belts, gears, etc. The book is essentially for apprentices rather than the expert machinist though the latter will find much of interest and value, and is intended to provide the answers to the many questions usually asked of the foreman or superintendent. Distribution is being made exclusively through the hardware dealers handling the Starrett line of tools, the price being 50 cents per copy. The briefest examination of the volume will convince the ambitious apprentice or machinist of its value in his everyday work.

Catalogue No. 3, just issued by Soren Bros., tinware manufacturers, 545-549 King St., West, Toronto, Ont., contains 144 pages of most attractively illustrated matter. The listings include pieced tinware, japanned ware, galvanized ware, sheet iron ware, miscellaneous ware and enamelled ware. Copies of the catalogue will be sent to readers of HARDWARE AND METAL, who are interested.

THE CLERKS DEPARTMENT

SOME TIPS FROM WISE OLD ROBERT DOLLAR

The Career of the Foremost Business Man on the Pacific —Canada the Scene of Many Early Struggles

"AVOID the easy, lazy job. Shun the position that calls for little or no exertion, that does not put your powers to the test, that does not keep you constantly on tiptoe in an effort to fill it well—better, in fact, than it was ever filled before. Don't run away from difficulties, from hard work, from hard knocks, if need be. Hammering hardens and strengthens a young man. It tests his mettle. It develops him. It teaches him self-reliance, self-confidence, grit. It drums out cowardice or timidness and makes him unafraid to stand up and fight until he learns how to win out."

Our speaker is Robert Dollar, the foremost business man on the Pacific, creator and owner of the famous Dollar Steamship Lines, a penniless lumberjack who became a "lumber king"; the man who has done more than any other human being to promote friendship and commerce between the yellow races and the United States, and whose reputation for integrity and ability is such that he was recently commissioned by the United States Government to arrange a thirty-million-dollar shipbuilding contract with the Chinese Government, and was made the depository for receiving these millions without even being asked by either nation to put up a bond!

How came Robert Dollar to attain such conspicuous success in business and such a superlative reputation for ability and integrity? The answer to this and other questions is given by B. C. Forbes in the "American Magazine":

"Tell me how you did it!" I exhorted.

"You are very familiar with my whole career," he countered. "I'm not so fond of talking as I am of acting. You know how I went about it—and surely no boy ever had a poorer start or less encouraging experiences as a youth than I had."

"Will you tell me," I asked, "how you are exercising foresight *now*?"

"Well," he replied, "every long-headed business man is not only doing everything he can to help in winning the war, but he is figuring upon after-the-war conditions and opportunities. Great Britain has no fewer than *thirty-seven* organizations getting ready to cope with after-the-war problems of every conceivable kind. Every nation in Europe is getting ready. We are the only nation that is lagging. We are doing practically *nothing* yet.

"Our own company, for one thing, is spending several hundreds of thousands of dollars in building new docks and other shipping facilities at one port alone in the Orient. We are also making extensive preparations at other Far Eastern points. Some of these facilities may not be actually needed for years, and they strike certain people as foolish, as a waste of money. True, the half-mile of docks we are constructing at one place may seem unnecessary at this stage of world development; but we are laying broad foundations for the future. We *know* they will be needed; as a national asset, we *know* they will become immensely valuable, for a correct reading of the history of the human race enables us to see what is coming. Always the nation that has the greatest fleet of ships has commanded first place in the world. And always the centre of commerce moves westward. It is destined next to pass to the Pacific. America will have the greatest number of merchant ships ever possessed by any nation. Trade must be found for them. The greatest field in the whole world for commercial development is China, with its population equalling one third of the world's total inhabitants. The nations on the Pacific, notably America, China and Japan, are to become leading nations hereafter. That is why our company is laying plans for expansion at both sides of the Pacific.

A Site in Shanghai

"Years ago the American Government possessed a large concession site in Shanghai; but it did not have enough far-seeing business gumption to hold on to it, and two years ago had to pay three hundred thousand dollars for what they formerly had for nothing. The British looked ahead, and retained a beautiful site of fifty acres for their consulate right in the heart of this growing commercial city. This is an illustration of foresight.

"The young man in any walk of life shouldn't find it hard to cultivate the forward-looking habit. I don't see how he can avoid developing it if he enjoys his work and concentrates his mind on it.

"Hindsight, properly utilized, promotes foresight; that is, a careful study of past causes and effects is likely to throw at least some light on future possibilities and probabilities. But before deciding on action, fortify and enlighten yourself with all procurable facts, and post yourself on probabilities, trends, undercurrents, et cetera. Be sure your facts are facts. Having got them straight—and *all* you can get of them—and having surveyed the whole outlook as discerningly as you can, then decide and act.

"And when you act, act wholeheartedly. Don't be timid. Don't tread gingerly. Have confidence; have self-reliance; have courage; have nerve; have faith. Don't let obstacles or hardships worry you—a goodly share of difficulties and hardships have the same effect upon the right kind of young man as blows have upon a piece of steel that is being tempered. Setbacks train you to fight better. The 'Black Friday' panic of 1873 bankrupted me just after I had made my first start in business, when twenty-eight, and I well recall an older man then saying to me, by way of consolation, 'Happy and lucky is the man who fails when he is young.' I can better appreciate the wisdom of his words to-day than I did then. Age and experience, you know, teach one many homely lessons."

Emigrated to Quebec

Born in Scotland in 1844, Dollar was reared in a humble abode above the office of a lumber yard where his father worked; but his mother's death set his father to drinking; unemployment followed; Robert was taken from school at twelve and put to work in a machine shop at sixty cents a week, and emigration to Quebec was decided upon when the lad was fourteen. After filling various rough jobs, the young, hard-up immigrant was engaged as "chore boy" for a lumber camp in uncivilized territory a hundred or more miles above Ottawa. His chief duties were assisting the cook, and when the food was not up to the mark—which was often!—the uncouth lumber jacks not infrequently revenged themselves upon the helpless cook boy. He was made cook two years later.

The semi-savage life of the lumber camp had almost completely rubbed off the superficial schooling he had received in Scotland; but the conviction overtook him, when he was nineteen, that if he was to make headway in the world he must start educating himself. One day after finishing his work he was practicing how to write and figure on a piece of birch bark—the only writing "paper" he could obtain—when in popped the manager and the treasurer of the company. "What are you up to? Is that all you've got to do?" they asked as he tried to conceal his writing materials. On inspecting the cook-house and finding everything shipshape, they questioned him less gruffly, and then left. His industry was rewarded by promotion the following year to the position of clerk to the foreman, although the clerking had all to be done nightly after a full day's lumbering.

This life, which he continued for years, latterly as a foreman, taught him resourcefulness, self-reliance, doggedness, frugality. As foreman of a large camp he had to set broken legs, pull teeth, stitch and dress bad cuts, prescribe for the sick and cure "night blind," a malady which struck victims, stone-blind nightly from sunset to sunrise, and which was caused by a constant, unvaried diet, month after month, of fat salt pork, flour and peas—nothing else. (The favorite cure was to

eat a piece of cheese or drink milk for five or six days, when such medicines could, by hook or crook, be procured.) He had to know how to keep under control a gang of none-too-gentle huskies; how to build new waterways and make untried rivers navigable for logs—he was the first to bring logs over the Chaudiere Falls and past the city of Ottawa; how to sleep when necessary on frozen ground without freezing to death.

Awaiting Opportunity's Knock

All this time he read and studied, taking with him each year a library of standard works. Also, he saved almost every penny he earned, and was owner, jointly with his brother, of an unmortgaged farm before his wages had risen above twenty-six dollars a month.

This stern training fitted him to seize Opportunity. Opportunity came to him—or, rather, he went after it—in the form of new territory which the Canadian Government opened north of Toronto. He had capital enough to form a partnership to purchase timber on virgin farms. They cut thousands of logs, borrowed money to carry them until the following summer in the hope of securing big prices, branched out bravely, had rapidly growing visions of cleaning up a modest fortune, when—crash! Jay Gould and other gladiatorial speculators were caught in the notorious gambling frenzy which exploded when gold fell with a sensational bang on "Black Friday," as it ever was called. Financial wreckage strewed the United States and Canada. Robert Dollar lost his all, and found debts of twenty-five hundred dollars hanging round his neck.

While struggling as a wage-earner to repay his creditors, a struggle which took three years, he married, "And from this time," he says, "my success in life began, as I was fortunate in getting a good helpmate who counseled me, spurred me, tended me, and aided me." Before long he had started eight camps in the Muskoka district. But this did not satisfy his ambition or his pioneering instincts. He invaded an island in the Georgian Bay, near Parry Sound, where giant logs were obtainable. This camp was accessible only in the summer months, as the whole zone was frozen over all through a long winter. The camp ran short of fodder, and Captain Dollar personally undertook to convey supplies over sixty miles of treacherous ice.

"We started off over the ice," he says, "with four teams of horses and four loads of feed. We soon came upon wide cracks which we had to bridge over with planks which we had taken the precaution to carry with us. Before night a terrific snowstorm and hurricane came without handclap of warning. It was so violent that one team was swept off its feet. We formed a hollow square with the loads, and men and horses huddled together in the centre. But nobody believed we could survive the night in this exposed place. My chart showed we were far out of sight of land, but indicated a small island or rock about a mile directly to windward, and, armed with an axe, I started to find it, in the hope that we could obtain some degree of shelter.

"Before I had gone a quarter of a mile I was driven back by the wind. But I couldn't find the teams in the blinding storm. As it was impossible to stand still, I lay down and yelled with all my might on the chance that the men might hear me. I began to choke. Rising, I was driven along at the mercy of the wind—which had shifted, thus mystifying me. One moment I would be spinning and falling over slippery ice, the next I would be floundering in water. The bones of my hand were broken by the ax handle; my clothes began to freeze as stiff as iron; I fell repeatedly, and knew my strength was giving out. One particularly vicious gust knocked me over, and my head hit the ice so hard that I was stunned.

"Snow driven against my face revived me. But I felt I was doomed and that I might as well curl up and die. Soon, however, I felt a little rested, and I determined to try once more. Raising myself on my elbow, I saw with astonishment and delight land not fifty feet from me. It was barren, inhospitable and uninhabited, but it seemed Paradise to me. I survived the night, which was away below zero—and so had the men, by using a load of hay to keep a fire going.

"But all our provisions were lost, except bran mash without salt. The men refused to proceed farther; but somehow I managed to persuade then to persevere—they knew they could not find their way back without me. After other adventures we at last found the camp. By this time the ice showed signs of breaking up, so I ordered the men to return at once with the teams before it should be too late. They point-blank refused to go with an Indian guide. I was ill and sore all over, scarce able to move a muscle. But to avert disaster, I consented to have them get me out of bed and into a sled. On the return journey nothing more serious happened than the horses falling through the ice into the water several times. Of course it took me several months to get over the effects of my experiences."

The Reward of Pluck

Fortune could not long refuse to smile on a man with such grit, with such qualities of leadership, with such heroic determination, with such enterprise. His business grew, he looked further afield. Why not export lumber to Britain? To send consignments all the way from western Canada across the ocean was a task then beset with difficulties. But he would blaze the trail.

So rapidly did his operations extend that he foresaw he must move to a centre where there could be harvested a wealth of giant trees suitable for export trade. After journeying to various districts and examining prospects with his own eyes, he bought large tracts of government lands in Michigan at $1.25 an acre, and was soon despatching a lumber-laden ship every month to England as well as supplying America with millions of feet of lumber a year, which was manufactured at the new mills at Dollarville, Michigan.

At forty, the immigrant who at eighteen could neither write nor figure with facility, had become a lumber king! But he sat on no gilded throne of ease. From his unbroken diary, which he has kept for fifty years, we learn that in one year, 1887, he traveled 31,141 miles—29,100 by water, 1,050 by rail and 991 by horses, or more than enough to circle the earth. In addition, he covered hundreds of miles on foot, often through forests.

"I began to survey the world's potentialities," said Captain Dollar, speaking of this stage of his career. "and, looking to the future, I analyzed that the vastest undeveloped market for lumber was the Orient, particularly China. Before making a final decision I went twice to China.

"How could this trade best be handled?' I next asked myself. I was inland. Moreover, Michigan's supplies of big lumber were nearing exhaustion. Clearly, San Francisco was the natural, the ideal location; besides, California had rich supplies of redwood. So I moved there in the late eighties. We found by and by that it was easier to get lumber, and to get customers, than it was to get vessels.

"I investigated. I discovered that ships were making abnormal profits at the high freight rates charged. There was obviously only one thing to do—acquire ships. My first ship paid for itself within the first year. We did not merely carry over to China and Japan our own cargoes of lumber, but industriously sought return freight, going after it wherever it was to be found.

"The creation of commerce between the States and the Far East then became one of my major aims. I visited China eighteen times and made it my business to form as many friendly connections as possible between the two nations. We found both the Chinese and the Japanese most dependable people to do business with—in fact, we have never been swindled out of a single cent in all our dealings with these peoples, a thing I wish I could say about our own and other white nationalities. Of course the most exacting care had to be taken on our part to live up to the very letter—to every dot of an 'i' and stroke of a 't'—of all our agreements."

A Wise Scotchman's Advice

"Let no young man seek a soft snap. Glass cases develop frail plants. Avoid the easy, lazy job. Shun the position that calls for little or no exertion, that does not keep you constantly on tiptoe in an effort to fill it well—better, in fact, than it was ever filled before. Don't run away from difficulties, from hard work, from hard knocks if need be. Hammering hardens and strengthens a young man. It tests his mettle. It develops him. It teaches him self-reliance, self-confidence, grit. It drums out cowardice or timidness, and makes him unafraid to stand up and fight until he learns how to win out.

"By 'real job' I don't mean a big, responsible position. It was a real 'job' felling trees and floating logs down difficult rivers and over rapids—I more than once almost lost my life and once had three of my men drown right in front of my eyes. The truth is that most jobs can be made 'real jobs' if they are filled by a real fellow, who wants to put all he can *into* it, not merely to get all he can *out* of it.

"The growth in this country's business has been so much greater than the growth in population that there are, relatively, a greater number of big jobs to fill than there used to be. To-day the only way to get men is to make them.

"In China, at Shanghai, Hankow and Tientsin, we are feeding, clothing, and educating in the Y.M.C.A.'s boys from twelve to fourteen, and are keeping them in school for five years. On Saturdays, when there is no school, they work in the office, learning American ways of doing business.

"Heretofore, the average American youth has not taken kindly to going abroad to fill openings, but the millions who are going overseas, and seeing something of other countries for the first time, will have their outlook on life broadened. They are likely to develop vision, to realize the importance of international commerce and the opportunities it offers.

"Here is a problem calling for foresight. The country should be educated to know that we will need foreign trade. We should lose no time in sending parties of our very ablest and most influential merchants and manufacturers to every country that we do business with. All chambers of commerce throughout the country should have committees of real live men to co-operate in this work in every part of the world. This is a national task in which all classes are equally interested. The British and other nations have business houses and coaling stations in all principal seaports of the world, backed up by branch banks. American houses and banks are conspicuous only by their absence. This should be remedied if we are to avoid trouble. It is up to us to have all plans ready when the emergency arises, as it surely will, so that we can tide our nation through a situation almost as full of danger as the war itself.

"Here is the most momentous opportunity ever known for the exercising of this quality which we have been discussing—foresight."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

"SAFEGE RAZORS

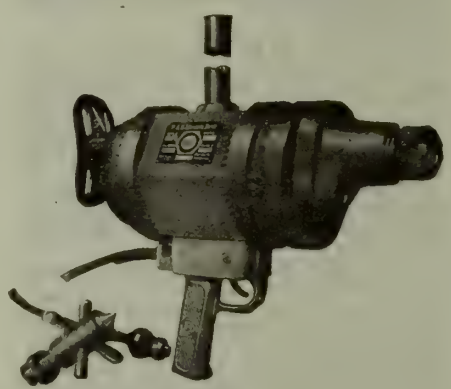
The Geneva Cutlery Co., Geneva, N.Y., is manufacturing a razor with a guard known as the "Genco Safege."

The blade of the GENCO Safege is made, it is stated, from the same steel and forged and ground by the same methods employed in the firm's other lines.

The guard of the GENCO Safege, it is claimed, is simple and yet effective and not only insures shaving with safety even aboard ship or on a moving train, but because of its peculiar position as it lays against the blade, guides the razor to the correct position for perfect shaving results.

The absence of corners and small parts, it is stated, makes thorough cleaning of the razor a simple matter, and also makes this cleaning possible when running water is not always available, since the guard may be readily detached and both parts thoroughly wiped dry and clean.

The razor, it is stated, is stropped in the same manner as the standard type of razors, and easily kept in good condition. In extreme cases where a regular strop is not available, it can be prepared, it is claimed, for satisfactory use by stropping upon the palm of the hand.



Safege Razors

PORTABLE DRILL

The Black & Decker Manufacturing Company, 105 S. Calvert St., Baltimore, have added a new size portable electric drill to their line. This drill has, it is stated, a capacity of ⅞ of an inch in steel, weighs only twenty-seven pounds and is equipped with a removable No. 2 Morse Taper Socket to take taper shank drill up to ⅞ inch diameter. The drill, it is stated, has the pistol grip and trigger switch featured in the firm's other sizes of drills.

The drill measures 5¾ in. by 17 in. long and has, it is stated, an offset spindle 2⅝ in. from the centre of the spindle to the edge of the frame and is also equipped with a light weight, high-powered, series compensated motor which, it is claimed, delivers a maximum output of more than ½ h.p. A feature of the drill, it is stated, is its great adaptability, especially for work that is inaccessible to any but a portable drill.

Portable Drill

CARBONOID

"Carbonoid," manufactured by the Weldum Products Company, Indianapolis, is, it is claimed, a foe to soot in chimneys. Carbonoid, it is stated, is a granulated compound which when placed directly on a bed of red hot coals will remove and consume all soot in furnace, stove, range, boiler flues, chimney or pipes. It is also claimed that by doing this Carbonoid results in a big saving in coal consumption and maximum heating efficiency. It is also claimed that carbonoid will quickly extinguish any chimney fires.

Carbonoid

TRUCKLINE

The "Powersteel" truckline manufactured by the Broderick & Bascom Rope Company, of 805 N. Main St., St. Louis, Mo., is made, it is stated, of half-inch yellow strand powersteel wire rope. The breaking strength, it is claimed, is twelve tons and the truckline, it is stated, while eighteen feet in length will coil up flat and takes up but little room.

Truckline

LINE GRIP

Dreadnought Line Grip No. 3, manufactured by the Coleman Fare Box Company, Limited, 1191 Bathurst St., Toronto, Ont., is used, it is stated, on express wagons, freight lorries, moving vans and similar vehicles. It is stated that it is a self-tying and automatic untying device and is invaluable in loading and unloading.

Dreadnought Grip

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

NEW price lists to hand on carpenters' tools show many lines which have undergone revision to higher levels. Planes, bevels, chisels, centre punches, plumbs and levels, steel squares, and tack hammers are among those which have moved upward. It will be noted, too, that a differential has been established between smooth bottom and corrugated bottom planes, the latter now selling at an advance over corresponding numbers in the former.

Quotations on Canada plate, coke tin plates and terne plates have been revised to lower levels, and the hope is expressed that supplies will soon be available in desired quantities. Black and galvanized sheets are holding steadily at declines recently recorded. Both jobbers and manufacturers report that tonnage now coming or promised for next few weeks will give them good assortment and place stocks in very fair shape.

Wrought pipe has shown a weaker tendency and new prices are now being worked out which will provide for a slight decline. The new scale of quotations is in line with recent declines named on raw materials. Malleable fittings and cast fittings have also reached lower levels this week, pound goods and discounts being altered slightly. Prices on boiler tubes have not yet been changed, although it was mentioned last week that these were under revision downwards.

Bar iron, bar steel and kindred lines show a slight revision in values this week. Declines of from ¼c to ½c per pound, determined by size of orders placed, are to be noted, practically the entire schedule of iron and steel bars being influenced by the move in basic lines.

Turpentine rules with a very firm undertone, Southern markets showing advances practically every day, with indications that the peak has not yet been reached. These conditions will be reflected here in time. A little greater activity is reported in this line, and another two or three weeks will see a very good movement in progress.

Asbestos sheathing is down 1½c per pound, and a decline of about 10 per cent. in the cheaper grades of brooms has been recorded. High-class broom corn is very scarce, and the better quality brooms reflect this in steadily maintained quotations.

Carpet sweepers have undergone a decline from recent advances, the revision generally amounting to $3 per dozen on those with nickeled fittings, and $2 per dozen on those japanned. Vacuum sweepers have been reduced proportionately. Present prices are being guaranteed by the manufacturers against decline to June 1, 1919.

Grindstones have advanced 25c, and a 5 to 10 per cent. advance is shown at some points in some lines of washing machines. Chicken leg bands have recorded advances, while one style of poultry netting has declined slightly. Lead pipe and waste are down 1c per pound; roofing caps are higher.

MONTREAL MARKETS

MONTREAL, Jan. 9.—Price changes are important. These comprise slight reductions for pipe fittings, Canada plate, sheets, wire solder, lead waste, and also for ingot tin, antimony and spelter. A very decided weakness characterizes the old material market, and heavy slumps will not be surprising. Many lines are steady, and the outlook is for a fairly well maintained basis for many of the staple lines.

Hardware markets are still quiet after the holiday lull, but the travellers are again out and are looking for a revival of normal business. Mail orders have been excellent, one large jobber stated to HARDWARE AND METAL, and it is expected that satisfactory conditions will obtain very soon.

New Sandpaper and Emery Cloth Prices

Montreal.

SANDPAPER, ETC. — Considerable change was made in the price of sandpaper recently and the makers have simplified the list prices and these indicate a slight reduction. No. 0 is now priced at $7.50 per ream; ½, $7.95; 1, $9; 1½, $10.50; 2, $12.15; 2½, $13.95, and 3, $15.90. The discount on these prices is 12½ per cent. Emery paper of B & A make is 15 per cent. advance on list, and emery cloth 30 per cent. advance. The new list on Star sandpaper is as follows: No. 0, $6.75; ½, $7.20; 1, $8.10; 1½, $9.15; 2, $10.35; 2½, $11.70, and No. 3, $13.20. The same discount applies, viz., 12½ per cent.

Rope Now Steady On New Prices

Montreal.

ROPE.—While rope has steadied down for the time being, it may be anticipated that further developments will come. The recent heavy reductions were brought about through operators being anxious for big orders, and some took exceptionally heavy losses, one rope man stating to HARDWARE AND METAL that a manufacturer across the border took a loss of $600,000 and was expecting to take a much greater one. New developments are looked for in some quarters and these may result in an

advance, rather than in a decline. British manila basis is still 24c per pound; pure manila 28½c, and sisal 25½c.

Both Oil and Gasoline Steady

Montreal.

OIL, GASOLINE.—There is a steady movement of coal oil on the basis of 19c per gallon for Royalite, and of 22c per gallon for Palacine and Electroline. Gasoline is steady and rather quieter and the basis is held at 34c per gallon for motor grade.

Stove Business Sought; Wares Are Steady

Montreal

STOVES AND WARES.—The travellers are now out on the road again and are expecting to book stoves for early shipment. The guarantee of the makers as to prices will make it easy for the dealers to secure their wants with a confident outlook regarding their sale to the consumer. Wares of various kinds are firmly held and the activity in these lines is not great, but is seasonable.

Nails Are Steady; Wire Unchanged

Montreal.

WIRE AND NAILS.—A base price of $6.25 per 100 pounds obtains for smooth steel wire. There is but small movement of this. Nails are steady and wire is selling on the unchanged basis of $5.50 per 100 pounds and cut at $5.85. The market is quiet.

Fittings Down Some; Pipe to be Revised

Montreal.

PIPE AND FITTINGS.—A slight decline has been made in the price of pipe fittings. This is about 2½ per cent., and the new discounts and net prices will be found in the current quotations.

While there is no definite change as yet, a slight revision may be looked for in the price of wrought iron pipe. The change will represent a decline, it is expected, but indications are that this will not be very heavy.

Canada Plates Less; Plates Revised

Montreal.

SHEETS AND PLATES. — Lower prices for Canada plate are quoted this week. Ordinary in 52 sheet boxes are quoted at $9 per box, and the same grade in 60 sheet boxes are quoted at $9.10. These will gradually be available in larger lots.

Black sheets are revised again, although the prices of last week are not discounted further. Slight revisions downward are also made for galvanized sheets, as will be seen below. Prices here are rather of a nominal nature.

BLACK SHEETS—			Per 100 lbs.
10 gauge	$7 50	$8 50	10 00
12 gauge	7 60	8 50	10 00
10 gauge	$7 50	$8 50	11 50
12 gauge	7 60	8 50	11 00
14 gauge	7 35	7 75	8 20
16 gauge	7 45	7 75	8 25
18-20 gauge	7 75	7 80	8 30
22-24 gauge	7 85	7 90	8 35
26 gauge	7 90	7 95	8 40
28 gauge	8 00	8 05	8 50
GALVANIZED SHEETS—			
10¾ oz.		$ 9 50	$11 00
28 gauge		10 90	10 65
26 gauge			10 35
22 and 24 gauge			10 15
20 gauge			9 95
18 gauge			9 95
16 gauge			9 80

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Steel and Iron On Steady Basis

Montreal.

STEEL AND IRON.—Now that the roads in country districts are better a considerable demand for steel and iron exists among the country merchants and supplies going forward, while not heavy, are fairly constant. The undertone is quite steady and prices are held unchanged.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

NEW PRICES ON TOOLS; REACH HIGHER LEVELS

Elsewhere in this issue mention is made of an advance in several lines of Stanley Rule & Level Co. goods. HARDWARE AND METAL has been successful in securing list with lines most vitally affected and the new prices established are reproduced herewith. Generally speaking, the advance may be said to approximate 10 per cent. over former figures. Lines not mentioned remain unchanged.

Bevels—No. 18 x 6 in., $9 doz.; 8 in., $11.55; 10 in., $12.55; No. 25 x 6, $5.60; 8 in., $6.35; 10 in., $6.60; 12 in., $7.35; 14 in., $7.90.

Plumbs and Levels—No. 00, $11.40 doz.; No. 0, $12.70; No. 03, $20.35; No. 2, $18.15; No. 3, $22.25; No. 5, $29.20; No. 7½, $26.85; No. 8, $31.05; No. 13, $28.95; No. 15, $34.75; No. 19, $36.85; No. 25, $39.90; No. 30, $31.30; No. 35, $27.25; No. 45½, $42.10; No. 48, $43.50; No. 50, $37.60; No. 102, $5.85; No. 104, $8.55; No. 104½, $14.35; No. 111, $57.90; No. 93 x 24 in., $3.60 each; 30 in., $4.15; No. 96 x 24 in., $7.40; 30 in., $8.45; No. 1093 x 12 in., $2.30; 18 in., $2.85; 24 in., $3.35.

A slight readjustment in metal levels has also been effected, this showing in a change in quoting each instead of by the dozen.

Planes—No. 3, $3.80; No. 3C, $4.05; No. 4, $4.10; No. 4C, $4.45; No. 4½, $4.75; No. 4½C, $5.10; No. 5, $4.75; No. 5C, $5.10; No. 5½, $5.30; No. 5½C, $5.70; No. 6, $6.05; No. 6C, $6.55; No. 7, $6.90; No. 7C, $7.45; No. 8, $8.25; No. 8C, $8.90; No. 9½, $1.95; No. 10, $6.05; No. 10½, $5.00; No. 12, $4.60; No. 12½, $6.25; No. 15, $2.15; No. 18, $2.40; No. 10, $2.55; No. 22, $2.60; No. 24, $2.70; No. 26, $2.80; No. 27½, $3.25; No. 28, $3.55; No. 31, $3.85; No. 32, $4.10; No. 35, $3.20; No. 36, $3.60; No. 40, $2.05; No. 40½, $2.80; No. 45, $13.85; No. 55, $27.40; No. 60½, $2.05; No. 65, $2.65; No. 65½, $2.20; No. 75, 61c; No. 78, $3.15; No. 100, 46c; No. 101, 37c; No. 102, 70c; No. 110, 99c; No. 112, $4.05; No. 113, $6.95; No. 130, $1.45; No. 131, $2.35; No. 140, $2.55; No. 190, $2.75; No. 191, $2.60; No. 192, $2.45; No. 220, $1.45; No. 603, $4.30; No. 603C, $4.60; No. 604, $4.60; No. 604C, $4.95; No. 604½, $5.30; No. 604½C, $5.70; No. 605, $5.30; No. 605C, $5.70; No. 605½, $5.75; No. 605½C, $6.20; No. 606, $6.70; No. 606C, $7.20; No. 607, $7.70; No. 607C, $8.30; No. 608, $9.10; No. 608C $9.80 each. No. 57, $8.10; No. 61, $2.20; No. 62, $5.85; No. 63, $2.55; No. 64, $4.85; No. 71, $4.25; No. 71½, $3.35; No. 72, $4.45; No. 74, $10.25; No. 85, $4.75; No. 90, $4.15; No. 92, $4.15; No. 93, $5; No. 94, $5.75; No. 95, $2.20; No. 97, $4.10; No. 98, $2.05; No. 99, $2.05; No. 143, $7.70; No. 146, $4.15; No. 147, $4.40; No. 148, $4.70; No. 171, $6.15; No. 196, $7.70; No. 203, $1.40; No. 212, $3.20; No. 239, $4.45; No. 278, $3.35; No. 289, $3.95; No. 444, $12.80; No. 602, $4.35 each net.

Plane Irons—Bailey or Stanley Bench—1¼ in., 37c; 1⅝ in., 45c; 1¾ in., 50c; 2 in., 52c; 2⅛ in., 59c; 2¼ in., 60c; 2⅜ in., 62c; 2⅝ in., 66c each single. 1¼ in., 66c; 1⅝ in., 75c; 1¾ in., 79c; 2 in., 90c; 2⅛ in., 96c; 2¼ in., 98c; 2⅜ in., $1.03; 2⅝ in., $1.07 each double.

Block plane irons are up proportionately to the bench plane irons enumerated.

Squares, Mitre and Try—No. 12 x 2 in., $4.40; 4 in., $5.35; 6 in., $6.95; 8 in., $7.75; 10 in., $10.20; 12 in., $12.05. No. 20 x 3 in., $4.35; 4½ in., $4.95; 6 in., $6.60; 7½ in., $7.20; 8 in., $7.45; 9 in., $9.25; 10 in., $10; 12 in., $12.25; 15 in., $15.45; 18 in., $20.80 per doz.

Centre Punches—No. 10, $1.90 per dozen.

Chisels, Firmer Bevel Edge—No. 20 x ⅛ in., $11.90; ¼ in., $12.40; ⅜ in., $13.35; ½ in., $13.55; ⅝ in., $14.35; ¾ in., $14.80; ⅞ in., $15.85; 1 in., $16.30; 1¼ in., $17.75; 1½ in., $19.75; 1¾ in., $22.05; 2 in., $24.80 per dozen.

Butt Chisels, Bevel Edge—No. 50 x ⅛ in., $10.15; ¼ in., $10.50; ⅜ in., $11.40; ½ in., $11.85; ⅝ in., $12.10; ¾ in., $12.60; ⅞ in., $13.45; 1 in., $13.65; 1¼ in., $15.15; 1½ in., $17.10; 1¾ in., $18.35; 2 in., $20.50 per dozen.

In Sets—No. 110, $8.05; No. 120, $7.75; No. 210, $11.05; No. 220, $10.65; No. 310, $15.80; No. 320, $15.15; No. 501, $8.90; No. 601, $13.25; No. 701, $17.60 per set net.

Tack Hammers—No. 2, $1.65; No. 3, $1.80; No. 4, $3.60 per dozen.

Nail Sets, Assorted—$1.75 per dozen.

Steel Squares—No. 3, $25.15; No. 3B, $31.15; No. 3M, $30.30; No. 10, $17.20; No. 12, $19.20; No. 14, $22.50; No. 18, $22.50; No. 100, $27.80; No. 100B, $33.80; No. 100C, $38.10; No. 100K, $32.95; No. F-2, $13.25; No. F-4, $14.55; No. R-3, $30.27; No. R-3B, $36.30; No. R-3N, $35.45; No. R-100, $34.15; No. R-100B, $40.15; No. R-100C, $44.45; No. R-100N, $39.30.

Lead Lines Easy; Also Solder

Montreal.

LEAD PRODUCTS.—With ingot lead a star performer in recent declines made, lead products are naturally on the easy side. Waste pipe is quoted at 14-15c per pound. Wire solder is easier, being quoted down from ¾c to 2c per pound. It is probable that further revisions may be made of a lowering character in the immediate future.

Lead pipe, lb.	$0 14 – $0 15
Lead pipe (cut lengths)	0 15
Lead waste pipe, lb.	0 14 – 0 15
Lead traps and bends	Net list.
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12¾
Lead sheets, 4 to 8 lbs., a. ft.	0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.	
Solder, guaranteed, lb.	0 47
Solder, strictly, lb.	0 40
Solder, commercial, lb.	0 36¾
Solder, wiping, lb.	0 36¾
Solder wire (8 gauge)—	
40-60	0 47¼
45-55	0 51
50-50	0 55
Zinc sheets, casks	
Do., broken lots	

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Tin Down 2-3c; Spelter; Antimony Less

Montreal.

INGOT METALS.—There has not been so much changing of price this week, although lead is weak still and tin somewhat lower. Markets are quiet and spelter, antimony and copper are all easy.

COPPER.—A good deal of price-cutting seems to have been conducted on this line where any real business is offered; 25c to 27c per pound covers the market.

TIN.—This may be said of tin, that, while the London market is registering declines of considerable proportions, the position here is confined to the stocks on hand. Licenses will not be granted for import until the stocks here are lower. Prices are ruling at about 75c per pound.

SPELTER.—An easier tendency has developed. The market is quiet and price basis is now 9½c per pound.

LEAD.—No change of price has been made this week, but the undertone is weak. Some think the bottom has been about reached. Price, 9-9½c per pound.

ANTIMONY.—A lower price obtains for antimony and 10c per pound is quoted. There is little movement.

ALUMINUM.—Nominal prices of 43-45c per pound are quoted here and there is little doing.

Declines May Come For Old Material

Montreal.

OLD MATERIAL.—So unsteady and weak is the market for old material that it is probable considerable declines may be made in dealers' buying prices in the immediate future. Quotations even now are nominal, and as the large holders of stocks have little outlet for what they are carrying, it is questionable if they will continue to quote definitely. The undertone is decidedly soft.

Dealers' Buying Prices:		
Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 18
Red brass		0 21½
Light brass		0 08
Scrap zinc		0 06¼

Overshoes, lumbermen's rubber boots		0 06
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

TORONTO MARKETS

TORONTO, Jan. 9.—Higher prices have been named on several lines of carpenters' tools including planes, plane irons, plumbs and levels, bevels, chisels and mitre and try squares along with others items. Lead pipe and waste pipe are down 1c per pound, while sap spouts are up $1.50 per M. Malleable fittings have been revised downward and wrought pipe is also being changed to lower levels. Bar iron, bar steel and kindred lines have come down slightly this week. Asbestos sheathing is down 1½c per pound.

Business is starting off well. Jobbers report a very fair amount of sorting business coming to hand and already spring orders are moving forward to the trade. The outlook generally is considered good.

Higher Prices on Carpenters' Tools

Toronto.

CARPENTERS' TOOLS.—New price lists have been issued by the Stanley Rule & Level Co. covering their products and these show on many lines advances approximating 10 per cent. Included in the list are bevels, plumbs and levels, planes, plane irons, mitre and try squares, centre punches, firmer chisels, butt chisels, tack hammers, nail sets and steel squares. The new prices on these lines appear in a panel elsewhere in this issue.

Export Demand For Garden Tools

Toronto.

GARDEN TOOLS.—Indications seem to point to a heavy export demand for garden tools this year. It is reported that the governments of France and Belgium are taking steps to provide those unable to buy or secure garden tools with these items. Another factor which may be expected to develop in these lines is business from Roumania. Altogether the outlook seems to be for a heavy volume of overseas business, which will provide a firm undertone to the market and preclude any possibility of an accumulation of supplies.

Hand Saws May be Revised; Sap Spouts Up

Toronto.

HAND SAWS, SAP SPOUTS.—There is a possibility that prices on the cheaper grades of hand saws may be revised to slightly higher levels than those now prevailing. Crucible steel, the real basis, is very scarce and hard to get and at the present selling prices, manufacturers intimate that some lines of their saws do not carry a really profitable margin.

An advance of $1.50 per M has been made in the Eureka sap spouts, bringing prices to-day up to $16.50 per M. A very good volume of orders has already been booked and indications are that there will be a heavy movement of these.

Asbestos Sheathing Down; Roofings

Toronto.

ASBESTOS SHEATHING, ROOFING—Lower prices have been named in some quarters on asbestos sheathing, present quotations being 13½c per pound or a decline of 1½c per pound.

Manufacturers of roofing intimate they are now booking orders against decline to May 1, 1919. Business already at hand is very satisfactory and the outlook is considered very bright. A firm market seems to be the outlook for some little time.

Cheaper Grades Brooms Easier

Toronto.

BROOMS. — The cheaper or lower grades of brooms have come in for a revision downward in price. Manufacturers intimate that there has been a surplus of low grade broom corn this year and that is a factor which has influenced prices to lower levels. The best grades of broms show no change in price, there being a big shortage of desirable broom corn and the market on these is considered very firm. The new prices on the lower grade brooms are about 10 per cent. below former levels.

Booking Orders For Rope Good

Toronto.

CORDAGE, TWINES. — Indications are that at the new price levels established booking business on rope has come along splendidly. The trade seems to be quite satisfied that present basis on rope is a good buy and volume of orders coming to hand is very satisfactory. The hemp market has firmed up again and this will be reflected in rope. Present range of quotations follows: Pure manila, 28½c per pound base; British manila 24c; New Zealand hemp, 24c; sisal, 25½c.

No new development in twines is reported as yet, routine business passing and outlook generally considered good.

Stoves Promise Well; Wares Active

Toronto.

STOVES, WARES. — Manufacturers are quite satisfied with outlook on stoves and ranges for 1919 and whereas there is only a fair amount of business offering at present this is a seasonable condition. Booking business on oil and gas stoves has been good and a heavy trade during the coming summer is anticipated.

Travellers from the various sheet metal and enamelware firms are already on their routes and the volume of business already coming to hand augurs well for the new year. The volume of busi-

ness so far turned in has been remarkably good as well as unexpected, indicating that the trade is in a good healthy position and confident as to what may be expected to develop during the present year.

No News in Regard to Nails

Toronto.

NAILS, WIRE.—No news is available in regard to nails. The market is holding steadily with only a comparatively small movement under way at present. Prices are based as follows, per 100 pounds: Wire, $5.50; cut, $5.85.

Smooth steel wire is quiet without any quotable change being reported, figures being determined from a basis of $6.25 per 100 pounds.

Little Movement in Oils and Gasoline

Toronto.

OILS, GASOLINE. — For the first time in many months a somewhat quiet feeling prevails in regard to oils and gasoline. The fact that retailers are very largely engaged in taking stock and only buying when necessary is thought to be the contributing factor in present lull. Prices have been well maintained, coal oil selling at from 18½c to 21½c per gallon and gasoline unchanged at 33c per gallon.

Revised Prices on Bars; Lower

Toronto.

IRON AND STEEL.—Revised prices have been issued on iron and steel bars and these provide for a scale of figures showing a slight decline on practically every item in the list. The lower figures shown generally obtain on quantity orders and the higher quotations are made on small shipments. The new basis of prices follows herewith—it will be noted they are from 25c to 50c below former quotations:

TORONTO—	Per 100 lbs.	
Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 20	5 45
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 75	6 00
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Corrugated Sheets Hold Unchanged

Toronto.

CORRUGATED SHEETS. — An unchanged and firm position is being maintained on corrugated sheets this week. There is a fair amount of business passing and the outlook in this respect seems to be very good. Manufacturers are preparing for a splendid volume of orders. Eavetrough and conductor pipe record no change in price and whereas trade just now is a little quiet this is a seasonable condition.

TORONTO—	Per 100 Sq. Feet.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$9 00	$7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Tonnage Coming Considered Good

Toronto.

SHEETS, PLATES.—The tonnage already coming to hand on galvanized and black sheets is considered good and manufacturers and jobbers are quite satisfied that supplies will come along very well from now forward. Prices have ruled at unchanged levels and are quite firm at present basis, which is reproduced below. Orders coming to hand are only fair, but greater activity is looked for in the next few weeks.

CARPET SWEEPERS DECLINE

Lower prices have been recorded on Bissell carpet sweepers and vacuum sweepers this week. The decline generally provides for a $3.00 per dozen decrease in carpet sweepers with nickel-plated trimmings and a $2.00 decrease in those that are japanned. Vacuum sweepers are down $8.00, $10 00, and $12.00 per dozen. Prices now ruling are reproduced herewith and it will be noted quotations are f.o.b. factory, Niagara Fal's, Ont Prices guaranteed by manufacturers against their own decline to June 30, 1919. Also stocked by jobbers. The list follows, all prices quoted being per dozen: Carpet Sweepers—American Queen, Nickeled Fittings, Cyco Ball Bearing, $48.00; Club, Jap'd., Cyco Bearing, $102.00; Champion, Nickeled Fittings, $40.00; Champion, Japanned Fittings, $34.00; Grand, Nic., Cyco B.B., $61.00; Grand, Jap., Cyco B.B., $55.00; Grand Rapids, Nic., Cyco B.B., $45.00; Grand Rapids, Jap., Cyco B.B., $39.00; Parlor Queen, Nic., Cyco B.B., $51.00; Princess, Nic., Cyco B.B., $46.00; Standard, Nickeled Fittings, $42.00; Standard, Japanned Fittings, $36.00; Universal, Nic., Cyco Bearing, $43.00; Universal, Japanned, Cyco Bearing, $37.00. Vacuum Sweepers—Grand Rapids, Nic., $98 00; Household, Japanned, $88.00; Superba, Nic., $114.00.

BLACK SHEETS—	Per 100 lbs.		
10 gauge		$7 50	$8 50
12 gauge	$6 85	7 35	8 35
14 gauge	6 90	7 20	7 90
16 gauge	7 00	7 25	8 00
18-20 gauge		7 30	7 80
22-24 gauge		7 35	7 85
26 gauge		7 40	7 90
28 gauge		7 50	8 00
3/16-inch plate			7 40
¼-inch boiler plate			7 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$9 30	$9 75
U.S. 28	9 00	9 25
U.S. 26	8 70	8 95
22 and 24	8 55	8 80
18 and 20	8 40	8 65
16	8 25	8 50
12 and 14 gauge	8 15	8 40

Second row of figures subject to rebate of 25c per 100 lbs. in some quarters for orders amounting to one-half ton or more.

Decline in Boiler Tubes Not Here Yet

Toronto.

BOILER TUBES.—It was indicated in last week's issue that lower prices had been reached on boiler tubes, but these are not yet effective. Supplies coming to hand have been bought on a high basis, and it may be a little while yet before a lower selling level will be attained. Stocks are now in very good shape, recent shipments improving the situation materially. Quotations range as follows:

Boiler Tubes—	Per 100 feet	
Toronto—	Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Wrought Pipe Lower; Fittings Too

Toronto.

WROUGHT PIPE, FITTINGS. — A lower basis of quotations is being worked out on wrought pipe according to advices now available, though just what these will be is not yet known. Price lists are in the hands of the printer, but these changes will, it is thought, work out along basis made in basic materials in the United States markets.

New prices established on malleable fittings show a slight reduction, the present quotations being as follows: Malleable and cast bushings, 20 per cent.; unions, 35 per cent.; plugs, 15 per cent.; Class B fittings, black, 26c per pound; Class C, black, 18c; Class B, galvanized, 37c.; Class C, galvanized, 26c.

Lead Pipe and Waste Comes Down 1c

Toronto.

LEAD AND ZINC PRODUCTS.—In line with conditions outlined in HARDWARE AND METAL last week, lower prices have been named on lead pipe and lead waste. The decline amounts to 1c per pound, to-day's figures being 13c and 14c per pound respectively. Lead sheets are somewhat easier in some quarters, too, selling down to 11½c per pound. No change in lead traps and bends has been made.

Solder has held steady and unchanged this week. The demand is fair and supplies ample to take care of requirements. Quotations follow:

Lead pipe, lb.		$0 13
Lead waste pipe, lb.		0 14
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sqr. ft., in rolls, lb.	0 11½	0 12½
Cut sheets, ½ to ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	0 40	0 45
Solder, strictly, lb.	0 38	0 43
Solder, commercial, lb.	0 38	0 39
Solder, wiping, lb.	0 31½	0 45
Solder, wire, lb.	0 47¼	0 54
Zinc sheets, lb.		0 26

Old Materials May be Revised

Toronto.

OLD MATERIALS. — Some changes seem to be under discussion in regard to old materials and an early announce-

ment as to what these may be can be expected. Trade just now is quiet and quotations shown herewith are really only nominal.

Dealers' Buying Prices—		
Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13
Red brass	....	0 21

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Metal Markets Show Little Change

Toronto.

INGOT METALS. — There is very little interest manifest in the various metals and little trading is in progress. It is hard to say what the market is or whether there really is a market just now. It will probably take some little time for what may be called a real market to develop.

COPPER.—No new developments have been reported locally. The metal is quiet and interest lacking. Quotations hold unchanged at around 30c per pound.

TIN.—Advices indicate that the London market is up £14 this week, but whether this will have any effect on prices here is doubtful. Quotations range from 70c to 80c per pound locally.

SPELTER.—Perhaps the most active metal is spelter, but even this could be better. Supplies are only fair, but equal to demands. The price holds around 9½c per pound.

LEAD.—Lots of it and no place to sell it. That is really the situation on lead and until things upon up in the spring little activity is expected. Prices are down around 8¼c to 8½c per pound.

ALUMINUM. — There have been no new items of interest develop this week, the market being dull and prices holding at nominal figure of 50c per pound.

ANTIMONY.—Even at 10c per pound, the local price, there is no activity in this metal and little interest seems to attach to it. Users are few and demand consequently limited.

LONDON MARKETS

LONDON, Ont., Jan. 9.—Numerous price changes have been recorded this week, and not a few provide for advances to higher levels. Some lines of carpenters' tools have moved up, and it will be noted that in planes a differential has been named for smooth bottom and corrugated bottom, the latter now selling at an advance over the former. Churns have gone up, and other lines following the upward trend are chicken leg bands, roofing caps, gimlet bits and wire hat and coat hooks. A new list and discount has been issued on sand paper which works out at little change from old list. Bar iron has registered a decline.

Trade for the new year has started off well, comparing very favorably with the same period of last year. Jobbers have completed stock-taking and retail merchants are hard at it.

New List Discount Named on Sandpaper

London, Ont.

SAND PAPER, EMERY CLOTH.—New lists have been established on sand paper from which a discount now prevails. This provides for a readjustment or evening up of values, the new net prices showing slight declines from recent advances recorded. The present lists as shown below are subject to a discount of 12½ per cent. It will be noted that the price on emery cloth has also been adjusted and new net figures show a slight decline from levels recently reached. To the list on emery cloth 30 per cent is added to arrive at net prices. Lists and net prices on sand paper and emery cloth follow:

	List Per Ream	Net Price Per Quire
Sand Paper—B. & A.		
Nos. 000 to 0	$ 7 50	$0 36
No. ½	7 95	0 39
No. 1	9 00	0 44
No. 1½	10 50	0 50
No. 2	12 15	0 58
No. 2½	13 95	0 67
No. 3	15 90	0 77

	List Per Ream	Net Price Per Quire
Star Brand—		
Nos. 000 to 0	$ 6 75	$0 33
No. 1½	7 20	0 36
No. 1	8 10	0 40
No. 1½	9 15	0 45
No. 2	10 35	0 50
No. 2½	11 70	0 56
No. 3	13 20	0 64

List prices subject to a discount of 12½%.

	List Per Ream	Net Price Per Quire
Emery Cloth—B. & A.		
No. 000 to 0	$30 00	$2 15
No. ½	31 20	2 25
No. 1	32 75	2 35
No. 1½	34 30	2 50
No. 2	36 50	2 65
No. 2½	39 40	2 80
No. 3	42 50	3 05

To list prices add 30%.

Planes Go To Higher Levels

London, Ont.

PLANES.—Several lines of Stanley goods have undergone revision. One of the most important is that affecting planes. It will be noted that a differential has been established between smooth and corrugated bottom planes, the corrugated bottom selling at an advance over the other. The new prices are shown as follows: Smooth bottom No. 3, $3.80; No. 4, $4.10; No. 4½, $4.75; No. 5, $4.75; No. 5½, $5.10; No 6, $6.05; No. 7, $6.90; No. 8, $8.25. Corrugated bottom, No. 3C, $4.05; No. 4C, $4.45; No. 4½C, $5.10; No. 5C, $5.10; No. 5½C, $5.70; No. 6C, $6.55; No. 7C, $7.45; No. 8C, $8.90 each.

Churns Advance To Higher Levels

London, Ont.

CHURNS.—Higher price levels have been established on Dazey churns this week. It is indicated that higher priced raw materials, along with constantly mounting production costs have been factors in this increase. The new quotations now in effect are as follows: No. 30, glass, $22 per dozen; No. 40, glass, $28.75; No. 400, metal, $6.25 each; No. 600, metal, $7.25 each; No. 1000, metal, $12 each.

Leg Bands Record Advance; Oyster Shell

London, Ont.

LEG BANDS, OYSTER SHELL.—An advance has been recorded on aluminum chicken leg bands. The new price established on these being 55c per 100. A very fair sale of oyster shell is reported and prices are being steadily maintained at unchanged figures as follows: Canadian $1.35 per 100 pounds; American $1.50 per 100 pounds.

Bar Iron Easier; Nails Unchanged

London, Ont.

BAR IRON, NAILS.—An easier tone has been noted in bar iron and the price to-day provides for a substantial decline from former levels. The new base established is $4.10 per 100 pounds. There have been no new developments to record in nails. The movement is light, the demand just now being limited, but the market is well maintained, wire being quoted at $5.50 per 100 pounds base and cut at $5.85.

Roofing Caps Up; Rope Prices Hold

London, Ont.

ROOFING CAPS, ROPE.—Tin roofing caps have reached higher levels, quotations being made to the trade to-day being $11.50 per 100 pounds in full sacks; small lots are invoiced out at 12½c per pound. There has been no further change in the rope market, prices holding at declines recorded last week. The hemp market has firmed up again and that dealers figure rope is a good buy to-day is indicated by the freedom with which orders have been placed at the present basis of 28½c per pound for pure manila; 24c for British manila and New Zealand hemp, and 25½c for sisal.

Booking on Spring Goods Continues

London, Ont.

SPRING GOODS. — Indications are that those dealers not already covered are placing orders for various spring goods which they will soon require. Prices are well maintained on these goods, poultry netting, Canadian, being quoted at a discount of 15 per cent. from list. Screen wire cloth is steady, in 100-foot rolls the price remaining at $3.25 per 100 sq. ft., and in 50 ft. rolls $3.30. Harvest tools and garden cultivators are quoted at 17½ per cent. discount from list, and spades and shovels at 25 and 25% off list, unchanged discounts. The outlook for all these lines is considered good and great activity is expected to develop in the next few months.

Hat and Coat Hooks Up; Gimlet Bits, Too

London, Ont.

COAT HOOKS. GIMLET BITS.—A new price has been named on coppered wire hat and coat hooks which provides for an advance, the present quotation for 3-inch being $1.10 per gross. Gimlet bits are also higher, the new figures on the American, in assorted sizes, being $1.25 per dozen.

English Cutlery Coming; Heaters Move

London, Ont.

CUTLERY, HEATERS.—Latest advices from the jobbers indicate that they are in receipt of some shipments of Joseph Rodgers and Sons' pocket cutlery. It is intimated that no change in present price is anticipated. A better movement of oil heaters is again noticeable. In fact the past season seems to have been a record breaker. Prices have been firmly maintained at following levels: New Perfection, No. 525, list, $7 each; No. 530, $8.25 each; No. 630, $10.25 each. Less 25 per cent. McClary No. 860, n.p., $4.75 each, net; No. 860, enamel, $5.50, each, net.

White Lead in Oil, Glass, Putty Unchanged

London, Ont.

WHITE LEAD, GLASS, PUTTY.—There has been no change recorded in white lead in oil this week, pure being quoted at $17.80 per 100 pounds in ton lots and in smaller quantities, $18.15. Glass has held steadily, single and double diamond being unchanged at 25 per cent. discount from list in full boxes with cut lights selling at 10 per cent. Little movement in putty is recorded and there has been no indication of any immediate change from following prices: Standard, in 100 pound drums, $6.75 per 100 pounds; in 25 pound drums, $7; pure in 100 pound drums $8.75; in 25 pound drums, $9.

Linseed Oil Steady; Turpentine, Too

London, Ont.

LINSEED OIL, TURPENTINE.—The market on linseed oil has been pretty quiet for some little time past, and the absence of activity is the main reason for steady market. The seed market has shown some variation but not enough to stir up interest in revising prices, which range as follows, per gallon: 1 to 2 bb'ls, raw, $1.70, boiled, $1.73; 3 to 5 bbls, raw, $1.69, boiled, $1.72; 6 to 9 bbls. raw, $1.69, boiled, $1.70. Less bbls. add 10c gal. Turpentine is gaining strength at southern points, which may be reflected here. Just now there is little moving and supplies are ample for requirements. Quotations hold at following conditions per gallon: 1 bbl. lots, $1 10; 2 to 4 bbl. lots, $1.09; 5 gal. lots, $1.20.

WINNIPEG MARKETS

WINNIPEG, Jan. 9—Price changes during the past week are not so numerous but are important. Reductions have occurred in some lines and advances in others. Among the lines to move up in prices appear unmounted grindstones and some lines of washing machines, while declines are recorded in rope, poultry netting and linseed oil. Markets in general are holding steadily, although moderate reductions are to be expected as raw material becomes more plentiful, while the increased output of many of the mills will also be instrumental in lowering costs gradually.

Business in general is reported as fairly quiet, all jobbers and retailers being in the midst of stocktaking.

Further Declines Recorded in Rope

Winnipeg.

ROPE.—Following last week's reduction in rope of 2c per pound, HARDWARE AND METAL also predicted further reductions. These are confirmed in new prices just announced by the manufacturers which show a reduction in pure manila and British manila, while sisal and lath yarn remain unchanged. To-day's market prices are given herewith: Pure manila rope, 30c lb. base; sisal rope, 26¼c base; British manila, African hemp and New Zealand hemp, 28¼c base; lath yarn, 26¼c base.

Grindstones Move Up 25 Cents

Winnipeg.

GRINDSTONES.—Prices on unmounted grindstones which have remained firm for some time past have been revised owing to the recent increased freight rates. New prices just announced are 25c per 100 pounds over former quotations, which makes to-day's selling price $3.50 per 100 pounds.

Poultry Netting Records Decline

Winnipeg.

POULTRY NETTING.—Banner poultry netting prices have been revised during the week, and show a downward trend. The manufacturers who have been loaded up with Government orders are now getting raw material in larger quantities and will, no doubt, be able to supply all demands. Prices now ruling are given below: Beaver Poultry Netting: 24 inch, $4.75; 36 inch, $6.10; 48 inch, $7.25; 60 inch, $8.50; 72 inch, $9.75 per roll.

Eavetrough, Conductor Pipe Hold; Easier

Winnipeg.

EAVETROUGH, CONDUCTOR PIPE. —Prices on eavetrough and conductor pipe remain steady on the local market, although a slight decline is recorded in the eastern markets and an easier feeling is in evidence. Prices now ruling are as follows:

Eavetrough: 8 inch, $6 85; 10 inch, $7.60; 12 inch, $8.95 per 100 feet.

Conductor Pipe: 2 inch, $8; 3 inch, $9.65; 4 inch, $12.75 per 100 feet.

Washing Machines Up 5 to 10 Per Cent.

Winnipeg.

WASHING MACHINES. — Increased freight rates as well as higher prices ruling on material have been the factors resulting in increased prices on several lines of washing machines which move up from 5 to 10% over former quotations. Among those affected this week are the following machines, together with to-day's ruling prices: Dowsewll, $6.35 each; Canadian, $6.60 each; Seafoam Power, $32 each; Seafoam Electric, $68.75. Prices on other lines remain firm.

Wrought Pipe Holds; Easier Tendency

Winnipeg.

WROUGHT PIPE. — Prices on wrought iron pipe continue to hold at unchanged levels on the local market, although an easier tone is manifesting itself. Stocks are reported as somewhat broken owing to the manufacturers being unable to secure skelp to manufacture certain sizes. However, better deliveries are looked for, in fact already reported and the situation is expected to show steady improvement. Prices rul-

ing to-day are as follows, though a change to lower levels would not come as any surprise:

Wrought Iron Pipe—	Per 100 feet. Black	Galvanized
¼-inch	$6 00	$8 35
⅜-inch	6 05	8 45
½-inch	7 85	9 60
¾-inch	9 95	12 30
1-inch	14 70	18 20
1¼-inch	20 00	24 70
1½-inch	23 75	29 35
2-inch	32 00	39 50
2½-inch	51 25	63 15
3-inch	66 20	82 60
3½-inch	86 85	
4-inch	103 00	
4½-inch	118 50	
5-inch	138 00	
6-inch	179 00	

Clothes Wringers Remain Unchanged

Winnipeg.

CLOTHES WRINGERS. — Wringer prices also hold firm but a revision is to be expected in the near future. To-day's ruling prices on a few lines are herewith confirmed as follows: Eze wringers, $62.55 dozen; Reliance, $73.70 dozen; Emperor, $105.90 dozen; Royal Canadian, $57.95 dozen.

Linseed Oil Down Another 10 Cents

Winnipeg.

LINSEED OIL. — Further drops in flax seed prices have been reflected in the price of linseed oil. Declines in oil amount to another 10c per gallon. Stocks are reported as light with only a small demand. Prices now ruling are given herewith: Raw linseed oil, $2 gallon; boiled linseed oil, $2.03 gallon, in single barrel lots.

Turpentine Holds Without Change

Winnipeg.

TURPENTINE. — Turpentine prices are reported as holding firm at former quotations; however, as stocks are below normal and the supply from the south questionable the tendencies are to higher levels. Prices in the meantime remain firm at the following figures: Barrels, $1.25 gallon; ½ barrels, $1.28 gallon; 5 gallon lots, $1.30 gallon; 1 gallon lots, $1.30 gallon; plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., January 9.—The whole pig iron market has now come down the $3 a ton originally suggested in the price reduction programme the American Iron and Steel Institute committee had prepared for submission to the War Industries Board at the meeting of December 11, but which the Board refused to hear read, as it had decided to discontinue price fixing after December 31. The steel producers adopted the suggested reductions in steel prices very promptly, but the merchant blast furnaces held off. There have been very few sales simply because there has been very little demand, but enough sales have occurred to show that any furnace expecting to sell must accept at least $3 a ton less than the Government prices formerly ruling.

The reduced prices are as follows: Bessemer, $32.20; basic, $30; No. 2 foundry (1.75 to 2.25 per cent silicon), $31; malleable, $31.50; forge, $30. Under Government control all prices were f.o.b. furnace except that during the fourth quarter of 1918 Tennessee and Virginia furnaces were allowed to charge delivered prices equal to base price plus freight from Birmingham to point of delivery, while eastern Pennsylvania furnaces were allowed, similarly, to use Pittsburgh as a basis. This gave the furnaces involved somewhat higher than base prices f.o.b. their furnaces. Now, however, various questions will arise. In open market conditions pig iron prices are not uniform at furnace as some districts develop lower or higher prices than others. Eastern Pennsylvania furnaces cannot stay on a Pittsburgh basis as that would make prices too high, while again, their prices normally rule somewhat higher at furnace than is valley iron at furnace. Southern iron, of course, must be at less than northern at furnace or it will not sell in sufficient volume since to engage the capacity of southern furnaces much iron must be sold in the north with heavier freights than must be paid on northern iron to delivered points. Birmingham prices prices used to rule about $3.25 below valley prices. Now Birmingham and valley are both quoting $31 at furnace on foundry iron, and Birmingham iron must come down still more, while besides that, the Birmingham furnaces are not nearly as well sold up as the northern furnaces. Eventually all these things will have to be straightened out, and this will make it difficult to maintain pig iron prices. Competition will more readily develop in pig iron than in steel since steel prices are easier to maintain because practically all steel prices are based on Pittsburgh, plus freight.

As to adjusting prices under pig iron contracts, each case will probably be considered individually. Nearly all buyers of pig iron who have contracts at Government prices are requesting that the $3 concession be made, and while furnaces have said a good bit about contracts being contracts and enforceable at law, the probability is that in most cases the furnaces will eventually recede and make the concession. They suggest that an important consideration will be whether the customer would be put at a disadvantage by reason of competition in his finished products if required to pay the contract price.

Steel Demand Light

Demand for steel products generally is very light. As to new buying and enquiry there is practically none, while specifications on contracts are light. There is, of course a large tonnage of contract tonnage on books, but it does not mean actual business unless the buyers specify or give actual shipping orders. The mills are of course ready, as a rule, to accept orders under the contracts at the recently reduced prices instead of at full contract prices, but that does not bring much business. For a time the mills made claims that they would hold buyers to contract prices despite the open market reductions, but no one took that talk very seriously. What was expected, perhaps, was that shipments through December would be invoiced at the old prices, but in some cases at least the concession was made to apply even to shipments between December 12, the date when some steel mills announced the reduced prices, and December 31.

The New Steel Contract

There is much more discussion than adoption of the new form of contract for the sale of finished steel products approved by the board of directors of the American Iron and Steel Institute and recommended for adoption by the trade. The feature of the new form is the provision for "liquidated damages," to be paid by the mill if it fails to ship on time and by the buyer if he fails to specify on time, the "liquidated damages" to be the difference between contract price and market price at time of failure, but in no case to be less than five per cent. of the contract price. The statement has been printed in two trade papers that the new contract is "already in use by leading steel producers," but that is not correct unless the phrase "in use" be interpreted quite liberally. It is certain that regular contracting is not being done with the new form, and it is very doubtful whether a single steel producing company has yet had contracts printed with its name thereon. The form that is used for discussion is a form printed by the institute, with no particular steel company name printed.

Generally speaking the steel producers favor adoption of the new contract form, but they are looking for leadership. Usually leadership is furnished by the United States Steel Corporation, but it seems there still needs to be discussion between the corporation officials in New York and the heads of the subsidiary companies, which make the actual sales, before a unanimous opinion is developed.

If this new contract form were adopted the result of course would be to limit very greatly the amount of forward buying and forward selling, as neither party would be willing to commit himself so far ahead when the contract had to be lived up to. Hitherto at one time buyers would fail to specify, while at another time mills would fall behind in deliveries. Buyers overbought and mills oversold.

Trade Prospects

The entire trade, buyers and sellers alike, are in accord that it is unlikely there will be much market activity for some time to come, say for three months at least. While it is sometimes con-

WEEKLY PAINT DEPARTMENT

Boosting Sales by a Demonstration

January Business Can Be Largely Increased and Foundation Laid For Future Trade —Plans Followed Out By One Dealer Successfully

A DEMONSTRATOR in any special exhibit of merchandise is one whose time should be mainly devoted to educating the public buying in the various methods and uses to which that merchandise may be put.

A demonstration should furnish the opportunity of standing face to face with a customer on more intimate terms than can usually be gained across the counter. It affords the opportunity of explaining in detail the value, merits and uses of any line of goods. It can be used as an educational force to exhibit some line of goods with which the customer is not familiar. Or it can be used to show new uses for an old line of goods, and which the consuming public has not fallen into the habit of using them for.

To Teach Public

A January Paint Demonstration should be designed to teach the public that certain paint and varnish specialties can be used within doors during the winter months as well as at any other season.

In one sense a demonstration should be conducted in the spirit of a classroom, to which all are free to come and learn; while it may attract either through curiosity or through personal interest, it must teach something worth while. It must impress upon those who view it, ideas that they will carry away, ponder over, and put into practical use with the line exhibited.

The spoken word, and more personal contact promoted by a demonstration, can scarcely be superseded by any other form of advertising.

A demonstration carried on within the store obviates much of the necessity of a clerk taking up valuable time to "talk" up a line. The demonstrator is paid to talk and demonstrate and take that burden from the clerk's shoulders.

Will Get Results

Then too, there is a lot of educational psychology involved in properly staging a demonstration. If it is properly applied, it brings home the bacon; if improperly applied, results may be disappointing.

Now, don't be afraid of that word—"psychology." It is simply a high brow term applied to the organized study of the workings of the human mind.

We are all at this study every day. If you work your demonstration in sympathy with the action of the average human mind and its desires, you can cash in on your efforts. If you don't—well, you don't.

So let's get a little closer to the brass tacks of applying these general terms to plain everyday business.

Can a paint demonstration be made to pay in January? It can; as has been proved.

But as we have said, its success depends on the method and manner in which it is conducted.

Cut Out the Frills

Do not attempt to rig up an over-elaborate display. Eliminate all the frills. Make it a tangible, realistic exhibition of what your goods will do in the day in and day out service that they are intended to render the consumer. Choose a simple, homely method of showing what your goods can be made to do. Make it so that it will appeal to high and low, rich and poor alike. Camouflaging with elaborate unnecessaries has a tendency to make the customer look for a nigger on the fence. Avoid this by all means.

Just as a plain, wholesome home-cooked dinner, and plenty of it, appeals to every human appetite, and warms up the cockles of the heart, so will a plain demonstration of paints or paint specialties on the everyday articles of home use loosen up the purse strings of the householder. There is a better and stronger appeal in it than any fanciful elaborate get-up.

A well-known paint department carried these ideas out successfully in January and boomed their winter sales beyond expectation.

Held the Crowd

But first, a word about the demonstrator. A young woman was chosen who had never attempted such work before, though she had had previous experience in selling behind the counter. Her most valuable asset was that she possessed a practical everyday knowledge of domestic science which had been gained in the adminstration of a home of her own. This enabled her to bring to bear a fresh, enthusiastic viewpoint in her work that engaged the attention of all whom her exhibit attracted.

The selection of a professional demonstrator had been avoided with these reasons in mind, and the wisdom of the choice worked out more successfully than anticipated. This woman's freedom from the cut and dried rigamarole of the professional led her into channels that only an experienced housekeeper could find. She added to her explanations little domestic suggestions and precautions that appealed especially to the women. A little coaching in the use of the specialties used for demonstration soon got her into the swing of things, and her natural talent, together with her practical home experience, did the rest.

As the first demonstration was largely an unproven effort and experiment, naturally expense was avoided as much as possible; this turned out to be one of the secrets of its success.

Moore's Paints

READY MIXED

Produce Customer Satisfaction

The customer finds them just the paints for the job at hand; covering a great amount of surface, easy to apply and presenting a good appearance long after other paints have faded away.

They're the paints that bring the customer back for more

Moore's Mixed Paints are manufactured primarily to please the customer, and are sold to you at a price to allow for a generous margin of profit.

An ideal paint for the customer to use and the dealer to sell, that's Moore's.

Our splendid agency proposition will interest you. Write us for information.

BENJAMIN MOORE & CO., Ltd.
WEST TORONTO - - ONTARIO

BOOSTING SALES BY A DEMONSTRATION

Continued from page 50.

A space immediately in front of the main entrance of the store was cleared out, and a platform of packing cases arranged and draped, so that the articles to be demonstrated could be reached easily while the demonstrator stood on the floor.

Not Cluttered Up

This platform was not cluttered up with pyramids of cans, brushes, etc., but was left entirely to the article being worked on, and the few tools and cans used in the work.

Sufficient floor space was left about the platform, so that both demonstrator and those looking on could move freely about. A few simple arrangements of paint specialties and color cards were made on tables at the back and sides of this space so that these could be referred to handily when required. Everything was arranged in order, so that attention could be centred on the demonstrator and the work in hand. There were no counters, railings or other bars to the intimacy of a customer if he or she were so inclined.

There was no attempt to make the usual "before" and "after" exhibits, commonly found in paint showings; it was held that there is a feeling on the part of the public that the extreme in both these instances is usually shown up and does not portray just average conditions. The progress of the work on the article in hand was thought to be sufficient in this respect.

Not Asked to Sell.

The demonstrator was freed from any handicap of making direct sales so far as possible. She was given an order pad to take such orders as could not be avoided, or steered towards other clerks. As soon as the order was complete, she then turned her customer and the order over to a regular member of the staff, who completed the sale, made change or wrapped parcels as might be required. This clerk was also given the credit for the sale. By doing this, much friction in regard to credit of sales is avoided, and which sometimes arises between demonstrators and clerks, where the demonstrator carries out the whole transaction. It also leaves the demonstrator free to interview and explain her lines to the maximum number of enquirers and listeners and avoids having her run through other departments to the annoyance of the regular staff. Regular staffs, as you know, have inclinations towards jealousy, which it is very desirable to avoid for the success of the demonstration.

What to demonstrate and what to demonstrate on were the most seriously considered questions, and the methods chosen in this instance were considered the biggest factors in the success of the exhibit. It was decided that concentration on some one line would maintain the effort towards simplicity. At the same time, it avoided confusion likely to arise in attempting to handle too many lines. Varnish stains were chosen because of the wide variety of uses to which they could be put on furniture, woodwork, wickerwork, picture frames, floors, etc. It was calculated that they would appeal more strongly to the householder for indoor use, and so it worked out.

Took the Chairs

Again keeping in mind the desire for simplicity, and the purpose to exhibit something that even the veriest novice could appreciate and handle, it was decided to utilize first all articles in the store on which a varnish stain might be applied. The store and office chairs were first requisitioned into use. There was no scurrying around in second-hand shops and junk heaps for dilapidated furniture. Articles that were in everyday use were taken up, refinished, and placed back into their customary service. In two or three days the demonstrator was able to point out object lessons all through the store. This method served the dual purpose of putting the office furniture in better shape, brightening it up, and showing what could be done to improve articles of average use.

When the available stock of furniture in the store ran out, a neighboring dry goods store furnished sufficient chairs and other articles to work on. The dry goods merchant had no reason to object, and in fact, his staff assisted somewhat in bringing attention to the demonstration. After this stock of available furniture ran out, the proprietor of the hardware store and his clerks found sufficient material of everyday use at their homes, and which served the purpose desired.

A few articles, such as a child's iron bedstead, a water tank, a bathroom cabinet, picture frames, etc., were given a coat of suitable household enamel. These were scattered through the demonstration as thought advisable, but the main effort remained with varnish stains.

Now, what were the results? Not a few of the merchants of the town, seeing the practical application of such a simple means of brightening up store furniture, bought varnish stains and improved the appearance of their fixtures. One manufacturer who happened in while the bookkeeper's stool was undergoing its transformation, decided that the wornout furniture and woodwork in his offices could stand similar treatment to advantage, so he bought. It was noticed that women folks took most interest in the exhibit when the common, ordinary, everyday chair was on hand. The nature and number of enquiries made by women showed how easily a simple showing, staged in this way, brought to mind the condition of everyday furniture at home and pointed out a simple means of improving the condition of these for service. Not a few attics were ransacked, and many discarded pieces of furniture were haled back into service.

The bright, suggestive conversation of the demonstrator led inquirers to seek ideas along many other lines. So that while varnish stains were played up almost exclusively, it was a means of leading to sales in other specialties for indoor use.

Was Well Satisfied

Did it pay? Well, the proprietor of this store says he is certainly going to try it again. Not only did actual sales increase during the continuance of this demonstration, but it was found that it fostered a habit of indoor painting that produced permanent results. Long after the exhibit was removed, customers were asking for varnish stains. The store furniture always stood handy as a ready reference for the clerks. It is what the eye sees that carries conviction, and the results of this effort carried a conviction that perhaps a whole lot of other expensive advertising could not convey.

This particular demonstration lasted three weeks, but the demonstrator's job lasted a good deal longer. Its success convinced this man that if a January demonstration could be made to pay with paints and varnishes, why not show up other goods that were subject to seasonable buying habits, and create a demand for them in off seasons? Oil burning cook stoves, fireless cookers, kitchen cabinets, waxes, fire extinguishers for the home were each given a turn in the same simple manner.

It will not be surprising to see before long the establishment of a permanent demonstration booth in this store to offset the fixed seasonable buying habits of the consuming public in paints as well as other lines.

Is Good Business

After all, much of the seasonable selling conditions that exist with many lines of goods are based on habits that have little or no reasonable foundation. Is it foolish to attempt to disturb these habits? It is not; it is business to do so. Not so very long ago ice cream was thought to be only a summer delicacy. Take away ice cream from the larger present day candy stores and ice cream salons during the winter and it would seriously cripple such business.

Many other lines have disturbed the previous buying habits of the public, to their own advantage. Getting them out of these ruts is one form of creating a demand, and creating a demand in season and out is business—the special business of advertising. A demonstration is one of the practical methods of advertising in this direction; and when it can be made to pay, why not go to it? Fix up a paint demonstration for the last two weeks of January and try it out.

ARGENTINE FLAX CROP

Preliminary estimates of the Argentine flaxseed crop show the following totals of acreage for the various provinces during the agricultural year, 1918-19: Buenos Aires, 614,425; Cordoba, 753,668; Santa Fe, 1,304,711; Pampa, 66,718; Entre Rios, 642,471; others, 37,066. The total acreage is 3,419,059. The flaxseed area for the year shows an increase of 185,328 acres.

Paint Firms After Export Business

Important Plans Discussed at Annual Meeting in Montreal—Co-operative Advertising May be Undertaken—Containers to be Available in Ample Time For Spring

AT the annual meeting of the Canadian Paint, Oil and Varnish Association held in Montreal on Tuesday, a number of important matters were fully considered and the discussion following was most enthusiastically taken up by those attending. That the association means to anticipate a share of overseas business that will be obtainable if it is sought, was developed when the question of appointing a special representative to visit France and Belgium was introduced. Steps were taken to approach the federal Government at once, for it was thought best to work in harmony with them in any plans that might be arranged. As a result a committee was appointed to take this matter in hand and results will depend upon the report that the committee is able to return to the association at a meeting to be held later.

Co-operative Advertising

In the United States a very large interest has been evinced in a scheme of nation-wide publicity regarding the use of paint and other kindred materials. Already it is understood that some $500,000 has been apportioned for this work and the scheme suggested called for the expenditure each year of about $100,000 in co-operative publicity work. After going into matters more fully however, it was decided to spend more money, and it is possible that a much larger appropriation will be expended annually for several years. The details of the scheme, while not available at the moment, include a wide campaign of advertising to cover the whole country from coast to coast, and the idea will be to co-operate and further the spirit of the Government's conservation scheme which was taken up during the progress of the war.

Just what the Canadian paint makers will do is not definite at this time, but it is expected that the scheme will take definite form in the near future and that a campaign fund will be raised.

Prices to Hold

It is a significant fact that all prices are left without change for the present, and this bears out the tendencies of the markets as indicated in the columns of HARDWARE AND METAL for several weeks. While a few raw materials have declined somewhat in price this does not mean that deliveries have so improved on the various materials as to enable the paint maker to make up his orders on the lower-priced raw supplies. Some lines have been very hard to secure and transportation has been slow. Linseed oil has declined quite a little but this is but one of the lines of consequence entering into the manufacture of paint. It is generally stated by the paint men that they do not anticipate any change probably for several months unless it might be of a slight nature on an odd line of goods. The regular lines would be steady, and in all probability, unchanged.

GEORGE HENDERSON

Of Brandram, Henderson, Ltd., who was re-elected as president of the Canadian Paint, Oil and Varnish Association.

Containers Available

HARDWARE AND METAL is informed that supplies of tin cans as required by the paint makers will very probably be available in sufficient quantities to take care of spring business. Some of the manufacturers are more hopeful than others, and one big firm stated that the prospect was most encouraging for such supplies as they would need over the coming months. Plate mills have had a lot of business to overtake but it would seem that the manufacturers are speeding up production in such a manner as to prevent actual disappointment on the part of their customers. It is also likely that the tin can, so necessary for this product, will be used mostly, if not altogether, the favorable turn in the war development making it unnecessary to use the substitute cans that had been arranged for.

Officers for 1919

The election of officers for the current year resulted in the return of George Henderson as president, Walter Ramsay vice-president, L. F. Monypenny second vice-president, and Messrs. D. Christie and A. C. Pendray as directors. George M. Edwards was re-elected as secretary.

The reports received by HARDWARE AND METAL indicate the outlook as a most encouraging one for the present year. An informal gathering of a social nature was held on Tuesday night, President George Henderson presiding.

Reginald H. Monk to Manage Chemical Plant

Reginald H. Monk, for many years connected with paint circles, has joined McArthur-Irwin, Ltd., Montreal, as manager of their newly-acquired chemical plant in Outremont.

Mr. Monk has served in the paint trade for nearly twenty years. Beginning his engagement with S. O. Cowper Coles as an electro-chemist in London, Eng., in 1901, he continued with them until 1904, at which time he left for Calcutta, India, where he was assistant manager for Turner, Morrison and Co. of Liverpool, manufacturers of paints and kindred lines. In 1906 he became chemist for Lewis Berger & Co., London, Eng., and was with them until 1907.

Coming to Canada in 1907 Mr. Monk joined the staff of Brandram-Henderson, Ltd., and was made assistant manager of its Wellington St. branch, Montreal. In 1912 he was appointed to the managership of the lead works division of Brandram-Henderson, Ltd., and this office he continued until January, 1918, being called at this time to the position of assistant general manager of this company. He also was a director of Brandram-Henderson Co. of B.C., Ltd.

He assumes his new duties immediately.

ELECTED NEW OFFICERS

At the first meeting of the Winnipeg Paint Club held this year the following officers were elected for 1919:

President—W. J. Bland, Canada Paint Co.

Vice-President—J. Drewe, Winnipeg Paint & Glass Co.

Directors—J. M. Lynch, Merrick-Anderson Co.; P. Jomini, Wood-Vallance Co.

Secretary-Treasurer—J. Leonard Paul, Brandram-Henderson, Ltd.

A general license, valid until March 1, 1919, has been issued to permit the importation into the United Kingdom of any quantity of gum copal and gum kauri. Importers are still under the obligation, however, of procuring permits to purchase.

Says That General Conditions in Canada Guarantee Continued Prosperity

Stocks Low, Prices High, and Money Plentiful Means Continued Business Activity, is the View of W. S. Fallis, of Montreal

"ON the threshold of the new year the outlook for 1919 is definitely favorable, and justifies reasonable optimism," W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada, Limited, stated to HARDWARE AND METAL.

"It is true that there are many industrial problems to be solved; problems which are of as much importance in their financial aspects as are the political adjustments of the coming peace in the field of international affairs. Notwithstanding this the broad, general lines of the course of trade, during the next twelve months, appear to be definitely drawn on the side of continued activity.

Will Be Gradual

"Prices may decline somewhat from the highest recent levels, but this decline will be neither general nor rapid. We must remember that vast as the total of the world's war production has been, it has, in a very strict sense, been a specialized production of war machinery and supplies, for war purposes, and that which has not been already consumed will be either scrapped or worked over, to help meet the demands of the reconstruction period.

"Men who have actual first-hand knowledge of conditions in Europe, are quite positive in their opinion that European buying, particularly of raw materials, will continue to be a great factor in maintaining the present price levels on this continent for some time to come.

Absorb Production

"The war restrictions on the use of metals, etc., for other than military purposes, have been so drastically in operation abroad for the past three years, and in a lesser degree, for a shorter period, on this side of the water, that the ordinary normal demands, stifled for such a time, will absorb the capacity of production for a very long period.

"These demands for raw materials, for made goods, for labor, and for capital, will be very great and very insistent, and the alert business man will make arrangements for his stocks with this fact in view.

"The country is prosperous, money is plentiful, and the people, just relieved from the shadow of the great war, are in a confident and generous mood; stocks, raw and made, are low and prices are high. Surely these are all definite guarantees of a continued and prosperous business activity."

WALKERVILLE FIRM PREPARING FOR A RECORD BUSINESS

C. L. Forgey, of Berry Bros., Walkerville, Ont., gave to HARDWARE AND METAL, his view of the outlook for 1919 as follows:

"We are making preparation for the biggest boom in business that we have ever had. As for varnishes, stains, and enamels there will be no change in these materials as far as we are concerned, and we can see no reason why business will not continue and improve as it goes along. There has been so much money saved by people who never saved before, that there is bound to be a good business for everybody. That is one result of the war, it has taught people to save, and this will enable them to buy homes, pianos, automobiles and all of the luxuries that are longed for by the laboring people.

Export Prospects

"As for export prospects, we expect a great increase in this department as it will now be possible to get ships, especially from those countries from which we have been cut off for the duration of the war. We think that all merchants should now clean up and advertise and let it be known that they have the goods. If everybody will do just this, prosperity will reach us earlier than if we sit back and wait for it to come."

SEES ERA OF PROSPERITY FOR ALL LINES OF BUSINESS

Royal Cluxton, manager of the Canada Paint Co., Limited, Montreal, says: "We hold nothing but the most optimistic views of the future prosperity, not only in the paint and varnish trade, but also for all lines of business in the Dominion of Canada, and I firmly believe that we are about to enter into an era of prosperity never before known or realized on this continent."

DU PONT EXPORT CO. FORMED

NEW YORK.—The organization of the E. I. du Pont de Nemours Export Company, which was incorporated to take over the du Pont Company's foreign business, has been completed.

Tentative plans for further expansion have been made and the following officers have been elected: F. W. Pickard, president; Walter S. Gavan, vice-president and director of sales; F. D. Brown, treasurer; Alexis I. du Pont, secretary.

The directors are F. W. Pickard, W. S. Gavan, F. D. Brown, F. C. Peters, C. L. Petze, J. A. Burckel and J. E. Hatt.

Headquarters will be established in New York by W. S. Gavan, who will be active head of the organization. An office will also be maintained in San Francisco. A large expansion in the du Pont company's foreign business is looked for with the ending of the war, and the new corporation has been organized to aid in the handling of this business.

BRONZE POWDER WORKS SOLD

NEW YORK.—Frank X. Anglin, assistant sales director for A. Mitchell Palmer, Enemy Alien Property Custodian, sold 2,500 shares of the stock of the Bronze Powder Works Company at public auction at the company's factory in Elizabeth, N.J., last Saturday.

William C. Cabell of Passaic, representing a syndicate of New York business men, bought the block of stock for $217,500 after brisk bidding.

Among those who tried to get the stock were Burton A. Howe of Grand Rapids, Mich., and Max Grifenhagen, formerly sheriff of New York County. It was announced that the purchasers would have a controlling interest in the bronze powder factory, and also two seats in the Board of Directors. Half of the purchase price was paid down upon acceptance of the bid.

GLASS FIRMS IN PATENT BATTLE

PITTSBURGH, Pa.—Suit was entered in the United States Court here by the Pittsburgh Plate Glass Co. against the American Window Glass Co. for alleged infringement of the Spinasse patent No. 1,208,851, relating to what is known as the cold bait process of drawing window glass cylinders. Over 90 per cent. of machine-made window glass, it is said, is made with this bait. Few patents in glass history have been more severely contested, three applications having been made, all for the same method, by H. G. Slingluff, of the Pittsburgh Plate Glass Co.; John A. Swett, for the American Window Glass Co., and by Arthur Spinasse, an independent inventor, to whom the patent was eventually granted after being appealed. The Pittsburgh Plate Glass Co. purchased the patent from Spinasse.

GERMAN DYE PATENTS TO BE "AMERICANIZED"

WASHINGTON, D.C.—Final disposition of the valuable enemy-owned or controlled dye patents in the United States is a matter which is interesting many. These patents are estimated to be valued at between $50,000,000 and $250,000,000. A Mitchell Palmer, custodian of alien enemy property, now holds them in trust.

The Federal Trade Commission has been simply flooded with applications for the use of these patents. Some of those making the applications, it is understood, have expressed the fear that, when peace is finally declared, they will be returned to their owners. Officials in the office of Mr. Palmer oppose any return to Germany of these patents. It is said that legislation may be needed to settle this whole dyestuff matter when peace is finally signed.

Vancouver Halifax TORONTO Montreal Winnipeg

Imperial Oil Company's Plan is Based on Dollars and Cents

BECAUSE it is regarded, in the stern language of dollars and cents, as good business, the Imperial Oil Company has adopted a program of co-ordinating the interests of the concern and its employees which goes much further in its benefits to labor than anything which has heretofore been attempted in this country; it involves the principles which have already been worked out by the Standard Oil Company in the United States. Joint committees of employees and executives for administration, automatic life insurance, old age pensions, sick benefits and athletic and social clubs are some of the features being inaugurated, not with any ulterior motive in relation to wage standards or in any spirit of paternalism but because the company has from careful investigations satisfied itself that to reiterate, it is good business.

In view of the unsettled conditions prevailing in the world labor markets, and the prospect that workers' demands may be difficult to meet if production is to be kept on a sound economic basis, Canadian employers generally will watch with interest the results of the working out of the Imperial Oil ideas which have been elaborated to HARDWARE AND METAL by Rev. Dr. Strachan, assistant to Pres. Hon. W. J. Hanna, who has been working on the program recently announced at Sarnia for some fifteen months. Dr. Strachan emphasizes that the company regards the proposition as a business one purely and simply, based upon statistics and actuarial conclusions.

The Replacement of Labor

The principal idea upon which the new relationship is based is to give recognition to what may be termed the vested right of the employee in an institution which he has served for a period of years and involves the problem to which students of sociology are giving much attention—to what is labor entitled in addition to wages? It is, of course, anticipated that this recognition of the vested interest of labor will result in a continuity of relationship in which the employee will benefit from the value of his experience and the company will gain advantages from that same experience. The cost of replacing an employee and the loss entailed in training him to a state of efficiency has been carefully considered in this connection.

No Strings on the Men

The company has endeavored to make it plain to the employees that there is no desire to tie strings to them. Take the insurance scheme, for example. All employees are automatically insured, no matter what the state of their health and there is no fee whatever. Nor is it necessary for the employee to remain with the institution to continue the policy. If leaving he may take it with him, but in that event will, of course, have to continue payment of the premiums himself.

With the sick benefit plan there are additional advantages as compared with the Workmen's Compensation Act. The employee is protected not only while at work but for 24 hours per day, 365 days of the year. Further, the company is prepared to look after the dependents of any employee fatally hurt until insurance payments are adjusted and this insurance will be above and in addition to anything which may be paid under the Workmen's Compensation Act.

In the pension scheme all employees are automatically enrolled. At the age of sixty-five there will be available for each employee in monthly instalments a sum representing annually 2 per cent. per year on a ten-year wage average; in other words, an employee of 20 years' standing would receive 40 per cent. of the average wage of the last ten years of service. This will be paid to the employee for the rest of his life and he will be at liberty to leave the company and seek other service—so long as he does not join a competitive institution.

In regard to these funds the finances are maintained on a sound basis, the funds being set aside from year to year so that there is a guarantee provided no matter what might be the developments in relation to the company's business in the future.

Human Efficiency

In addition to the benefits which the company foresees in the saving in training of new men by encouraging the loyalty of employees, the higher standard of efficiency possible for healthy people is taken into consideration. The company will have medical men to look after all employees. Likewise when a new employee is taken on he will be subjected to a medical examination. This is not with the desire of taking on only men of a certain standard but to judge the physical ability of the individual to undertake the work required of him. It is the idea to fit a man to the work he is best able to perform and, of course, applicants not physically fit for the position which they are seeking will be advised to this effect.

Not only health of body but health of mind is aimed at and in this connection community social centres are to be established in connection with each of the company's plants. A suitable building will be erected for the use of the employee, his wife and family and there will also be grounds for outdoor recreation.

The Housing Problem

The housing problem is another which has been faced by the company. At the present time about a hundred homes—self-contained houses, up-to-date in every particular—are in course of construction and these will be rented at a nominal figure which will enable the company to carry the charges.

Administration Committee

Fundamentally in regard to the relations of capital and labor the arrangement made for administration by a joint committee of employees and executives is perhaps even more important than the innovations cited. At Sarnia where the new era has opened, the committee is composed of fifteen workers and fifteen foremen and higher officials of the company; these form a general body which is divided into four groups representing different departments. This committee will rule on matters of policy and will have the right to initiate plans concerning recreation, sanitation, education or other matters bearing upon the welfare of the employees. This committee will also have the right to deal with such questions as wages and hours of employment, etc.

According to Dr. Strachan the object is to give every employee the feeling that he has the same rights in the institution as the highest executive. Any worker can take a grievance to the committee of his department and his case can be appealed through the general committee right up to the president of the company if necessary.

The program as outlined has been put into effect in connection with the company's Sarnia plant and its inauguration at other branches will follow. Dr. Strachan is now in Vancouver in connection with the organization there.

VARNISH ADDS DASH TO WEDDING

CHICAGO.—Varnish added piquancy to a wedding recently. At first the varnish seemed an obstacle, but not for long. It made the wedding just a little different.

Lieut. John M. Dayton of DeKalb, Ill., and Miss Jean Clark, duly provided with a marriage license, dropped in upon the Police Magistrate of Oak Park to be made one. There was a slight pungent odor and a shininess to the floor and they paused as some one shouted: "Look out for the varnish!"

Then someone suggested the roof as a fitting place for the altar. Everyone went up. It happened to be over the fire station and the firemen rang the bell and otherwise cut up. Everybody for blocks around turned out and produced confetti and it was a big wedding.

If it hadn't been for the varnish it would have been just one of those casual hitches.

Quality First

In the long run quality is the deciding factor among most varnish buyers.

The high quality and uniform dependability of Berry Brothers' varnishes and their allied products, is widely recognized among all classes of buyers and consumers.

Varnishes, Enamels and Stains bearing Berry Brothers' label need no selling arguments—because it is known to be a guarantee that any product sold under it, is true to description and the best that can be produced for the uses intended.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, January 9.—A slight revision has been made in the price of linseed oil by one firm but this is not a decline from the basis of last week. Turpentine is steady and quiet, and this applies as well to putty and white lead in oil. In view of the fact that pig lead has lowered considerably it is just probable some change may be made in white lead in oil, though no action was anticipated at the meeting of paint men this week. The outlook is encouraging.

Flaxseed is Firm; Linseed Oil Held

Montreal.

LINSEED OIL.—The spread of quotations this week is less, but there is no lower price basis for either raw or boiled oil. Crushers report a very firm market for flaxseed, and future options are particularly firm. There is a very good supply of oil and of seed here for crushing as required, and it is expected that prices will hold much as they are for the present.

Turpentine Steady On Light Selling

Montreal.

TURPENTINE. — There is little change in turpentine excepting that in one quarter there has been a little lowering of the basis. This is, however, still within the price basis of last week. Supplies are fair in some quarters but demand is light. The outlook is that prices will be maintained on a fairly high basis.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 05	$1 13
Small lots	1 17	1 24

(Packages extra)

Steady and Quiet Rules Putty

Montreal.

PUTTY.—The market is steady and the demand for putty light. Supplies are ample to meet the trade's needs and price basis is without any change whatever.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

No Change in White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Although there was a discussion this week of the price basis for various paint lines no change was decided upon for white lead in oil. The basis is still $17 per 100 pounds for five-ton lots of standard lead; $17.50 for 100 pounds for ton lots, and in small lots $17.85. Pig lead is weaker, but some expect that the bottom has been reached already. It is not clear just what the effect may be on white lead in oil, but the situation should soon clarify itself.

More Spring Orders For Mixed Paint

Montreal.

MIXED PAINT.—A large paint maker stated to HARDWARE AND METAL that orders were again coming in for paint to be forwarded early in the spring. Much booking business was taken before the holidays and those dealers not protected are now placing for their requirements. Prices are steady and the undertone is quite unchanged on shelf lines.

TORONTO

TORONTO, January 9.—Lower linseed oil is again reported in some quarters this week. The market on turpentine is very firm and primary points record a steadily upward tendency. This has not yet been reflected in local prices to the trade but may be at a not too distant date. Varnishes are reported as very firm, being scarce and hard to get, and no immediate prospect of an improvement in receipts. Travellers now out are cleaning up on spring orders and volume of orders coming to hand represents a very satisfactory total.

Linseed Oil Range Of Prices Widens

Toronto.

LINSEED OIL.—A somewhat wider range of prices is noticeable in respect to linseed oil this week, some factors quoting prices which represent a reduction from levels shown last week. The market on seed is considered remarkably steady and firm, and shows little variation, up one day slightly and down another, with only a comparatively small change for some time past. Future seed is holding up splendidly, May prices being up to point higher than cash quotations. Deliveries of seed have been very good and indications seem to point to supplies being available as wanted for heavy demands that will apply on a spring business. Range of quotations this week follows.

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1.59	$1.70
3 to 5 barrels, gal.	1.58	1.69
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1.61½	$1.73
3 to 5 barrels, gal.	1.60½	1.72

Add 10c gallon in smaller quantities.

Varnishes Holding At High Levels

Toronto.

VARNISHES.—There is little sign that a let up in conditions which have brought about the present state of high prices and scarcity of supplies has yet been modified as they affect varnishes. Gums are becoming scarcer all the time and even were shipping immediately released, which it won't be, it would take at least two to three months to secure supplies. It seems possible that with America a fairly close market that European interest may absorb some spot stocks, and as a further depletion in gums occurs with no immediate prospect of replacement, it is possible some further slight advances in varnishes may be reported.

Turpentine Shows Decided Strength

Toronto.

TURPENTINE.—The market on turpentine in the South is showing decided strength and advances are being recorded almost daily. This has not yet been reflected here in prices to the trade but it will not be long at present rate before a revision will have to be made. Supplies locally at the present time are very good and indications seem to be that shipments will come along fairly well

as wanted during the coming season. There seems to be every indication that market will remain firm for some time to come, and present trend of quotations is in line with information given out in HARDWARE AND METAL some weeks ago. Low grade rosins seem to be getting sorted out into their natural classification and the market is considered firm with some slight advances reported. A fair movement overseas continues, mostly of supplies bought some time ago and held for space, and as this trade develops stocks will be reduced to a point where market will reflect shipping conditions. Prices locally on turpentine are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.10
2 to 4 barrels (barrels included) ...	1.06- 1.09
5 gallon lots	1.17- 1.20

Business in Mixed Paints Coming

Toronto.

MIXED PAINTS. — Business from merchants not already booked is coming along quite readily now that paint salesmen are again on their territories. Manufacturers are well satisfied with the volume of orders coming and are preparing for heavy 1919 trade.

White Lead in Oil Holds Steadily

Toronto.

WHITE LEAD IN OIL.—The market on white lead in oil rules steadily and present indications are that present basis will be maintained for some little time yet. Price today on pure white lead in oil is $17.80 per 100 pounds in ton lots, and $18.35 in smaller quantities.

Glass Holds; Putty Quiet

Toronto.

GLASS, PUTTY. — Window glass prices hold firm and unchanged this week with little business passing. Similar conditions may be said to apply to putty, only a fair demand being reported, and quotations unchanged at following levels:

PITTSBURGH MARKETS

Continued from page 49

tended that prices will not decline further, there is practically no doubt that in time they will. Doubtless, as has been the case in the past when buying practically ceased at a time when there was much contract business on books, prices will be maintained as far as possible to encourage buyers to take out contract material. When there is not much more business in actual shipping orders to be squeezed out of contracts, and when there is a disposition on the part of consumers to make fresh sales, prices will come down to whatever point is necessary to get buyers to take hold. The steel mills always endeavor to avoid reducing prices to the last point until the buyer is known really to be ready to take hold.

There is practically no doubt that steel mill operations will drop to less than 75 per cent. of capacity within a very few weeks, and a rate of 60 per cent. or less may be reached. Capacity may now be estimated at about 49,000,000 gross tons of steel ingots a year, while in 1913, the best year before the war, production was about 30,300,000 tons, and capacity at the end of the year, or just before the war was about 34,000,000 tons. Thus even a 60 per cent. operation of the steel mills at this time, when there is scarcely any new construction work going on, and hardly any railroad buying, would really represent quite a lot of steel in the circumstances.

Making a Big Turnover in a Small Store

In One Year Sales Total $3,000 in Small Store on North Shore of St. Lawrence Gulf—Neat Arrangement and Use of Advertising Brings Business to J. P. Cote

J. P. COTE, of Matane, a small town in the Gaspe Peninsula, sells about $3,000 worth of paints and varnishes annually. This is a remarkable showing, as the town is a small one and its location such that one would hardly think it possible to secure a large paint business there. As is generally conceded the season in this belt is a short one and the weather changes are often frequent and the winters long and severe. The winter sets in very early and the spring is late. It is, therefore, the more creditable that Mr. Cote has been able to so develop his trade as to ensure him an annual turnover of approximately $3,000. This would be a nice business for many a larger store located in a more even climate.

Attractive Arrangement

A glance at the accompanying photograph will give some inkling of the neatness with which Mr. Cote has displayed his paint and varnish stock. Nothing seems to have been out of place when the photo was taken and this is the manner in which the stock is kept throughout the season. Aside from the peace of mind which must come to the owner, the attractiveness of the stock as seen by the customer, it assists materially, the selling force, to have the goods in regular order. It is a time-saver and, therefore, a money-saver to have one's goods where they may be had without delay of any kind. Incidentally, it may be said that the arrangement of the stock throughout the store has been made with like care. Mr. Cote has found is one of the successful helps in making for the progress that attends his business in a general way, for, as was stated to HARDWARE AND METAL, the business has shown a steady, satisfactory growth.

The Use of Helps

The careless manner in which the advertising aids and helps supplied by the manufacturer are used (or more precisely, not used) in some localities, is regrettable. It is a great waste for which there can be no excuse. In the Cote store this class of matter is made use of to the best advantage possible and with profitable results. Paint-selling helps have a real value. This should be recognized and the greatest possible use made of them. They cost much money and have been worked out by the paint manufacturers with a view to giving agents just the assistance required. Without them many sales would never be made.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze,—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

Our Motto for 1919—SERVICE

DURING the past four years conditions have adversely affected prompt delivery of your orders. Many of our skilled workmen answered the call to the colors. Their places were hard to fill. In few other industries has there been such a dearth of raw materials. Embargoes on first one and then another metal caused delays. Freight and express embargoes added to shipping difficulties.

We have supplied thousands of dozens of knives, forks and spoons for the equipment of our soldiers and sailors. Large orders for silverware necessary for dining cars and naval vessels used in transport and patrol work had to be given preference over commercial business—they were part of the munitions of war.

Many of these conditions have now changed with the signing of the Armistice. Embargoes have been lifted. More workmen are available. War orders are not so urgently needed. Metals are more easily obtained. The experience gained in speeding up production for the equipment of our armies on short notice will be turned into good account in making more prompt delivery of our regular lines.

We wish to thank our customers for their patience during the troublous times now passed away, and we look forward to even happier relations in the future.

Our new Thrift Recipe Book containing many useful recipes and also illustrating various pieces in "Heirloom Plate," is ready for distribution. We will be glad to send upon request, a number of copies for presentation to your customers.

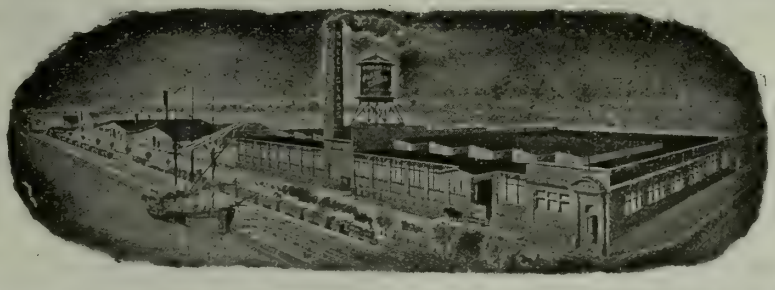
Lowe Brothers Paints

Can You Tell Your Customers Honestly that the Paint You Recommend to Them is the Best Paint Made?

Do you realize that people who have just passed through great tribulation like the present war and who have taught themselves to look things squarely in the face are going to be very hard to fool? Their attitude in war is going to be their attitude in peace. They want the truth, even when it hurts. They demanded the genuine of the Canadian soldier and they surely got it. They are going to demand the genuine in the goods they buy – and they are going to get it.

Now, it is up to you to ponder this deeply and make your decision right away. 1919 is going to be a big paint year and 1920 is going to be bigger still and it is the part of wisdom to start with the right goods now and build up your paint business on the sure foundation of quality.



There is nothing that draws custom to a store like quality. It is the repeat orders that you are after. It is the constant patronage and the new customers that make your business grow.

Lowe Brothers make the best paint and have made it for a half a century and we are prouder of our reputation as paint makers than we are of our success—and our success has been great!

Keep Up Your Paint Sales!

Make your Paint Department pay during the dull winter months.

Many of your customers will be doing considerable inside work now that outside painting is at a standstill.

It only remains for you to offer the proper suggestions and make the necessary display to capture this business.

The best way you can do this is with—

Stephens'
REGISTERED TRADE MARK

Interior Paints
Wall Colours
Varnishes
Stains and Enamels

Their attractive containers and labels allow for a pleasing display that will rouse the interest of your customers.

We also furnish you with attractive advertising matter and assist you in every way.

Stephens' products are all high-grade — carefully manufactured of quality and reputation beyond reproach.

The Stephens' line is an all-year line.

May we send you particulars of our agency plan? It will interest you.

Pyrene FIRST AID KIT

Pyrene Safety First Aid Kits Display Them—*Sell Them!*

Pyrene Safety First Aid Kits should be part of the equipment of every factory. They should be on each floor, in each department ready for any emergency.
Pyrene Safety First Aid Kits reduce your customers' Compensation Insurance premium and thus cost little or nothing to install.
Include this indispensable kit in your sales of Pyrene Fire Appliances. Your nearest jobber will supply you or write direct to us for literature.

Pyrene Mfg. Co., of Canada, Limited
3 St. Nicholas Street
MONTREAL

Pyrene FIRST AID KIT

Indurated Ware

Far superior to metal and will last many times as long. Will not split, warp, crack or come apart. Eddy's washtubs, washboards, household pails, milk pails, butter tubs, cuspidors, etc., are made from this granite-like substance and will last indefinitely. Eddy's washtubs and pails will never show a leak—Eddy's butter tubs will never taint the product as wood is apt to do.

These goods being light, economical and practically unbreakable, are favorites in every home. Therefore, it will pay you to display them prominently in your store.

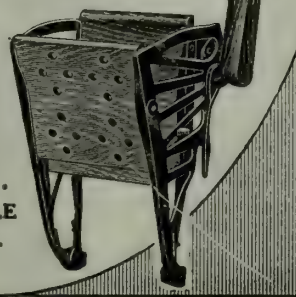
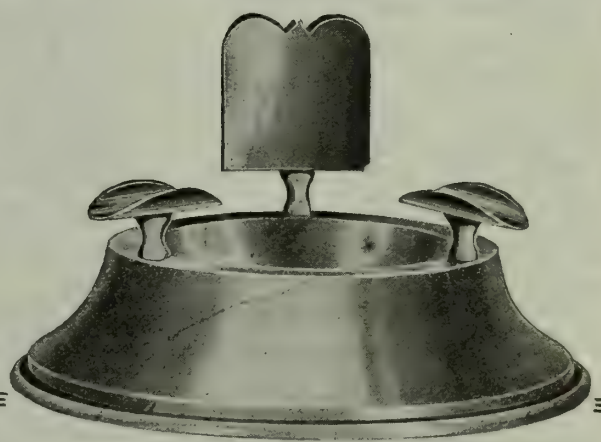
"White"



MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.



Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

Talk No. One Hundred and Eighty-One

We all talk a good deal these days about building up Canada and making peace prosperous—You can make a start and benefit yourself, too, by insisting on those good Canadian-made "PREMIER" GALVANIZED SHEETS.

—TINKER TOM

GENCO RAZORS

Another Mehasco Message 23

MEHASCO

We handle the Geneva Cutlery Company's Razors, the well-known, nationally advertised Genco line. With each Razor we give an absolute guarantee, and any user dissatisfied will have his razor replaced free of charge. We have them in different qualities that retail from $2.00 to $5.00 each. With a three dozen assortment we give a practical Razor Display Case. Write us for information on this proposition.

Merchants Hardware Specialties LIMITED

CALGARY, ALTA.

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

OPEN HEARTH STEEL

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

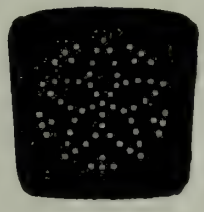
Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Can't Hook and Peavie Handles.



There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company

ST. THOMAS -:- ONTARIO

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

J.E.B. Quality Co.

Ideal Veneer Chair Seats

Of all sizes and styles. Write for our Catalogue A.

PREPARE NOW FOR BETTER BUSINESS

THE return to peace conditions opens the home market to motor and tractor lubricants as never before. Are you prepared for business? Plan ahead; check up stock on hand and on order.

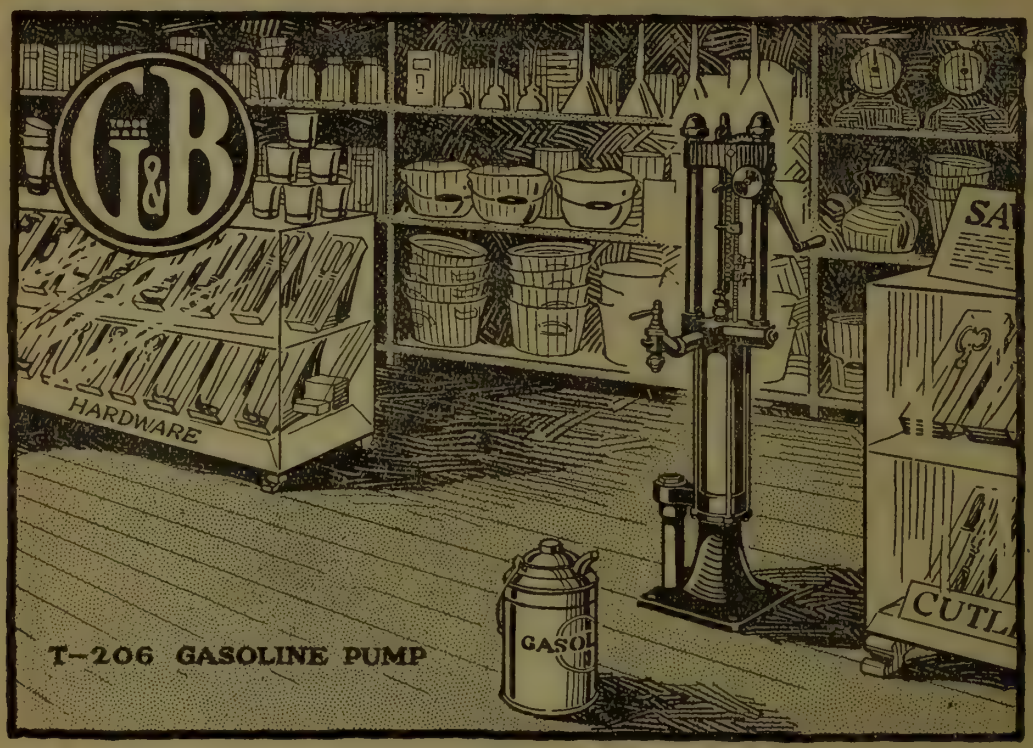
According to reliable figures there are in Canada to-day 86 motor cars and trucks for every hardware dealer. These 86 vehicles consume annually upwards of 1,400 gallons of lubricating oils and greases. In addition, every tractor in your district uses 1½ barrels of lubricants per year. How many of these motor and tractor owners will you supply?

There is no more profitable or satisfactory line of lubricating oils and greases than Polarine. Our attractive dealer proposition offers a minimum profit of 33 1/3%, with additional discounts on quantity orders that work out greatly to your advantage.

Stock the full Polarine line of oils and greases. Give each customer what he wants. The motoring public are worth-while customers and every satisfied customer is a distinct asset. They will buy other goods where they get the lubricant that "Makes A Good Car Better."

Polarine is consistently advertised throughout the Dominion—have you noticed our big winter campaign? Take full advantage of it. Put in a good window display. Make the fact well known, that **you** sell Polarine.

Polarine is supplied in two grades, Polarine and Polarine Heavy. There are also Polarine Oils and Greases for effective transmission lubrication. Put up in attractive lithographed sealed cans—half-gallon, gallon and four-gallon. Larger quantities in 12½-gallon steel kegs, half-barrels and barrels.



Write for our Polarine Booklet on Automobile Lubrication to 56 Church Street, Toronto. Get particulars of our dealer proposition.

Helping The Hardware Dealer Handle Gasoline Trade

Hardware dealers building up a lucrative gasoline trade through the great increase in automobile and motor-truck operators can give speedy and convenient service by installing a Gilbert & Barker T-206 pump.

It discharges, exactly, gallons or lesser quantities as desired. Discharge register tallies from one to ten gallons. Such an outfit pays for itself by eliminating waste, and with underground tank, minimizes fire risk.

There are other G & B pumps delivering from one to five gallons at a stroke and suitable for the needs of dealers with a small or large gasoline trade.

G & B storage outfits for lubricants, paints and varnishes are made in different sizes; substituting safety and convenient service for fire risk and messy waste.

Write for catalogue or call at any branch of Imperial Oil Limited.

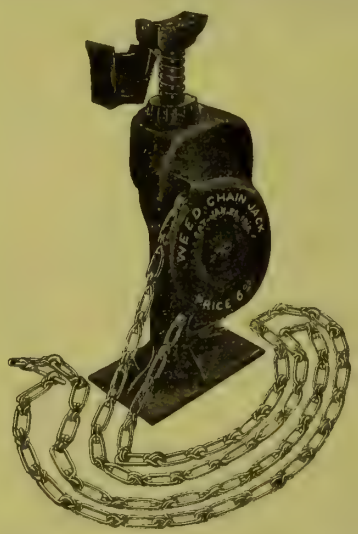
In North Star Dry Cells Your Customer Gets What He Pays For: ---Service!

The element required in an ignition battery is length of life—service—it must do the work required or it must be cast aside to be replaced by a satisfactory — an **efficient** battery.

In North Star Dry Cells your customer gets a thoroughly efficient battery in every sense of the word.



He will always come back to you, because in selling North Stars, your customer always gets what he pays for—**service.**

The Western Battery for Western Need.

Order through your Jobber.

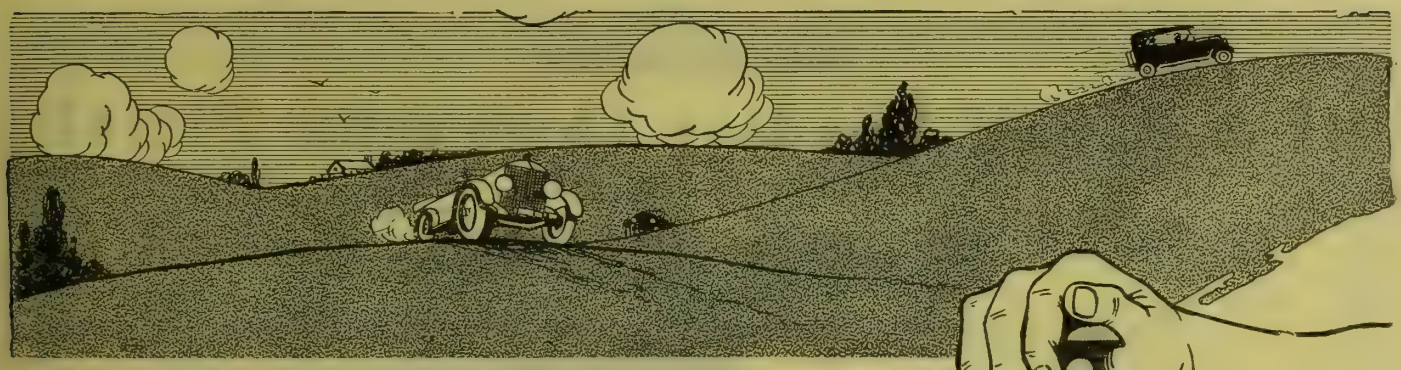
Canada Dry Cells Limited

WINNIPEG, MANITOBA

YOU SHOULD SELL WEED CHAIN JACKS

The most easily operated Jack on the Market

Weed Chain Jacks lift a car by a few pulls on a chain and lower by a few pulls in the opposite direction. The operator can stand away from the car, clear of the wheels, mud guards and tire carriers. This feature is especially noteworthy where cars are operated by women.

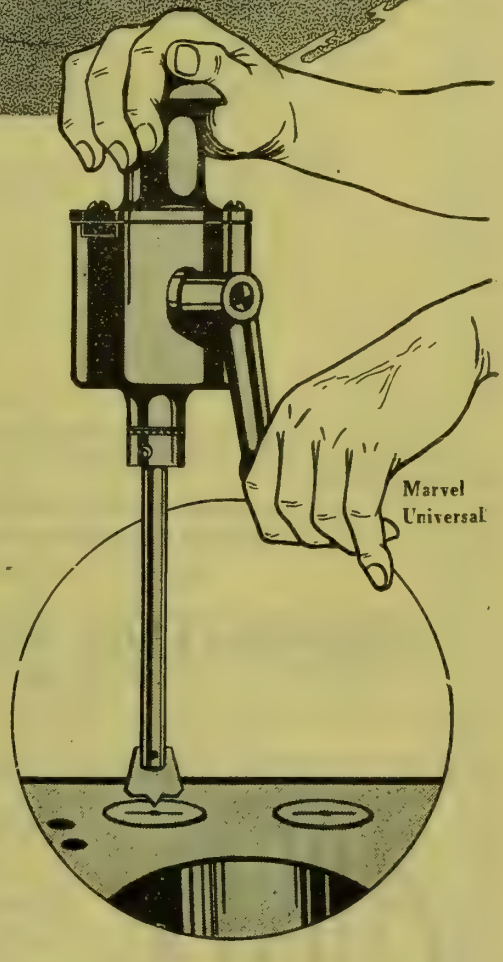


They are made of malleable iron, black enamelled; the base is extra heavy to prevent upsetting; the top is concave to prevent slipping of the axle. The lifting screw is cold rolled steel with square machine-cut threads. The gear housing is stamped steel, and the chain is heavily plated to prevent rust.

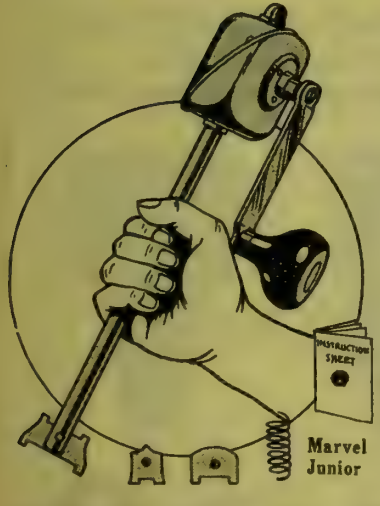
A Weed Jack purchaser is a pleased customer.

GREAT WEST ELECTRIC COMPANY, LIMITED

WINNIPEG



Distributors for Laco Tungsten and Nitro Lamps



It's NOW as Easy as Necessary to Keep Valves Tight

Tight valves spell power! Motorists recognize it; experience has taught them that valves must be ground regularly. But they send their cars to mechanics because of the strenuous, disagreeable labor connected with grinding valves by ancient methods. Every one of these men are prospects for a simple grinder that will easily do a good job and at the same time save them money.

The Marvel Universal Valve Grinder is a mechanically perfect device that requires simply turning a crank **always in one direction.** The valve is turned back and forth always a little further in one direction than the other. No stopping every few minutes to lift the valve. No possibility of leaving ridges or rings. You get a smooth seat in less time. Perfect compression is insured—power is put back in the engine.

MARVEL VALVE GRINDERS

are made in two sizes, the Universal and the Junior. They are so priced that one or the other model fits every need and demand from your trade. The Junior makes as perfect a seat as the larger, heavier model. Has a smooth movement. The Junior is the ideal size for the Fordist. It reaches the last cylinder. Both sizes come equipped with an instruction booklet; five different points to fit valves in **any** car; a short and long stem; a spring, and a box of Marvel Valve Compound, ready, complete for action.

Here's an exceptional opportunity for sales. The Marvel's sturdy construction, its simplicity and practicability mean money for you. Possibilities are limited only by the number of motorists in your vicinity. Drop the coupon for further information—or for sample Grinders.

1,000,000 Motorists Use It 4,000,000 More Need It

The limited supply and high cost of inner tubes makes it necessary for motorists to repair punctures, cuts, tears and cracks—to keep their tubes in good repair.

The present conditions make it imperative for motorists to stop the easy-going, wasteful habit of carrying $5 to $15 worth of spare tubes—that deteriorate quickly—and scrapping perfectly good inner tubes that merely have a puncture, cut or tear—which can be repaired *permanently* with a Shaler 5-Minute Vulcanizer, quicker than a new tube can be inserted.

Saves Tubes—Saves Repair Bills

Easy to Use

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically*—and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on patch"—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. Carry it in your tool box for emergency use. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

Easy to Sell

A five-minute demonstration sells the Shaler Vulcanizer easily. Every sale gives you a good profit. The large resale of Patch and Heat Units is profitable and brings new customers into your store, who will also buy other accessories.

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc.; 4,000,000 more need it. Every motorist is a prospect for this handy tube vulcanizer—it should be in every car owner's tool box, for emergency use on the road or repairing tubes at home.

Complete Outfit Only $2.00

The outfit includes, the Vulcanizer—12 Patch & Heat Units (6 round for punctures, and 6 oblong for cuts)—complete $2.00. Extra Patch and Heat Units $1.00 per dozen.

Sold By All Accessory Dealers and Jobbers

TO DEALERS—To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists, Repair Shops and Garages mailed on request.

Why You Should Be A Michelin Dealer

No. 39

Prompt Service

It means a lot to you, Mr. Dealer, to be sure that when you write or wire to headquarters, your needs will be promptly and efficiently served.

The Michelin plan of dealer co-operation is in itself an assurance of such service. Ask any Michelin dealer and he will confirm this assurance by his own experience.

The keynote of Michelin's sales policy is to make it easy for the Michelin Dealer to sell Michelin products profitably and satisfactorily. Prompt service is one of the means by which Michelin accomplishes that end.

Write today for Michelin's Dealer Proposition

Wanted

AGENCIES WANTED

I wish to get into touch with manufacturers of lines suitable for the ironmongery, hardware, tool and cutlery trades. I call upon these trades, both wholesale and retail, in Scotland and part of Ireland; have worked the ground for 15 years and am well and favorably known to buyers. I represent the manufacturers of a well-known proprietary line. Office and showroom in Glasgow. Open to represent manufacturers on commission basis, or act as buying agent. Satisfactory credentials furnished. **GEO. W. WELSH**
59 Clifford Street, Ibrox, Glasgow, Scotland

WANTED—EXCLUSIVE AGENCY ON SUFFICIENT basis for the Province of British Columbia. Reply Box 163, Hardware and Metal.

FOR SALE

THE NELSON HARDWARE BUSINESS IN Windsor, Ontario, is for sale. The death of Mr. A. E. Lech, the recent owner, necessitates this move. The store has the best stand and business in the city. The stock is clean and well bought, and is in splendid condition. With fixtures added it will now inventory about $40,000 to $45,000. It is a golden opportunity to make money. The right man can buy it right, and on favorable terms. Address M. C. Lech, Giles Avenue, Windsor, Ont.

FRUIT FARM IN THE NIAGARA DISTRICT, situated about ten miles from Hamilton, on Lake Ontario. Close to trolley line and G.T.R. station, school, church, bank and post office. Modern house and out buildings. Good bathing beach. Will sell or exchange for live hardware business. Box 151, Hardware and Metal.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Acmes, Sunlights, Silver Kings, Souvenirs, Welcomes, Crown Hurons, Peninsulars, Jewels, Pandoras, Favorites, Imperial Oxfords, and all kinds of Ranges and Heaters. Write for list and prices. Grundy Bros., Strathroy.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

POSITIONS WANTED

YOUNG HARDWAREMAN DESIRES POSITION as manager Western hardware store. Six years' experience. Good references. Box 150, Hardware and Metal.

A GOOD SALESMAN—AN EXPERIENCED hardware clerk wanting position in Saskatchewan or British Columbia will start the first of the year. Box 138, Hardware and Metal.

YOUNG MAN WISHES POSITION AS HARDware clerk, wholesale or retail, experience in both. Western location preferred. Box 155, Hardware and Metal.

EXPERIENCED TRAVELLER WANTS TO sell, in Toronto, on commission, Tungsten lamps or hardware specialty. Box 159, Hardware and Metal.

DISCHARGED SOLDIER DESIRES POSITION as clerk in good hardware. Two years' experience. Western Canada preferred. Box 160, Hardware and Metal.

HARDWARE CLERK, FIFTEEN YEARS' retail experience, desires position as manager of store in Alberta or Manitoba. Best of references. Box 161, Hardware and Metal.

A FIRST-CLASS HARDWARE CLERK WITH fifteen years' experience, is open for engagement. Best of references. Apply Box 164, Hardware and Metal.

HARDWARE SALESMAN, TWELVE YEARS' experience, desires change of position. Good stock-keeper, buyer and salesman. First-class references. Would accept position retail or wholesale. State salary. Box 165, Hardware and Metal.

UNIVERSAL ELECTRIC HEATING PAD

For Homes Wired With Electricity

A HEATING PAD OFTEN SAVES A DOCTOR'S BILL

Do not wait until Influenza and Pneumonia, which have spread their destruction of life from one end of the country to the other, reach your very door before you find a means which will help stamp out this dreadful disease from your homes.

The UNIVERSAL Heating Pad will help a great deal towards the relief of that starting cold, which is the foundation from which the influenza starts.

The use of the Heating Pad when chilly or whenever an ache or pain starts will often check it before it develops into a cold which at this time is pointing to this dread disease.

The UNIVERSAL Heating Pad will help toothache, headache, backache, sprains or bruises. Ready relief is obtained by using this Pad, which is a stitch in time when trouble of this kind arises.

The only 3 Heat Electric Pad which positively maintains the temperature on each degree of heat, the changes being made by a simple pressure of the finger: can be changed in the dark.

This Pad is ideal for sleeping porches. It weighs but fourteen ounces, is covered with gray eiderdown and can be folded, laid flat or wrapped around any part of the body. Nowadays the finest of arts is to keep fit, so give this wonderful Heating Pad a chance to do its Bit for you. See your UNIVERSAL Jobber to-day, he always has a supply on hand to meet your demands.

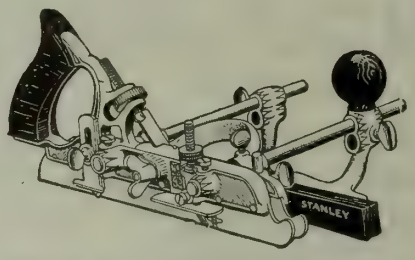
TOOLS THAT MAKE DEALERS FAMOUS



Why Bother with Substitutes?

Stanley Tools

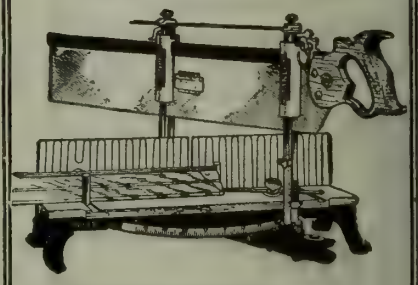
"Zig-Zag" Rules

They might very properly be called "Folding Tapes". They, however, have the advantage that, as the joints are held open by springs, they can be used to measure across openings by supporting the end away from the user, where, with a tape, it would be necessary to have one person hold each end, or else hang the outboard end on a nail, necessitating additional climbing. In many cases, they are useful for measuring concave, convex and various uneven surfaces. When folded, they are compact and easily go in the pocket. A handy and convenient rule for mechanics and householders.

Stanley "Forty-five"

Seven Tools in One

(1) Beading and Center-Beading Plane; (2) Rabbet and Filletster Plane; (3) Dado Plane; (4) Plow Plane; (5) Matching Plane; (6) Sash Plane; (7) A Superior Slitting Plane.



Extra cutters may be used to advantage by substituting specially formed detachable bottom Carpenters will find this tool almost invaluable

Stanley Plumbs and Levels

are made of thoroughly seasoned and selected stock, and have many valuable features which will appeal to every lover of good tools. Made in all styles for **Carpenters, Masons, Plumbers, Machinists, Millwrights, etc.**

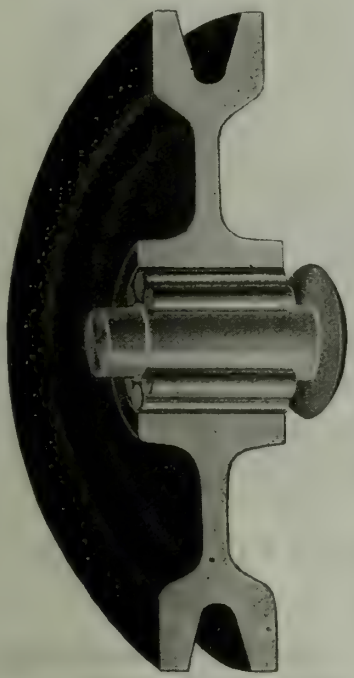
Stanley Tools

Mitre Boxes

These Boxes are compact, strong, and durable; are quickly put together or taken apart for convenience in carrying; have the greatest strength with the least weight, and will do the widest range of work of any Mitre Box made.

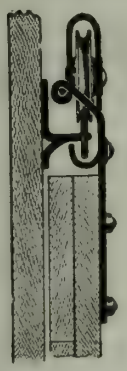
Several new and important features have recently been added to these Boxes which will interest Carpenters, Cabinet Makers, and other workers in wood.

Made in seven sizes. With each Box a specially made Back Saw is furnished.



STANLEY SPOKESHAVE

Have a Stanley catalogue on file for reference. It shows a wonderful line of Carpenters' Tools. We will be glad to send you a copy.



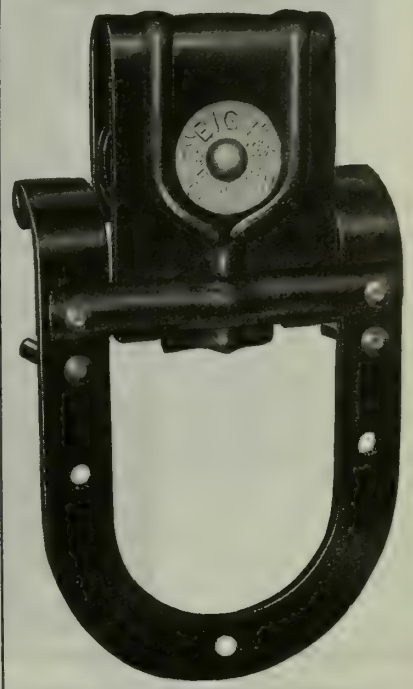
CAVERHILL, LEARMONT & CO.

MONTREAL

"BIG 4" FLEXIBLE DOOR HANGER

Sectional view of Axle and Bearings

Side view of "Big 4"

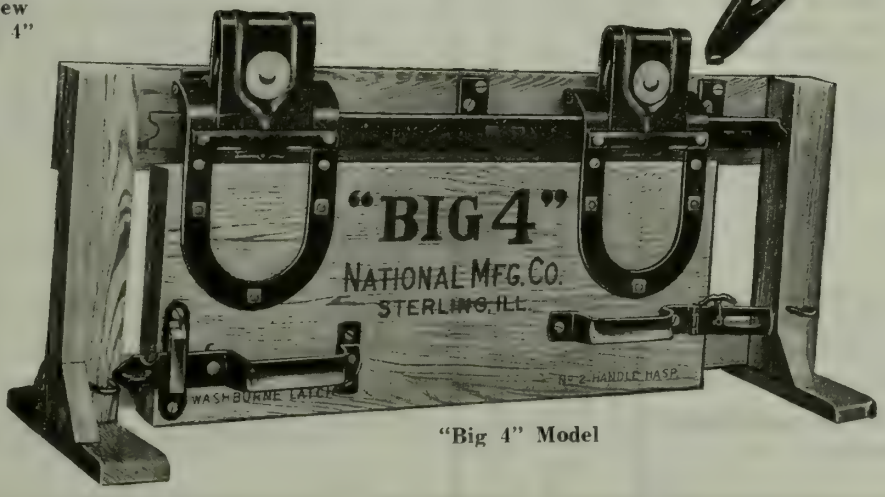


Since the introduction of sliding Barn Doors, many and varied have been the types of Hangers brought on to the market. Of all the attempts to manufacture an ideal hanger, "Big 4" still holds first place over all competitors. Why do any guess-work on your part? Sell a Hanger that has a reputation already established for satisfactory service wherever used.

There are a multitude of features possessed by the "Big 4" which makes it superior. Note the illustrations. Do you know any other hanger to be so complete? We venture you don't and have the **"proof."** Write for it, our big catalogue of builders' supplies.

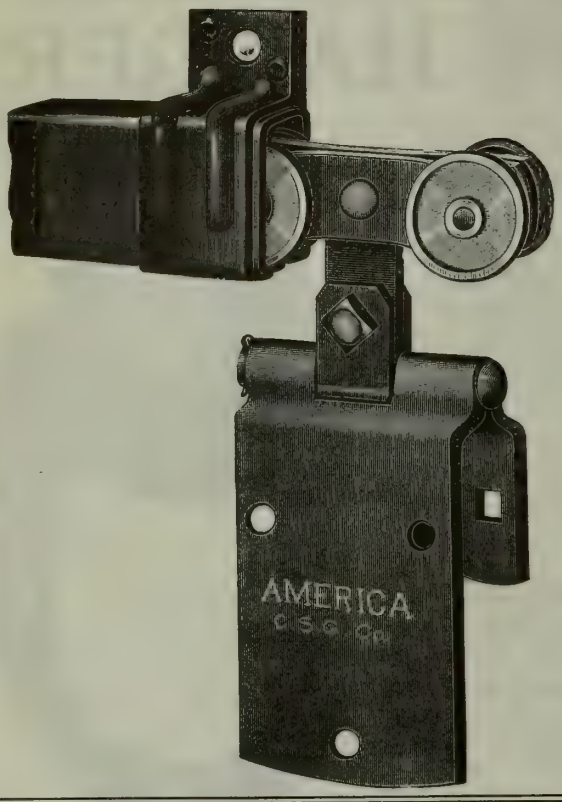
Cater to the best interests of your customers and incidently your own by recommending the **"Big 4" Flexible Door Hanger.**

May we send you information?



NATIONAL MANUFACTURING COMPANY
STERLING, ILL.

Front view of "Big 4" Hanger



Flexible Feature of "Big 4"

"Big 4" Model

American Tandem Truck Trolley Hangers

Among users of Door Hangers and merchants who sell them the "AMERICA" is admitted to be the most efficient and practical hanger for operating barn, factory, warehouse or garage doors.

Constructed of heavy steel, fitted with hardened roller bearings and has lateral adjustment which permits increasing or decreasing space between door and building.

AMERICA Hangers run in the famous Hatch Trolley Track supported with corrugated brackets, and carry heavier doors. Renewed building is in sight — be ready with a stock of hangers, track and brackets.

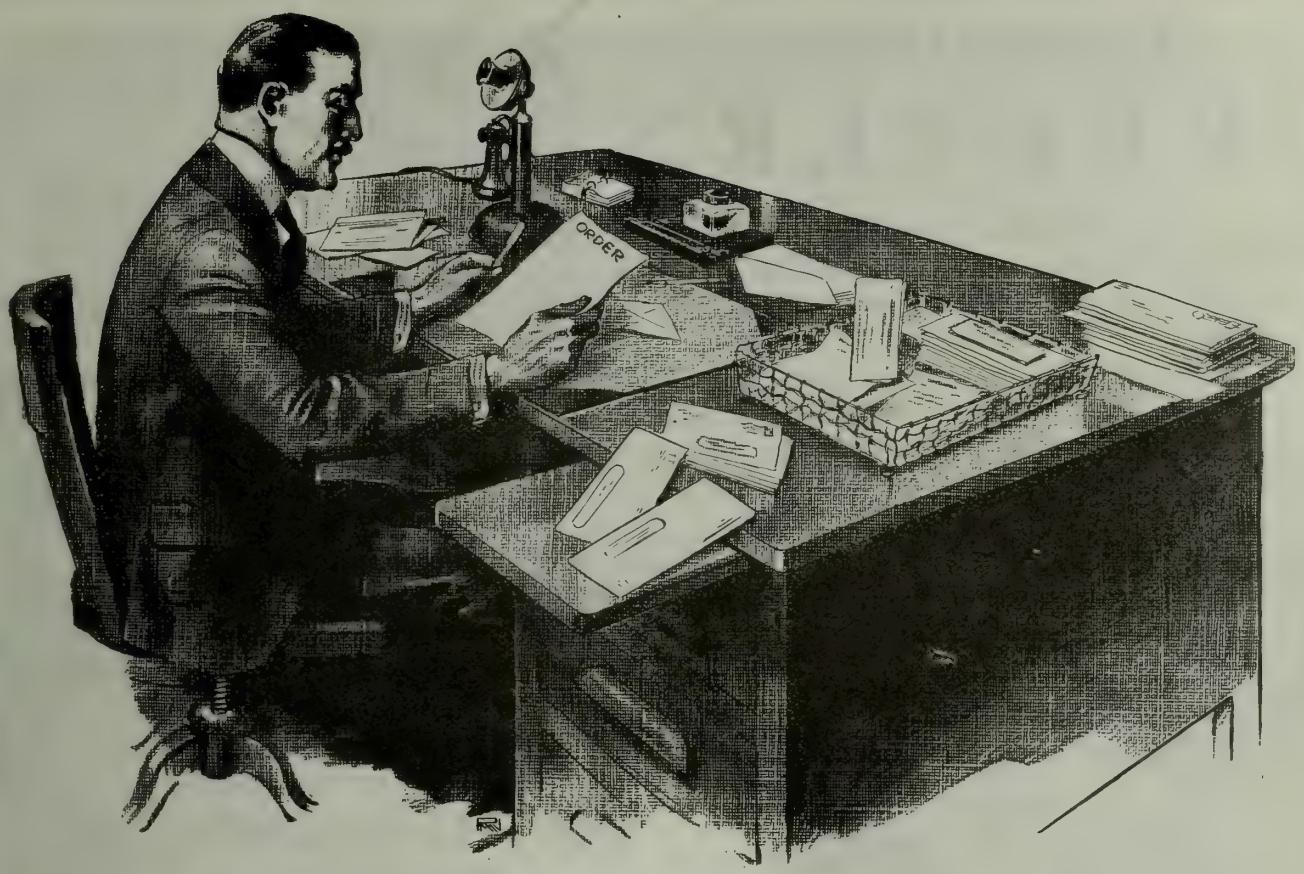
Satisfaction on these three lines guaranteed.



Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

If interested tear out this page and place with letters to be answered.

What Dealers Say of the Plymouth Plan

15% More Profit

The E. P. Reed Lumber Company, North Abington, Mass.

"We have given this a thorough test in our sales and find that we not only can figure about 15% **more profit** but can tell a customer exactly how much his rope will cost.

"We think that the public are more pleased with the prices given this way for the reason of definite price. We could never in weighing rope tell the customer the exact price."

Advantage in Selling

The F. T. Blish Hardware Company, So. Manchester, Conn.

"We note in comparing the freight and prices by the foot that there is an **advantage to us in selling** on your plan, and we anticipate that we are going to profit and like it better than selling rope by the pound."

Great Help

Mr. James A. Spilman, Rolla, Missouri.

"I received the 'Rope-by-the-foot' schedule card some time ago and am using the plan regularly in our rope sales.

"I find it to be a **great help** for so many customers ask for so much rope, and want to know the cost in advance. The entire force appreciate and use this plan."

Controls Profits

The Nielson Merc. Co., Coalridge, Mont.

"We like the 'Rope-by-the-foot' method best. It is the only way to control your profit."

Saves Disputes

Messrs. Weiss & Kuhlmann, Lester Prairie, Minn.

"We find this plan very handy for us. The price by the foot enables any one to know what the rope is going to cost him before he gets it. He knows whether he wants to have more at that price or not before it is off. We find a great many times that people buy more rope this way. It saves labor and time not having to weigh the rope or to figure out what it is going to cost. If the rope is too high for the customer, it saves disputes after the rope is cut off. If the rope costs too much for them before it is cut off, you are nothing out and the customer is pleased.

"All of this goes to make this plan handy and the selling of 'Rope-by-the-foot' a success."

Makes Quotations Possible

Mr. E. Thurston, Clifton Hill, Mo.

"Have the 'Rope-by-the-foot' plan in use. Good thing. Have used similar forms to sell by the foot for years past. Your plan enables me **to arrive at price quickly** without weighing. By the foot is the right and satisfactory way to sell rope."

PLYMOUTH CORDAGE COMPANY

North Plymouth, Mass. **Welland, Canada**

INDEPENDENT CORDAGE CO., LIMITED

If interested tear out this page and place with letters to be answered.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible —their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

Every merchant needs the protection a complete N.C.R. System will give him

Peace is bringing increased competition in your business.

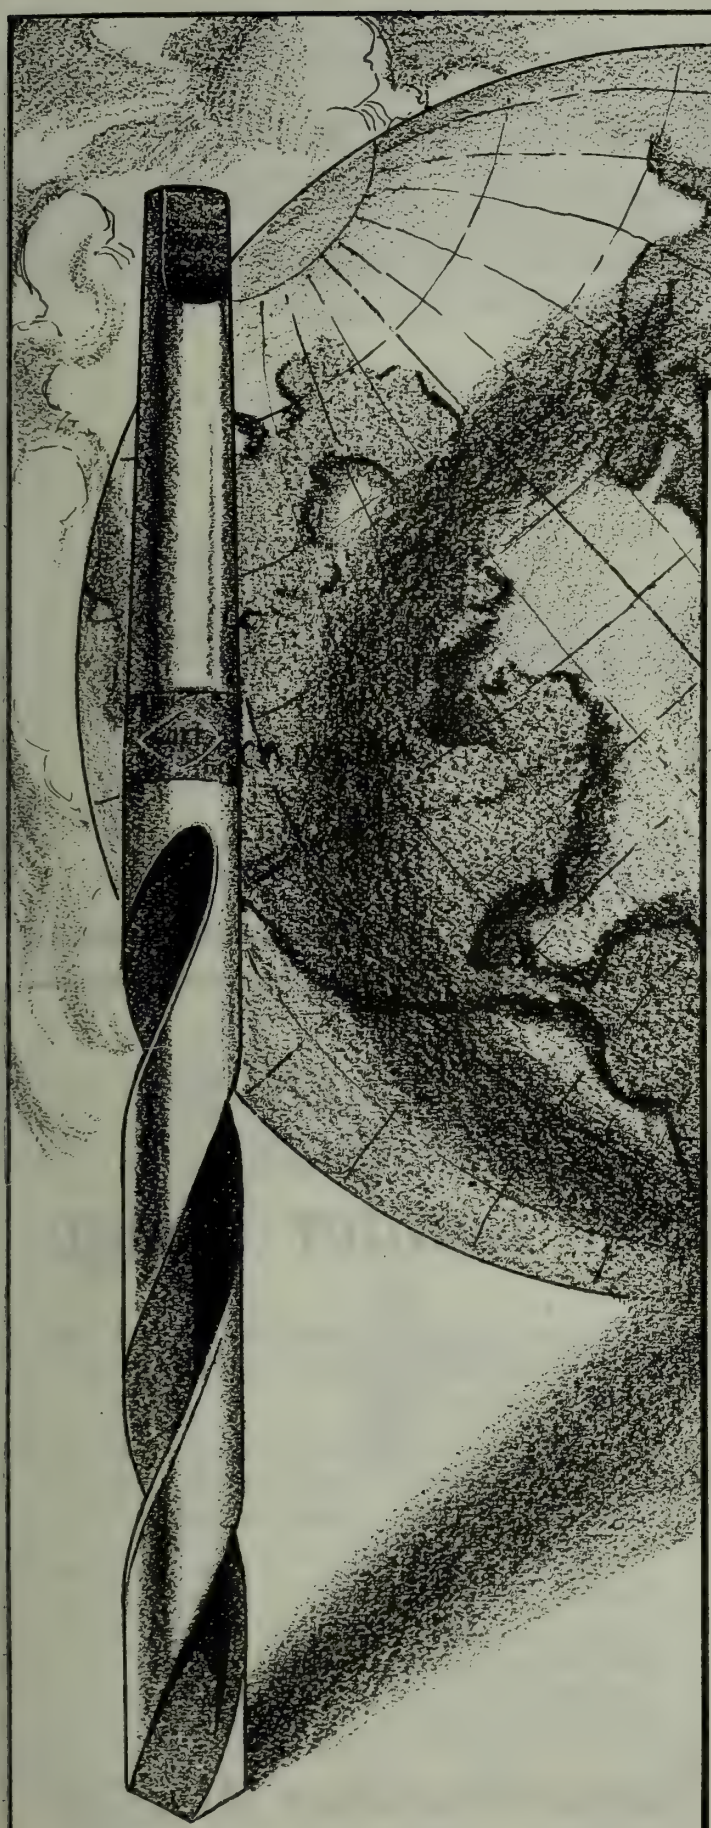
You must meet that competition. You cannot afford to run the risk of losing a single cent of profit.

A modern National Cash Register and an N.C.R. Credit File will enable you to get all your profits on every transaction in your store.

Because—

1. They will make it possible for you to run your store with the least expense.

2. They will prevent the mistakes and disputes which cause loss of trade.



3. They will enable you to give customers the quick, satisfactory service which wins new trade.

4. They will give you the accurate records which you need to control your business.

5. They will protect your money, your clerks, your customers, and yourself.

The National Cash Register Company, Limited, of Canada, Toronto, Ont.

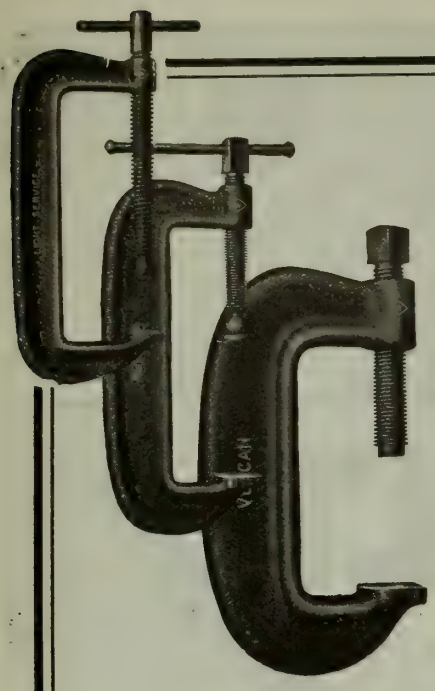
Offices in all the principal cities of the world.

WILT

"Where there's a WILT— There's the Way"

On Duty

You will find **WILT** drills on war duty in all parts of the British Empire, and in all the Allied countries. **WILT** drills are worthy of the outstanding position they occupy in the drill world. Every **WILT** Drill, whether it be small or large, represents the best efforts of thoroughly experienced drill makers, working in harmony, in a splendidly equipped, modern plant, and backed up with the determination of the manufacturers to turn out a product worthy of the name and trade-mark which it bears.



Discriminating hardware wholesalers and retailers who value repeat business and satisfied customers may safely endorse and recommend the use of **WILT** drills.

Williams' Superior Drop-Forged "C" Clamps For Fvery Purpose

"THEY STAND THE STRAIN"

HELP the shop people to select the "C" Clamp best adapted to their needs; there's "A Williams' Clamp for every purpose."

For general utility — without need for maximum strength — Williams' "Light Service" line will fit the cost. 8 sizes, 2" to 12" capacities.

For stability and utility—medium service—Williams' "Agrippa" line offers the solution. 7 sizes, 4" to 18" capacities.

For extreme strength and heavy service—Williams' "Vulcan" line provides abundantly for both. 11 sizes, ¾" to 12½" capacities. All are made of a special, high grade steel and after forging, are "heat-treated" to increase their toughness and strength.

Machinists' Tools Booklet with your imprint if desired.

DAVIDSON'S

POPULAR

Premier Leader Range

is a range that is built to supply the demand of a high-grade steel range at a popular price.

It is just as fully guaranteed, as to its baking and economical operating qualities, as our higher-priced ranges.

There is a "Premier" to meet every demand, whether for a steel or cast range, one fully dressed or strictly plain. The "Premier Leader" is made square or with reservoir.

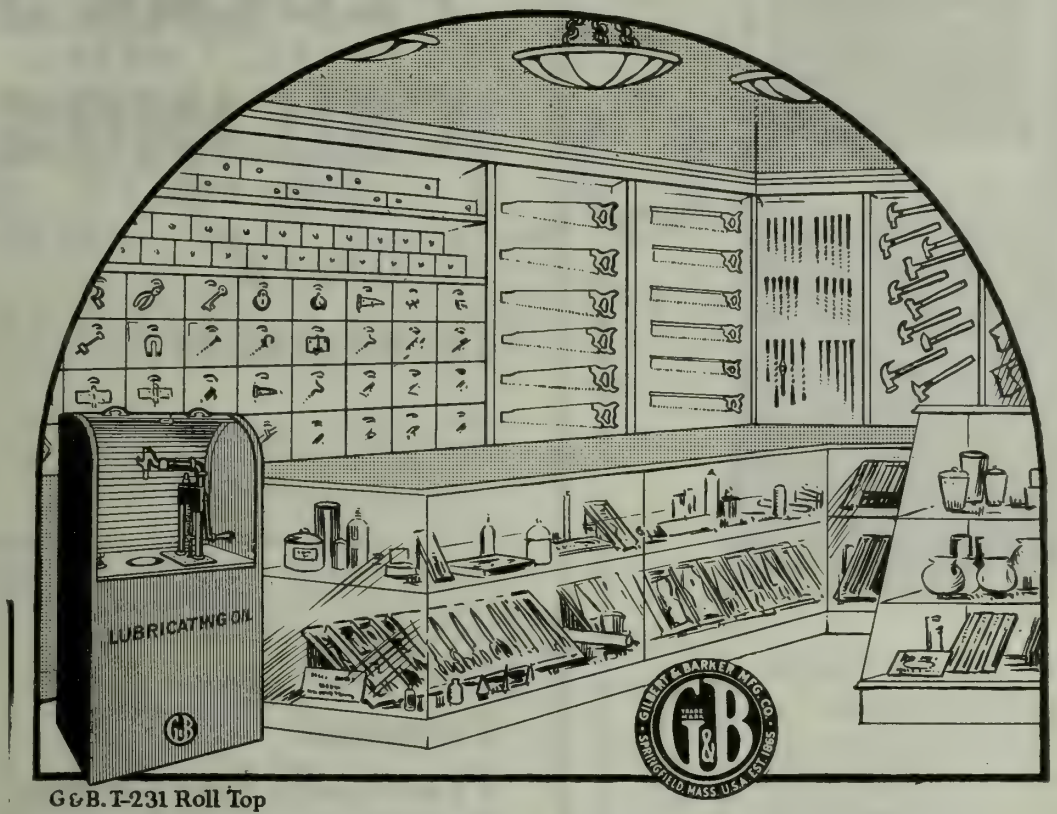
Do You Want Export Business?

ADVERTISERS in the "Export Numbers" not only reach every worth-while hardware buyer in Canada, but also reach a select list of 1,200 buyers in foreign lands. The next "Export Number" will be issued Feb. 2. Last forms close Jan. 26. Copy and cuts for the export section this issue should be sent in without delay. Regular advertisers may use space pro rata on contract. Rates same as in ordinary issues. Two pages, $100; one page, $55; half page, $31.25. Extra color if desired, $18.75 page.



It would cost you many thousands of dollars and take years for a representative to call on the 1,200 foreign buyers who receive the "Export Numbers" of HARDWARE AND METAL. For the modest rates given above, you can reach these buyers simultaneously.

Write for evidence of direct results secured by advertisers in these numbers.

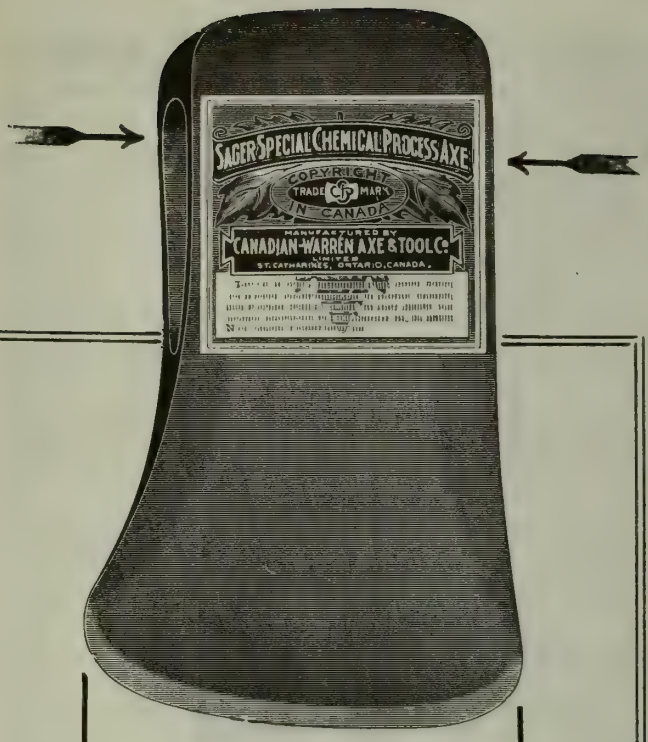
Keep Profits In---Shut Waste Out In Your Motor Oil Trade

Your motor oil profits can't drip away when you have a Gilbert and Barker T-231 Roll-Top Cabinet to handle the oil.

Leak-proof, dust-proof, dirt and fire-proof, it pays for itself by eliminating waste. And it's a time-saver, too; enables you to serve the trade with absolutely clean oil quickly as well as conveniently. This measuring pump gives a quart or less, as desired. The outfit is made in one and two-barrel sizes.

Dealers who need larger-capacity equipment will find a battery of G. & B. tanks suitable. Made in a variety of sizes and styles for oils, paints, varnishes, etc.



Gilbert & Barker Gasoline Pumps and Storage Systems give economical, safe and convenient handling of gasoline.

PEDLAR'S
PERFECT METAL
CEILINGS
AND WALLS

A word in season

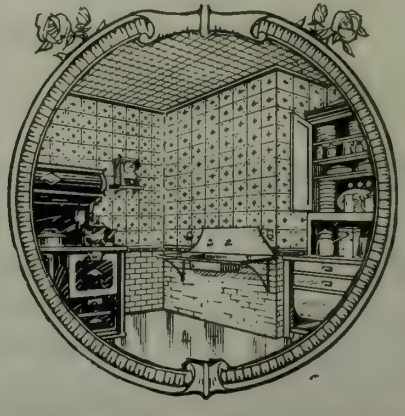
often brings a surprising opportunity for profit to the dealer who speaks the word.

For instance:

Whenever you happen to hear a customer mention re-decorating his house, suggest the suitability of Pedlar's "Perfect" Metal Ceilings and Walls.

Point out their distinctive advantages:

Fireproof
Practically Everlasting
Easily put on
Choice range of artistic patterns



Your sales of Pedlar's "Perfect" Metal Ceilings and Walls can be increased with greater profit to you and complete satisfaction to your customer.

SUPREME AMONG WASHERS

The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.
Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

"Gillette"

for 1919

Home Trade

From time to time you will hear and read about the Gillette Safety Razor, *Made in Canada,* being sold in tropical cities, Oriental bazaars, and distant mining towns among the snows. Will you please remember that however widespread our distribution in the world markets may be, Canada and the Home Trade come *first!* The interests of the Canadian dealer were safeguarded throughout the War, notwithstanding the pressing demands made upon us by the outside world. Dealers can plan to give the Gillette their earnest attention in 1919, assured that, in Quality and Quantity, the Gillette will stand behind them!

Export Trade

In the last two years, Gillette Razors from Canada have invaded most of the centres of population throughout the world. The traveller in Ecuador, New Zealand, Honan, Malay Straits, Siberia, or Arabia, will encounter the familiar Gillette Razor, MADE IN CANADA.

Especially among those countries, whose soldiers fought with the Allies, is there a ready demand for the Gillette, for a majority of the men in the Allied Armies swore by this razor, and having returned to their homes, have opened inexhaustible markets for the Gillette Safety Razor.

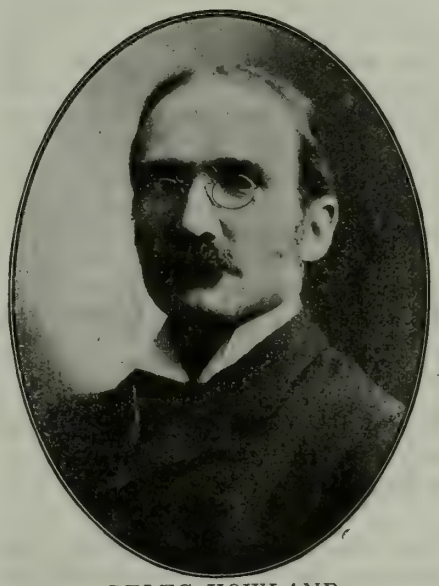
Keep In Touch With Your Banker

Peleg Howland, President of the Imperial Bank, Discusses the Business Outlook—Big Problem For Coming Six Months Will Be to Meet Price Readjustments, He Says

ONE of the biggest problems merchants will have to face during the first six months is to meet the readjustment of values," said Peleg Howland, president of the Imperial Bank of Canada, and head of the hardware firm of H. S. Howland Sons & Company, Ltd., in discussing the business outlook with HARDWARE AND METAL. "Many people are holding off buying in the belief that prices will come down. Prices will come down, but reductions, it would seem to me with some exceptions, are going to be gradual rather than sudden, and in the meantime merchants must buy to take care of the business that offers.



"Previous to the signing of the armistice I confess that I thought that when fighting ceased there would be a much greater disturbance in business affairs than actually occurred, and that we might have seen a panicky feeling follow that would have resulted in the offering of goods on hand at serious cuts, but fortunately this did not occur.

Looks for Good Business

"From what I see I expect there will be good business for at least some months. With such a large proportion of this country's effort during the past four years turned on producing the necessities of war there must be a shortage of many things which we from our standard of living consider essential needs. The farming community has prospered because of demand and high prices. The returned soldier is assured of his pay from three to six months after his discharge, and a proportion at least of those discharged from munition factories will find employment in producing the essential things referred to, and of which we are short, so that we may expect an expenditure in the more or less immediate future that will lead to a fairly large turnover of goods.

Cause Hesitation

"Were it not for the extremely high prices, which cause hesitation on the part of the buyer, and check enterprise, the country would soon be industrially at it hammer and tongs! When the happy condition will be reached when demand can be restrained no longer and prices will permit expansion on a reasonably sound basis it is impossible to determine, but it seems to me that it can only come after there has been a lowering of the scale of wages, which must naturally follow where there are more workers than work.

PELEG HOWLAND

President of the Imperial Bank of Canada and head of the hardware firm of H. S. Howland Sons and Company Limited, Toronto.

"It is very hard for those engaged in any kind of employment faced by the extremely high cost of living to bring themselves to a frame of mind to accept a lower rate of pay than now exists. They can, however, have the consolation that lower wages mean cheaper goods and cheaper living. The action of the law of supply and demand seems to me as certain on the market price of labor, be it manual or mental, as on any other commodity, and people should keep employed at what they can get rather than remain idle. Goods must be made at prices to suit demand, or competition and production will cease and lack of work increase. Anything that can be done by the newspapers to educate the public to the necessity of keeping at work for what can be got will help to prevent dissatisfaction and bring about early that condition where price and demand meet referred to above, and industrial activity results.

"I recognize that the business situation in Canada is on a pretty sound basis. What I mean by that is that the business community in general is solvent. This is especially true in regard to the hardware trade. Hardware men for some time past have been buying so as to take care of the needs of their customers and no more. Few retailers are heavily stocked. It is a good, safe, general policy to follow, and has done much to put the trade on the foundation on which it stands to-day. The merchants who continue to work along this line can make no mistake."

View on Credit

As to his views regarding credit, Mr. Howland stated: "Credit wisely granted always helps business. Doubtless no great hardship would be imposed on the community at present by adoption of the cash system of retailing goods. Whether it is the part of wisdom to generally adopt the system with the hope of maintaining it permanently is another matter.

"I am a great believer in the advantages to be derived from credit judiciously extended, in fact our whole economic system is based on credit, and probably its curtailment in one direction would lead to its expansion in another.

Should Be Limited

"Credit should of course be limited by the retailer to what his means permit. He should not give so much that his own credit would be affected thereby. There should be in every case a fixed time for the payment of goods sold on credit, and the customer should be led to understand that the terms of sale must be carried out and payment made on time. Nor should credit be given to those of whom the merchant has not a reasonable idea from what source they will be able to raise the funds for repayment.

Would Help Business

"If credit is granted by the retail merchant on the conditions I have named, I am of the opinion it must help to the expansion of his business and thus to his profit, for the production of his neighborhood must be assisted thereby. For instance by the use of tools for the cultivation of the land the comfort and welfare of the people increased, and thus their welfare was encouraged by house-

hold goods sold in that way. It is practically an axiom that obligations to be met tend to exertion and increased industry, all leading to prosperity and growing wants to be supplied through the merchant.

Must Use Judgment

"In considering what I have said, it must be borne in mind that some men are so constituted that they cannot give credit successfully. They either credit too freely or are poor collectors. In this case, cash I would say is the only system that would prevent failure, and if that system cannot, because of local conditions, be adopted, then a change of location or retirement from business are the only two alternatives. I may say, therefore, that I would be very sorry to see a general adoption of the cash system by the retail merchants of this country, as I feel it would result in an economic loss."

Favors Happy Medium

Asked what he thought of the policy many manufacturers are adopting in continuing standardization, which was to be put into effect as a war measure, Mr. Howland stated that he favored a happy medium.

"In some lines manufacturers seem to have run wild, and there has been little excuse for the turning out of so many sizes, styles and finishes. A reasonable curtailment of these without shortening up the supply of what is actually needed by the community must lead to some saving in the cost of production and of distribution, and one would naturally think eventually to increased consumption and in consequence an increased volume of business. Of course the extent to which standardization will be adhered to will be largely regulated by competition and the desire of manufacturers to cater to the ideas or whims of those they are endeavoring to please. Pressure of this kind will probably be resisted for only a limited period.

Consult Your Banker

"If I may venture on a word of advice to merchants, I would urge upon them during this period of more or less uncertainty to keep closely in touch with their bankers and consult them frequently on conditions and on their business policy. The advice of men trained to caution at this time cannot but be helpful to everyone engaged in business."

Goods Priced Too Low and Public Got Impression Quality Must Be Poor

Edmonton Hardware Firm's Interesting Experience With Line of Cutlery—Advanced the Price and the Goods Turned Over Rapidly

AN interesting experience which shows an attitude of the buying public that has been especially noticeable since the war, was that of the Sommerville Hardware Company, Limited, of Edmonton, during the holiday season. Three years ago the firm secured a large number of two-piece carving sets with the idea of making a Christmas special with them. A year ago they were put on at the bargain price of fifty-nine cents. The firm was somewhat surprised when the sales were almost negligible. During the Christmas season just passed the same sets were shown and marked at ninetyfive cents, and they sold very rapidly.

The manager believes that the first sale did not attract buyers because prospective purchasers imagined that if the sets were only worth 59 cents the quality must be very poor. There was not, it is stated, the slightest justification for this attitude.

Want Better Goods

The incident shows what many hardware firms have commented on, and that is that people who have been making more money are buying better goods than they ever did before.

The Sommerville companies report a holiday trade that was much better than a year ago, and that prospects for 1919 are very good. This is based to some extent upon the fact that farm lands have been changing hands very rapidly, not only in the vicinity of Edmonton but in the district to the South. This means that many new places must be outfitted, new buildings erected and so on. It is also apparent that a great deal of new land is being taken up and also that many of the farmers are planning improvements which will necessitate the purchase of hardware goods.

Stocking New Line

This year the firm sees an opening for extending its trade and is stocking blacksmithing supplies to a much greater extent than in former years.

The manager stated to HARDWARE AND METAL that the sales of skates have been fully fifty per cent. greater this season than last. He attributes this to the fact that as a result of the war being ended people feel more free to buy things that they did not care to purchase before, and also to the milder winter which has made people engage in skating more than they would if the temperature were low.

In 1919 the firm added to its stock a line of toboggans, skis and sleighs. This was a new line to most stores in the West as these sports are not engaged in nearly as much as in the East. The results, however, were so satisfactory that the firm plans to lay in a larger stock than ever to take care of its growing trade.

Showed Nice Increase

The cutlery department showed a nice increase in sales in all lines. This was especially noticeable in Community silver. The manager attributes this increase to a great extent to the special window displays that were made. Six patterns were displayed, and it was found that the window displays brought not only direct but immediate results.

As a result of milder weather than usual, stove sales were about the same as a year ago. The manager states, however, that without doubt the sales would have been much larger had the weather been really cold.

EXPORT RESTRICTIONS LIFTED

The British Government this week issued a general license for the exportation of the following goods to all non-European destinations:

Fuel economizers constructed of cast iron pipes used as auxiliary heating apparatus in connection with land or marine boilers; guttering, and cast-iron gutter and cast iron pipe fittings and connections; radiators, manufactures of cast-iron pipes; tin plates, terne plates; black plates, huts, wooden; mixtures and preparations containing not more than 10 per cent aniline color, not otherwise prohibited; phenalgin; boot polish; strapping, leather, for breeches; artists' water colors; floor cloth containing jute; the following lead manufactures: Metallic packing containing lead, printing type, coffin furniture, carriage furniture, lead capsules, lead scales, lead toys, lead weights for dressmaking; the following zinc manufactures: Zinc buttons and zinc stencils; advertising signs made of iron or steel plates or sheet steel; sheets, perforated; adhesive containing no more than 25 per cent. starch or other cereal substance; oilcloth, oilcloth baize, and imitation leather.

BRITISH TRADE FAIR

The Imperial Trade Commissioner in Canada and Newfoundland, G. T. Milne, has been advised by the Department of Overseas Trade in London, that the British Industries Fair, organized by the Imperial Board of Trade, will be held in London from February 24 to March 7 next.

About 600 firms will exhibit at the fair. These firms are manufacturers of the following goods: China and earthenware; glassware of all descriptions; paper, stationery and stationers' sundries; printing; fancy goods and travelling requisites; toys and sport goods.

The Department of Overseas Trade will have offices at the fair, admission to which is by card issued by the Imperial Board of Trade. The partners or buyers of Canadian firms who contemplate visiting the fair, will be furnished with cards of admission on application to G. T. Milne.

OFFERING $10 REWARD

The Canada Cycle and Motor Co., Ltd., Weston, Ont., is offering a reward of $10 for information that will lead to the recovery of tires stolen from a shipment made to a Toronto dealer recently.

Mail Order Firms May Be Taxed

Retail Merchants Will Urge Ontario Legislature at Coming Session to Assess Profits of the Big Stores—Would Use Figures Furnished By Railways and Express Companies as Basis For Getting at Percentage

DRASTIC action aimed to protect the merchants in small towns in Ontario against the encroachments of the big mail order houses will be asked for at the next session of the Legislature by the Ontario Retail Merchants' Association. The plan which is under discussion and which will likely be favored is to tax the mail order houses on the basis of the volume of business they do in each place. In order to arrive at this amount of business it is proposed to obtain the figures from the railway companies, the express offices and from the parcel post department. No recommendation in regard to the rate of assessment has as yet been made. This will probably be left over until it is seen what action the Ontario Legislature takes in regard to the proposal.

May Be Extended

There is every probability that if the Ontario Legislature takes action along the lines suggested that the Retail Merchants' Association of Canada will take the necessary steps to obtain similar taxation in each province.

If the situation in other provinces is anything like that in Ontario, at least what letters of merchants would indicate it is like, then the small town merchants are having troubles of their own. A great number of letters from all over Ontario have been received by the Ontario Association. Practically without exception they tell of the inroads the big department stores are making on the business in the small towns and they urge in no uncertain language that action be taken to tax the profits of the big firms.

Using Parcel Post

The point is also made that under the present system of parcel post the mail order houses have a tremendous advantage. It is suggested by some that regulations in connection with the parcel post system be modified so that the mail order houses cannot use them to the extent they do now.

Many of the merchants freely predict that unless something is done the country merchants will gradually be forced out of business.

It is rather a noticeable fact that hardwaremen do not appear to be suffering from mail order competition. Hardware and similar lines, it seems, is one field which the mail order houses have found it better to leave alone. There is no question about the fact, and it has been demonstrated time after time that the hardware merchant in any part of the country can not only undersell the mail order house, but can give more service in every way. The hardware men have gone after business aggressively and that is one thing the mail order houses cannot stand. It is a well known fact that the mail order firms seek out the towns where merchants do not advertise and then centre their efforts upon them.

Keen Business Men

Hardwaremen have not only been advertising and keeping up to date stocks, but they have been advertising the fact that they invite comparison on any and all occasions with the "catalogue." Prospective buyers have found after actual comparison with the hardware merchants' prices and those of the mail order firms that the home merchant was the cheaper, and often by quite a considerable amount. Not only this, but the home merchant was prepared to give them all kinds of service that the mail order houses would not attempt. For instance, a farmer living ten miles out in the country could come in and pick out a stove. The hardwareman's price was equal to and very often less than that of the mail order firm. The home merchant was handling a standard line of stoves, parts of which could always be replaced when necessary. The mail order stoves are often flimsily built affairs, bought in large quantities at the very lowest price and would not compare in quality with the standard stoves. The farmer could order his stove from the home merchant and the merchant would deliver it and set it up and see that everything was in good order. Nothing of this kind happens with the mail order firm. The farmer may drive in ten miles only to find that parts of the stove sent by the department store are missing. Even if the stove is all there, he has to lift it around and load it himself and then drive home and put it together as best he can.

Gets No Service

The point is he gets no service from the mail order house. In case he is not prepared to pay all cash for the stove the home merchant will always accommodate him. The mail order houses never do this. Unless cash is received with the order the goods are not shipped. Very often when the time comes, as it always does sooner or later, that new parts are needed, the mail order house cannot supply them. They have sold out that line of stoves and are handling some other specially ordered line. On more than one occasion people have bought goods from the pictures in the mail order catalogues and upon their arrival have found them very different from the descriptions.

Back of every article that leaves the hardwareman's store stands the merchant's guarantee. If it is not satisfactory he will make it so. These are a few of the reasons why the hardware men are not conspicuous among those who complain so bitterly about the inroads of the mail order firms.

Although they are not hit as hard by the mail order firms as many other retailers, the hardwaremen without doubt are prepared to stand behind other merchants and do their share toward securing legislation which would check the inroads the big city stores are making on country business.

Keenly Interested

In the meantime retailers all over the country are following with keen interest the action that is to be taken in Ontario.

The following editorial from the Owen Sound "Advertiser" may be said to sum up the views of the Ontario merchants.

Tax the Mail Order Houses

"The Ontario Government is considering placing a tax on mail order houses in order to protect the merchants in the smaller towns and cities against their competition. At a meeting of the Assessment Committee of the Legislature Mr. Proudfoot raised the question; and wholesalers present were unanimous in the opinion that the big departmental stores, through their mail order business, were driving the small merchants in the country towns out of business. They stated further that the postal service, by carrying parcels at a loss and paying for it out of the carrying of letters, was giving the mail order houses an unfair advantage.

"We hope the Government will act; it should have done so long ago. It has long been well known that the mail order octopus was crushing the life out of the country merchants, drawing, by its bait of attractive catalogues and tempting advertisements, business that should go to them. That the Government appears at last to be realizing that Toronto is not the whole province is a good sign.

"Mr. Proudfoot's suggestion was that the departmental stores should be taxed according to the business done in each municipality. The only objection raised to that plan was that it would be difficult to enforce; but we do not see where there would be much difficulty. The mail order houses know where their goods go; all that would be required would be a statement from them, giving the amount received from each municipality —which would involve a good deal of work, but presents no special difficulty.

The point raised regarding the operation of the parcel post should be looked into. Is there any reason why any service should be operated at a loss, and why the loss should be made up by persons who do not use it? Why should each department of the service not carry itself? It does not look fair to overcharge letter-writers for the benefit chiefly of institutions that are actually a detriment to the country at large.

"But the matter of postal rates is incidental; the main point of interest is action to loosen, if possible, the hold the mail order houses have gained on the business of the province at the expense of those to whom it should go."

STOVE MANUFACTURERS ASK FOR BETTER RATES

STOVE manufacturers from all parts of the Dominion held a two-day session at Montreal this week at which questions in connection with export business were considered and also selling policies. It was stated to HARDWARE AND METAL that prospects are good for overseas business and that a number of inquiries, some of them for large quantities of goods, have been received. In order to compete with American and other firms the stove manufacturers need better shipping rates and a committee was named which went to Ottawa and asked the Government to arrange for a rate between any Canadian ports and Liverpool that will be as low as that obtainable by American manufacturers. As far as stove prices are concerned it was stated that Canadian firms are now selling at from five to fifteen per cent. lower than American firms but unless the Government arranged for better transportation rates they would be handicapped.

The stove manufacturers have another question that needs settling shortly. This is a request from the molders' union for an increase in wages that approximates twenty-five per cent. This request was received but no action will be taken on it for thirty days pending the settlement of other business. The American stove manufacturers recently came to an agreement with the molders by which a ten per cent. increase in wages was granted.

SAYS NAILS AND WIRE LIKELY TO RULE STEADY

ONE of the largest makers of steel goods in Canada stated to HARDWARE AND METAL this week that there was every indication of nails and wire products holding steady for some months. At present, satisfactory deliveries are being maintained to the trade, but production costs were still high and delivery of raw material at this season of the year was always a difficult thing to maintain regularly. As a consequence of this and also in view of the fact that no surplus could be laid up during the progress of the war, there was little now in the way of overstock. "As a matter of fact," he said, "makers are booked for their output for several months ahead This has been brought about by the war conditions to a great extent.

"Export prices for nails and some other wire goods are in excess of the prices obtaining in this market now. Wire rods, from which nails are made, have not changed in price. There is no indication of any kind at this time pointing to a reduction of price, for the demand abroad is going to be very great and when transportation is available there will be a big movement to overseas points."

NEW PRICE NOT BASIS IN BIG STEEL ORDER

THERE seems to be a tendency in some very well-informed quarters to think that the U.S. Steel Corporation was rather premature in announcing a reduction in prices which included a three-cent base price for plate. To show that it does not control the situation it is worth noting that the biggest plate order sent from Canada since the war ceased, that for seventy-six boilers for the Fabricated Ship Corporation, was placed inside the last week or so at a base price of 3.75, which is well in advance not only of the Steel Corporation cut price, but of the fixed price of 3.25 that ruled during the life of the U.S. War Industries Board. Certain it is that the three-cent price has not stimulated business.

Other lines continue to make concessions in prices. Sheets, for instance, are at a seven-cent mark from the warehouses. Sheet mills, both in U.S. and Canada, are out looking for business. Many mills were taken off sheets during the war, and are now returning from the rolling of plate or other war material. Their books are empty and any business offering is keenly pursued.

The Canadian Government railways are sending out specifications for considerable business in the way of supplies for the railway shops.

BIG SEASON EXPECTED FOR MADE-UP FENCING

THE demand for manufactured fencing has been developing very satisfactorily in the past few weeks and orders, it is stated, have been coming in most satisfactorily. This is accounted for, in part, because of the manufacturer's confidence regarding the future of the market. He has, in some cases, at least, gone to the extent, it is stated, of guaranteeing prices for some time. The retailer is therefore taking no chance and realizing the need of having stocks available at an early date. Some have stated clearly that they want shipment made early, so that they will be in a position to supply customers' needs on short notice.

EARLIER CLOSING IS ASKED IN TWO PROVINCES

CONSIDERABLE impetus may be given to the movement for early closing as a result of the activities of the Retail Merchants' Association in Ontario and Quebec. At the coming session of the Ontario Legislature, very largely signed petitions will be presented by the grocers' branch of the organization, asking that the closing hour be made seven o'clock. The Retail Merchants' Association will ask the Quebec Government and the Montreal city council to pass a by-law requiring all retail stores in the city of Montreal to close four times a week at seven o'clock. A great many hardware firms have expressed a desire for early closing and some general move in this direction may be made.

ALBERTA RETAILERS WANT FACTORY ACT MODIFIED

ALBERTA retailers will make strong representations to the Provincial Legislature at its next sessions to have the "Factory Act" altered. It is stated, that as it stands at present the act discriminates against the larger stores, as small stores are permitted to remain open while more important places of business, which have to employ outside help, must close. Hardware firms, it is stated, are actively engaged with other retailers in endeavoring to have the legislation adjusted as soon as possible.

THE CHRISTMAS WINDOW CONTEST.

The results of the Christmas Window Contest conducted by HARDWARE AND METAL *will be announced next week. Photographs were received from hardware men all over the Dominion and the keenest interest was taken in the competition. The photos show that some unusually fine Christmas window displays were made and comments made by the various firms indicate that this year's holiday trade was one of the best on record. All agree that the window displays were a big factor in bringing people into the stores in crowds and in making possible the big turnovers that were made.*

Results are always the best test of any window display, and the firms who entered windows in HARDWARE AND METAL'S *contest are more than satisfied. Among so many window displays and such attractive arrangements the judges had the greatest difficulty in making awards.*

WILL LIKELY CONSIDER MUNICIPAL TELEPHONES

THE question of installing a municipal telephone system to be operated by the Public Utilities Commissioners in connection with the Hydro section of that board will likely be considered in London, Ont., very shortly. This move has been made, it is stated, as a result of the Bell Telephone Company not only increasing certain service charges since the war commenced, but intimating that other charges are likely to be increased. The investigation at Ottawa in connection with the request of the Bell Telephone Company to increase its rates all over Canada is being followed by business men with considerable interest and the communications that have been received from various business organizations and from municipalities indicate that many people are anything but satisfied with the service they have been getting. The Telephone Company argues that owing to increased costs of materials and increased wages its request to advance its charges is fully justified.

EXPORT BUSINESS MAY AFFECT CORDAGE PRICES

PRICES on first class manila cordage are now back pretty well to where they were in January, 1917, and in spite of the reductions that took place recently, the manufacturers are expecting a good business this year. Sisal cordage so far has been reduced only two cents per pound. Binder twine of all grades has only been reduced a cent and a half from the prices that ruled during the season of 1918. Some firms are watching the situation in regard to securing export business with much attention and the fact that the United States War Trade Board may grant manufacturers licenses to ship abroad twenty million pounds of binder twine is a factor that may tend to keep prices firm. Recent advices from London, England, state, that while business is comparatively quiet at present a large demand must inevitably develop. As far as the Canadian trade is concerned a good volume of business at the new prices is reported.

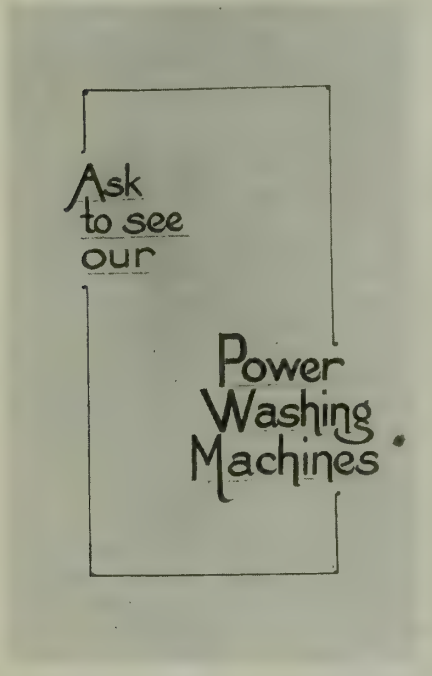
BIG TURPENTINE DEMAND FROM SOUTH AMERICA

LATEST reports from the South in regard to turpentine are as follows: Dealers report foreign trade opening up in various directions this month in turpentine with facilities better for the movement of the latter commodity. Good sales to South America were reported during the current week, aggregating several thousand barrels. The shipping situation will steadily improve and before spring a pronounced change will probably have come in that respect. As stated on several occasions, the shipments out of the United States next four or five months will be greatly in excess of production, so that visible supplies in this country will get down to very small proportions compared with what they are normally, giving additional strength to the situation for the coming year when production is expected by experienced observers to fall below consumption.

NATURAL GAS SCARCITY BOOSTS SALE OF STOVES

SALES of stoves in many districts of Ontario received a big boost this week by the action of the natural gas companies in advertising extensively and urging consumers to go as light as possible on the gas in order that the supplies should not give out. In several instances, it is stated, the supplies came so close to giving out, especially during the cold snap in the early part of the week, that many persons hurried to purchase stoves. At Aylmer, Ontario, stove dealers made record sales for a few days and at many other points a much larger business was done than usual.

Store Founder Insisted on Plain Cards



Could Not Read the Small Lettering and Decided to Have Bold Type—Uniform Style of Letter and Numeral Gradually Adopted—Illustrations Show This Style

One of a series by R. T. D. EDWARDS

THE system used in one of Canada's big stores for putting show cards on their goods is a very interesting one indeed and is sure to be beneficial to the smaller merchant.

We will first state how this store came to adopt its present system of plainly-printed uniform style show cards.

The founder of it was one day viewing their show windows. On one neatly-trimmed merchandise display was a show card neatly lettered with small type. The man's eyesight being slightly defective he could not make out what was printed on the card. The result was that an order was passed that all cards, whether in the show windows, or for interior use, must be lettered with a

bold type so that all customers might be able to read them easily.

Uniform Style Adopted

A system was gradually worked out and the result was that a uniform type of letter and numeral was adopted—a style that was applicable to hand or machine printing.

The style adopted was a square-faced Gothic, a style which the cardwriter could form by using the brush stroke method (we might say here that the brush stroke method of forming letters is the only way to turn out show cards quickly, and it is being taught and used by all the foremost schools and cardwriters). The next thing to standardize in this store was the sizes of the cards. Each card had to have a ruled border. Then a range of prices was selected, suitable to the prices of the merchandise in the various departments, from one cent upwards and many of each price and size were printed.

A large sliding door cabinet was built with shelving suitable to the various card sizes. The cards were placed in it in numeral order on their edges, this making it easy to obtain the desired price card. Sale cards, Friday bargain cards, "As Advertised" cards, etc., were all arranged in this manner.

One great feature in this company's system of show carding the store is a hard and fast rule that all cards belonging to a sale or season of the year must be taken down on a given night and replaced by the uniform white card with black printing. For instance, the day following Christmas all cards with Christmas designs are to be discarded or at the end of the semi-annual sale all sale cards must be dispensed with on a given date. This system can be worked out in the small store just the same. Don't allow Christmas cards to remain up after Christmas. It looks just as bad on the part of the store management as if "Friday Bargain" cards were left up on Saturday.

This "big store" example is not given as one to be followed minutely by the small store cardwriter, but many things can be gleaned from it that will be very helpful. For instance, many cards can be worked up ahead of time; borders can be ruled, standard prices can be made up by hand and filed away for busy seasons. The style of letter can be made uniform whether a heavy "Gothic" or a neat "Roman" be used. The color and sizes of the card should be standardized. This rule of course would vary for special sale purposes or at "opening" times.

Samples of This Store's Cards

The two styles of show cards demonstrated give a fair idea of the class of work used in the windows of the big store above mentioned. They are good readable cards. The type is plain, the layout neat and not elaborate, yet when you see either of these styles used in a couple of dozen windows all at one time the effect is good. The same form of lettering has been used for years and in all probability will be used for years to come. It is a part of the policy of the store.

The cards are white with black letters. The underlining is red. The shading on the one card can be done in any shade to suit the window trim.

POSITION WANTED

I want a place in your store.
I will be one of your greatest workers.
I will get new business for you every day.
I will always be on the job.
I will be on hand before the store opens in the morning.
I will stay and work for you after all others have gone.
I will always be enthusiastic about you.
I will tell everybody about you and your merchandise.
I will increase your efficiency many times.
I won't ask you for a cent of salary.
I am absolutely necessary to your business.
I am the WINDOW CARD.

QUEBEC OIL MEN CONVENE

The Quebec sales staff of the Imperial Oil Company, Ltd., met in convention at the Ritz-Carlton Hotel in Montreal under the chairmanship of the Montreal manager, W. W. Oswald. Between 25 and 30 men were in attendance, and the year just passed was reviewed carefully and plans made for the business of 1919. An excellent spirit was manifest throughout, and three full days were assigned the various topics which were considered. The salesmen then left for their territories, and prospects for 1919 as outlined to HARDWARE AND METAL indicate that the future promises well.

Accessory Sales Growing Rapidly

Service and Reliability, Backed by Newspaper and Attractive Window Displays, Given as Reasons For Splendid Success of Accessory Department by Winnipeg Firm—Will Extend Newspaper Advertising This Year

"OUR sales of auto accessories were easily one hundred per cent. greater than in 1917," said the manager of the accessory department of the J. H. Ashdown Hardware Co., Limited, Winnipeg, to HARDWARE AND METAL. "We are hoping to maintain this rate of increase for 1919 or perhaps increase it. Our policy has been to carry a complete and reliable line of auto supplies suitable for all cars. We aim to give the highest possible service to our customers and our stock in especially selected with regard to reliability. Any lines that are found to be unreliable are promptly dropped. By living up to this policy we have won the confidence of our customers. We are trusted and considered most dependable by all our customers, and this has been a big factor in the rapid development of our accessories department.

Has Grown Steadily

"This is our fourth year in handling accessories. In 1916 we carried only a very small stock. We were satisfied that there was room for development and in 1917 we not only doubled our stock, but doubled our business. In 1918 we considered that our stock of accessories was the most complete in Western Canada."

The Ashdown Company has gone after the accessory business aggressively. Besides carrying a complete stock of goods it has them arranged attractively. The firm is not afraid to use advertising space at any time in connection with its business, and this has helped the growth of the accessory department. The firm has realized also the value of backing up its newspaper advertisements with attractive window displays. As may be seen by the accompanying illustration the window display of auto accessories is not only striking, but it is convincing.

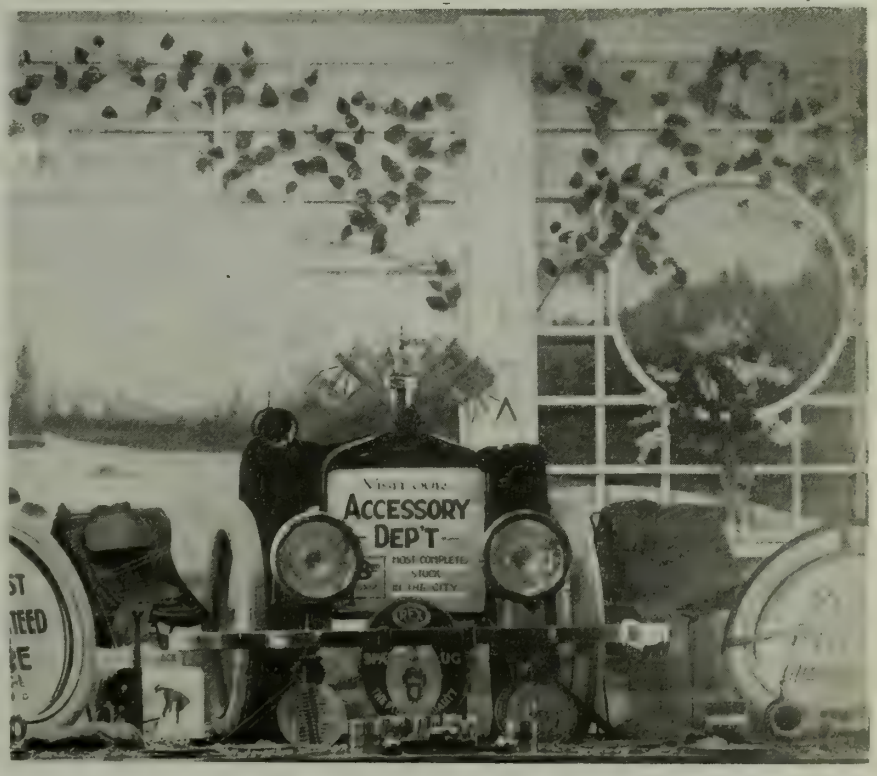
Helps Boost Sales

As stated above the basic principle behind the entire department is reliability and service. Note how this is carried out even in the window displays. "700 miles guaranteed," is a statement that might mean nothing in some windows. The fact that the tire shown is known by any auto owner to be a reliable one lends weight to the firm's guarantee, and when the car owner knows by experience that the Ashdown Company is prepared to make good its guarantees that confidence is established which enables a firm to double its business. "Visit Our Accessory Department" and "The Most Complete Stock in the City" are invitations that are more than likely to be accepted not only by prospective new customers in the city, but also by visitors from outside points who may be attracted by the window display.

Up to the present time the firm has been advertising on auto supplies alone only once or twice a month.

"We intend to advertise every Saturday in future in what we regard as the best paper in the city for that purpose," said the manager. "We will continue the same policy as before in regard to window displays, that is, we will back up our advertisements by attractively arranged windows."

The illustration in the adjoining column shows the type of advertisement the Ashdown Company has been using. The reproduction is one half of the size of the original advertisement. It is of interest to note that each of the firm's advertisement contains illustrations, and that all prices are given in prominent figures. The firm always aims to keep its advertisements seasonable, and this greatly increases their pulling power and general interest for auto owners.



Special advertising for the accessory department and always of a seasonable character is a feature of Ashdowns sales methods.

IF I SOLD HARDWARE

I would arrange a display to show the economy of sharp cutlery. I would show the jagged slices of bread cut with a dull knife, and clean slices cut with a sharp knife.

The same contrast could easily and effectively be visualized with meat, tomatoes, and similar foods. And I might not only display cutlery, but also devices for sharpening cutlery.—Hinton Gilmore, in "System."

Window displays have been a big factor in the development of the Ashdown Companys accessory business. The use of show-cards adds to the effectiveness of the display.

EDITORIAL COMMENT

IT PAYS TO ADVERTISE

THE statement in last week's issue of HARDWARE AND METAL from Windsor, Ontario, that the *Border Cities Star* has decided to open its columns to Detroit firms has an angle that is of interest to all retailers. The *Star* was purchased by its present owner after the merchants agreed to do a certain amount of advertising. On his part, the owner of the newspaper agreed to cut out all Detroit advertising. Just what this means may be gathered from the fact that Border Cities' firms were making a fight to prevent more than three million dollars going across the river annually into the pockets of Detroit merchants. The owner of the paper claims that the merchants have not given him the support they promised and have not advertised as they agreed to. Similar complaints have been made from time to time by the owners of papers in Canadian towns when they opened their columns to mail order houses. Newspapers are a business proposition and it takes a lot of money to operate many of them. The papers have a duty to perform not only to the public, but to the merchants. On the other hand, the merchants of a town have a decided obligation toward the home newspaper. It is entitled to their support and firms who fail to use space are not working either in their own interests nor those of the community. This policy of not advertising by home merchants is to blame perhaps in a very large way for the big development of the mail order firms. There are two noticeable facts in connection with the hardware trade at the present time. One is that the business was never on a more sound basis and the other is that hardware firms were never doing so much advertising. It is encouraging to know also, from the managers of many hardware firms, that they have found advertising so successful that they are planning to increase their space. This does not mean that they have been using too little space in the past, but rather that their business has grown so steadily as a result of their efforts that they feel fully justified in taking more.

SHIPMENTS HELD UP

BECAUSE British and French ports are at present so congested that it is impossible to handle the volume of traffic the Canadian Railway Board has issued orders which will hold up all shipments for these points. There is now sufficient freight at Halifax and St. John to fill every boat which will leave in January and other shipments have been piling in on top of these. Until the Government order became effective shipments were moving overseas at the rate of half a million tons a month. The length of time the embargo will be effective is at present decidedly indefinite and will result in huge quantities of goods being held by Canadian firms in order that the terminals may not become congested also. In the meantime, Canadian manufacturers are perfecting organization for securing all the export business possible. The group plan is being worked out and manufacturers wishing to ship various lines will centre their efforts along co-operative lines. In a large number of instances credits will have to be arranged and the Government is arranging to look after this end of the business. At the present time, it is stated, prospects are bright for Canadian firms securing some excellent orders.

FUEL OF THE FUTURE

THE fact that the Province of Alberta possesses 88 per cent. of the coal deposits of Canada, and that at the present rate of consumption the anthracite supplies of the United States will be exhausted in less than a century, has resulted in considerable attention being given to the economic utilization of Western Canada fuel by the Research Council of the Dominion Government. Although no plant has yet produced lignite on a commercial scale, the Dominion Government has appropriated $200,000 for this purpose, and this is to be supplemented by the Governments of Manitoba and Saskatchewan by $100,000 each. An estimate of the total coal in Western Canada is 1,193,774,342,000 tons, most of which is lignite.

STEADILY GROWING FIELD

THAT there is over 2,000,000 horse-power of electrical energy generated in Canada is demonstrated in the report on Electric Generation and Distribution in Canada about to be issued by the Commission of Conservation. Two of the principal points brought out are the large part water-power plays in the production of electricity and the fact that over three times as much power is produced by privately-owned plants as by those publicly owned.

There is a big demand for more electric power in all parts of the country and the sale of electric labor-saving devices is increasing at a rapid rate. While there are big openings in this business for hardware men, it is an ever-widening field and one that might be cultivated with profit.

THE EXPORT SITUATION

AS stated in previous issues of HARDWARE AND METAL, while considerable export business may develop for Canada with some European countries it will be the policy of each country to provide everything possible at home. This will not only keep debts as low as possible, but will provide much needed employment for men who have been in the army. Canada's opportunity will come in providing raw materials of which these countries are short, tools and food, until those who lost so much in the war are again on a self-sustaining basis. England is turning from a war basis to a peace footing with a rapidity that is astonishing many of her commercial competitors. Already, it is stated, she has secured in the face of the keenest competition a number of large and important orders. France is following in the same line. The vast arsenal of Roanne will be devoted to the rebuilding of old and the construction of new railway material. The factories at Bourges, which have been devoted to the manufacture of explosives, will now be utilized for the manufacture of chemical fertilizers. Shops which have been working in wood for aviation will hereafter manufacture windows, doors, and parts of all sorts for the construction of houses in the invaded regions. Other works will manufacture the metal parts entering into this sort of construction.

THE RETAILERS' SATISFACTORY POSITION

AFTER four years of war and all the hardships that war conditions entailed, the retail merchant is in the most satisfactory position that he has ever been. Henry Detchon, secretary of the Credit Men's Association, in a recent address stated that the Association had reports, complete in every detail, on every retail merchant in Canada. These records show every amount that is owing, every amount that is overdue and how payments are being met, and Mr. Detchon states that there never was a time when conditions were so favorable.

"A great many merchants," he stated, "who three or four years ago found it necessary to take long credit terms, are now taking their cash discounts. When a merchant gets into that position, he can assuredly be assigned to the prosperous class."

THOSE little things which a clerk does without hope of reward quite often determine his salary for the coming year.

WHAT OTHER EDITORS SAY

EACH individual citizen has a duty to perform regarding repatriation. First of all, he must think of repatriation as something in which he is personally interested, and toward which his way of thinking will assist. He must discover means of co-operating with other citizens in facilitating the return of our soldiers and war workers to civil life. He must consider how he can readjust himself or his business to conform to any change in industrial conditions. He must have confidence in himself and the resources of Canada to absorb our returning citizens. —London *Advertiser.*

IT is a bad thing to "make business" by making articles that serve no use. To waste material is as bad as to waste food. It is even worse, for we raise food every year. But who can create iron or coal? And it takes a generation to develop a forest. We have placed many of the "non-essentials" under control. Some of them ought never to come back. The only way to prevent it is ot create so many new and useful industries that other kinds will have no place. A business that makes nothing but money is a poor kind of business. Every business ought to contribute to the daily progress of the world. I would rather hear that a man made a million blows than that he made a million dollars.—Henry Ford in his new paper, the Dearborn *Independent.*

IF those firms that can reduce prices without sacrificing reasonable profits will hasten to do so, accepting for the time being a lower rate of return, the wholesome and necessary process of deflation will be set in motion. Labor will not object to reduction in pay if the purchasing power of the dollar is increased and the standard living is not threatened. Actual, not nominal, wages determine the wage-worker's standard of living. Far-sighted and broad-minded corporations will reduce prices to a point that will eliminate not fair and reasonable profits, but "profiteering." —Chicago *Daily News.*

ADVERTISING, like any other commodity, can at once become an asset or a liability. Advertising to be of value must first establish and receive confidence, then it becomes an asset. The liability is immediately created when advertising mis-states facts and thereby establishes mistrust and uncertainty; it is to be hoped that the work of the Associated Advertising Clubs of the World, by its war on fake advertising, will be able to create such laws and conditions that advertising of the future will be a dependable medium always truthfully stating indisputable facts.—*American Artisan and Hardware Record.*

BRIGHTEN up, boys, brighten up. The boss of to-day though actually the same man is not in the same frame of mind as the boss of yesterday.

No man can rise in the ranks if he refuses to look into his employer's welfare. Living for self, working for self is not the thing. The biggest men in the world to-day are those fellows who walked the ladder rung by rung with their employers. The employer of labor who sees the employee's interest in his work will not forget when handing out bouquets. When an employee gets the big head and believes that the works cannot go on without him, the sooner he resigns the better for himself and all concerned. He might be fired if he remains.—Sarnia *Canadian Observer.*

THERE is a growing feeling throughout the country that the whole question of taxation by a tariff system should be taken out of politics and administered by an independent commission. Heretofore our tariffs have been framed by the Manufacturers' Association, by which both the old line political parties have been controlled. Now the demands of the Western Provinces and of the United Farmers of Ontario are such that the party leaders are hardly prepared to face the situation. An unbiased and competent commission could frame a more equitable tariff pclicy than any of the political parties have done.—Forest *Free Press.*

EVENTS IN THE TRADE

Business Changes

Westboro, Ont.—H. A. Stinson, hardware, has sold to J. Weatherall.

Lougheed, Alberta.—Kirkman & Coleman have purchased the hardware business of McClure & Graham.

Personals

A. Danielson has joined the staff of Grant & Sons, hardware, Galahad, Alta.

C. E. Houlding, of Saskatoon, spent the week in Winnipeg on business.

J. Buller, of Gendreau & Buller, Lampman, spent a few days in Winnipeg on business this week.

Walter Street, Amisk, Saskatchewan, has purchased the implement business of A. M. West, at Hughenden, Alta.

S. W. Smith, manager Toronto branch Brandram-Henderson Ltd., spent a couple of days in Collingwood last week.

Major C. O. Fairbank, of the hardware firm of Van Tuyl & Fairbank, Petrolea, Ont., has been elected mayor of the town.

M. J. Beatty, of Beatty Bros., Limited, Fergus, Ont., plans to leave about the end of January to attend the Fair at Lyons, France.

D. L. Henderson, until recently with the Collingwood Hardware Company, Collingwood, Ont., this week joined the sales staff of the Aikenhead Hardware Limited, Toronto.

R. Bennett, recently with J. Yolles, stove and furniture dealer, Toronto, has joined the sales staff of the Hamilton Stove and Heater Company, of Hamilton, Ont.

L. C. Stewart, Halifax, N.S., one of the directors of Brandram-Henderson Ltd., Montreal and branches, was a visitor at the Toronto offices of the company this week.

Russell Creighton, who has been a salesman in R. J. Walkem's hardware store at Tottenham, Ont., for two years, has taken a position as travelling salesman with the International Harvester Company.

Fire Losses

The Horwood Glass Mfg. Co., Ottawa, sustained a small loss by fire.

The stock of the McClary Mfg. Co. was damaged by smoke and water during a big fire in adjoining premises at Montreal.

The hardware store of George D. McCash, at Brock, Saskatchewan, was completely destroyed in a fire which swept the business section of the town. The loss of Mr. McCash is estimated at $10,000.

Fire which is believed to have originated from a leaky lamp destroyed the hardware store of James Montjoy at Chauvin, Alta. The fire reached a keg of powder which exploded and the flames spread through the whole building in a few minutes. The loss of $5,000 is partially covered by insurance.

Kingston Hardware Man Selected as Chairman

Percy B. Chown, of the hardware firm of A. Chown & Company, Kingston, Ont., has been honored by not only being re-

PERCY B. CHOWN
of Kingston who was appointed Chairman of the city Fire Committee.

elected for a third term, as alderman for Victoria Ward, but as chairman of the Fire and Light Committee. Although a busy man, Mr. Chown has found time to devote to the interests of the city, and during his term in the council has worked hard. Prior to entering the the City Council he served for many years on the Board of Education, and was chairman of the Property Committee.

Frederick Simmons, another Kingston hardwareman, who was re-elected as an

to our customers and our stock is espe-

and Light Committee.

Obituary

Arthur P. Leonard, of Weyburn, Sask., travelling salesman for the Rumely Machine Company, died from pneumonia, which followed a short illness with influenza.

The death occurred at St. Charles River, Richelieu, Quebec, of Oza Bayard, tinsmith.

Julius E. Waterous, one of the founders of the Waterous Engine Company of Brantford, died on Saturday last.

William Branan, of Melfort, Sask., agent for the John Deere Implement Co., died from influenza. He was a native of Strathroy, Ont.

Frederick T. Hoskin, for forty years in the tinsmithing business at Strathroy, Ont., died as a result of a fall in which he fractured his hip. He was in his 91st year and prior to going to Strathroy resided at Bowmanville.

George L. Gillies, hardware dealer, Highgate, Ont., while on his wedding trip was stricken with pneumonia and died in Grace Hospital, Detroit. Mrs. Gillies is still very ill with influenza.

Trade Notes

The National Fuse Company, 144 York St., Hamilton, Ont., manufacturers of electrical appliances, has changed its name to the Equator Manufacturing Company.

The Stevens-Hepner Company, Limited, of Port Elgin, Ontario, has been granted permission to increase its capital stock from $150,000 to $500,000.

The Canadian Accessories Company, S. Coll, Daniel Leitch, and Thomas Shipping, have commenced business at Ridgetown, Ont.

The Dominion Linseed Oil Company, Ltd., manufacturers of Livingston Brand Linseed Oil, with factories at Baden, Ont., and Montreal, have opened a factory at St. Boniface, Manitoba, with a view to looking after the Western and Pacific Coast trade. Mr. H. P. Livingston, general manager of the company, has been in Winnipeg for some time, directing the installation of this new plant, which is now running, and ready for business.

Montreal News

Maurice Wheeler, of Sargent & Co., was in Montreal this week.

George Shaw, of the Millers Falls Co., was in Montreal this week.

T. L. Hopkins, of the Stevens Arms Co., was in Montreal during the week.

Mr. McIntyre, of McIntyre and Taylor, Toronto, was a Montreal visitor this week.

Among those attending the sales convention of Lewis Bros., Limited, in Montreal, was Douglas Carter, a former tra-

veller for this firm, but who is now in Picton, being associated with Carter Bros., retail hardware.

T. B. Hinchman, of the John H. Graham Co., New York, was a Montreal visitor.

Richardson and Bureau have recently been appointed the Montreal selling agents for the Clipper Tool Co., Buffalo, New York.

H. T. Meldrum, of the H. T. Meldrum Co., addressed the Montreal electrical men at their luncheon on Wednesday on "Trade Opportunities."

F. J. Macdonell, eastern representative for the Victor Saw Works, Ltd., Hamilton, was a caller at the Montreal office of HARDWARE AND METAL.

At the annual meeting of the Canadian Paint, Oil and Varnish Association, Walter B. Ramsay was nominated as a candidate to the council of the Montreal Board of Trade.

Thos. R. Frazer, vice-president of the King Hardware Co., Ltd., Atlanta, Ga., was in Montreal this week. Mr. Frazer was on a brief visit to his brother, John A. Frazer, sales manager for Lewis Bros., Ltd.

R. A. Cowman, representing R. Johnson, Clapham and Morris, Ltd., Manchester, England, was in Montreal this week. Mr. Cowman is making a special visit to Canada to ascertain what Canadian manufacturers can do to supply demand in England.

Hon. C. C. Ballantyne, Minister of Marine and Fisheries, and also vice-president of the Sherwin-Williams Company of Canada, Ltd., who has been in the Royal Victoria Hospital for nearly two weeks, after an operation for appendicitis, is now out of danger.

Incorporations

The Perfection Garden Tools Company, Limited, capital $100,000, head office, Toronto, has been granted a provincial charter. The firm plans to manufacture and deal in wood and iron implements for agricultural purposes.

Toronto Battery Service Company, Limited, Toronto, Ont., capital $40,000, plans to acquire the business of S. L. Pearson & Co., Toronto, and manufacture and deal in batteries, and auto accessories.

General Motors of Canada, Limited, capitalized up to $1,000,000, of Walkerville, Ont., has been granted a provincial charter.

Canada Iron Foundries Limited, Hamilton, Ont., capital $1.000,000, has been granted a provincial charter.

The Smart Turner Machine Company, Limited, Hamilton, Ont., capital $200,000, plans to take over as a going concern the business of the Smart Turner Machine Company, Limited, of Hamilton, and manufacture pumps, steel barrels, and other metal goods.

FENCE COMPANY SOLD

The founders of the Sarnia Fence Company, Ltd., Sarnia, Ont., M. D. Pendergast and M. H. Pendergast, have sold their entire interest in this company and are going to the States, where they have two other fence plants. Messrs. H. Banwell and Wm. Lottridge, of the Banwell-Hoxie Wire Fence Company, Hamilton, and James Playfair, of the Great Lakes Transportation Co., are the new owners of the company. Mr. Lottridge will be manager, it is announced.

Ford Company May Supply Owners With Tires at Reasonable Price

Big Deal is in Progress, it is Stated, By Which Ford May Control Output of One Line of Canadian Company's Tires

ACCORDING to information given to HARDWARE AND METAL negotiations are well under way for the purchase by Henry Ford of the entire output of a certain well known line of automobile tires. While no prices have as yet been definitely stated, it is rumored that they may be supplied to Ford owners at about ten or twelve dollars.

The Ford Company has recently been advertising that it plans to greatly extend its service to Ford owners. Under the new plans it is aimed to have all dealers handle Ford parts. Supplying Ford owners with standard 30 x 3½ tires may, it is stated, be a part of this service. The situation promises to be an interesting one.

The question of supplying tires to Ford owners at a reasonable price is one which, it is stated, has been under consideration by the Ford Company for some time. A representative of a tire company with which it is stated the Ford Company is arranging for practically its entire output of one line of tires, stated to HARDWARE AND METAL that an announcement might be made in a couple of weeks, giving details of the proposition.

REGINALD H. MONK

As stated in last weeks issue of HARDWARE AND METAL. *Mr. Monk has joined McArthur Irwin Ltd., Montreal, as manager of their chemical plant.*

PORT ARTHUR HARDWAREMAN IS GIVEN THIRD TERM

B. Tourtellot, manager of the Tourtellot Hardware Co., Port Arthur, Ont., was re-elected in the recent municipal elections to the city council for a third term. In a field of twenty seeking the ten seats on the council, Ald. Tourtellot was elected almost at the head of the polls. J. C. Dobie, of the firm of Marks, Clavet & Dobie, headed the polls in a hard-fought contest for the Board of Education. F. W. Barton, senior member of the Barton-Fisher Hardware Co., tried for a seat on the council, but was defeated by a very narrow majority. Mr. Barton, just to show that he has the determination to get what he makes up his mind to have, has given the local papers notice by announcing, the day after the election, his candidature twelve months hence.

DOMINION BATTERY CO.'S SALESMEN'S CONVENTION

The first annual convention of the sales staff of the Dominion Battery Co., Toronto, was held at the King Edward Hotel this week. Discussions took place on topics of interest to the sales force, and also on advertising, and methods of co-operation with the trade during the coming year.

One of the interesting events of the week was a luncheon at the King Edward Hotel, which was attended by James Dixon, president; Wm. M. Turnley, managing director; J. A. McMahon, director; C. W. Moodie, director, and the following salesmen: E. W. Long, P. C. Paiement, M. Engers, J. D. Bryan, J. R. Skinner.

The luncheon was also attended by A. L. Lockwood, president the Lockwood-Ash Motor Co., Jackson, Michigan; Mr. T. E. Reynolds, special sales representative of the Lockwood-Ash Motor Co., Jackson, Michigan; Messrs. Ward & Fuller, of the Dominion Battery Company's staff, and Mr. L. J. Cunniff, of the H. K. McCann Company, Limited, Toronto.

An inspiring address was delivered by Mr. J. Dixon, president of the company, who thanked the officers and salesmen for their excellent co-operation during the past year. Mr. Dixon referred in a most optimistic manner to the wonderful opportunities which were presented for developing the firm's business during 1919.

Annual Convention of Lewis Bros., Ltd.

Salesmen Were Keenly Interested in Program, Which Was Replete With Special Features—Sales Problems Were Discussed by Representatives From All Over Dominion

ONE of the most successful conventions ever held by Lewis Bros. Ltd., Montreal, wholesale hardware, was that in Montreal from Monday, January 6, and continued daily until Friday.

During the past four years the management had, in common with many concerns throughout Canada and the States, deferred the assembling of their sales force. But, with a cessation of the war and with great possibilities presenting themselves, it was felt opportune that the men should come in to the "house" for mutual discussion of the big sales problems that will present themselves in the coming months.

The various sessions were held in a special convention room of the Queen's manager John A. Frazer, assisted by Hotel under the chairmanship of sales J. Thurston Smith, secretary-treasurer of the firm. Nearly thirty travelling salesmen were present and this was, for a number, the first convention which they had been able to attend.

Interesting Program

A unique program was a feature of this year's proceedings, speakers being brought to Montreal to address the salesman on the selling points possessed by many of the lines of staple and special goods sold by the firm throughout Canada that this was an undoubted success, was attested by the men after the close of this part of the week's program, and many expressions were voiced that this feature alone was well worth the time spent in convention. Special attention was also directed to the new auto equipment department just opened and to the 200 page catalog, illustrative of these lines, which is just off the press.

Another instructive feature introduced this year was a special visit to the Montreal plant of the Steel Company of Canada. The whole of Friday afternoon was so spent and the various processes of manufacture of steel products proved alike interesting and educative.

Banquet to Salesmen

The banquet given by the firm to their sales force and some invited guests on Friday night at the National Club was very successful. About seventy-five attended and the tables were laden in a manner to remind the guests of pre-war dinner functions. Mr. Fraser presided, and his duties as toastmaster were shared by Mr. J. Thurston Smith. Many toasts of appropriate nature were drunk and during the evening a pleasant and complete surprise was sprung on both Mr. Fraser and Mr. Smith, the travellers having quietly arranged the presentation to the former of a splendid dinner wagon and to the latter of a fine upholstered arm chair. Suitable recognition of the great surprise and appropriate choice of these gifts was made by both recipients.

Among the invited guests at the banquet were the following: Richard Hunter, Kingston; D. G. Carter, Picton; W. R. Yendall, London; Elmer A. Cabana, Buffalo; Mr. Craig, Hamilton; and John R. Anderson, J. E. A. Bureau, and A. H. Illsey, Montreal.

The Program

The week's program was as follows:

MONDAY, JANUARY 6.

2.30 p.m.—Roll call.
2.32 p.m.—Address of welcome. Mr. Jno. A. Frazer, sales manager Lewis Bros., Ltd.
3.00 p.m.—Address. Mr. G. D. Davis, manager Hardware and Metal, Toronto, Ont.
3.25 p.m.—Address. H. B. Render, Auto Supply Department, Lewis Bros., Ltd.
3.30 p.m.—Address. H. C. Thompson, Teddy Morel, president Hall-Thompson Co., Hartford, Conn.

TUESDAY, JANUARY 7.

9.00 a.m.—Roll Call.
9.01 a.m.—H. V. Armstrong, General Catalogue Work.
10.00 a.m.—J. F. O'Brien, General Asbestos Co., Charleston, S.C.
10.30 a.m.—Mr. Jones, Northern Electric Co., Montreal, P.Q.
11.00 a.m.—E. B. Callaher, vice-president Clover Mfg. Co., Norwalk, Conn.
Luncheon Recess.
2.00 p.m.—Roll Call.
2.05 p.m.—H. C. Burrows, sales manager Hill-Smith Metal Goods Co., Boston.
3.00 p.m.—T. C. Goodwin, Champion Spark Plug Co., Windsor, Ont.
3.30 p.m.—"Bull Ring." "Roll up your sleeves and cuss the house."

WEDNESDAY, JANUARY 8.

9.00 a.m.—Roll Call.
9.01 a.m.—H. V. Armstrong, General Catalogue Work.
10.00 a.m.—F. J. Macdonnell, Eastern Representative Victor Saw Works, Hamilton.
11.00 a.m.—R. H. Dawson, Cutlery.
11.15 a.m.—A. H. Illsey, Associate Editor Hardware and Metal, Montreal.
11.30 a.m.—J. A. Miller, president Canadian Pyrene Mfg. Co., Montreal.

Luncheon Recess.

2.00 p.m.—Roll Call.
2.01 p.m.—M. H. Schott, Canadian National Carbon Co., Toronto, Ont.
2.30 p.m.—W. P. Kearney, vice-president Dominion Chain Co., St. Catharines, Ont.
3.00 p.m.—B. H. Kaple, Brunner Manufacturing Co., Utica, N.Y.
3.30 p.m.—J. A. Donnelly, A. Ramsay & Son Co., Paints.
4.00 p.m.—G. F. Cowper, Canadian National Carbon Co., Toronto.
4.30 p.m.—J. C. Gibson, Oneida Community Co., Silverware.

THURSDAY, JANUARY 9.

9.00 a.m.—Roll Call.
9.01 a.m.—H. V. Armstrong, General Catalogue Work.
10.00 a.m.—J. E. Norwood, president Automobile Accessories Co., Baltimore, Md.
10.30 a.m.—W. R. Yendall, general manager Richards-Wilcox Mfg. Co., London.
11.00 a.m.—Mr. Stevenson. H. W. McCandless & Co., New York, N.Y.
11.30 a.m.—Mr. Van Allen, Otter Manufacturing Co., New York, N.Y.
12.00 a.m.—Ralph Waldt, Weaver Garage Equipment.
Luncheon Recess.
2.00 p.m.—Roll Call.
2.01 p.m.—H. S. Hart, Dillie & McGuire Co., Richmond, Ind.
3.00 p.m.—H. C. Ring, assistant in sales, Frank Mossberg Co., Attleboro, Mass.
4.00 p.m.—Mr. Young, Champion Ignition Co., Flint, Michigan.
4.30 p.m.—Mr. Barker, sales manager Northwestern Chemical Co., Marietta, Ohio.

FRIDAY, JANUARY 10.

9.00 a.m.—Roll Call.
9.01 a.m.—Elmer A. Cabana, vice-president Buffalo Spec. Co., Buffalo, N.Y.
9.30 a.m.—W. P. Richardson, Perfection Garden Tool Co., Toronto.
10.00 a.m.—H. B. Render, Automobile Accessories Catalogue.
10.30 a.m.—"Peace Conference." Everyone taking part.
Luncheon Recess.
1.30 p.m.—"sharp"—Leave Queen's Hotel and spend the entire afternoon going through the plant of the Steel Company of Canada.
Evening.
6.30 p.m.—Banquet, National Club, 157 St. James Street, Montreal.

The salesmen present were: G. Bambridge, L. H. Brown, E. A. Burden, N. Depocas, G. L. Devitt, D. Deschamps, A. N. Drouin, C.. Cobeil, J. P. Hammill, G. R. Hagerman, G. E. Karch, A. D. LeBlanc, C. H. McGibbon, H. E. McGill, Z. Miron, E. Pilon, J. E. Pilon, L. R. Rettie, J. E. Arnett, E. A. Runions, J. A. Trempe, J. A. Tanguay, C. C. Young, R. F. Warren, A. Lamy, G. C. Dufresne, V. Gagne, F Castillon, J. C. Paquette.

W. A. MACLENNAN PASSES ON

Had Been in Attendance at Sales Conference of Steel Company of Canada at Hamilton—Stricken in Toronto—Died at Montreal

W. A. Maclennan, who had charge of the sales office of the Steel Co. of Canada at Vancouver, B.C., died suddenly last Sunday morning following a very brief illness. The late Mr. Maclennan came East to be in attendance at the Sales Conference of the company at Hamilton held last week and following this had gone to Montreal. He returned to Toronto Thursday night and was taken seriously ill Friday morning. He insisted on going back to Montreal that day and arrived there in a very serious condition. His nephew, to whose home he went, enlisted the aid of nurses and doctors, but Mr. Maclennan passed away on Sunday morning, January 12, at the hospital to which he had been removed. Mrs. Maclennan, his wife, is ill with influenza. The funeral was held on Tuesday of this week.

IRWIN AUGER BIT CO. CONVENTION

The Irwin Auger Bit Co. have just held at their factory, Wilmington, Ohio, a salesmen's convention to discuss present plans and prices and confer in regard to future policy and development. This convention was attended by all the salesmen of the United States and Mr. T. Mortimer of Toronto, who represents them for Canada. A distinct note of optimism characterized all the discussions and the sessions of the convention were conceded by all to have been most helpful.

A very pleasant feature of the convention was a banquet at which the executive officers entertained all the employees, including the salesmen, where brief speeches were made and an excellent programme carried out.

BIG DEMAND FOR PLATE GLASS THIS YEAR PREDICTED BY BROKERAGE CO.

BECAUSE building activity in Canada follows somewhat along similar lines to that across the line, generally to a greater extent when the population proportion is considered, the following notice just sent out to the trade by the Johnston Brokerage Co., of Pittsburgh, may have much interest for Canadian firms:

Plate Glass

To the Trade,—

The projected construction, compiled from reliable sources, shows that expenditures aggregating $500,000,000 will be under way before the end of 1919. This tremendous outlay is reported by various publishers of journals issued for the guidance of architects, contractors and dealers in various building lines. The proposed construction embraces industrial and office buildings, apartment houses, hotels and residences, institutional, church and municipal buildings, etc.

Will Require Glass

The construction mentioned, of which some detail is given below, will require an immense amount of plate glass, in fact a great deal of flat glass products, but refer to and are most interesting to plate and window glass manufacturers and dealers. There are other demands for plate glass that will consume a surprising feetage, among them being the automobile industry and the export trade. Both of these outlets now promise new records in consumption. There are hundreds of localities where building activities are resuming from which no reports are obtainable, but these will come in due time and will materially swell the already large figures. The sale and delivery of plate glass will certainly be conducted on more rational and business-like lines. Long time and meaningless contracts entirely controlled by the speculative buyer will cease. This change will be welcomed by the legitimate and substantial distributor and will put the market on a solid and proper basis.

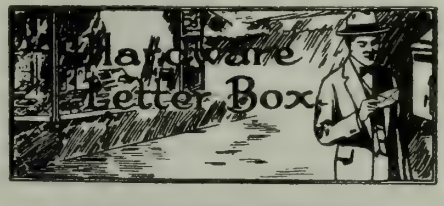
Some Estimates

To recapitulate prospective building for which plans have been drawn and in a majority of instances contracts executed, the figures below are submitted:

New York City, N.Y., $70,575,000; Buffalo, N.Y., $3,693,000; Newark, N.J., $4,255,000; Boston, Mass., $20,816,000; Worcester, Mass., $1,920,000; Eastern Mass. (except Boston), $3,855,000; Maine and New Hampshire, $1,350,000; Connecticut & Western Mass., $6,089,000; Philadelphia, Pa., $43,740,000; Trenton and Camden, N.J., $3,955,000, Eastern Pa. (except Phila.), $4,250,000; Baltimore, Md., $4,160,000; Pittsburgh, Pa., $15,575,000; Cleveland, Ohio, $34,450,000; Columbus, Ohio, $3,535,000; Cincinnati, Ohio, $2,005,000; Chicago, Ill., $144,047,000; Detroit, Mich., $50,000,000; St. Louis, Mo., $4,898,000; Kansas City, Mo., $20 000,000; Minneapolis, Minn., $10,000,000.

The figures, large as they appear, only scratch the surface. Consider the Central and Western districts, the great North-West, the Pacific Coast, the South, etc. Prepare for big business, the biggest you have ever experienced or handled.

RIFLE SHOOTING TO BE REVIVED



Preparations are already under way for the revival of rifle shooting in Montreal. Lieut.-Col. Robert Starke presided at a meeting held this week to discuss the matter with parties interested. Among other topics that will receive the attention of the military men asked to attend, will be the appointment of a Bisley team, and also the matter of continuing rifle practice in Canada as obtaining before the war.

BAD BLAZE AT MONTREAL

Damage to the extent of $250,000 is estimated to have been done the building and contents known to Montrealers as "Motor Row" on Saturday. The city's water pressure is stated to have been so low that the fire department was unable to cope with the fire effectively. While the Cadillac and Just Motor Companies are reported to have suffered extensively, the Dominion Motor Car Co., White Motor Car Co., and Cutten & Foster were also losers.

WERE WELL CARED FOR

During the influenza epidemic recently the management of the Gillette Safety Razor Co. of Canada, Ltd., took prompt and effective action to care for its employees. Not only were its own sick given every attention, but the families of employees who had been stricken were attended by Mrs. A. A. Bittues, wife of the manager. Mr. Bittues also was active in assisting, as well as Dr. and Mrs. Dean. As a result of the energetic measures taken the fatalities were kept very low. The company maintains an emergency hospital in its Canadian factory at Montreal.

Theimo Washing Machine

Bonthron & Drysdale, Hensall, Ont.—Kindly advise where we can get repairs for the Theimo washing machine.

Can any of our readers supply manufacturer's or agent's name?—Editor.

Soot Doors

W. Walker & Son, Ltd., Toronto.—Could you let us know manufacturer of soot doors in the city?

These are made by the Gurney Foundry Co., Toronto.—Editor.

Spring Motors

Hamilton Sales Co., Hamilton, Can.—We have constructed a patented rotary evaporator and we require a spring motor for same, similar to those which were used for rotary store signs before electric motors came into use. Could you assist us in getting names of manufacturers of such motors?

Spring motors are procurable from the Otto Heineman Phonograph Supply Co., 172 John St., Toronto; His Master's Voice, Ltd., 208 Adelaide Street West, Toronto; Hedason Mfg. Co., New Haven, Conn.; H. C. Thompson Clock Co., Bristol, Conn.; H. G. Saal Co., 4410 Ravenwood Ave., Chicago; A. F. Meisselbach & Bros., 29 Congress Street, Newark, N.J.; Thomas Mfg. Co., Dayton, Ohio. Some of these firms deal in phonograph motors only, and whether they would have "pull" enough for you we cannot say. By submitting full details with probable load to be carried to them, however, they could advise you definitely.—Editor.

Aladdin Mantles

The Tourtellot Hardware Co., Port Arthur, Ont.—Where can we procure Aladdin mantles for coal oil lamps?

These are procurable from the Mantle Lamp Co., 297 Aladdin Bldg., Montreal, or branch at Winnipeg.—Editor.

Wants Turnstiles

Cochrane Hardware Ltd., Sault Ste. Marie, Ont.—Where can we secure recording gates or turnstiles?

These are supplied by the Cleveland Turnstile Co., Cleveland Ohio; National Ticket Co., Cleveland, Ohio; F. P. Smith Wire and Iron Works, Chicago, Ill.—Editor.

Brass and Bronze Hardware

R. Irvine, 305 Ashdale Ave., Toronto.—Can you give a few names of American manufacturers of brass and bronze hardware?

We are not quite clear as to just what type of hardware you wish to secure but manufacturers whose names appear below turn out a wide range of goods which will probably include items you wish to buy. We assume you must have a list of Canadian manufacturers. Brainerd Mfg. Co., East Rochester, N.Y.; National Brass Co., Grand Rapids, Mich.; Garden City Plating & Manufacturing Co., Chicago, Ill.; Foster, Merriam & Co., Meriden, Conn.; Yale & Towne Co., New York, N.Y.; The Stanley Works, New Britain, Conn.; S. & F. Corbin, New Britain, Conn.; Russell & Erwin Mfg. Co., New Britain, Conn.; Sargent & Co., New Haven, Conn.;; Lockwood Mfg. Co., New Haven, Conn.; Chicago Spring Butt Co., Chicago, Ill; Chicago Hardware Co., North Chicago, Ill.; Bommer Bros., Brooklyn, N.Y.; Champion Hardware Co., Geneva, Ohio; Reading Hardware Co., Reading, Pa.; Penn Hardware Co., Reading, Pa.

THE CLERKS DEPARTMENT

Popular Priced Standard Goods Sought by Robert H. Ingersoll

Youth Who Left the Farm Without a Dollar Has Sold More Than Fifty Million Watches—Has Never Stopped Advertising and Always Got Big Results

THIRTY-SEVEN years ago the Lansing, Mich., "Republican" printed this paragraph among its "personals":

"Robert H. Ingersoll left his father's farm at Delta Mills day before yesterday and boarded a cattle train for New York City to make his fortune. Young Ingersoll is just nineteen. But he is a hustler and we expect him to make his mark in the big city."

The huge city impressed, but did not frighten him. He wanted a job, and before nightfall he had that job—with an older brother who had preceded him to New York and set up as a rubber stamp manufacturer on lower Broadway.

The brother was not enterprising enough to satisfy young Ingersoll and after a few months he decided to cut loose and establish himself in the business of making rubber stamps. As he couldn't do all the work himself he sent to Michigan for his younger brother, Charles. The business grew gradually, but there were hard struggles for the young strangers to overcome. Out of each struggle they got strength and self-reliance and courage for the next one.

Charles stayed inside the store making the goods, selling to the customers who came in, keeping the books and doing the correspondence.

Robert went out and sold the goods, continually studying the market for new openings. He was convinced that the big opportunity lay in manufacturing something which he could connect with his name for which there was a big demand and which he could afford to sell at a low, standard price. He experimented with a dollar camera, a dollar toy typewriter, a dollar sewing machine, a dollar printing press and a dollar dynamo. Even in those days the power of the word "dollar" was apparent to Robert H. Ingersoll, as was the fact that fortune awaited the man who could supply an extensive demand with an inexpensive trade-marked article.

The business grew, but the money had to go right back into it. In fact, money was so badly needed to expand the business that Charles's salary could not be paid for a long time—just enough to live on was allowed him—and finally Robert gave him a share in the business in place of his back salary—the foundation of the now-famous firm name of Robert H. Ingersoll & Bro.

The Ingersoll Chain Stores

The bicycle craze was sweeping the country in the late eighties and the Ingersoll brothers operated a bicycle factory and became one of the largest jobbers in the country of bicycle parts and accessories. They also saw possibilities in the sporting goods market and started a chain of six retail sporting goods stores in greater New York. Through these they did a business of a half million dollars a year.

But Robert was not satisfied. His stocks had to be sold on a basis of price competition only and they had no reputation, no steady demand. The firm was no different from hundreds of other concerns in trade. He wanted a staple distinctive article that he could identify with his name—a specialty that would apply a universal need and be permanent in its demand.

One day in an old junk store where he was trying to sell a bill of goods he spied the smallest clock he had ever seen.

"Why couldn't it be made just a little smaller and called a watch?" was the thought that flashed across his mind. So he bought it, took it to a manufacturer. Together they worked out a model which, though large in size, was a good timekeeper and could be made at a low cost.

Of course every one laughed at him, as they had laughed at other inventors of the world's useful products. But he was persistent, and the manufacturer in Connecticut made up a few hundred watches.

The primary idea, Mr. Ingersoll says, was a watch for $1, and although the cost of production in the first year or so did not permit such a price with profit, the first watches turned out were sold direct to consumers at $1 through the medium of the firm's mail-order catalogue. This was in 1892 and thus was established the Ingersoll Dollar Watch which has become one of the most famous of American manufactured products.

First Watches Quite Clumsy

The following year Mr. Ingersoll exhibited the watch at the World's Fair in Chicago. Several improvements had been made in the model, and this with the continued high cost due to small production made it necessary for Mr. Ingersoll to sell these watches at $1.50.

Quite naturally they created a sensation. The "Columbus" was not dainty, being two and one-half inches wide and one and one-sixteenth inches thick, and it ticked with all the enthusiasm and vigor of a grandfather's clock. But at that time only the rich could afford an accurate watch, and here was one that not only kept good time but cost only $1.50.

At first the watches were just thrown into the firm's mail-order catalogue, but gradually they crowded out everything else. The power of advertising was not as well known then as it is now, and for some time Mr. Ingersoll hesitated to spend very much money in this way. But gradually he came to realize that without advertising his business would remain small, and so, in 1898, he "splurged" on a page in the old Cosmopolitan. It was his first real ad., and it cost $250. He shut his eyes, held his breath and waited for the returns to come in. The first morning's mail brought $1,800!

Since then he has never stopped advertising.

Advertising made it possible for him to increase production, and increased production made it possible for him to reduce the price to $1. "The Watch that made the Dollar Famous."

In twenty-five years in the watch business he has sold watches to more than 50,000,000 persons. His watches are sold by more than 100,000 retail merchants, scattered all over the world. He has made possible an institution that in normal times produces 18,000 finished watches every day—or more than 5,000,000 in the year. Each year he has refined and improved his watches, made them smaller and better looking, as well as better timekeepers.

Early in his business career, he adopted this policy, "Give all we can for what we get instead of get all we can for what we give," and this, with a rigid guarantee and plenty of advertising, has helped to make him the world's greatest producer of watches.

SAYS EATON'S EIGHT-HOUR DAY PLAN IS GOOD BUSINESS FOR COMPANY

THE announcement of the T. Eaton Company of the adoption of an eight-hour day policy for store employees, with Saturday a full holiday during part of the year and a half holiday throughout, at once demands admiration as indicating the desire of a successful business institution to reduce labor's burdens, says "Financial Post." There are a number of aspects—from the standpoint of the company, its competitors and the employee—from which the matter may be thoughtfully considered.

From the company's standpoint it is undoubtedly good business. Not only is the concern able to carry any financial burden which may be involved, but the good effect on public opinion is worth considerable to the biggest example of big commercial business in Canada. And in view of the greater efficiency, which may be expected from the employees during the shorter hours, it is doubtful if production and sales returns will fall off materially under the new arrangement. The work behind the counter in a large department store is most trying; the clerks are on their feet all the time, the atmosphere is not usually good and customers are often far from considerate. Under these conditions short hours are likely to be accompanied by more efficient selling efforts and when the time of opening and closing is well known and favorably recognized, it is doubtful if there will be any great reduction in the average clerk's takings.

The short hours will undoubtedly have a tendency to attract to the Eaton Company the best available help. Other concerns will quite probably find it necessary to increase wages or lose their best salespeople. This effect on the labor and economic situation will probably be farther reaching than might appear at first glance. Take in the case of the Ford Company, which not only reduced hours, but set a high standard of wages. Results, it is said, warranted the change in relation to this company, but the effect upon competing concerns, not so fortunately situated, was rather serious: Ford naturally attracted many of the efficient hands of other concerns, while those who did not respond were in a favorable position in demanding higher wages.

So far as the average employee is concerned, shorter hours no doubt add to the contentment of mind and through enlarged opportunity for recreation should increase efficiency, but idle hours provide also greater opportunities for spending. Further, it must not be forgotten that the official schedule of hours applies to the rank and file of the workers only. For those in executive positions "office hours" are usually waking hours; there is no time schedule for those who work with the mind.

On the point of service to the public there is no definite answer. The Eaton Company has by efficient methods been able to reduce its hours to the minimum for retail institutions. The argument against the old idea of keeping open so long as the people are willing to buy—that they will arrange their shopping to meet conditions—has been carried far because the public has been convinced that it pays to shop on Eaton schedule. But how far could this go? Would it be in the interest of all the people if all retail establishments should operate on such short hours? As it is the smaller establishments are given an opportunity to serve the emergency shopper when the big store is closed.

Lots of Chances For Young Men Says Ford

Henry Ford has some interesting observations to young men in his new paper, the Dearborn "Independent." For instance, he says: "Successful persons often say that opportunities are just as plentiful as they ever were. But they don't tell you what they are, where to find them or how to use them.

"If a young man were starting out to-day without a dollar, and the ideas on which present successful organizations are built were developed by other men, would it mean that there were no opportunities left? Not at all. However much we have been able to do, there is still so much to be done, so many new opportunities to be developed, that no one need despair of a chance to do something worth while.

"There are thousands of new starting places waiting to be discovered. There are thousands of needs waiting to be filled. There is great reward waiting for any one who has eyes to see the need and ability to meet it.

"Opportunity? Why opportunity is the cheapest and most plentiful of all our treasurers. Like rich virgin soil it only waits to be found and used."

EXPORT RESTRICTIONS REMOVED ON ARMS AND AMMUNITION

The United States War Trade Board announces in a new ruling (W.T.B.R. 477) that applicants for export licenses will no longer be required to attach to their application Supplemental Information Sheet X-2 except in the case of applications for the exportation of arms, ammunition, or explosives.

KILL THE VARMINT

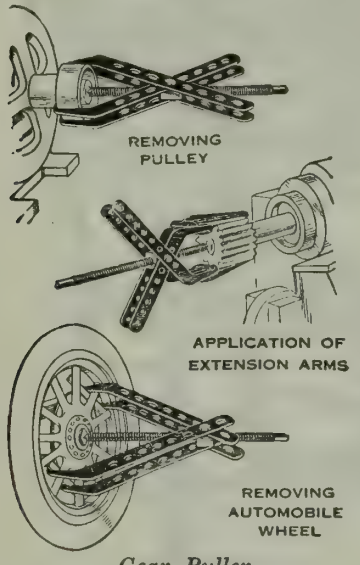
Something the Cat Brought in. (Toronto News).

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

NEW "TOT MOBILE"

The new 'Tot Mobile" is made, it is stated, in two sizes, one ten inches high and the other twelve. The car is made, it is claimed, with iron axles, a slanting steer rod, two wheels at the front, foot rests, and a detachable shaft. The

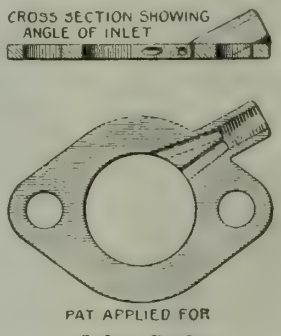


Tot Mobile

wheels, it is stated, are of hardwood. The Tot Mobile is manufactured by George W. Stock, 1344, Sycamore Street, Cincinnati, Ohio.

GEAR PULLER

The "Little Giant" gear and wheel puller is made, it is stated, of four puller arms of drop-forged steel, with hooks and adjustable stud bolt. This, it is stated, gives the device an adjustment range of from 2½ inches to 13 inches



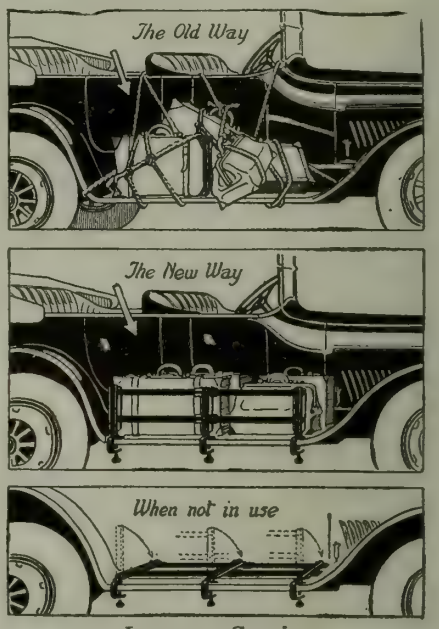
Gear Puller

when extension arms are used. The puller arms are so arranged, it is stated, that with the draw screw in place there is no need of holding or steadying bar. The puller prongs, it is stated, are designed to give maximum strength, yet to occupy little room. For this reason, it is stated, they may be used for removing timing gears or other gears where room is limited.

This device, it is stated, is handy in removing inside work and for inside pulls. For removing small pulleys or gears a pair of extension arms are used. These arms are provided, it is stated, with a locking arrangement for fastening to the pulling arms and provide for two pulling points rather than the four as in the primal attachment. The "Little Giant" is manufactured by the Premier Electric Company, Cuyler and Ravenswood Avenue, Chicago.

INLET GASKET

The Puritan inlet gasket manufactured by the Puritan Machine Works, 7 Hersam Street, Stoneham, Mass., is designed, it is stated, to facilitate the connection of auxiliary air valves, moist air devices, primers and decarbonizers. It is placed between carburetor and mani-



Inlet Gasket

fold. The gaskets, it is stated, are of solid brass and machine finished to a perfect surface. The inlet hole is bridged, and this, it is claimed, insures strength. It is placed in such a way that it is stated that the auxiliary charge is mixed thoroughly with that of the carburetor. The "Puritan" gasket, it is stated, does away with drilling and tapping as it is drilled and tapped to receive standard ⅛ inch pipe thread, thereby eliminating the dangers of drawing metal chips into the cylinder. The gasket, it is stated, is very easy to attach, and it is not necessary to disconnect gasoline feed pipe or hot air tube.

LUGGAGE CARRIER

The Marquette luggage carrier, made by the Marquette Manufacturing Company, Inc., 616 Endicott Building, St. Paul, Minn., is made, it is claimed, of the best grade of steel, cannot break, and has nothing to get out of order. It will, it is stated, outlast two or three cars. The carrier, it is stated, can be attached to any make of car in a few seconds and without the use of any wrench or tools.

Luggage Carrier

SOLDER CEMENT

"Greblox" solder cement, made by the Greb Company, 196 State Street, Boston, it is claimed, is a non-conductor of electricity, and will hold, it is said, metals, minerals, glass, cloth, wood paper, and practically any material. "Greblox" can be used, it is claimed, as an insulator for stopping short circuits, for mending radiators, tools, or even for repairing

Solder Cement

tears in upholstery. The cement, when absolutely dry, is not affected, it is stated, by chemicals or water, and it is said to be fireproof.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MANUFACTURERS of bolts and nuts have issued a new discount sheet which provides for declines in many lines of bolts, some of a very substantial nature. New net prices on those lines revised will range from 5 to 15 per cent. below quotations which have been in effect during the past few months. Blank and tapped nuts, both hexagon and square, remain at unchanged figures.

New prices have been announced on wrought pipe, that with a steel base showing the greater decline. The present basis of quotations is in line with reductions made in raw materials, and a lower production cost now developing through more nearly efficient labor.

After two or three weeks of uncertainty as regards decline to be made, new prices have finally been determined upon for boiler tubes. These show a general decline of about 10 per cent. This is not the result of an accumulation of supplies, for although shipments are coming along better there are still some sizes not represented on the stock sheet. The past few weeks has seen a heavy demand for tubes, and offerings have been quickly absorbed to keep stocks at a low point.

New developments of interest are lacking in scrap metals. Dealers seem to be well stocked, and the low basis which has been named on prices may hold until some activity is manifest one way or another.

Turpentine prices, after a period of inactivity locally, have recorded an advance of 2c per gallon in some quarters. In view of the strong markets in the South, there would seem to be some probability that even higher levels will be reached. Substantial shipments of rosin and turpentine, aggregating 40,000 barrels, have left New York for South American and other ports, and depleted stocks resulting are now being replenished from producing points in South. Rosin records an advance for the week of from 10c to 35c per barrel on the low grades, and turpentine is up about 4c per gallon at primary points. Locally a little more interest is noted, and another couple of weeks will see considerable activity, it is expected.

Linseed oil has recorded a decline amounting to 10c per gallon in some quarters, the lower flaxseed market being the direct influence to bring this about. Seed is down about 18c for the week, although prices yesterday showed an advance which may mean bottom has been reached. Supplies are considered very good, and crushers expect to be in a good position to take care of heavy spring business which will be developing actively in another two or three weeks.

Arsenate of lead is lower in price, while new prices on formaldehyde provide for an advance. Dash churns, screw drivers, farriers' hammers, game traps and draw knives are among the lines which have moved to higher levels. Business is good and spring orders will soon be on their way to the retailer in big quantities.

MONTREAL MARKETS

MONTREAL, Jan. 16.—There have been several important changes this week, most of them declines. Old materials have been revised very greatly to lower levels and the market is dull. Ingot metals, too, are on the soft side, and copper, tin, lead and aluminum are quoted with less spread. Lead pipe is lower to the extent of one cent per pound, and steel sheets, both black and galvanized, are less. Wrought iron pipe is lower, and bolt discounts are changed, with a reduction being made in some styles. Cotton waste is easier, and pipe wrenches are slightly less in price.

Rope is looking firmer, and an advance in this commodity would not be very surprising, as hemp has advanced in the States two to three cents.

Waste Down About 10%; Wrenches Less

Montreal.

WRENCHES, WASTE. — Various grades of cotton waste are lower in price and the reduction is approximately 10 per cent. Stillson pattern wrenches of W & B make are being quoted in one quarter at 50 per cent. off the list instead of 45 and 5 per cent. as formerly.

Bolts Revised To Lower Basis

Montreal.

BOLTS AND NUTS.—A revision has been made through the change of discounts on bolts and nuts. The following discounts are in effect, the change providing for a reduction of 5 to 15 per cent. in some styles, while others are unchanged. Nuts are unchanged. Carriage bolts, $1 list, ⅛ in. dia. and smaller, 6 in. and shorter, 20 per cent., longer lengths, 10 per cent., 7-16 in. dia. and larger, net list; machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 25 per cent,, ⅜ in. dia. and longer, 15 per cent., 7-16 in. dia. and larger, 5 per cent.; sleigh shoe bolts, all sizes, net list; coach and lag screws, 30 per cent.; square head blank bolts, 5 per cent.; bolt ends, 5 per cent.; plow bolts, 15 per cent.; elevator bolts, 10 per cent.; fancy head bolts, 10 per cent.; shaft bolts ($3 list),

10 per cent.; step bolts, large head ($3 list), 10 per cent.; whiffletree bolts, 10 per cent.; nuts, square, blank, add to list $1.50; nuts, square, tapped, add to list $1.75; nuts, hexagon, blank, add to list $1.75; nuts, hexagon, tapped, add to list $2. Terms, 2 per cent. off 30 days from date of shipment.

New Pipe Prices Are Announced

Montreal.

PIPE.—The following prices on wrought pipe are announced and are slightly less than those prevailing previously: Standard, per 100 feet: ¼ and ⅜ in., black, $4.68; galvanized, $6.81, and for other sizes the prices are as follows with black price first and galvanized following: ½ in., $6.21, $7.78; ¾ in., $7.82, $9.95; 1 in., $11.56, $14.71; 1¼ in., $15.64, $19.90; 1½ in., $18.70, $23.76; 2 in., $25.16, $32.01; 2½ in., $40.37, $51.19; 3 in., $52.79, $66.94; 3½ in., $67.16, $84.18; 4 in., $79.57, $99.74.

Makers Are Busy On Stove Outlook

Montreal.

STOVES AND WARES.—With the season ahead a promising one, stove manufacturers are endeavoring to solve some of the problems that must be met. It is expected that some definite proposals may be forthcoming soon as to the methods of standardizing, etc. In the meantime there is but little movement, but this is a seasonable condition. Wares are being made up by the factories to fill spring orders, and the outlook for a satisfactory movement later is good.

Hemp is Firmer; Rope May Stiffen

Montreal.

ROPE AND CORDAGE.—The hemp market has been advancing in southern points, and this would mean a change here. In fact some rope makers looked for a change ere this, they state, and seem to feel that a higher price basis for rope in the immediate future is possible. There is naturally little sale for rope yet, but this will develop very probably as the season proceeds. Pure manila basis is still 28½c; British manila 24c, and sisal 25½c per pound.

Coal Oil Price And Gasoline Holds

Montreal.

COAL OIL, GASOLINE.—A steady and seasonable demand continues for coal oil. The prices are unchanged and Royalite is quoted at 19c and Palacine and Electroline at 22c per gallon. Motor gasoline is selling fairly well and the price is 34c per gallon.

Sheets Are Down; Selling Light

Montreal.

SHEETS AND PLATES.—Light selling has been responsible in part for a weakening of the market on both black and galvanized sheets. Prices show less spread now, and while there is a more nominal basis than is usual, the range of quotations is not so wide as it was. The demand continues to be limited.

BLACK SHEETS—			Per 100 lbs.
10 gauge	7 25	$7 35	$8 50
12 gauge	7 35	7 40	8 50
14 gauge	7 10	7 35	8 20

18-20 gauge	7 50	8 15	8 30
22-24 gauge	7 60	8 20	8 35
26 gauge	7 65	8 30	8 40
28 gauge	7 75	8 50	8 50
GALVANIZED SHEETS—			
10¾ oz.	$ 9 50		$10 75
28 gauge	10 90		10 25
26 gauge			10 00
22 and 24 gauge			9 85
20 gauge			9 65
18 gauge			9 65
16 gauge			9 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Iron and Steel Hold Unchanged

Montreal.

IRON AND STEEL.—While there is some likelihood of slight readjustments being made on various lines of iron, the basis is quite steady, and any change contemplated will be of a slight nature. The country trade is less active than it would be were colder weather prevalent for the farmers cannot get about in customary fashion.

Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50

Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95

New Discounts on Bolts and Nuts; Some Bolts Lower

A NEW range of discounts has been named on bolts and nuts which in some cases provides for a decline of from 5 per cent. to 15 per cent., with other lines showing no change whatever. The small sizes of machine and carriage bolts show the greatest decline, with plow bolts, shaft bolts and whiffletree bolts a close second. Carriage bolts 7/16-inch and larger are unchanged, and sleigh-shoe bolts are in the same position as formerly. Square and hexagon nuts, blank and tapped, are still quoted at figures which have been in effect for some time past. The new discounts are reproduced herewith along with the old discounts for comparative purposes:—

NEW DISCOUNTS ON BOLTS AND NUTS
Applying to Standard Lists
Cancelling Previous Discount Sheets and Effective January 7, 1919. Subject to change without notice.

Lead Pipe Down 1c; Other Lines Easy

Montreal

LEAD PRODUCTS.—Lead pipe and lead waste are each down 1c this week, and the tendency of other lines is easy. The market range for pig lead has been less, and with any orders in sight the sellers are ready to accept business if offered on anything like a large basis. Orders are not plentiful, and solder and other products are in limited, though seasonable demand.

Lead pipe, lb.	$0 13

Big Reductions in Price Old Material

Montreal.

OLD MATERIAL.—As pointed out in HARDWARE AND METAL last week, the conditions obtaining in old metal and scrap markets were such as to indicate falling prices. This has now developed and the whole lines have been revised, copper, brass, zinc, iron and lead lines being reduced considerably. This is the immediate result of a slow demand and accumulating supplies. Notwithstanding the slump dealers are looking for an improvement in the not distant future as far as movement is concerned.

Dealers' Buying Prices:	
Tea lead	0 03 — 0 03¼
Heavy lead pipe	0 05

Yellow brass	0 10	0 11
Red brass	0 14	0 15

Overshoes, lumbermen's rubber boots	....	0 05½
Bicycle tires	....	0 04
Automobile tires	0 04	0 04½

Weakness Shows in Ingot Metals

Montreal.

INGOT METALS.—There is a manifest tendency to lower tendencies on most ingot metals, and some decline is shown in tin, copper, lead, and aluminum. There is little movement.

COPPER.—While there is little to report on this line, the tendency is easy and the range narrower with 25c per pound as a ruling price.

TIN.—No licenses are available as yet and the market is quiet. Local price basis is hovering around 70c per pound.

SPELTER.—At 9½c per pound, and with the undertone unchanged, little movement has been effected.

LEAD.—A narrowing of the price range is made and quotations are now fixed for the week at 9c per pound.

ANTIMONY.—At 10c per pound the basis is unchanged and few sales are reported.

ALUMINUM.—The range this week is less, and at 43c per pound a small amount of trading is done.

TORONTO MARKETS

TORONTO, January 16.—New discounts have been issued on bolts and nuts, which with the majority of styles of bolts provide for declines from former levels. In the case of nuts, there has been no price change recorded. The new prices on wrought pipe have been determined upon and in some instances this is a fairly substantial figure. New prices have finally been determined upon on boiler tubes, which show about a 10 per cent. decline. Brass butts are down from 12½ to 15 per cent.

Business has started off splendidly and travellers report conditions throughout the country good. Spring orders are being assembled ready for shipment and in another week or two delivery of these will be in full swing. Prospects are considered excellent.

Brass Butts At Lower Levels

Toronto.

BRASS BUTTS.—A lower basis of quoting has been provided for in new prices now being named to the trade on brass butts. Indications are that the metal which has been largely used in war work is now more plentiful so that commercial interests will be in a position to secure supplies more as they want them. The decline ranges from 12½ to 15 per cent.

Cordage Holding Steadily; Selling

Toronto.

CORDAGE, TWINES.—The market on rope is holding steadily. Manila hemp has stiffened and the feeling seems general that at the declines recently recorded, rope is a very good buy. That many retailers are booking at present figures is advice gathered from the jobbers and manufacturers who indicate that volume of orders coming to hand is splendid. Prices now ruling are given as follows: Pure manila, 28½c per pound base; British manila, 24c; New Zealand hemp, 24c; sisal, 25½c.

Twines are generally unchanged. It is understood the United States Government will release 20,000,000 pounds binder twine for export at a set price, but whether this will be low enough to take care of the business offering seems a question. The situation locally is unchanged, prices ruling at figures shown in current market quotations.

Outlook for Wares Good; Stoves Too

Toronto.

STOVES, WARES. — Manufacturers of tinware, enamelware and kindred lines are very pleased with outlook for 1919 and the volume of orders coming to hand at this early date indicate that the trade are making preparations to secure increased business during the present year. The market is holding steadily and without change. Manufacturers expect to be in a better position as regards supplies so that practically a complete range of goods will be available.

The outlook for stoves is good. Travellers are starting out on their territories again and reports so far indicate that prospects are good. Prices are steadily maintained and no immediate change is looked for.

Nails Hold Unchanged; Active

Toronto.

NAILS, WIRE.—Nails are holding at unchanged levels and reports indicate that a little more activity is noticeable in these. The demand is by no means heavy, but that interest is developing seems to be generally conceded. Prices have remained steady, wire selling at a base price of $5.50 per 100 pounds and cut nails at a base of $5.85 per 100 pounds.

Smooth steel wire shows little activity and no price changes are reported, the base remaining at $6.25 per 100 pounds.

Oils and Gasoline More Active

Toronto.

OILS, GASOLINE. — Travellers are back on the road again and the results of their efforts are showing in increased activity for both oils and gasoline. In another couple of weeks it is expected business will be humming again. Prices have held at unchanged figures this week, coal oil selling at 18½c to 21½c per gallon. Gasoline is steady, too, the price remaining at 33c per gallon.

Bars Steady; Little Movement

Toronto.

IRON AND STEEL.—Prices generally have been revised to lower levels noted last week, and the market seems quite steady at quotations now prevailing. The amount of business coming to hand is small just now, but outlook is considered satisfactory. Tire steel and toe calk steel show slight readjustments from last week's figures, the former being down 5c and the latter up 15c per 100 pounds. Prices are as follows:

Common bar iron	$4 75	$5 00
Common bar steel	5 00	6 25
Refined iron	5 15	5 40
Angle base	5 25	6 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Steady Tone to Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—The market is holding steadily and only a seasonable amount of business is being done. Similar conditions generally apply on sheet metal building lines, including eavetrough, conductor pipe, metal siding and kindred items, all of which rule at unchanged prices with the volume of trade light. Quotations on corrugated sheets appear herewith, other lines being priced in current market quotations.

TORONTO—	Per 100 Sq. Feet.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$9 00	$7 50
No. 26 gauge	10 00	8 50

No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Sheets Hold at Steady Figure; Active

Toronto.

SHEET PLATES. — The market on sheets and plates is being very well maintained and jobbers report business coming to hand as very good when sea-

son is considered. No quotable changes are recorded, although big substantial orders on black sheets will sometimes be accepted at figures slightly below those shown below. Arrivals of black sheets from the mills have been good and galvanized have also been coming along freely so that stocks are rounding into very good shape. Range of quotations follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$8 50
12 gauge	$6 85	7 35	8 35
14 gauge	6 90	7 20	7 90
16 gauge	7 00	7 25	8 00
18-20 gauge		7 30	7 80
22-24 gauge		7 35	7 85
26 gauge		7 40	7 90
28 gauge		7 50	8 00
3/16-inch plate			7 40
¼-inch boiler plate			7 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$9 30	$9 75
U.S. 28	9 00	9 25
U.S. 26	8 70	8 95
22 and 24	8 55	8 80
18 and 20	8 40	8 65
16	8 25	8 50
12 and 14 gauge	8 15	8 40

Second row of figures subject to rebate of 25c per 100 lbs. in some quarters for orders amounting to one-half ton or more.

Boiler Tubes Register Decline

Toronto.

BOILER TUBES. — Reductions have taken place in the price of tubes and these appear to be voluntary on the part of some of the sellers. There are no large stocks on hand either here or across the line. In fact there are some sizes that are not represented yet. There has been for some weeks past an unusually heavy demand for tubes, and this tends to keep the stock on hand at a low mark. Instead of the old tube list standing with ten per cent. off a new list was handed out to-day, making 2-inch lapweld tubes $32 per 100 feet against a former $36. It may be that still lower prices will come in tubes, for they are still a long way ahead of the pre-war prices, but these will, it is thought, come along gradually. It is doubtful if even after the lapse of time and much readjusting prices will ever come down to pre-war levels. By November of 1915 the price had shown only a nominal advance. After that the rise in price amounted to a real procession, and it was an unbroken succession of increases covering the period between then and the end of the war.

Boiler Tubes— Toronto—	Per 100 feet Seamless	Lapweld
1 inch	$32 00	$.....
1¼ inch	36 00	.....
1½ inch	39 00	32 00
1¾ inch	39 00	32 00
2 inch	45 00	32 00
2¼ inch	48 00	34 00
2½ inch	50 00	40 50
3 inch	58 00	45 00
3¼ inch	.....	52 00
3½ inch	70 00	54 00
4 inch	80 00	67 00

Wrought Pipe Prices Available

Toronto.

WROUGHT PIPE. — When HARDWARE AND METAL went to press last week new prices were not available on wrought pipe. These, however, have been determined upon and the present quotations which record a fairly substantial decline in some grades and sizes is reproduced in panel form herewith. Quotations appear on standard buttweld and standard lapweld steel pipe, which record the greatest declines.

WROUGHT PIPE
Price List No. 38.
Standard Buttweld

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

Lead Products Hold; Wire Solder Down

Toronto.

LEAD AND ZINC PRODUCTS. — There have been no further developments in manufactured lead products, the market holding steadily and without change at declines recorded last week. Solder shows only one change. The wire solder being ½c lower in some quarters at 46¾c per pound. Manufacturers indicate that orders coming to hand are good and they report that they are busy meeting demands of the trade. The outlook is bright and preparations to take care of big business are being made.

New List Old Materials Announced

Toronto.

OLD MATERIALS.—As indicated in last week's issue of HARDWARE AND METAL a new list of scrap metals and other lines was being worked out. This is now available and in it some very severe cuts have been made in the prices that dealers will pay. It is indicated that the list was not put out with the idea of stimulating trade, for an announcement that prices dealers will pay have been cut to pieces is hardly calculated to help matters this way. A leading Toronto dealer when asked if anything was coming in at the new low levels said, "There is practically no business going on at present. Many of the yards are going over their business for the year. As a matter of fact we do not want to buy, and sellers do not seem anxious to dispose of their holdings at present rates. I can't see where there is anything in the immediate future that is going to improve matters much either. For all practical purposes we are simply sitting on the fence at the present time."

Cement Steady; Plaster of Paris, Too

Toronto.

CEMENT, PLASTER OF PARIS.—A very steady tone is noted in regard to cement. There is little activity just now, this being the quiet period, but the outlook seems quite bright, and when trade opens up in another month or six weeks it is expected to show very satisfactory returns. Prices hold at unchanged levels as shown in current market quotations. Plaster of Paris is quiet just now and prices are holding without any quotable change. Activity is expected to develop in the next few weeks.

Formaldehyde Goes To High Levels

Toronto.

FORMALDEHYDE.—New prices have been named on formaldehyde at which orders are being booked, and these show an average increase amounting to about 4c per pound. It is expected these prices will carry through the coming season, figures which have been reached being as follows: 400-lb. barrels, 36 1-3c per pound; 200-lb. kegs, 39c per pound; 100-lb. kegs, 40¼c per pound.

Lead Easier; Other Metals Steady

Toronto.

INGOT METALS.—Lead is slightly easier again this week, but beyond this change there is nothing new to report in the situation, all lines holding at unchanged levels. Business is quiet and only buying done is for immediate requirements.

COPPER. — Lower prices in United States markets have not affected quota-

tions here as yet. The market is quiet, little interest being reported and any sales made are on the 30c per pound basis.

TIN.—The situation is without change as far as tin is concerned. Supplies are ample for immediate requirements, though there is little coming through. Price holds at around 70c to 80c per pound.

SPELTER. — No new developments are recorded in spelter. A fair trace of activity is apparent, but no price changes are noted, 9½c per pound being figure asked.

LEAD. — Lower prices have been named on lead this week and quotations generally in effect are around 7c to 7¼c per pound. There is lots of lead, but only a fair amount of trading reported.

ALUMINUM.—Interest is still lacking as regards this metal. Supplies for commercial interests are expected to improve, but little activity is noted as yet. Quotations continue at nominal figure of 50c per pound.

ANTIMONY.—There is no movement of antimony reported. Supplies are sufficiently heavy and price holds at around 10c per pound.

LONDON MARKETS

LONDON, January 16.—Important changes have been recorded in the markets this week, several lines going higher, and several reaching lower levels. The new discounts on bolts which have been made provide for a general lowering of values, though prices on nuts show no change. Wrought pipe has undergone a decline practically all along the line, some sizes and grades dropping substantially. Dash churns, screw drivers, draw knives and farrier hammers are among the lines to reach higher levels. Solder has sagged, and malleable fittings are also down somewhat. Carpet sweepers are selling at lower figures, along with vacuum sweepers. Linseed oil has declined.

Business during the past week has been seasonably good. Most hardware merchants are still at stock-taking or figuring their stock books, so are showing only limited buying interest.

Revised Discounts on Bolts and Nuts

London, Ont.

BOLTS AND NUTS.—A new discount sheet has been issued on bolts and nuts which provides for an advance in many lines, while others again record no change. Large carriage bolts, sleigh shoe bolts and nuts, square and hexagon, blank and tapped are unchanged. The discount prevailing to-day as applied to standard lists follows: Carriage bolts ($1 list) ⅜ x 6, smaller and shorter, 20 per cent., over 6 inches long, 10 pepr cent.; 7-16 in. dia. and larger, net list; machine bolts, ⅜ x 4, smaller and shorter, 25 per cent., over 4 in. long, 15 per cent., 7-16 in. dia. and larger, 5 per cent.; sleigh shoe bolts, ⅜ in. dia. and smaller, net list, 7-16 dia. and larger, net list; coach and lag screws, 30 per cent.; skein bolts, 25 per cent.; square head blank bolts, 5 per cent.; bolt ends, 5 per cent.; plow bolts, 15 per cent.; elevator bolts, 10 per cent.; fancy head bolts, 10 per cent.; step and shaft bolts ($3 list), 10 per cent.; whiffletree bolts, 10 per cent; nuts, square, blank, add $1.50 to list; nuts, square, tapped, add $1.75 to list; nuts, hexagon, blank, add $1.75 to list; nuts, hexagon, tapped, add $2.00 to list.

Dash Churns Move Upward

London, Ont.

DASH CHURNS.—New prices have been named on ash wood dash churns and these provide for an advance all along the line. The difficulty in securing suitable wood, its high prices, along with high scale of production costs have been factors to bring about increased values. The present quotations are: No. 1 x 5 gal., $23 per dozen; No. 2 x 7 gal., $24.25 per doz.; No. 3 x 10 gal., $27.50.

Screw Drivers Up; Farriers' Hammers, Too

London, Ont.

SCREWDRIVERS, FARRIERS' HAMMERS.—Quotations named on Champion screw drivers provide for a higher range of prices. The figures now named to the trade being as follows: 3-in., $2.80 per dozen; 4-in., $3.45; 5-in., $4; 6-in., $4.85; 7-in., $5.65; 8-in., $6.50; 10in., $8.

Helelr farier hammers are also quoted at higher levels, the new price on the No. 64 x 13-oz., 14-oz., and 16-oz being $15.50 per dozen.

Tire and Roof Patches; Windows Quoted

London, Ont.

TIRE, ROOF PATCHES, WINDOWS. Prices have been named on the "Locktite" patches for tires or mending use, quotations being as follows: household size, $2 dozen; No. 3, $4; No. 2, $8. Sticktite windows for automobiles are also being quoted to the trade, the prices given out ranging at these figures: No. 1, for Ford 1916 model, $1 each; No. 17 for Ford 1917 and 1918 model, 50c each; No. 3, oval for Overland, Buick, Maxwell and Chevrolet, $1.40 each; No. 6 J. M. for Dodge, 50c each. Another item on which prices have been named are Sticktite Roof Patches. The No. A selling at $4 per dozen boxes and No. B at $4.40 perp dozen boxes.

Carpet and Vacuum Sweepers Decline

London, Ont.

CARPET AND VACUUM SWEEPERS.—Lower prices are ruling on Bissell carpet sweepers, the present quotations showing a decline of $3 per dozen on those that are nickel-plated finish and $2 per dozen on those with Japanned finish. Bissell vacuum sweepers show quite substantial declines also; all of these changes following on the heels of advanced prices named some time ago. The new quotations on both carpet and vacuum sweepers are given herewith:

Carpet Sweepers—Champion, Japanned—$34.00 doz.; N.P., $40.00 doz.; Standard Jap'd., $36.00 doz.; N.P., $42.00 doz.; Universal, Jap'd., $37.00 doz.; N.P., $43.00 doz.; Grand Rapids, Jap'd., $39.00 doz.; N.P., $45.00 doz.; Princess, N.P., $46.00 doz.; American Queen, N.P., $48.00 doz.; Parlor Queen, N.P., $51.00 doz.; Elite, N.P., $51.00 doz.

Vacuum Sweepers—Household, $88.00 doz.; Grand Rapids, $98.00 doz.; Superba, $114.00 doz.

Drawknives Up; Solder Down

London, Ont.

DRAW KNIVES, SOLDER.—Higher prices have been named on draw knives this week, the Winsted carpenter line now selling at following figures: 7 in., $14.50 dozen; 8 in., $15.50 dozen; 9 in., $16.50 dozen; 10 in., $17.50 dozen. Declining tin and lead markets have been factors to bring about lower prices on solder, and the present price on half and half solder of 44¼c per pound reflects this easier tendency.

Wrought Pipe Registers Decline

London, Ont.

WROUGHT PIPE.—New quotations are available on wrought pipe, and these reveal a generally lower tendency. Standard buttweld steel and standard lapweld steel, prices on which appear in panel elsewhere record perhaps the biggest decline. The new figures are in line with lower prices on raw material and lower production costs due to more nearly efficient labor. Quotations now ruling are down from 5 to 10 per cent. in most cases.

Pipe Fittings Slightly Easier

London, Ont.

PIPE FITTINGS.—A slightly easier tendency is to be noted in prices which have just been issued on pipe fittings. The present range of net prices and discounts is given as follows: Malleable fittings, Class B, black, 26c per pound; class C, black, 18c; class B, galvanized, 37c; class C, galvanized, 26c; bushings, 20 per cent. discount from list; unions, 35 per cent.; plugs, 15 per cent.

Rope Holds; Nails Unchanged

London, Ont.

ROPE, NAILS.—Prices named on rope

a couple of weeks ago are without change. Jobbers report a very good volume of orders coming to hand, and as the manila hemp market has stiffened, present figures seem to represent very good value. Quotations are as follows: Pure manila 28½c base per pound; British manila 24c; New Zealand hemp 24c; sisal 25½c. No change in the base price of nails has been made, wire being quoted at $5.50 per 100 pounds and cut at $5.85 per 100 pounds.

Putty, Glass, White Lead in Oil Holding

London, Ont.

PUTTY, GLASS, WHITE LEAD IN OIL.—Prices on putty, window glass and white lead in oil have been maintained at steady and unchanged levels during the week. White lead in oil is being booked for spring delivery at present prices. Business for immediate delivery on all three lines is seasonably quiet. The range of quotations is given herewith:

Putty—per 100 lbs.:	
Standard, 100-lb. drums	$6.75
Standard, 25-lb. drums	7.00
Pure, 100-lb. drums	8.75
Pure, 25-lb. drums	9.00
Window Glass:	
Single Diamond	25%
Double Diamond	25%
Cut Lights	10%

White Lead in Oil—per 100 lbs.:

	In Ton Lots	Less Than Ton Lots
Pure	$17.80	$18.15
Pure Elephant	18.30	18.65

Arsenate of Lead Takes New Prices

London, Ont.

ARSENATE OF LEAD.—Spring booking of dry arsenate of lead is now in progress, new prices having been named to the trade which range at following figures: ½ lbs., 43½c per pound; 1 lbs., 39½c; 5 lbs., 36c; 10 lbs., 35c; 25 lbs., 34½c.

Linseed Oil Lower; Turpentine Firm

London, Ont.

LINSEED OIL, TURPENTINE.—Lower prices have been reached on linseed oil, the present basis providing for a decline of 10c per gallon. The past week has seen quite a flurry in all grains, and flax seed has suffered declines mainly through the probability that Argentine seed may be a factor in the world's markets again. A steadier tone is noticeable to-day but there seems to be an uncertainty as to what the future may be. Present prices on linseed oil are as follows, per gallon: 1 to 2 bbls., raw, $1.60, boiled, $1.63; 3 to 5 bbls., raw, $1.59, boiled, $1.62; 6 to 9 bbls., raw, $1.57, boiled, $1.60. Southern markets on turpentine show increased strength, and a revision to higher levels locally seems possible. Supplies are very good, and whereas demand is light, outlook is considered bright. Range of prices follows, per gallon: 1 bbl lots, $1.10; 2 to 4 bbl lots, $1.09; 5 gal. lots, $1.20.

WINNIPEG MARKETS

WINNIPEG, Jan. 16.—Price changes during the week, while not numerous, are important, and affect such lines as barb wire and game traps, both moving up in price. Plain galvanized wire, coil spring wire, galvanized and black sheets, together with wrought pipe, bluestone and solder, show slight revisions downward.

Business is still fairly quiet, as dealers are all stock-taking, but jobbers are preparing for the usual spring rush, and feel very optimistic regarding business prospects for this year.

Substantial Decline Made in Sheets

Winnipeg.

BLACK GALVANIZED SHEETS.—Shipments of galvanized sheets seem to be coming through more freely, with the result that prices during the week have receded substantially. Stocks are reported now to be fairly well assorted. Prices on black and galvanized sheets now ruling are quoted herewith:

Galvanized Sheets—10¾ oz., $10.75 per 100 lbs.; 28 ga., $10.35; 26 ga., $10.05; 24 ga., $9.90; 22 ga., $9.90; 20 ga., $9.75; 18 ga., $9.75; 16 ga., $9.60.

Black Sheets—28 ga., $8.75 per 100 lbs.; 26 ga., $8.65; 24 ga., $8.60; 22 ga., $8.60; 20 ga., $8.55; 18 ga., $8.55; 16 ga., $8.00; 14 ga., $7.95; 12 ga., $7.90.

Barb Wire Revised Upward

Winnipeg.

BARB WIRE.—Following the advanced freight rates new prices have been named for Spring covering barb wire, which provide for a slight advance. Prices for shipment from the Head of the Lakes are withdrawn. To-day's ruling prices same are as follows, Winnipeg basis: Barb wire, Lyman, $5.50 spool; Gledden, $5.35 spool; Baker, $5.30 spool.

Plain Twist Wire Lower; Others, Too

Winnipeg.

PLAIN TWIST, GALVANIZED WIRE.—Prices f.o.b. Head of Lakes have also been withdrawn on other lines of wire, including plain twist, coiled spring and plain galvanized. Prices in general have undergone a slight revision downward. To-day's markets on the various lines are quoted, Winnipeg basis, as follows: Plain twist wire, $7.00 per 100 pounds; coiled spring wire, No. 12, $5.90 per 100 pounds; plain galvanized wire, 6, 7, 8 ga., $7.30 per 100 pounds; 9 ga., $5.85; 10 ga., $7.35; 11 ga., $7.45; 12 ga., $6.00; 13 ga., $6.70; 14 ga., $7.85; 16 ga., $8.15.

Game Traps Go To Higher Levels

Winnipeg.

GAME TRAPS.—Prices on game traps have undergone a further revision during the week, moving up from 10 to 15 per cent. This is said to be due to advanced prices of raw material, labor and increased freight rates. Although this advance has been in force by the manufacturers for the past two months, Winnipeg jobbers have held to the old prices until such time as it was necessary to replenish their stocks. New prices now effective are given as follows:

Game Traps—Victor—No. 0, $2.30 per doz.; No. 1, $2.69; No. 1½, $4.06; No. 2, $5.66; No. 3, $7.53; No. 4, $8.89; No. 91, $3.78; No. 91½, $5.38.

Oneida Jump—No. 0, $3.06 per doz.; No. 1, $3.60; No. 1½, $5.37; No. 2, $7.89; No. 3, $10.49; No. 4, $12.36.

Hawley & Norton—No 0, $3.29 per doz.; No. 1, $4.23; No. 1½, $6.33; No. 2, $8.87; No. 3, $11.82; No. 4, $13.92.

Newhouse—No. 1, $5.76 per doz.; No. 1½, $8.68; No. 2, $12.82; No. 2½, $20.19; No. 3, $17.11; No. 4, $20.19; No. 4½, $18.91; No. 50, $8.67 each; No. 5, $12.27 each.

Stop Thief—No. 1, $2.08 per doz.; No. 2, $2.59; No. 3, $3.43.

Solder Drops Five Cents

Winnipeg.

SOLDER.—Heavy drops in the price of tin have had the effect of lowering solder prices on the local market as much as 5c per pound during the past week. To-day's selling prices are as follows: Half and Half, cases, 50c per pound; less quantity, 51c per pound.

Wrought Pipe Goes Lower

Winnipeg.

WROUGHT PIPE.—Pipe manufacturers advise a slight reduction in prices during the week, made possible by the increased supplies of much-needed raw materials. Stocks, it is thought, will now soon get back to fairly normal proportions. Prices now in effect are as follows:

Wrought Iron Pipe	Per 100 feet Black	Galvanized
⅛ inch	$ 6 20	$ 8 55
¼ inch	5 55	7 85
⅜ inch	5 67	7 95
½ inch	7 60	9 30
¾ inch	9 60	11 95
1 inch	14 25	17 60
1¼ inch	19 20	23 90
1½ inch	22 60	28 50
2 inch	30 90	38 25
2½ inch	49 50	61 15
3 inch	64 90	79 95
3½ inch	84 00	102 55
4 inch	99 50	121 50
4½ inch	114 40	141 50
5 inch	133 20	153 10
6 inch	172 80	212 70
7 inch	241 90	.....
8 inch	253 60	.....

Formaldehyde To Be Higher; Bluestone Down

Winnipeg.

FORMALDEHYDE. — Attention has been called to prices on formaldehyde

for Spring. However, manufacturers advise that prices cannot be named until towards the end of the month, and that they will be approximately 10c per pound higher than 1918 prices.

The price on bluestone for this year has just been named and shows a reduction of ¼c over 1918 price of 12c, making to-day's selling 11¾c per pound.

Canada Plate, Tin Plate Decline

Winnipeg.

CANADA PLATE, TIN PLATE.—As HARDWARE AND METAL goes to press, a wire has been received advising of a substantial reduction in the price of Canada plate and tin plate. Indications would seem to be that better supplies are looked for and an effort to get away from inflated values which have prevailed in an effort to hold stock are being extended. The new prices read as follows: Canada plate, half polished, $9.25; tin plate, IC 20x28, $23.50; IC 20x23, $28.50; IC 20x29, half boxes, $17.25; IX 20x28, $27.00; IX 20x33, half boxes, $16.75; IX 20x39, half boxes, $19.40.

Linseed Oil Holds; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices still hold firm on the local market at former quotations with only a small demand. Prices are as follows: Raw linseed oil, $2.00 gal.; boiled linseed oil, $2.03 gal., in single barrel lots.

Turpentine prices show no change during the week. Stocks are reported adequate for present demands, which are below normal. Prices now ruling are as follows: Barrels, $1.20 per gallon; ½ barrels, $1.23; 5 gal. lots, $1.25; 1 gal. lots, $1.25, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Jan. 16.—Pig iron production in the United States in December was at the rate of about 40,800,000 gross tons a year, showing a decrease of a trifle less than one per cent. from the November rate and a decline of slightly less than three per cent. from the maximum rate on record, which was attained in September. The year's production was about 38,900,000 tons, against 38,647,397 tons in 1917 and 39,434,797 tons in 1916, the record year.

Production in 1918 was at about 12 per cent. under the average capacity for the year, the losses in production being due to the railroad breakdown last winter, occasional shortages of coke later, poor quality of coke furnished, a little labor shortage, and a considerable shortage of the classes of scrap usually used in blast furnaces to swell output.

The present blast furnace capacity is about 45,000,000 tons. There has been a sharp increase in capacity since the war started. No new furnaces were completed in 1914, and only three in 1915 and four in 1916, but in 1917 no less than 14 new stacks were completed and blown in and for 1918 the count was eight stacks. There are seven stacks now in course of erection or definitely projected, which would add considerably more than a million tons to the capacity.

Production of steel ingots in December was at the rate of 43,750,000 gross tons a year, against a rate shown for November of 43,000,000 tons a year. The maximum rate attained was in September last, at the rate of 46,800,000 tons per year.

Steel ingot production in 1918 amounted to about 42,200,000 tons, against 43,700,000 tons in 1917 and 41,400,000 tons in 1916. As was the case in pig iron, the steel ingot output in 1918 was considerably below the capacity, which averaged during the year about 48,000,000 tons. Capacity at present is about 49,000,000 tons, and there is about 1,000,000 tons capacity involved in new construction now in progress.

Some blast furnacemen, also some scrap dealers, are attempting to argue just now that building of new steel capacity has outrun blast furnace construction, so that if there were such demand for steel as to call for all steel making capacity to be operated there would not be enough pig iron to go around. This is not correct. A careful analysis of the whole situation indicates that the balance between pig iron capacity and steel capacity is the same as was shown by the actual production in 1916, and in that year no steel works suffered from lack of pig iron. That is, if the production of steel making pig iron bore to the 49,000,000 ton steel ingot capacity the same proportion as obtained in 1916 there would be left, out of a 45,000,000 ton production of pig iron, about 7,000,000 tons of foundry and other grades not used by steel works. Furthermore, the United States in 1916 exported about 600,000 tons of pig iron and about 200,000 tons of scrap. Assuming that the steel works undertook to operate at capacity, they would be able to get a supply of pig iron and scrap, but there would be in addition a margin of safety in the cutting off of exports of pig iron and scrap.

Mill Operations Light

The rate of steel production in December was surprisingly heavy, in view of the lightness of demand. Apparently the mills made every effort to ship promptly against orders on books, for fear customers would ask for postponements. The average steel consumer probably did not realize, immediately upon the signing of the armistice, how plentiful steel was going to become. The matter is well understood now, and by as much as steel was shipped freely in December, the requirements of buyers are now diminished. Some estimates place steel mill operations last week at as low as 65 per cent. of capacity, and while this seems like a tremendous

Continued on page 68.

Differentials and Extras on Galvanized Steel Sheets

FOR the convenience of those in the trade who may not have list of differentials and extras on galvanized steel sheets, the following list, dated January, 1919, which applies on the Premier line, may prove useful as a basis to work on. It is indicated this agrees in every detail with the differentials and extras asked by United States mills when under Government regulation. It is further said that about the only change from last year is in the differential on 10¾ oz.. now 40c, formerly 30c per 100 pounds, but as 10¾ oz. is practically 30 gauge and the differential has always been 50c for 30 gauge, it is thought the 40c differential on 10¾ oz. is more in line with what it should be. The increased differential originated it is stated, in the United States.

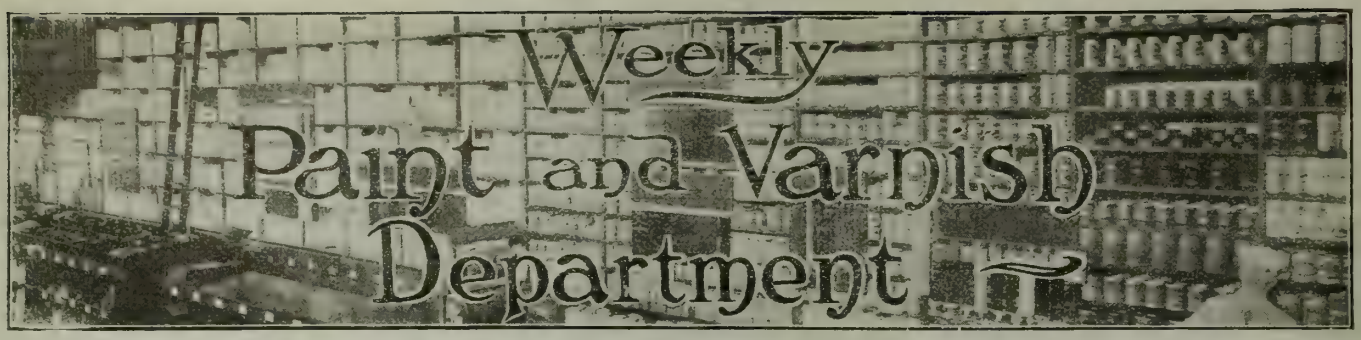
Base Sizes— Gauges No. 12 to No. 30 inclusive—24, 30, 36 ins. wide; 72, 84, 96, 120 ins. long.

Extras for Odd Sizes— On all sizes other than shown above when specified in quantities of less than 4,000 lbs., prices will be quoted on application.

Extras for Width—

Nos. 12 to 26. Over 32 to 36 ins.	Nos. 28 to 30. Over 32 to 36 ins.	Nos. 12 to 18. Over 36 to 40 ins.	Nos. 20 to 24. Over 36 to 40 ins.	No. 26 Over 36 to 40 ins.
No extra.	20c extra.	10c extra.	20c extra.	30c extra.

No. 24 and heavier—Under 24 to 12 ins.....15c per 100 lbs.
No. 24 and heavier—Under 12 to 9 ins.....25c per 100 lbs.
No. 25 and lighter—Under 24 to 12 ins.....20c per 100 lbs.
No. 25 and lighter—Under 12 to 9 ins.....35c per 100 lbs.



Extras for Length—

Gauge.
No. 16 and heavier—60 ins. to 144 ins.....No extra
No. 18 and lighter—Over 60 to 120 ins.....No extra
No. 18 only—Over 120 to 132 ins..... 5c extra per 100 lbs.
No. 19 and lighter—Over 120 to 132 ins.....10c extra per 100 lbs.
All gauges—Under 60 to 30 ins.....10c extra per 100 lbs.
All gauges—Under 30 to 18 ins.....20c extra per 100 lbs.

Gauge Differentials—

Gauge.
No. 30 —Add 50c per 100 lbs.
10¾ oz. —Add 40c per 100 lbs.
No. 29 Add 25c per 100 lbs.
No. 28 —Base.
No. 25-26—Deduct 30c per 100 lbs.

Gauge.
No. 22-24—Deduct 45c per 100 lbs.
No. 17-21—Deduct 60c per 100 lbs.
No. 15-16 Deduct 75c per 100 lbs.
No. 12-14—Deduct 90c per 100 lbs.

Making People Think "More Paint"

Service to Your Community and Bigger Business For Your Store Will Follow the Application of This Idea—Opportunities on Every Side For Increasing Paint Sales

"HOW much is the average dealer agency, carrying our full line, worth to us?" This question came from the president of a large paint and varnish manufacturing concern to his sales manager.

"His worth is exactly in proportion to the service he renders his community through his paint department," was the prompt, though somewhat surprising reply.

Turn that answer over in your mind for a few minutes, you who retail paints and varnishes.

When the man, who superintends the solicitation of your "valued orders," measures the worth of your business to his company, not in cold dollars and cents, but in terms of service to your community; doesn't it suggest a new slant from which to promote and extend your paint and varnish sales?

Service the Standard

Service to your locality as a measurement of business value!—not how much cold cash he was obtaining from his agencies—nor how much each was getting out of his community—but how much service was each community receiving from its dealers and the line of paints and varnishes they sold

Just read that sales manager's answer over again.

Turnover, gross and net sales, profits, quality, etc., are set aside in his mind for the serious and more profitable consideration of what the ultimate consumer was receiving.

Long experience had taught him that if the service rendered the community by his dealers was building permanency, increased business and a clientele of satisfied, come-back customers, all of these necessary phases of business would take care of themselves proportionately.

Reverses the View

Perhaps this viewpoint turns ordinary questions of business hindside-before.

In many instances such a reversal would work out to greater profit than harm.

Then apply this question home:—What is your attitude towards your trade through your paint department?

Is it solely "how much can I get out of my community?"

Remember the old text warning us about reaping that which we sow. Its moral is double acting, working both ways.

The man who "just sells" paints and varnishes without regard to service and consequences is drifting along with those "get them and get them good" methods that will "get" him sooner or later.

Such methods are becoming relics of ancient history in paint and varnish merchandising.

A Better Standard

The dealer who is planning the building and development of a paint department for permanent profit and increased business will lay his foundation on the policy of "giving them and giving them good" methods.

It will help him to think over that sowing and reaping text in a rosier light.

Applying this sermonette closer home and in detail:—

Is every house in your community painted sufficiently well, and frequently enough, to protect and preserve it against the inevitable ravages of moisture and weather?

It is reasonably safe to say they are not, in at least seven cases out of ten.

Then what are you doing about it?

Are You Doing This?

Are you seeing that every available piece of literature supplied to you by your manufacturer is distributed to the owners of these seven paint-neglected houses?

Are you stirring up the advertising department of your manufacturer to go after these fellows?

Have you posted your clerks to observe the paint neglected condition of your town? Have you instructed them to throw out personal suggestions in their sales talk to these property owners whenever they enter your store?

It's easy enough to make sales after a man starts thinking of his own free will about painting. Too often his thinking apparatus is a long time starting in this direction when left to itself.

Merchandising and salesmanship of the higher order makes it a duty of starting him to think and then making the sale.

If you are doing these things, not only are you promoting sales, but you are extending to the individual and the community a service, within your power, for the protection, preservation and beautifying of their property.

Neglecting Chances

If you are not doing these things, then you are neglecting to measure up to a value that is being increasingly looked for, not only by your supply house, but by your customers and possible customers as well.

Once the ball is set a-rolling in the direction of service there is no end to the returns it will bring you.

Did you ever get wind of the fact that Jim Jones, or John Smith or Henry Perkins wanted to sell a piece of run-down property and did you ever suggest to them that a few dollars invested in paint and paint application would boost the possible sale price?

Besides being a kindness, that's real sound dollar-in-pocket service to your customer and money-in-the-till business for you.

Perhaps that sales manager was not so far wrong after all in his estimation of worth. Under his hat there

(Continued on page 62)

Brighten the Home-Coming

Thousands of our soldier boys will soon be back home again. The shadows and sorrows of war are over, and we all look forward to the glad reunions.

There will be many demands upon the **Hardware Dealer** for **both Paint and Varnish** to assist in making the **"Welcome Home"** a happier one.

Moore's "Impervo" Floor Varnish is just the thing to lend a spirit of brightness and good cheer wherever used. Recommend it to your customers. The ease with which it may be applied, its delightful finish and the amount of wear it will stand from rough usage always brings the customer back for more.

Once sold—always sold. That's how our agencies feel about it.

We know our **attractive agency** plan will interest you. It's such a **liberal one.** A postal will bring you particulars. Write us.

"IMPERVO"

rested a whole lot of other service ideas that he knew were within the power of his agents if they would only exercise them in their first hand contact with their local trade.

Facts, figures and experience had taught him that the more his agents sought to extend such services, the more valuable their paint departments would become to them as well as to his own business.

Just keep thinking over his method of valuation—then apply it by seeing how much you can do for your trade through your paint department—if you do, you will surprise yourself by finding how much your trade will do for you.

IF I OWNED A PAINT STORE

I would make a direct appeal to children in the hope of obtaining new customers during the slack winter season. In the centre of my window I would place a doll's house with the rooms handsomely papered. I would also exhibit odds and ends of wall paper stock, cut into strips for papering dolls' houses.

I would then offer to paper free of charge any doll's house brought in to me by any little girl, or to provide wall paper without cost to any child sending me the exact dimensions of her house. Many little girls would take advantage of my offer. In this way I would expect to keep up interest in my wall paper designs in the stormy winter season. This interest would focus the attention of the elders on my special winter services, such as interior varnishing and the like.

The cost of the plan would be small and I would be disposing of otherwise useless remnants.—Clarence T. Hubbard in "System."

ANNOUNCE NEW POLICY

George A. Marshall, who has recently purchased the Perfection Sanitary Brush Company, 1118 Queen St. West, Toronto, announces that the company has discontinued the system of selling their goods from house to house, and sell through the hardware trade, thereby eliminating the former system, and giving more satisfaction to the consumer as well as the retailer, who would reap the benefit of making a profit on such goods. This firm is the original maker in Canada of Sanitary Twisted Wire Brushes, Mops, Dusters, etc., and prior to Mr. Marshall taking over the business sold largely through agents who called from house to house.

NOT LOWERING PRICES

The British Brush Manufacturers' Association has issued a circular to the trade expressing the view that existing conditions for some time to come, will not admit of any reduction in the selling price of brushes. The war bonus is still being paid to the workers, prices of raw material are still running high, and in some instances have increased during the past month, so that conditions generally do not admit of any reduction in the cost of manufacture.

The Brush Department

Hardware Dealer Has Chance to Render Real Service in Selling Brushes

Customers Often Forget All About Brushes and Get Poor Results From Trying to Work With a Worn-out or Hardened Brush

MOST hardware dealers can sell a great many more brushes this year if they will go about it in a systematic way. In a great many stores brush selling is neglected. This is not done intentionally, but in the great majority of cases thoughtlessly. A customer comes in to buy some paint and the hardware dealer will go to a good deal of pains and trouble to see that he gets just the right paint for the job he has in mind. He will give him all sorts of directions about how to use it and so on and in a great number of cases forget all about selling him a brush.

Getting the right brush is a most important part of the painting. More than one job has not been as well finished as it might have been simply because the worker did not have the right brush. When he went to the hardware store to get the paint he forgot all about asking about a brush or he thought that the old one that was at home would do all right. The hardware man did not talk brushes to him or explain to him why a certain brush would give the best results.

Was Unsatisfactory

The man went home and after finding the old brush discovered that it was as hard as only a brush that has not been used for half a year or so can get. After working around with it for an hour or so perhaps he got it into a condition where it was at least semi-pliable and started to work. It was plain from the start that it was not working right and would not work right and yet the worker rather than lose any more time and anxious to get the painting done went on. At the end he had a job that in spots looked as if the paint had been thrown on. There were bare spots and rough spots and streaks and other objectionable features.

Easily Avoided

This sort of thing has happened times without number and the whole difficulty could have been obviated had the hardware man or his clerk in the first place suggested that a new brush was necessary. The man would have saved time, he would have saved money and he would have had a satisfactory job that would have encouraged him to do more painting instead of looking forward in the future to side-stepping any more such work and trouble.

This is only a simple thing and yet there is a big chance here for not only boosting sales of brushes, but rendering real service to one's customers. Most of them fail to seriously consider the brush question when starting to do painting. Working with too small a brush will make hours of extra work for a man or woman who attempts to paint walls or ceiling or do other similar work in the home. This is trying on their temper and a suggestion from the hardware man that a wide brush would be better would have obviated the trouble. On the other hand it is impossible to get results in painting small articles with a huge brush. The painter simply cannot get into the corners and cracks with it. If he has gone down town perhaps a couple of miles to buy the paint the chances are that he will not want to walk down again purposely just because he forgot or did not know about the brush.

The Time To Sell

The time to sell the brush is when the man is buying the paint and when he gets home and does a nice job and does it quickly and satisfactorily he will appreciate the suggestion of the hardware man, especially if he has had any experiences in working with either the wrong kind of brush or with an old and very much worn-out one that has been lying around the house for years. It may seem that this is a small service the hardware man can do and yet in reality it is a big one, making as it does for that more or less intangible quality that establishes good will for a store or merchant. Good will is usually founded on just such little things and once established will bring customers back to the store for everything they may need that the store carries.

The head office for Alberta of the Imperial Oil Company has been moved from Calgary to Edmonton. F. Turley, who has been assistant manager for the province, goes to Edmonton as manager, and A. E. Halverson, of Edmonton, who has been city salesman, becomes assistant manager.

BARNS

M L QUALITY

Need More

PAINT PROTECTION

Think over these two facts

1st. There is a greater yearly loss on farm buildings through lack of paint than actual loss by fire.

2nd. Prices of lumber have more than doubled during the past four years.

These conditions call for more barn and stock-building protection and preservation by means of paint.

IMPERIAL BARN AND ELEVATOR PAINT

Is made to give the maximum value in protection and preservation and in colors suitable for any requirement.
Can be used in metallic buildings with Galvano Primer.

Big Chances for Selling More Paint

London, Ont., Paper Draws Attention to Neglected Condition of Store Fronts—Elora Hardware Man is Early Bird in Getting After the Farmers—Edmonton Firm Getting Ready For a "Clean-Up Week"

ALTHOUGH the year is young there are many indications that paint sales should be numerous. It is not often that the daily press awakens in the middle of the winter to the fact that buildings are suffering from a lack of paint. The following from the London "Advertiser's" editorial columns shows that a whole lot of badly needed painting has been held up in that city.

Clean Up This Spring

"CAN London's Chamber of Commerce consider any more important subject than the improvement of the appearance of the city? And are citizens so smug in fat content that they will refuse to acknowledge that there is ample room for specific treatment?

"Take a man who gets a haircut once in two months, and who goes with a smear of beard upon his face in business hours, or a woman who always presents a "dowdy" appearance. Do they commend themselves by carelessness any more than the overtailored dandy or the too-much enameled female? Men even pile up fortunes to-day because people want their shoes to shine, a shine being an indication of neatness on a shoe, if it is the reverse on a coat sleeve.

"The city needs some hair-trimming and cosmetic treatment. Some of our store-fronts have not had a coat of paint in ten or fifteen years. They are covered with the colors provided by smokestacks, and smeared with rust from leaking pipes. The showy windows are contained in shining glass and polished metal, but if a visitor glance at the upper stories he will think about the city much as he would think about a man with a very dirty collar. We ought to send the community shirt-front and collar to the laundry when the smudges are apparent.

"A plan might be worked out whereby some general color scheme for buildings would be accepted. The city could do worse than donate the paint. With well-kept streets (dirty pavements are like soiled shoes on a man), and properly-painted buildings, we would not be far from reaching the 'spotless town' class."

Not the Only Ones

While London stores and homes may be needing paint, the same condition is general all over the Dominion. Not in many years have farm buildings been so neglected from a paint standpoint. Aside from the fact that farmers, taking them as a class, are hard men to sell paint to they have been so busy making money by responding to the call for "greater production" that they have used little paint. There was also the fact that they were short of help. This lessened the already decreased paint consumption in the rural districts.

This year the farmer will have the help and he will certainly have the money. It is up to the paint dealers to go after the business hard and they will make up for all the arrears of neglected painting.

Don't neglect your barn, which is the most important building on the place.

Of course you use paint on your house and out-buildings, and for the same reason you should use paint on your barn. Paint is not only meant to make buildings look better but its most important use is on account of the protection it affords against the attacks of the weather.

A well painted barn will keep in good repair for a century while an unpainted, neglected building will go to pieces in a quarter of that time. Come and see us today about special barn paints.

A. HOBBS
HARDWARE, PAINTS, OILS, ETC.
ELORA

This is one of the first paint ads to appear in the newspapers this year. The above reproduction is one half the size of the ad. Note the arguments this dealer uses with the farming community.

Cities Need It Too

There has been just as much work held over or neglected in the cities too. With 300,000 soldiers coming back and many families getting back to normal housekeeping conditions again there will be an endless number of homes to paint and all kinds of furniture that has been stored or not used to "fix up." Hardware men cannot begin too soon to commence their "drive" on this paint trade. Some of them have commenced already. This is the way A. Hobbs, of Elora, Ont., is drawing the attention of the farmers of his district not only to the work they should do, but also to the fact that he has the paint for them to do it with and will be glad to give them the benefits of his advice in making a selection. Mr. Hobbs is one of the first to open up his advertising guns on the farmers this year.

Plan a Campaign

Other firms, however, are busy with plans. The Sommerville Hardware Co., Ltd., of Edmonton, is busy arranging the details of a "Clean-Up Week." While no date has as yet been announced the firm plans to get busy as early as possible in the spring. It will use both newspaper space and its windows, it is stated, to drive home the idea that a whole lot of painting is necessary in Edmonton and vicinity.

In many parts of the United States regular "Paint-Up Campaigns" are being planned. Canadian dealers might find it profitable to do something along this line and it is not unreasonable to expect that the manufacturers would co-operate with them fully in any efforts they may make.

This Manitoba dealer goes after winter business as shown above. By using this arrangement his ad looks twice as large as it really is.

LADIES OF STAFF ENTERTAINED

The ladies of the staff of Brandram-Henderson Ltd., Toronto, were entertained on Wednesday evening of this week to a dinner at the King Edward Hotel, which was followed by a theatre party. Mrs. S. W. Smith, wife of the Toronto manager of the company, was the hostess and reports indicate how enjoyable the evening's entertainment was in its entirety. Appreciation was also expressed of the comradeship and get-together spirit underlying the evening's entertainment.

Varnish Efficiency

Varnishes vary greatly in quality. Good varnish makes a finish of lasting beauty, poor or unsuitable varnish does not. They cost the same to apply, and the difference in the price per gallon is nominal. Cheap varnish is costly economy.

For architectural work and every other purpose for which varnishes and their allied products are used, Berry Brothers' varnishes, enamels and stains are 100 per cent efficient. The name of Berry Brothers guarantees the utmost in quality and dependability.

It pays to make a leader of "Berry" brands because the label is an effective selling argument.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 16.—Linseed oil has dropped 5c per gallon. This is the direct result of a lower price here for seed and this in turn followed a weaker condition in the Argentine. If restrictions are thrown off there regarding export, etc., it is expected that the easier condition will be reflected here, though some assert that a low level has now been reached at $1.50. Turpentine is quoted at $1.05 this week, there being less spread than before. Stocks are ample in some quarters, but not excessive, and it is expected export will soon develop considerably from southern points.

The coming season is viewed with confidence and signs are encouraging that there will be a greater sale of paint and painting material than ever before. Actual business received in certain quarters already indicates a bumper season in prospect.

Linseed Oil At $1.50; Seed Lower

Montreal.

LINSEED OIL.—Due to the possibility of Argentine seed reaching market in less restricted manner, and following a weakening tendency there, markets here on linseed oil have declined somewhat. Raw oil is being offered in large lots as low as $1.50, and this is the lowest price reached for some time. Some say that this will be the lowest level reached, but much, naturally, depends upon the outcome of the situation in South America. Sales are limited to small lots for the most part.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 52	$1 62
5 to 9 bbls.	1 51	1 62
10 to 25 bbls.	1 50	1 62
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 54½	$1 60
5 to 9 bbls.	1 53½	1 65
10 to 25 bbls.	1 52½	1 65

Turpentine Steady But Less Spread

Montreal.

TURPENTINE.—While there is less spread in the turpentine price this week, the basis being steady at $1.05, quantities are still limited and with the usual difficulties of transportation consequent at this season of the year, little improvement is looked for in delivery. Export demand has also been developing and this will serve to maintain a firm basis, in all probability.

Turpentine—	Per Imp. Gal.	
1 to 4 barrels	$1 05	$....
Small lots	....	1 12

(Packages extra)

Putty is Steady; Little Moving

Montreal.

PUTTY.—There is but a limited sale for putty and the basis is unchanged. Some look for a maintained price basis for some time, while one maker states that a slight revision is possible. The following quotations are available here:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

No Change For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The basis for white lead in oil is holding. Whether there will be any change in this commodity is not yet determined. High-priced lead is in the hands of most corroders, and it would appear that they are loath to reduce prices greatly at this time. One informant stated that he looked for a maintained basis for some time and another thought there might be a slight reduction soon. In five ton lots the price is still $17 per cwt.; ton lots $17.50 and small lots $17.85.

Paint Orders Coming; Outlook Excellent

Montreal.

MIXED PAINT.—Orders for mixed paint have been very satisfactory in point of numbers, and the volume of these has totalled up well. There is a good deal of firmness to the market in many ways. Labor costs have continued on a high basis and production will be very heavy during the winter manufacturing season, a big paint maker pointed out. It looks as though the season ahead will be a record breaker.

TORONTO

TORONTO, Jan. 16.—Lower prices on linseed oil and higher prices on turpentine are two of the main factors in the paint markets this week. Arsenate of lead prices have been named and these show a decline from prices prevailing last season. The outlook for mixed paints continues good, travellers securing good spring business from those merchants not already booked up, and indications are that 1919 will be a banner year. White lead in oil is steady, and putty is holding firm at unchanged levels. Window glass is without change and paint brushes rule in a very strong position.

Lower Priced Linseed Oil

Toronto.

LINSEED OIL.—Lower prices have been established this week on linseed oil, this amounting in some instances to a total of 10c per gallon, which came in equal declines of 5c each. This is a direct result of a decided weakening in seed values, the decline for the week being about 18c. Whether this has reached its low point is uncertain, but the market stiffened yesterday, going up 2c from closing quotations of the day before. It is indicated that supplies of seed in the hands of the crushers at United States points are small and there seems to be little surplus in the country. It is said the demand is very small at the present time, and that there has never been a time when there has been so little oil booked ahead and in the hands of the crushers as now. All users of oil are looking for big business, and it stands to reason that when the revival of business comes, as it will, the brisk demand will create bullish tendencies. The situation in Canada is somewhat better, but as crushers here are in a position to export on a favorable basis to overseas points as well as United States points any move to higher levels there will be reflected in the markets here. Supplies are considered to be in good shape, a goodly amount of seed coming by rail. Prospects are considered very bright and prices much, if any, lower than present basis are not generally expected to rule. The quotations now ruling, which show a somewhat narrower range are:

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1.55	-$1.60-$1.65
3 to 5 barrels, gal.	1.54-	1.59- 1.64
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1.57½	-$1.63-$1.68
3 to 5 barrels, gal.	1.56½-	1.62- 1.67

Prepare
for
Bigger Business
in your [redacted]
Paint and Varnish Department

This year will see a great revival in the use of paints and varnishes. The housing problem, which has become acute in many cities, calls for more homes to be erected at once, and these new homes will all need painting.

The re-painting of older buildings, which has been put off for various reasons during the war period, can no longer be neglected if they are to be saved from serious loss through disintegration; in fact, all signs point to a largely increased demand for all paint products during 1919.

The merchant, therefore, who is prepared with a full and complete stock to meet this demand, will be the one to reap the benefit in increased sales and larger profits.

MARTIN-SENOUR
PAINTS AND VARNISHES

will be in greatest demand on account of their exceptional High Quality. This 100% Pure Quality has earned for Martin-Senour products a reputation that can never be excelled.

MARTIN-SENOUR publicity for this year, in the way of newspaper and magazine advertising, mailing campaigns, poster showings, etc., will be far beyond anything ever before attempted, and will bring the name **MARTIN-SENOUR** to the attention of every paint prospect throughout the Dominion.

MARTIN-SENOUR Paints and Varnishes on your shelves will mean that you will be in a position to profit by this established reputation and this nation-wide publicity.

PIONEERS OF PURE PAINT

Turpentine Goes Up Two Cents

Toronto.

TURPENTINE. — Locally the situation in turpentine has reflected the strong tendencies of Southern markets in an advance in some quarters of 2c per gallon with other interests figuring on a move to higher levels. Turpentine has advanced over 5c at primary points and indications point to a very strong market for some little time to come. The movement of rosin and turpentine out of New York for South American and other ports has, it is indicated, exceeded 40,000 barrels. The result is stocks of rosin and turpentine are very much lower in New York and a movement of these two lines to replace depleted stocks is now going on from the South. Rosin in the lower grades is firm, advancing from 10c to 35c per barrel. Supplies on hand here are equal to demands of the trade, and whereas no heavy movement is reported, trade is considered very good. Range of prices follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.12
2 to 4 barrels (barrels included) ...	1.06- 1.11
5 gallon lots	1.17- 1.22

Arsenate of Lead Records Decline

Toronto.

ARSENATE OF LEAD.—Lower prices have been named on arsenate of lead for the coming season, the new figures being as follows: Dry, per pound: ½ lbs., 43½c; 1 lbs., 39½c; 5 lbs., 36c; 10 lbs., 35c; 25 lbs., 34½c; 50 lbs. and 100 lbs., 33c; 200 lbs., 32½c. Paste, per pound: 1 lbs., 29c; 2 lbs., 26½c; 5 lbs., 25c; 25 lbs., 23c; 50 lbs., 23c; 100 lb., 22c; 600 lbs., 21c.

Steady Position to White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—White lead in oil is holding very steadily in an unchanged position. The demand at the present time is only fair, but indications are that a fair amount of business for spring is being booked up. Prices have ruled without change during the week, pure white lead in oil to-day being quoted at $17.80 per 100 pounds and smaller quantities at $18.35. The various brands appear in current market quotations.

Glass Unchanged; Putty Holding

Toronto.

GLASS, PUTTY.—There have been no new developments to record in respect to window glass. The market is undoubtedly firm, and whereas little movement is in progress just now, the outlook is for heavy business in another month or two when trade opens up. Discounts appear in current market quotations. Putty is steady and prices being quoted to trade provide for no change over figures ruling for some time past. Business just now is seasonably quiet.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

PITTSBURGH MARKETS

Continued from page 59

change for an industry that only two months ago was straining every nerve to get out the last ton possible of output, it is really suggestive of a high rate of production, for 65 per cent. production out of the present capacity would mean 40 per cent. more tonnage than was produced in 1906, and it is well recalled that the demand that year was regarded as almost unprecedentedly heavy. There was enormous demand for rails, with a heavier output than attained in any other year, before or since, and large quantities of steel were used for building freight cars and locomotives. Now there are hardly any rails being rolled and only a very few tens of thousands of freight cars are still to be built, on old orders, while there is no move to place additional orders. Also, there is scarcely any new construction outside the railroads, and manufacturing consumers generally are operating at rather light rates, except the automobile industry, which is making every effort to turn out a maximum number of cars every week, wtih promise of a very full demand for an indefinite time to come. The automobile industry, however, is physically unable to consume steel equal to more than two or three per cent. of the total steel making capacity. Jobbers are buying very sparingly. Their orders are urgent, in that when they do buy they want the quickest possible delivery, as they are afraid as to prices. There is no disposition on the part of either jobbers or manufacturing consumers to buy ahead.

In the circumstances the likelihood is that steel mill operations will continue to decrease for some time to come, perhaps to a rate below 50 per cent. of capacity. Some additional demand will doubtless develop with spring, but the heavy demand, the demand that is universally expected to keep the steel industry busy and prosperous for a period of years, perhaps five, is still in the uncertain future. Steel producers are as diffident about making predictions as to when this demand will start as they are bold in asserting that some time it will come.

Prices

Pig iron and steel prices are under no pressure. The market all along the line is well defined and producers will not budge from the recognized prices. There are no offers to buy any considerable tonnages at slight cuts from existing quotations and thus there is no incentive to cut. Producers have large quantities of material sold under contract and with a steady market they expect buyers to take more material than could possibly be sold by cutting prices. Hence it is easy for the market to stay steady.

Steel Corporation Figures

The Steel Corporation reports its unfilled tonnage at the close of business December 31 at 7,379,152 tons, or 745.511 tons less than at the beginning of December. This statement is altogether a puzzle. Shipments during December were probably about 1,100,000 tons, and if there were bookings on new business equal to 350,000 tons that is all that could be expected, recalling how very dull the market was during the month. That would strike a balance in one respect, but it would leave nothing for the cancellations of war steel contracts that had to follow the sudden ending of the war. How these cancellations could avoid getting into the records before the end of December is not understood. One may speculate, of course, that the war steel business had not been entered as unfilled tonnage originally, but it would be equally difficult to explain why such an omission occurred.

RADIATORS DROP 25 PER CENT.

The "Iron Age" this week says in part of the new prices on iron and steel:

"The drop in prices has been accepted in spots in the foundry trade, as instanced by a 25-per cent. cut by radiator makers and some recessions in malleable casting prices. Guidance in respect to prices on old contracts is expected from a meeting of pig iron producers in Pittsburgh on January 15.

That this decline in radiators in the United States may be followed by a similar move here seems certain.

Trade Inquiries

1. **Iron, steel and other manufactures.**—A London firm of manufacturers' representatives wish to secure the sole representation upon a commission or buying basis of Canadian manufacturers of the following goods: Malleable iron steam fittings; electrical plant and equipment for all purposes, including shipbuilding; brass fittings; pumps; forgings; stampings; machine tools, etc.; tools of all kinds; wood manufactures; chemicals; household laundry machinery; toys; metal fittings for fancy goods, etc.

5. **Wooden handles.**—A Glasgow firm asks for quotations on broom and other wooden handles.

6. **Enamelware.**—A Glasgow house is in need of household enamelware of all descriptions.

8. **Barytes.**—A Glasgow house asks to hear from Canadian exporters.

17. **Kitchen chairs.**—A Belfast firm who have been importers of the above, knocked down, from Canada before the war, wish to be placed in touch with exporters with a view to business as soon as conditions permit.

20. **Asbestos, engine and pump packings, india-rubber goods, engineers' machines and tools.**—A Glasgow firm making a specialty of supplying engineers' and public works requirements in the engineering line, are open to consider representation of manufacturers of the above, either as purchasers or sole agents.

Many Painters Insist on Using

Dougall Varnish

Experience has taught them that it is the easiest to use—looks best and lasts longest and that it is by far the most economical varnish obtainable.

Put in a Stock of Dougall Varnish

You can then be certain of selling to your customers varnish which will be good value and which will give entire satisfaction.

Write for Dealer Proposition—it's a good one.

DOMINION
Rubber System
Belting Service is Dominion Wide

No matter what your business or where it is located, there is within telephone distance of your plant, a branch of the Dominion Rubber System and a belting expert.

These technical experts are not merely salesmen, *they know belting* and its requirements thoroughly and their services are at your command, without charge, whether you are a customer or not.

Put your problems up to the Dominion Rubber System experts—*place your belting equipment in their care—they will shoulder the responsibility* for giving efficient service in all your belting, no matter what it is used for.

They are able to "speed up" your production—reduce your manufacturing or belting costs or eliminate unnecessary delays and "shut-downs."

The Dominion Rubber System is not only the largest but the oldest organization of its kind in Canada and has specialized in belting for more than fifty years—its entire facilities and Dominion Wide Service are at your command.

If you are in trouble or in doubt about a belt, 'phone, wire or write our nearest branch and *let us prove that our Belting Service means more than just selling belts.*

A Paint that Satisfies!

When you hand a can of paint over your counter, what are you selling your customer?

Is it just paint—a fluid which colors a surface? If that is all you can honestly give him for his money, it's high time you were linking up with a *Stephens' Agency.*

Every *Stephens' Agency* sells with every *Stephens' can of Paint or Varnish* a product that he is proud to recommend to his customer.

He knows — that the Stephens' organization is back of every sale. An organization that has a reputation for good paint.

He knows — that the high standard set for Stephens' Paints and Varnishes is there in every can.

He knows—that his customer will be thoroughly satisfied.

STOP THAT

GUESSWORK

There is only one way whereby you can be sure —take a Stephens' Agency.

Write to-day for our proposition

YOU SHOULD SELL WEED CHAIN JACKS

The most easily operated Jack on the Market

Weed Chain Jacks lift a car by a few pulls on a chain and lower by a few pulls in the opposite direction. The operator can stand away from the car, clear of the wheels, mud guards and tire carriers. This feature is especially noteworthy where cars are operated by women.

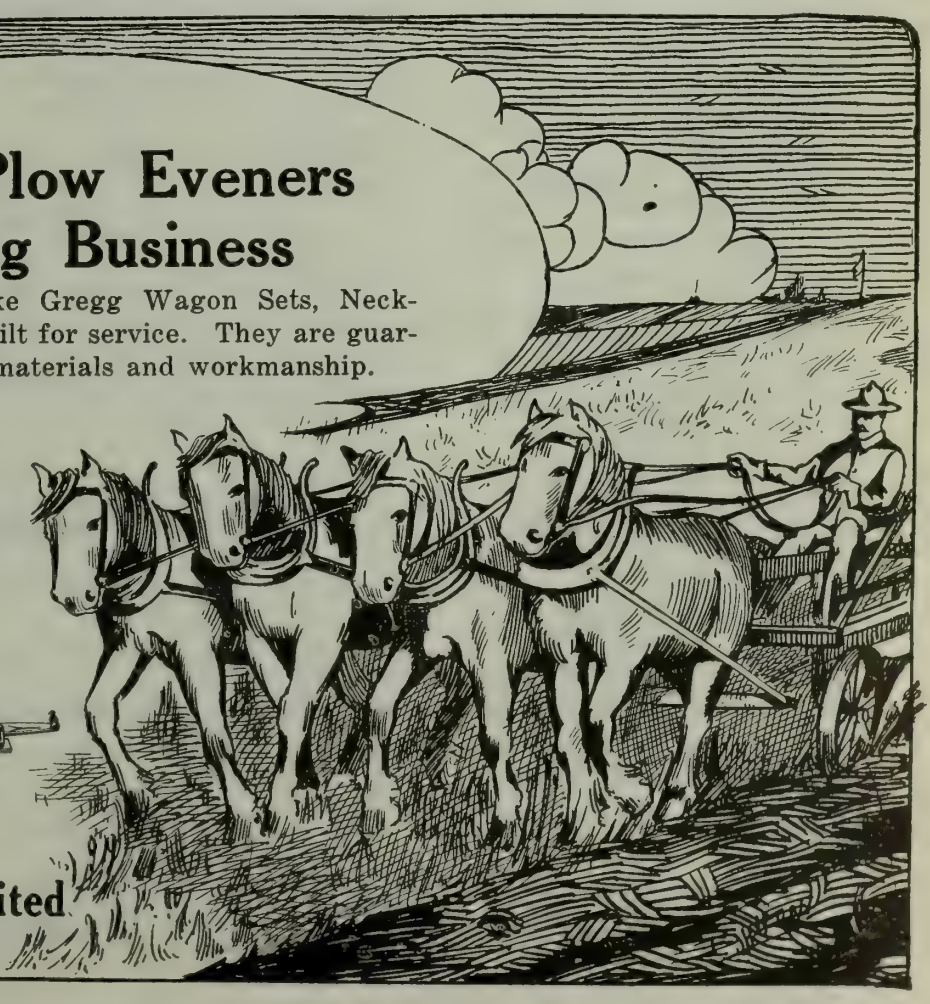
They are made of malleable iron, black enamelled; the base is extra heavy to prevent upsetting; the top is concave to prevent slipping of the axle. The lifting screw is cold rolled steel with square machine-cut threads. The gear housing is stamped steel, and the chain is heavily plated to prevent rust.

A Weed Jack purchaser is a pleased customer.

GREAT WEST ELECTRIC COMPANY, LIMITED

WINNIPEG

Distributors for Laco Tungsten and Nitro Lamps



Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neckyokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

Send for copy of catalogue describing our full line.

Any jobber in the Canadian West can supply you with Gregg Goods.

Paint—and Confidence

When he leaves your store with a can of paint your customer believes he has what you consider the best paint on the market. He argues, unconsciously perhaps, that you would not ask him to use a paint in which you had not perfect confidence.

So he accepts the paint you sell on your say-so, and puts its success or failure right up to you.

CROWN DIAMOND
Liquid Paints

will spread confidence in your store more surely than any other paints you can sell. They are the result of over 75 years of paint manufacturing—a perfect product endorsed by three generations of Canadians.

Crown Diamond Paints have passed every test of time and climate. They are proven paints that you can sell with pride, and with the certain knowledge that they will more than satisfy your customers.

Best of all Crown Diamond Paints pay bigger profits than ordinary paints. If you will mail the coupon you will learn why.

Stewart & Wood, Limited, Toronto.
W. B. Dalton & Son, Limited, Kingston, Ont.

MR. DEALER: Have you planned your campaign of WASHING-MACHINE selling for the coming season?

You will show good judgment and reap sure profits if you choose a line you can GUARANTEE, and which will cause your reputation for EXCELLENT GOODS to be increased.

KRIBS WASHING MACHINES grow in favor every day. The increasing demand for them proves that beyond question. They are EASY TO SELL because of their many attractive features—you will enjoy showing them to your customers. The PRICES are within reach of all. Machines from the modest hand-power to the highest class electric.

Are YOU wide-awake and progressive? Are you ready for a LIVE proposition? Your jobber probably has our machines, but if you write us to-day WE

WILL SHOW YOU THE WAY TO LARGER PROFITS

WILLIAM A. KRIBS, HESPELER, ONT.

Makers of Freight-Handling Trucks of all Kinds

K K

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

There are no substitutes for Dairy Foods.

1881-1919

Looking Backward and Looking Ahead!

THE Sharples institution is now entering its 38th year of service to the Farmer and Dairyman. They have been years of pioneer work in improving two of the greatest aids to the dairy industry—the separator and the milker machine.

To-day the Sharples Suction-feed Separator is recognized the world over as the **only** separator that skims clean at any speed.

Likewise, the Sharples Milker is the only one that applies any squeeze or pressure to the teats.

World-wide acceptance of these pioneer inventions has made the Sharples factories the most extensive of their kind. The Sharples institution is also the largest American-owned separator and milker business in North America.

But past success is only a stepping-stone. We believe that dairying will become the world's most useful, most profitable industry. And in this future era of tremendous progress the Sharples institution will be ready to meet every demand made upon it.

That is the spirit behind our plans for 1919 — in which the Sharples dealer will have a large share. It will be the guiding principle in our extensive national advertising; it will be the basis of our sales aid service to the trade. A Sharples 1919 contract is the most profitable business connection a dealer could have.

P. M. SHARPLES,
President.

Lowe Brothers Paints

Sell Your Customers What They Want To Buy

"The Little Blue Flag Sign
Outside of your door,
Will guide the new Customers
Into your store."

There are very few customers who do not prefer the best. Especially is this true of **Paint.** They have learned to their sorrow that cheap paint is by far the dearest eventually.

It's this type of customer and this class of trade that is the most profitable for you to cater to in your **paint department.** You can best do this by putting in a stock of **Lowe Brothers' Paints.** They satisfy the most particular.

Make **Lowe Brothers' Paints** the foundation upon which to build up a successful paint department. The care and most exacting attention given to the manufacture of our paints is evident in the high quality reputation enjoyed by them.

Here is a list that will introduce this **quality line** to your trade during the winter months. Look it over and then write us for our agency proposition. It's a liberal one.

High Standard Interior Paint
Mellotone
L-B Wagon Paint
Oil Stains
Graining Color Sets
Gold Paint
Oil, Japan and Distemper Colors

The Financial Post on "Bolshevism"

THE menace to the social and economic system of the nation to-day is "Bolshevism."

The trouble is that while there is general condemnation of the tactics employed in the extreme development of Bolshevism, there is far too wide encouragement given to the movement which leads to this state as a natural climax.

This is a time of world-wide social unrest. What is demanded of those mediums of public expression which would serve the best interests of all is a broad view of the relations of capital and labor and social problems which must be solved. For either faction to endeavor to shift the burden of reconstruction to the other is merely planting the seeds of Bolshevism.

Besides the terse, incisive article of which the above sentences are a part,

THE POST

THIS WEEK CONTAINS:

Big Profits and Higher Dividend for Union Bank
Holt Warns Against Paternalism by Politicians
Service-At-Cost Idea is Further Argued by Pitts
President Peacock Tells of Barcelona Company's Position on Radial Issue

An Army of Shooters Will Return Home in 1919

This year will doubtless see more hunting, shooting, and trapshooting in Canada than ever before. No body of men is more expert with firearms than Canada's Army, soon to come home, demobilize and settle in every part of the Dominion.

For 117 years Duponts have been making powder in America. During that time the reputation of Dupont Black and Smokeless Powders has grown and strengthened.

Commence this year to make your Powder Department a more live and profitable department than ever before. Let it be known that your store sells Dupont Powders, and the shells and cartridges loaded with Dupont Powders by all the leading ammunition makers of the country.

MENDETS
A PATENT PATCH

It's the Little Things That Count!

The little courtesies, the little conveniences that customers always look for, attract trade to your store. The bigger sales follow as a natural course. **Mendets** will just do that for you. Its usefulness is already apparent. There is a demand already created. Its to your customers' interest and to your own advantage to sell it.

For mending graniteware and all other kitchen utensils.

Collette Mfg. Company, Collingwood, Ont.

If any advertisement interests you, tear it out now and place with letters to be answered.

THE "NEW" MACLEAN'S

Starting with the January issue, MACLEAN'S MAGAZINE comes out in a new size—11 x 14¼—same size as *The Saturday Evening Post.* This change will enable us to give readers more entertaining articles and stories, and a very much enlarged "Review of Reviews" Section. You will find this January issue of MACLEAN'S more pleasing and instructive than the great majority of magazines you find displayed on news-stands—and

contents are carefully censored—no sex stories—you can take it into your home with the utmost confidence.

A word about the contents—

"Why Laurier Will Wait"

In discussing the policy of the Liberal leader during the coming session of Parliament, J. K. Munro predicts, in January MACLEAN'S, that Laurier will allow Union Government a free hand. In this policy of inactivity "he sees the way open to the accomplishment of all his purposes. If he is half the politician his friends believe he is, he will sit and smile and wait—yet a little longer."

All Canada is interested in what is going to happen in Ottawa. J. K. Munro, veteran press gallery man, is a shrewd observer, and his political articles in MACLEAN'S have stirred up more comment than anything else appearing in the press of the country. He knows politics from the inside. "Why Laurier Will Wait" is a forecast of the near future that bristles with interesting points. A few of the other "head-liners" in this issue:

Bolsheviks at Work in Canada

A sensational article on activities in subterranean circles. There are foreigners in Canada ready to wave the red flag.

Achievements of the Canadian Army

Since the Canadian Division was formed, they have not retired a foot nor lost a gun—a marvellous record. An inside story of how this great army was handled and controlled is told by H. F. Gadsby who spent a month at Headquarters during the last great offensive.

The Grave Dangers of Peace

An article by Agnes C. Laut on the insidious new propaganda being launched by the Germans to split the Allies.

Jock in a Juggernaut

The most interesting war article in a long while, because it is new—it deals with experiences in the tanks.

AND THESE AS WELL:

The Dance Halls of Dawson - By E. Ward Smith

My Hour - - - By Robert W. Service

The Strange Adventure of a Rialto Rainstorm - By Arthur Stringer

The Minx Goes to the Front - - - - By C. N. and A. M. Williamson

The Three Sapphires - - By W. A. Fraser

Mr. Craighouse, of New York, Satirist - - By Arthur Beverley Baxter

The Intercepting Spark, By Mary Josephine Benson

Over 65,000 Canadian Families Buy

MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

20c PER COPY. $2.00 PER YEAR. A TRIAL!—6 MONTHS FOR $1.00

MACLEAN'S sells for $2 a year—should be more. We want you to get acquainted with MACLEAN'S, for we know that after we once introduce you to "Canada's National Magazine" you two are going to be friends for life. So, to make you known to each other, we will accept your subscription now for only six months to start off with. In other words, we want you to "try out" MACLEAN'S, and see for yourself just how good it is!

Don't miss this unusual opportunity. Simply sign the coupon, pin a postal note to it, and mail it to us.

TO-DAY

Tear off here and mail

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

PAINT, VARNISH & COLOR MAKERS
LINSEED OIL CRUSHERS
MONTREAL, TORONTO, WINNIPEG, VANCOUVER, LONDON, ENG.

"This B-H Dealer's Proposition Looks Better Than Ever!"

"To begin with, there is the same high quality, which has placed Brandram's Genuine B.B.White Lead, B-H. "English" Paint and other B-H goods quite beyond the reach of competition. And that quality is extended into some new products such as B-H Auto Enamel, making the B-H Agency still more attractive."

"Then there is the same liberal advertising policy---with good new features added."

"Ask any B-H Dealer what he thinks of our co-operation. He will tell you it helps him wonderfully in developing his paint and varnish business."

"Don't be satisfied with anything but the best goods, the best service, and the best advertising co-operation."

"Before Spring business opens up, look into the B-H proposition! You don't have to merely ***listen*** to it---you can actually ***see*** our complete range of dealer's helps, and it will not obligate you in any way to look it over."

"Let us send our traveller up to see you, with his sample trunk. Name and address, please!"

CARPENTER-MORTON
QUALITY
ECONOMY PRODUCTS
REG. U.S. PAT. OFF.

"There's the Trademark I Swear By"

It's the mark of quality in the beginning that spells economy in the end.

It's a real pleasure to sell Carpenter-Morton Economy Products to my customers for I know when I make the sale that satisfaction is assured.

Brother Merchants, you make no mistake when you concentrate upon the Carpenter-Morton line.

Besides buying merchandise of quality that gives you a liberal profit you buy a line reinforced by an ever-increasing intelligent advertising campaign that is appearing in all the worth-while national periodicals of the country. Not in small, seldom-seen space, mind you, but in dominating space, many ads in four colors that have 100% reader attention. Stick to Carpenter-Morton Economy Products and your customers will stick to you.

Write for our new book illustrated in four colors. It describes the virtue of Carpenter-Morton Economy Products and explains in detail our 1919 Sales and Advertising Campaign.

CARPENTER MORTON CO.

Established 1840

77 Sudbury St. Boston, Mass.

Distributing Branches—Chicago and San Francisco
Canadian Distributor—A. Ramsay & Son Co., Montreal

In our last message we urged you to "face the New Year with confidence"—and we meant every word of it.

A careful survey of the business situation has convinced us that 1919 is going to be a wonderful year. There never was a time when Canadians could look into the future with such satisfaction. The gigantic reconstruction plans will ensure business activity in a country which now rejoices in the return of peace.

To prove our own confidence, we have just placed contracts for the most comprehensive advertising campaign in our history. Many newspapers have been added to our list, and each paper will carry more insertions in larger space, telling Canadian Housewives why they should buy O-Cedar Products.

O-Cedar Polish Mop

Who will make these sales—you or some other dealer? That depends upon your own efforts. You can get the business—and it's mighty profitable—if you dress your windows and arrange your store displays so as to focus our widespread advertising on your store. Then in your local paper, to direct still more O-Cedar business your way, you can use our free electros—either single cuts or complete ads.

The cut shown above is merely to show what you can do in the way of store and window display, using a few boxes or display fixtures. We have lots of signs and hangers for helping you to develop O-Cedar sales. Will you write and ask us for them?

Order O-Cedar Products from your Jobber.

CHANNELL CHEMICAL COMPANY, LIMITED

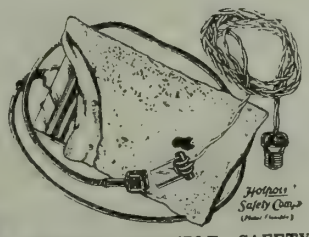
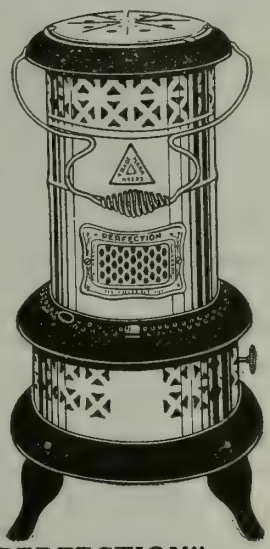
AUXILIARY HEAT



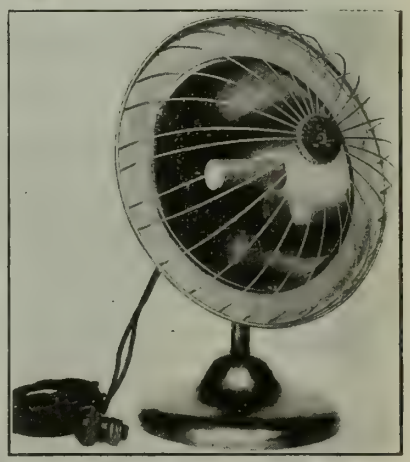
Electric and Oil Heaters



The "RED HOT" Electric HEATING AND COOKING STOVE

With the mild winter we are having, with spring in sight, and coal at $12 a ton, there should be a greater than usual demand for auxiliary heating appliances such as those we are here illustrating.

Now is the time to arrange for a window display of these lines. Show them in action on your counter, and introduce them to every householder who comes into your store.



METAL, FLEXIBLE SAFETY COMFO—Hot-pad, Flexible. Will fit around neck, shoulder or limb, etc. No water to heat—no rubber water-bottle to fill—no rubber to deteriorate

"PERFECTION" OIL HEATER

The "PERFECTION" Oil Heater is well known—a heater which has proven itself efficient in every respect—throws a strong heat, is clean and odorless. The "Perfection" is a big selling line in both rural districts and the city.

The "RED HOT" Heating and Cooking Stove—one of the newest on the market, approved by the Hydro-Electric Commission. Sells at a popular price; good profit for the retailer.

"MAJESTIC" ELECTRIC HEATER

The "Majestic" needs no introduction to the trade. Is a handsome fixture, throws a splendid volume of heat. Made in several styles and sizes.

Ask our travellers, or write direct for the above line.

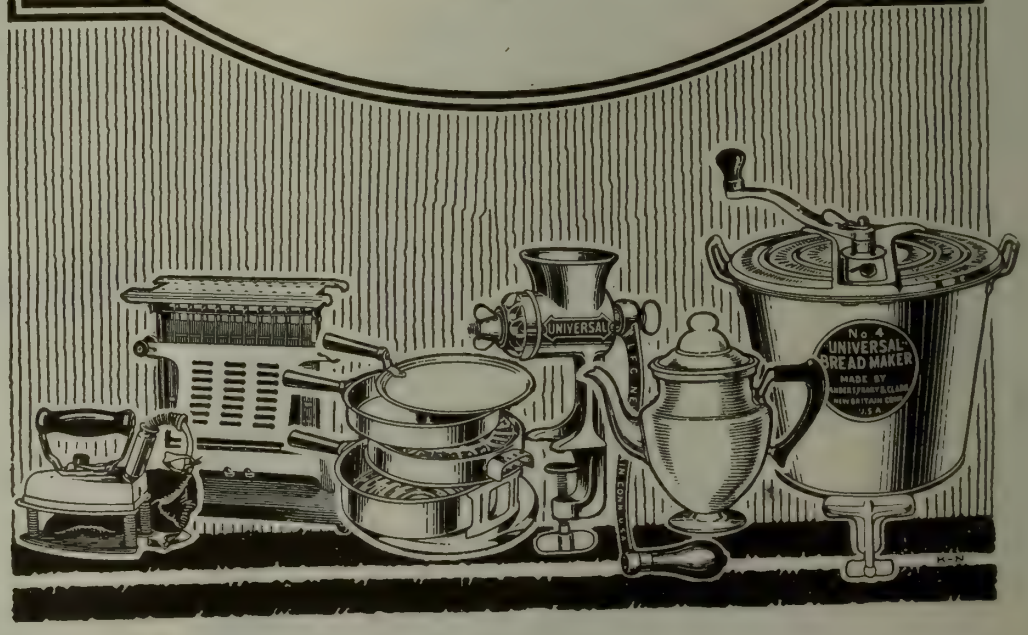
UNIVERSAL

What Sells UNIVERSAL Home Needs?

They are the best in mechanical construction, material and quality. Nearly every home in your community is using, with the utmost satisfaction, utensils bearing this UNIVERSAL Trade Mark.

Our national advertising in the prominent publications, such as The Saturday Evening Post, Delineator, Woman's Home Companion, Pictorial Review, Literary Digest, and many others, keep up the interest in UNIVERSAL Bread Makers, Food Choppers, Percolators, Electrical Appliances, Vacuum Bottles, Cutlery, Pocket Knives, etc.



Make our advertising your advertising by following it up with attractive window displays and advertising in your local papers, for which we will furnish electrotypes. This will help exploit the idea that your store is headquarters for UNIVERSAL Home Needs.

UNIVERSAL Home Needs are made to meet the Home service requirements of the consumer and the store profit requirements of the Dealer. Act to-day, not to-morrow.

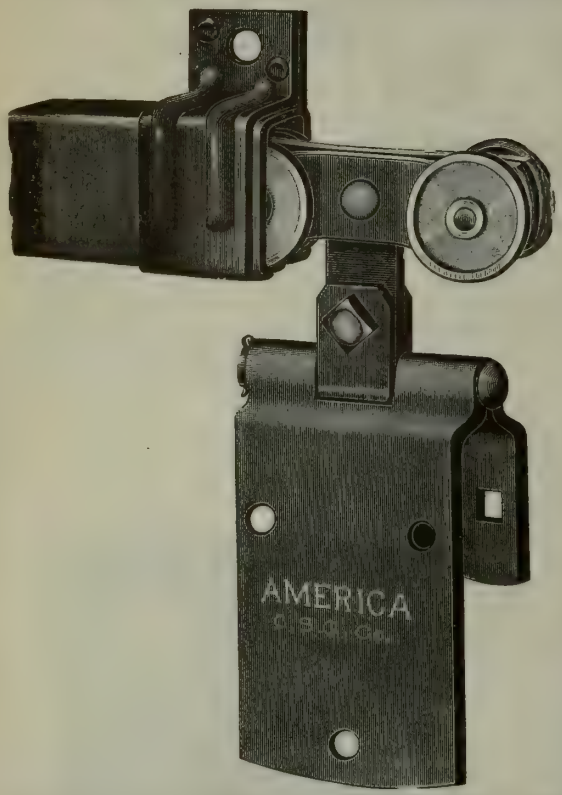
BALL TIP BUTT

A Butt is a little thing and many Hardware Dealers are prone to not give sufficient thought and consideration to the purchase of this line. **Do not make this mistake!** A small, unsatisfactory sale to-day may reflect back to you in the absence of greater sales in the future. The service to be expected of a Butt is what proves its worth. We are proud of our **No. 500 Ball Tip Butt,** so much so that we back it to the limit. It takes no secondary consideration in the manufacture of our many lines. **It's the Ball Tip Butt you should be selling.**



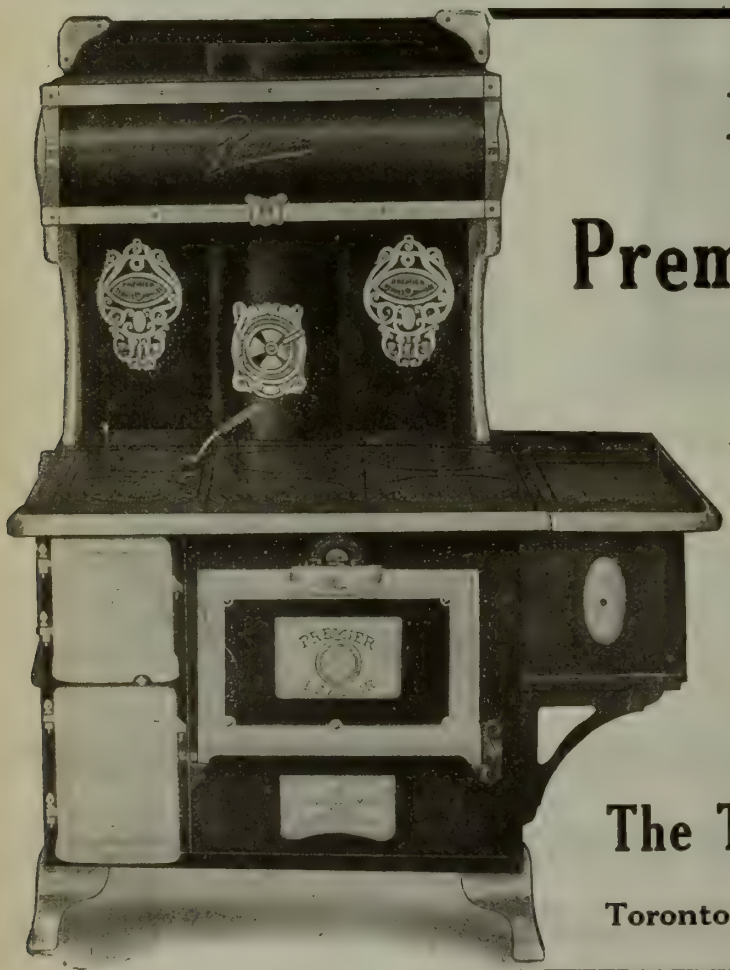
Full Size

No. 500 Ball Tip Butts lend a quality appearance to any interior or exterior. **The mark of Distinctiveness** upon any door. Will last longer, wear better and prove altogether more satisfactory than a cheaper Butt. Made of **Bright Steel, Japanned or Plated,** and comes to you individually wrapped with screws in the unusual **"National Way."** You can create any amount of **customers' satisfaction** by selling **No. 500 Ball Tip Butts.** Customers' satisfaction means more business for you. Isn't that worth while? May we tell you how? Write us.

National Manufacturing Company, Sterling, Ill.

America Tandem Truck Trolley Hangers

Among users of Door Hangers and merchants who sell them the "AMERICA" is admitted to be the most efficient and practical hanger for operating barn, factory, warehouse or garage doors.



Constructed of heavy steel, fitted with hardened roller bearings and has lateral adjustment which permits increasing or decreasing space between door and building.

AMERICA Hangers run in the famous Hatch Trolley Track supported with corrugated brackets, and carry heavier doors.

Take In More Profit On Every Dry Cell You Hand Out. I'll Tell You How

W. M. Turnley, Manager
The Dominion Battery Company, Limited

I'LL not only tell you how to make a bigger profit on each sale but also **how to make more sales;** how to corner the battery business in your community and **hold it**—with RELIABLE Dry Cells.

Every time you sell a RELIABLE Dry Cell you hand the customer a surprise package, for RELIABLE Dry Cells **give longer intermittent service** than the buyer is accustomed to get. Many extra hours of service are crowded into RELIABLE Dry Cells.

As a retailer you'll like the way RELIABLE Dry Cells are sold—always through the regular channels of trade; never by mail order houses or from the factory.

"Lively and Lasting"

Westwo REGD

It Pays The Dealer To Buy Wagon Sets In Crates

The price per set is very slightly more than where shipped loose — while the crated sets reach the customer in as good shape as when they leave the factory.

No Bruised Woods
No Marred Finish

Westwo products are made from the best selected hickory and oak. Irons used are the best manufactured in Canada. Painted and striped — they look better and last longer.

All Sets Guaranteed
Defective Parts Replaced

Goods Represent The Highest Quality

Westwo goods represent the highest quality. Every piece backed by the manufacturer's guarantee. You will have requests for these goods. Write your dealer to-day for illustrated folder and catalogue. If he does not handle, write us direct.

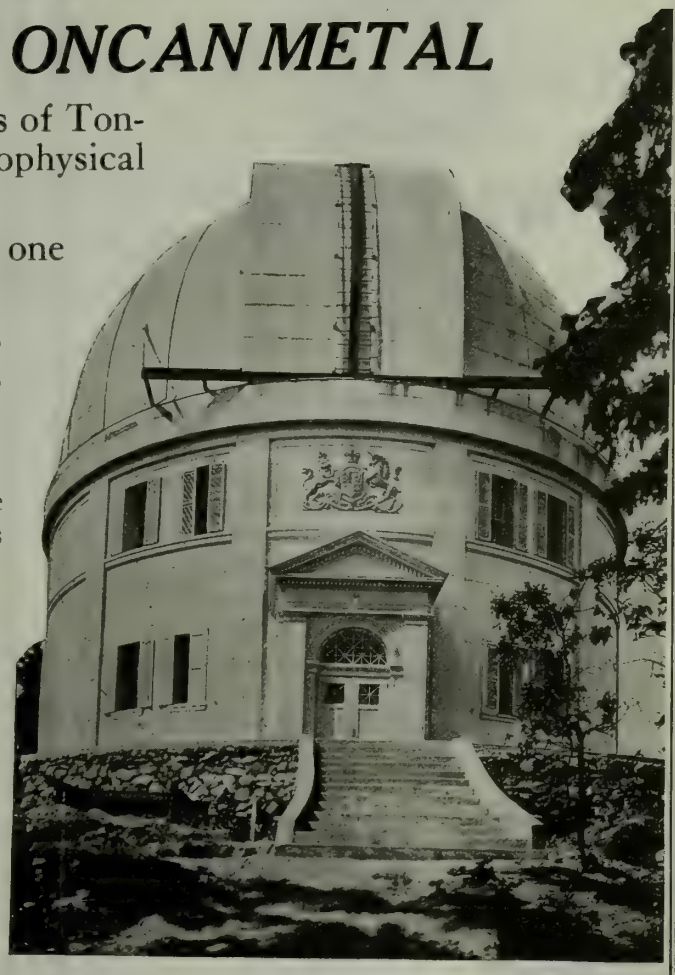
West-Woods Limited

Winnipeg

Canada's Scientists

Recognize the value of TONCAN METAL

by using sixteen and one-half tons of Toncan Metal sheets in the great Astrophysical Observatory at Victoria, B.C.



This National Observatory houses one of the world's greatest telescopes.

The double walls of the dome, as well as window frames, shutters and doors, are covered with galvanized Toncan Metal.

This material was selected because time has proven that among sheet metals made from iron ore

TONCAN METAL

is unsurpassed in its resistance to Corrosion

A REVOLVING DOME WHICH IS COVERED WITH TONCAN METAL.

This great 72-inch reflecting telescope is the second largest in the world. The glass for the great concave mirror which weighs more than two tons was cast in Belgium and shipped just a few days before war was declared.. It was ground by America's most noted opticians, no error of more than one two hundred thousandth of an inch being permitted.

Every part of this great Telescope is the best procurable for the purpose, and it is significant that Toncan Metal was chosen for the sheet metal work of the building which houses this masterpiece of science.

Toncan Metal has been used in all parts of the United States and Canada for Eaves Trough, Flashing, Roofing, Siding, Ventilattors and every severe sheet metal service.

To the building owner, Toncan Metal is a welcome relief from the expensive metals such as copper and zinc on the one hand, and the ordinary short-lived sheet metals on the other.

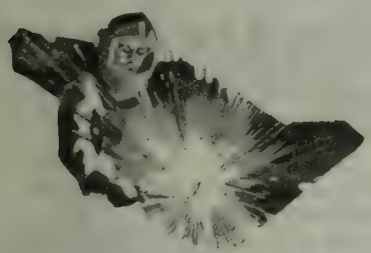
ARMCO IRON

Five Great Points of Superiority

Chemical Purity, Rust-resisting, Enameling Welding and Electrical Conductivity

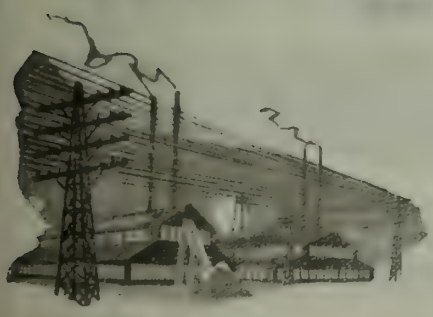


As a Base for Enameled Products

Normally, this is one of the most popular uses for Armco Iron. Many leading manufacturers of stoves with enameled parts, enameled refrigerators, kitchen-cabinets, enameled table-tops, etc., have depended on Armco Iron for many years. Its perfect enameling properties are due to its remarkable freedom from seams, scars, pinholes and other defects.

Armco Iron Resists Rust

Rust resistance is one of the most vital forms of metal conservation, and Armco Iron has exceptional rust resistance because of its purity and evenness. There has always been a heavy demand for it by manufacturers of durable railroad equipment, building equipment, gas tanks, oil tanks, water tanks, grave caskets, culverts, flumes, closet tanks, stoves, safes and many other products.



Armco Iron Welding Material

Redeeming damaged or worn castings and parts by autogeneous welding is another important phase of metal conservation. Armco Iron's melting point is uniform. It welds more quickly and more smoothly than any other welding material, and the joints have the maximum strength and reliability.

High Electrical Conductivity

Iron is being successfully used to-day for telephone, telegraph cable, high and low tension transmission wire, and wire to carry electrical conductivity because of its purity and evenness.

For Railroad Uses and Shipbuilding

Armco Iron gave valuable aid in bringing about peace in the form of a wide variety of railroad products and ship parts.

4 Good Reasons
---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

It's Good—
PEERLESS ORNAMENTAL FENCING

is the last word in fencing, beautifies, protects and enhances the value of your property. It safeguards your children, keeps out marauding dogs, animals and destructive chickens, protects the lawn, shrubs and flowers and prevents trespassing. It wears well, too.

Beautify Your Home with

Peerless Ornamental Fencing. It is built of strong, stiff wire, heavily galvanized and coated with zinc enamel to prevent rust. In style, durability, service and every feature combined to insure absolute satisfaction, the Peerless fencing is true to its name. It will not sag and cannot break down with ordinary use.

Send for Catalog. Shows many beautiful designs of fencing for lawns, parks, schools, churches cemeteries, etc. **Dealers nearly everywhere.**

THE BANWELL-HOXIE WIRE FENCE COMPANY, Ltd.
Winnipeg, Man. Hamilton, Ont.

Again in Demand

The wooden tub is back—the high cost of the metal tub is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue.

Stewart Clipping Machines at the Front

The Stewart No. 1 Ball Bearing Enclosed Gear Machine

(Copyright by the Committee on Public Information)
Clipping a French cavalry man's horse with a Stewart Machine.

Clipping of all horses used by the Allies and U.S. armies is general and a great many **Stewart No. 1 Ball-Bearing Machines** are used.

What it means to Dealers:

This lesson on the benefits of clipping hard-worked horses and the remarkable efficiency of **Stewart Machines** is being brought back to our Canadian farms and towns, with the result that more horses will be clipped this spring than ever before, and more **Stewart Machines** will be asked for and sold by dealers.

The Stewart No. 1 Ball Bearing Horse Clipping Machine

is rapidly replacing all other makes as the result of its superior qualities to clip, turn easy and stand up.

It never fails to please and is invariably asked for.

Sold through the regular trade channels only.

Horse clipping starts with the first spring weather.

Don't lose sales by experimenting with unknown and untried machines.

Sell the old reliable Stewart—reasonable in price and guaranteed to please and stay sold.

Order from your Jobber now.

GASOLINE TANKS

WELDED, TESTED, HIGH-CLASS TANKS
For Underground Storage of Gasoline

(Any Fittings to Suit Supplied

A high quality tank, steel welded throughout, making it practically a one-piece tank. Treated on the inside with an odorless, anti-rust oil and then painted on the outside with anti-rust, acid-proof black paint. They are practically rust and corrosion proof. We are tank builders. We make a specialty of tanks. Anything we turn out in this line you can depend on. They are made by expert workmen. We put our best efforts into tank building; it is our specialty. Our tanks are built to conform to the requirements of the National Board of Fire Underwriters. They are all tested before leaving our works under air pressure by a competent superintendent and then crated and shipped so they will reach you in good condition. We believe our prices will appeal to you as being very reasonable. Nothing but the best will do for handling gasoline. If not as represented when it reaches your station, fire it back at our expense. Can we do fairer? Any size made to your order.

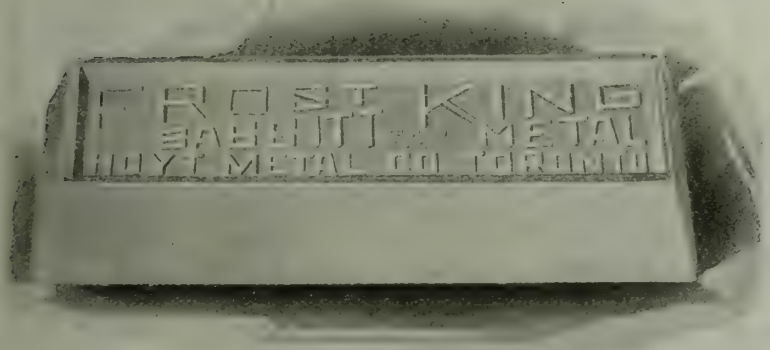
Williams' "Agrippa" Tool Holders

FOR nearly half a century we have been designing and making drop-forgings and drop-forged tools. Our trade-marks, "Vulcan" and ◇W◇ and "Agrippa" are known throughout the world wherever machinery and tools are used; they represent our constant endeavor to maintain and improve quality—to put *Superior* into our product—to make it individual and worthy of the high standard long established for Williams' goods.

Williams' "Agrippa" Tool Holders are a case in point. They embody all the improvements in design, material and practice suggested by experiment with former models. No pains or expense that will add to their efficiency is spared in their manufacture. Many of their features are unique and make for economy and convenience. A full line in a wide range of sizes is carried for various classes of work, including

Turning · **Boring** · **Threading**
Planing · **Cutting-off** · **Knurling**
Side Work



These tools, as well as Lathe Dogs, Clamps, Caliper Gauges, etc., are all described in our Machinists' Tools Booklet—free on request.

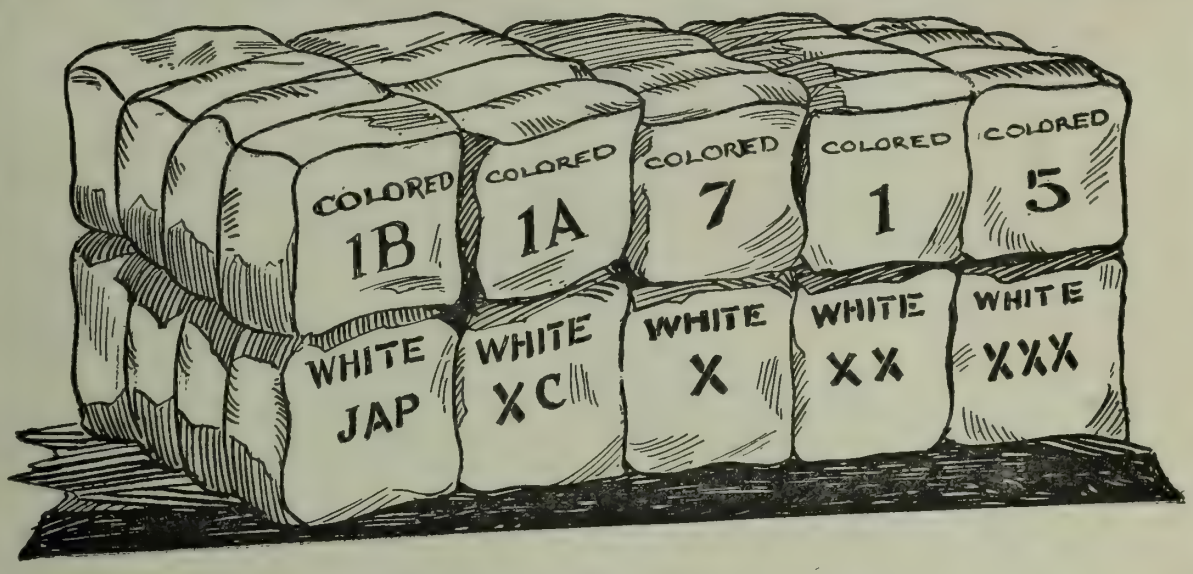
The Publisher's Page



TORONTO JANUARY 25, 1919

"ONE thing about HARDWARE AND METAL that appeals strongly to me is that I find many new ideas in every issue," stated a leading retailer to a HARDWARE AND METAL representative a few days ago. "I find new ideas and news each week in the advertising as well as in the editorial pages. The trouble with too many papers is that they are a kind of a cut-and-dried proposition, pretty much the same week after week."

It is the constant aim of the publishers of HARDWARE AND METAL to supply readers and advertisers with the best possible service—to keep our editorial and news pages full of live, practical information for the hardware trade, and thus retain the confidence of the trade, which we have enjoyed for over 30 years.

That we are succeeding to a marked degree is indicated, we believe, by frequent similar remarks such as quoted above, and by the fact that practically every worth-while buyer and seller of hardware in Canada is a paid-in-advance subscriber to HARDWARE AND METAL.

COTTON WASTE

—at the Right Price

Acme wastes are a good buy, because they are the best value for the money. Fully 10 per cent. lower in price than any other line of *cotton waste* of the same quality. Made both colored and white, comprising five grades each. An ample variety for any use. Our steadily increasing business with the largest consumers and jobbers in Canada is conclusive proof of the superiority of the *Acme Line*.

Set No. 1750
Stanley Screen Door Sets always give the utmost satisfaction.

Set No. 1752
The exceptional convenience of these sets is noteworthy.

Set No. 1754J
These sets can be used by anybody and are liked by everybody.

Stanley Screen Door Hardware

THE sets here illustrated are extremely popular and are preferred because of their handsome appearance, because of the effective service they give and because of their strength, durability and ease of applying and using.

Set No. 1750 consists of one pair of ornamental wrought steel loose-pin butts (3x3) to screw on the surface; one wrought steel pull; one extra quality wire spring and one gate hook and eye finished in Japan, Antique Copper, Dull Brass or Stanley Sherardized.

Set No. 1752 consists of one pair of ornamental wrought steel loose pin butts (2½x 2½); one wrought steel pull 3½ inches long; one wire spring No. 2; one gate hook and eye. The door is removed by slipping out the pins.

Set No. 1754J is intended for screen doors wider than the entrance into which they are to fit. Doors are easily lifted off these loose joint hinges.

Here is hardware that is of splendid quality, that is in strong demand, and that brings you an excellent profit. Catalog sent free on request.

The Stanley Works

New Britain, Conn., U.S.A.

New York **Chicago**

Manufacturers of Wrought Bronze and Wrought Steel Hinges and Butts of all kinds, including Stanley Ball Bearing Butts. Also Pulls, Brackets, Chest Handles, Peerless Storm Sash Hangers and Fasteners; Screen Window and Blind Trimmings; Twinrold Box Strapping, and Cold Rolled Strip Steel.

Stanley Garage Hardware is adaptable for factory and mill use.

Stove Makers Seek Export Business

Canadian Firms Will Send Representative to Europe as Soon as Possible—Orders For Enamelware Will Also Be Sought—Government to Be Asked For Special Transportation Rates to Liverpool

CANADIAN stove manufacturers and makers of enamelware will make a strong bid for all the overseas business they can obtain. At a meeting held in Montreal, the sessions of which occupied two days, the manufacturers went into the situation thoroughly and it was decided that the best way to look after Canadian interests was by having a man on the ground. A. M. Smith, sales manager of the McClary Mfg. Co., of London, Ont., was selected as the representative subject to the approval of his firm and it is planned to send him to Europe as quickly as possible.

Formed Committee

At the first session of the manufacturers a committee consisting of Messrs. Gibson, Clare, Fisher, Gunn, Smith, Moffatt, Peacock, Cote, LaMarre. Fraser and Goodwill was appointed to deal with the subject of exports.

F. M. Tobin, of Toronto, was elected secretary and treasurer of the export committee and it was decided to apportion an assessment upon all manufacturers present or who may be interested, such assessment to raise the sum of $5,000, for the purpose of defraying expenses of a representative and current incidental expenses. The understanding is that if business is obtained it is to be distributed to the manufacturers who can best handle it. This plan it was thought would give all interested an opportunity to share. In case of any manufacturer participating in the expense and not being able to handle any of the business secured (if any is secured) a refund is to be made up to fifty per cent. of the amount advanced. The refund is to be made by those who secure orders.

It was resolved that the representative selected be competent to handle the business for manufacturers of enamelware, who will be invited to participate in the arrangement.

Arrange Shipping

In order to make the very best prices possible, an essential in securing the business against other competitors, the stove manufacturers appointed a committee which went to Ottawa and took up the question of securing cargo space, transportation rates between Canadian ports and Liverpool equal to those obtainable by American firms, and other questions in connection with shipping. The stove manufacturers have been assured of every assistance not only in shipping arrangements but in the matter of credits also.

A. M. SMITH
Sales Manager of the McClary Mfg. Co., London, Ont.

All information is to be secured also regarding the duties on imports into France and Belgium and also on ocean insurance.

W. S. Fisher of Sackville, New Brunswick is chairman of the committee looking after all these matters and A. M. Edwards of Galt is secretary.

Tells of Plans

At the meeting in Montreal Mr. A. Clare, of Preston, reported on the plans under consideration by furnace manufacturers, and W. R. Gibson of the Gurney Foundry Company Limited, Toronto, read a paper on the class of stoves and quantity of imports into France from adjacent European countries prior to the war.

G. Peacock gave some information regarding freight rates.

Spring Buying Light

Ex-Mayor A. M. Edwards of Galt, president of the Galt Stove and Furnace Co., seen by HARDWARE AND METAL and questioned as to the prospects of business, said that spring buying was very light owing to the fact that buyers figure on lower prices. He stated that he could not see any justification for such a stand as there has been no drop in the price of raw materials and the cost of living is still at the top notch and as long as it remains there, wages cannot come down and the price of the manufactured article will therefore have to be maintained, there being no other course for the manufacturer to pursue.

Expects Big Rush

"What looks like the big trouble," said Mr. Edwards, "that will be encountered this year will be that the buyers will hold off and then everybody will be congested with business later on, when the demand comes. If the buyers do not place their business now, how can the country at large expect the manufacturers to take care of the returning soldiers? Everybody is anxious to get the veterans back into their old employment but if the buyers hold off it will be impossible to do this."

The same condition as found in Quebec applies to Ontario, said Mr. Edwards, while the Western business was an unknown quantity since the buyers had not come East as yet.

Regarding standardization, Mr. Edwards said his firm was endeavoring to specialize on certain lines and that in the past three years they have cut down their lines considerably.

Among those who attended the Montreal meeting were: Z. A. Hall, Hall Zryd Foundry Co , Hespeler, Ont.; W R. Gibson, Gurney Foundry Co., Ltd., Toronto; A. W. Cote, Canada Stove and Foundry Co.; W. J. Christie, Empire Stove and Foundry Co.; J. G. Fraser and J. Bennett, Hamilton Stove and Heater Co.; J. M. Gunn and A. M. Smith, McClary Mfg. Co., London; F. Reynolds, James Smart Co., Brockville; T. L. Moffatt, Moffatt Stove Co., Weston; E. G. Goodwill, Thomas Davidson Co.; W. T. and D. S. Fisher, Enterprise Foundry Co.; C. W. Fawcett, Fawcett Mfg. Co.; C. Stewart, Stewart Mfg. Co., Woodstock, Ont.; A. G. McIntyre, McIntyre

Britain is Eager for Canada's Goods

Great Opportunity Awaits Canadian Manufacturers, Says Manchester Man—German Goods Will Not Be Bought—Enormous Quantities of Manufactured Goods Will Be Needed

THAT Great Britain is eager to buy millions of dollars' worth of goods from Canada immediately, and of many descriptions, and that she has a preference for these goods already, is the expressed conviction of Mr. R. A. Cowman, of Manchester, England. Mr. Cowman is now in Canada on a missionary trip for his firm, R. Johnson, Clapham and Morris, Ltd., Manchester, and came here for the express purpose of learning at first hand what Canada can do in supplying the Old Country with various lines of manufactured products. He has studied the situation in England, being associated there closely for years in the manufacturing and selling business as pertaining to iron, steel and wire goods.

A New Bond Created

The war has created a new bond of understanding between England and her colonies, he stated to HARDWARE AND METAL, so that there is to-day a very different feeling and attitude toward the products of Canadian mills than has been possible in earlier years. The people in England have not appreciated even yet what a large country Canada is. They read of Canada's resources and expanse without being able to comprehend what this really means. But the war, aside from this, has evolved a new order of things, and the British people are now eager to show in a practical manner that they appreciate the sacrifice which has been made by her sons. If by purchasing goods "Made in Canada" she can show her appreciation of the part Canada took in the World War, then England will have been glad to leave her money with those who thus are entitled to consideration.

"Made in Canada," said Mr. Cowman, "is the greatest phrase which can today be used on a package going into England. It is that which the British people like to see, and it carries with it great weight."

Now Is the Time

That the time is ripe for the Canadian manufacturer to place his goods upon the British market was definitely emphasized by Mr. Cowman. Competition will be keen from other places, but this should be no barrier to the manufacturer of a given line who can make his products in quantities and sell them in competition with other makers. One of the things which manufacturers have not been able to grasp is that of the immense quantities of a given line of goods which the markets of Great Britain can absorb. Already, Mr. Cowman pointed out, he had been able to place orders with Canadian firms who had been surprised at their magnitude, and these orders, he remarked, were not extraordinary at all, but such as would

R. A. COWMAN
of Manchester, England, who sees opportunities for Canadian trade in Britain.

be given regularly by a large British buyer. They seemed to be much larger, however, than the average order placed by the Canadian buyer. With so large a population, Great Britain could naturally absorb an immense amount of goods. Great quantities of bolts, nuts, screws, nails and steel products are required.

What of Competition

Mr. Cowman pointed out that the Canadian manufacturer will have to quote reasonably satisfactory prices. He will, in short, have to compete with the manufacturers of friendly allied countries and get down to rock bottom. That he will be in a position to do this, Mr. Cowman thought possible, for it is simply a matter of increasing output and thus decreasing costs. That has been the solution of other manufacturers, coupled with reasonably paid labor, or even high-priced labor giving efficient production. It ought to be possible, and Canada will have the big additional advantage of being considered preferentially. There was no doubt about that.

"There is no reason to entertain any fear of German competition," said Mr. Cowman. "Germany will not be permitted to repay her war obligations in German-made goods."

To suggest such a possibility to a Britisher is to get the cold refusal to think of anything German in the purchases of the future. It was pointed out that there is little likelihood of any competition of this sort for at least five years.

Some Lines Wanted

While the demand for Canadian-made goods has been better during the war years, Mr. Cowman pointed out that there was great room for development. Huge quantities of nails and wire goods had come from Germany prior to the war. Since then they had come from America and elsewhere. It is estimated that, even considering the difficulties of transportation Canada sent to England an average of from 15,000 to 20,000 tons annually of wire nails and other wire products. This can now be greatly increased, for there is an excellent demand and this will have to be filled from abroad.

Germany supplied England with more than 90 per cent. of her enamelled ware before the war. Someone is going to get this trade other than enemy countries, and England is open to purchase largely in Canada. Samples will be secured, and if the manufacturer here can supply the goods on a favorable basis he will be accorded all the business he can take care of. In addition to these lines, builders' hardware, shelf and heavy hardware, woodenware, and many other lines will be in demand.

Make What is Wanted

Mr. Cowman pointed out that the manufacturer will, in some instances, have to make the goods that are wanted and to which the British buyer has been accustomed. This will not be difficult. Securing a sample of such products as are required, he will be as able to make the various lines wanted as anyone else, and he will be able to make and supply the goods, Mr. Cowman thinks, at a price which will compare favorably with others. The labor costs are high everywhere, and in this respect various countries are now on much the same basis. It is a matter of producing more and selling large quantities, larger than ever before.

STOVE MAKERS SEEK EXPORT BUSINESS

PRIZE WINNERS IN THE XMAS WINDOW CONTEST

PLACES OVER 5,000 POPULATION

1. **G. E. Hammond, Mills Hardware Company, Barton St. Branch, Hamilton, Ont.**
2. **H. A. Bowen, c/o J. H. Ashdown Hardware Co. Calgary.**
3. **L. W. Misener, Purdom Hardware Company, Limited, London, Ont.**
4. **Alexander Baillie, Sumner Hardware Company, Moncton, New Brunswick.**

Honorable mention—A. A. Macdonald and Oscar Klinke, Bond Hardware Co., Guelph, Ont.; Herbert L. Huehn, The P. Hymmen Company, Limited, Kitchener, Ont.; Everiste Babineau, Sumner Hardware Company, Moncton, N.B.; Miss Dickson, Sumner Hardware Company, Moncton, N.B.; S. E. Fawcett, Fawcett Hardware Limited, Saskatoon; Edwards and Rose, Lindsay, Ont.; Arthur Goddard, Fowler Hardware, Limited, Sudbury, Ont.; Charlie Harvey, Barton & Fisher, Port Arthur, Ont.; W. A. Schaefer, M. Weichel & Sons, Limited, Waterloo, Ont.; P. E. Hughes, Cochrane Hardware Limited, North Bay, Ont.

PLACES UNDER 5,000 POPULATION

1. **H. G. Binns, Binns' Hardware, Newmarket, Ont.**
2. **Frank S. Newton, R. M. Birce Hardware, Essex, Ont.**
3. **G. P. Eldredge, Northern Canada Supply Company, Limited, Timmins, Ont.**
4. **J. C. Kayser, Rutherford and Kayser, Simcoe, Ont.**

Honorable mention—A. R. Bernhardt, Bernhardt Hardware, Preston, Ont.; W. E. Cassidy, Cochrane Hardware Limited, Copper Cliff, Ont.; F. E. Hendershot, Mount Forest, Ont.; L. W. Rumball, Nanton, Alberta; Melville Maloney, Meaford, Ont.; G. A. Culbert, Johnson Bros., Boissevain, Manitoba. Reproductions of the first prize winners are shown on pages 42 and 43.

The Christmas Window Contest

Winners of the First Prizes Describe Their Methods and the Plans Along Which They Worked to Increase Their Sales at the Holiday Season

ENTRIES for the Christmas window contest put on by HARDWARE AND METAL were received from all over the Dominion. Some of the window displays sent in were spoiled by poor photographs which did not begin to do justice to the arrangements, or the time and effort spent in dressing the window. Some of the contestants in their window displays lost sight to a great extent of the fact that "sales value" is what counts. They went in for effects that while pretty and perhaps striking had in them little of that power which a really good window exerts in bringing people into the store with their minds made up to purchase some article they had noted in the window as appropriate for the gift they were looking for.

Some Good Ones

The great majority of the windows though were excellent and showed that the window dressers had planned their windows carefully. Letters from the firms showed that they had reaped the benefits in a holiday trade that surpassed any they had known in a long time.

In the prize winning window for places over 5,000 population Mr. G. E. Hammond used as a background for the display common building paper, which he painted over with alabastine in a soft green shade. In front of this he placed a lattice work painted in white mellotone. A head of Santa Claus in the centre, surrounded by a holly wreath, lent a decidedly seasonable touch to the window and the attractive effects were enhanced by a holly rope placed round the edge of the background and by the ferns placed in handsome jardinieres above.

A Timely Touch

The Victory wreaths in deep rich dark green, with gold lettering and red ribbons were most timely. The roof of the window was constructed of white crepe paper placed over strips covered with red and green crepe paper. Red and green rope ran crossways to five red bells. Father Christmas crepe paper made an attractive and decidedly seasonable border at the top of the window.

Special Feature

Special attention was paid to the lighting arrangements. There were four 200-watt lamps in the window and four lamps above the roof. This made the display show up splendidly.

Every article was nicely priced, special Christmas price tickets being used.

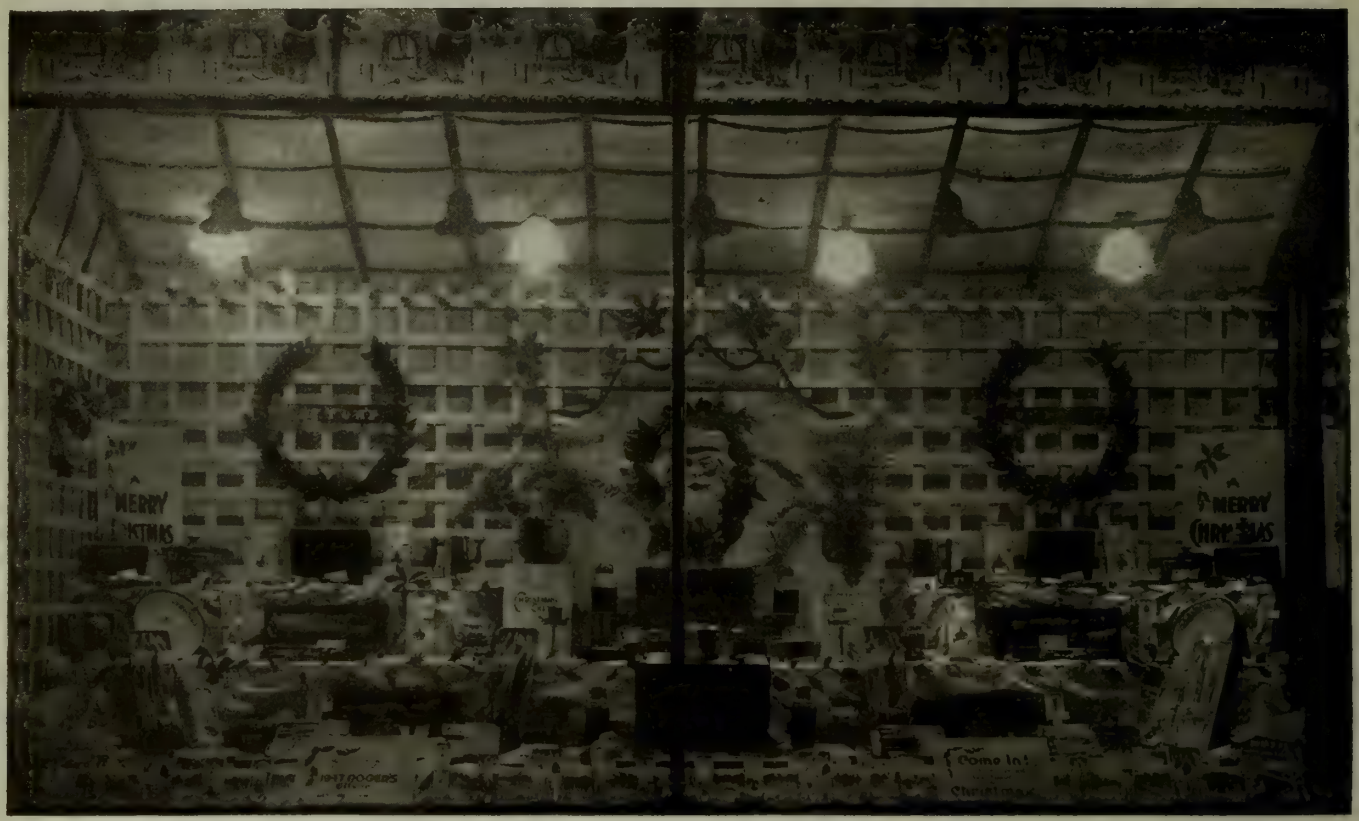
The articles were selected with a view of offering prospective gift hunters something really attractive and serviceable. That the window display was effective was shown by the returns. Mr. Hammond states that since he has been dressing the window the firm has sold more silverware than they ever did before.

"It certainly pays to advertise," he says. "By showing the people what we have they have been coming to the store where they used to go up town for these lines."

A Timely Idea

H. G. Binns, of the Binns Hardware, Newmarket, Ont., says of his window:

"The chief drawing feature of this window is the large arch which occupies the greater part of the background. This arch was suggested through the huge victory arch which was recently erected in the States, and appealed to us as being very appropriate this year.



"It was made very inexpensively from three sheets of beaver board and painted flat white to resemble masonry. At the top of each of its pillars are the words "peace" and "liberty" formed by cutting out the board and pasting blue tissue paper behind. In the centre of the arch are the words "Merry Xmas" cut out with red paper behind. These cut-outs are illuminated with electric flashers.

"In the centre of the arch stands Santa, whom the kiddies were all glad to see, and behind him the dark sky comes down to meet the snow.

"The walls on each side of the arch are dressed with polished nickel bath fixtures and fancy boards on which are displayed the highest grade of cutlery and silverware.

"The cone-shaped roof is formed by draping oak leaves and tinsel from the centre, out toward the edge, and finished

Continued on page 57

A SALES PRODUCER

THE *above illustration shows the Christmas window display of the Mills Hardware Co., of Hamilton, which was awarded first prize in the competition held by* HARDWARE AND METAL *for contestants in places of more than* 5,000 *population.*

The window was dressed by G. E. Hammond, and was the unanimous selection of the judges as winner. They considered it a splendid example of the window dresser's art. It contains a great many points that other hardware men can turn to advantage not only in Christmas displays but at all seasons of the year. The goods shown were particularly seasonable. There was nothing in the display that did not carry an appeal to the shopper who was looking for something useful and serviceable as a gift for Christmas. The arrangement was a most attractive one and nothing of this was lost by the care that was taken in the lighting arrangements. The prime object of a display window is to produce sales, and the judges were of the opinion that the Mills window eminently fulfilled its mission.

A CHRISTMAS ATMOSPHERE

THE *window shown above was the winner of first prize in* HARDWARE AND METAL'S *contest for places under* 5,000 *population. It was dressed by H. G. Binns, of the Binns Hardware Company, Newmarket, Ont. The adoption of a Victory Arch was a happy idea as well as a timely one and was calculated to have the double effect of attracting attention and putting Christmas shoppers into a favorable mood by their remembrance of the happy ending of the great war.*

Apart from all this, however, the window was a sales-producer and when Christmas shoppers looked into it they found displayed a number of hardware lines, any of which would make attractive and serviceable gifts. Mr. Binns used price tickets freely and with splendid results. He found that by this means people came into the store with the price fixed in their minds and the gift they wanted selected, and he saved time, worry and trouble, besides largely increasing his sales. A study of the prize-winning windows is worth while by all window dressers in hardware stores, as there are many suggestions that may be invaluable to them on other occasions.

NEW LEAD IN OIL PRICE MAY HOLD UNTIL JUNE 30

AS was expected, an adjustment has been effected in the basis of white lead in oil. The direct reason for this is that of a gradual lowering of prices on pig lead and the corroders have acted on this condition. In making the change the following arrangement was arrived at, and as will be seen, the prices now named are effective at once and may continue to June 30th:

> "White lead will be based at a price of $15.50 per 100 lbs. in five-ton quantities. These prices will remain in effect until June 30th, unless conditions necessitate an advance."

It is quite clear that the corroders are prepared to fill orders on the new basis outlined in the paint market quotations, but that they will not guarantee prices at these figures should subsequent market conditions warrant a revision upward.

There is to be no reduction of paint prices. The manufacturers have been working on high-priced lead and the price of mixed paints, they state, will hold consistently on present levels for a considerable length of time.

DROP OF EIGHTY CENTS IN GALVANIZED SHEETS

OUTSIDE of a drop of eighty cents per hundred pounds in galvanized sheets and a reduction of from fifty to eighty cents per hundred in black sheets there was little change in prices in the steel market this week and it is believed that steel prices are likely to remain as they are for some time. The reduction in prices of sheets has followed plentiful deliveries and prices on these lines are now, it is stated, down to rock bottom. Pittsburg reports state that the mills are not operating over sixty per cent. capacity. Following their recent tremendous production it will take very large orders to mean capacity business for them now. Toronto steel men seem to feel confident that the prices of steel have got past the danger mark that existed around the first of the year. At that time there seemed to be danger that the price lists, with Government control relaxed, and with the mills out gunning for business, might get on the toboggan and more or less demoralize the market. The cut announced by the U. S. Steel Corporation was regarded by many as the first of many such reductions. This view apparently has not been borne out and a representative of the United States mills while in Toronto a few days ago gave it as his opinion that the first reduction would be the last for some time. The first cut did not affect wages, and he takes the view that no further cut will be possible until wages are reduced. In the scrap metal market business remains stagnant.

MERCHANTS KEEPING EYE ON BUSINESS INTERESTS

THAT retail merchants are keeping an eye on events and are prepared to make a protest against what they regard as against their interests was shown twice this week. The merchants of Ottawa at a largely attended gathering went on record as being strongly opposed to the proposed absorption of the Bank of Ottawa by the Bank of Nova Scotia and will consider ways and means for combating the merger. In the opinion of the merchants the disappearance of the Bank of Ottawa would be in the nature of a catastrophe not merely local or provincial, but national. The merchants took the view that banks are not private, but public, institutions, servants of the public, and that it is not in the interests of the public that they be merged. The Merchants Club of Brantford at its annual meeting registered a protest against the demobilization plans of the Government, claiming that the City of Toronto is getting the benefit of thousands of men being outfitted there after their discharge. It was held that other cities are being discriminated against to the advantage of Toronto. It might be noted also that merchants have been figuring very largely in the various protests that have gone to Ottawa recently against the proposed increase in telephone rates.

EARLY CLOSING PLANS ARE UNDER DISCUSSION

EARLY closing continues to be a live issue with retailers in several of the provinces and indications are that it will become effective at many points before long. A proposition different from that under consideration in any other cities has been made at London, Ont., by the recently formed Chamber of Commerce. The plan suggested is to have all retail stores close at five o'clock every evening in the summer months, at eight o'clock or earlier on Saturday nights, and to eliminate the Wednesday afternoon half-holiday which has been generally adopted during the summer months. Some of the larger stores have been closing at five and, it is stated, that the plan has worked out most satisfactorily. There is a difference of opinion among some merchants as to whether five o'clock is a better hour for closing than six. Most of the hardware men have been closing at six o'clock.

SAYS GLASS INDUSTRY ON A SOUND BASIS NOW

LATEST reports from across the line state that the glass industry is now on a safe and sound basis for 1919. A letter sent out by the Johnston Brokerage Co., of Pittsburgh, says:

"Information from Cleveland is to the effect that the two committees have agreed on wages and working rules for the coming year; the skilled workers are to receive 10% advance over the wages that were in effect at the close of last blast.

"The operating periods among the hand plants will be: One group of about half the factories from February 8 to May 24, and a second group of about the same capacity from August 15 to December 8. Although the factories are only going to make 50% of normal production this two-operating-periods plan will distribute the production over the year in a way that ought to help the market wonderfully, and be a benefit to both manufacturers and distributors.

"An immense amount of work has been accomplished to bring about this adjustment, as there have been a number of complex questions to combat."

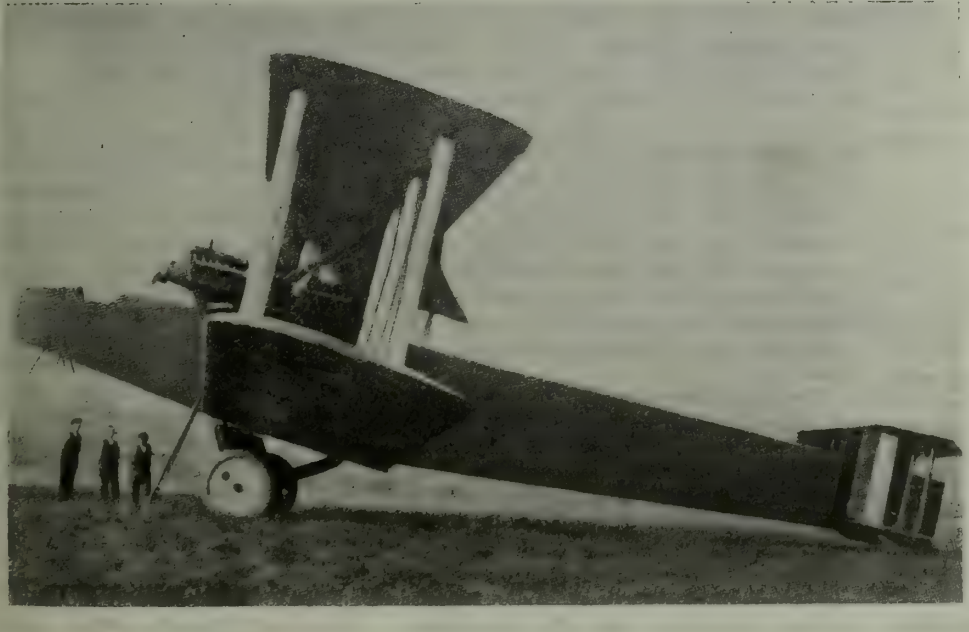
LOOKS AS IF BUILDING WILL BE BRISK THIS YEAR

FOR the first time in five years architects are willing to admit that inquiries they have already received indicate a big year's building. Brick manufacturers and other firms dealing in supplies also report a large number of inquiries. There is every indication that great numbers of new houses will be erected, to say nothing of a lot of building such as factory extensions, public buildings and memorial halls for soldiers. All this will mean a lot of business in which hardware men are interested, and many of them are preparing for greater sales than they have had since the war started. It is stated that more new banks and bank branches are planned than have been built in many years.

WILL FIGURE PRICES ON DELIVERY TIME BASIS

AS stated in a recent issue of HARDWARE AND METAL the stove manufacturers of Canada guaranteed prices until April 1. At a meeting held this week they went a step further and decided to accept business for later dates at prices ruling at the time of delivery. The outlook for business for 1919, it is stated, is good and as shown on another page of this issue the manufacturers are going to make a big effort to capture some of the overseas trade. Another problem they will have to deal with shortly is a request from the Molders' Union for an increase in wages of twenty-five per cent. All these factors and the homecoming of 300,000 men, many of whom were former employees and will be cared for, create a situation that has not confronted the manufacturers before in their history and make it difficult for them to plan for the future .

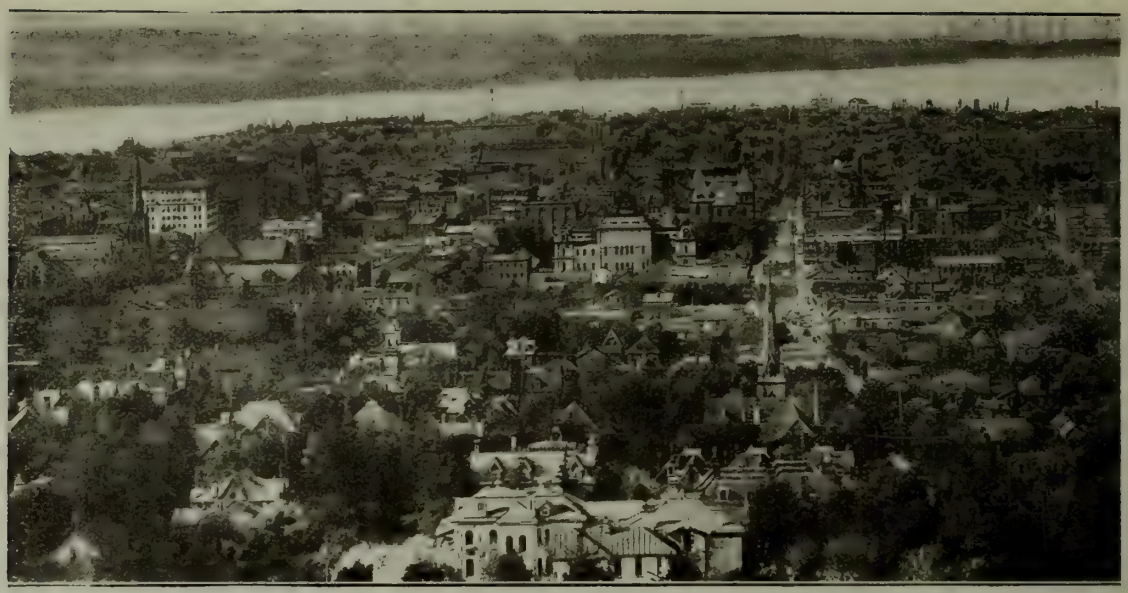
GOVT. MAY REMIT DUTY ON LOWER PRICED TRACTORS



REMISSION of duty on farm tractors under $1,400 in value ceases on February 7, unless the Order-in-Council granting the remission is further extended. The question of extension has been given some consideration, and it is expected, will be officially before the Cabinet within a few days. The Canadian Manufacturers' Association is making arrangements for sending a delegation to Ottawa on the subject.

INQUIRIES FROM BRITAIN STIMULATE TURPENTINE

LATEST reports from the South in regard to the outlook for turpentine supplies are as follows:—



"After a little sagging weakness, turpentine has moved up to 72 cents. The market is reported stimulated a bit by British inquiry, indicating a desire on the part of United Kingdom dealers to get stuff over as quickly as the freight situation eases up. Then, too, the meagreness of receipts plays in favor of the turpentine situation being well sustained, the shrinkage in fresh offerings being decidedly noticeable since the opening of the year and the lots arriving from the woods growing smaller and smaller from now on."

Current Events in Photograph

COMMERCIAL FLYING

The public is just beginning to realize the immense possibilities of commercial aviation. The war gave more impetus to flying than it would have gained under normal conditions in years. Not everyone knows that nearly ten billions of dollars are now invested by the various Governments in air craft of one sort and another. It is not planned to let this huge investment lie idle just because the war is over and some of the huge planes, like the one in the picture, are already in use and big developments along commercial lines are taking place. The direct routes possible by air and the great speed the planes can make will take many days off the records attainable even by the fastest trains.

The City of Hamilton

Make the Convention a Real Hummer

Splendid Program Has Been Arranged For the Big Gathering at Hamilton on February 18, 19 and 20—Many Features of Keen Interest to Hardware Dealers—Splendid Opportunity to Get Together

ARRANGEMENTS are all complete for the fifteenth annual convention of the Ontario Retail Hardware and Stove Dealers' Association, which will be held at the Royal Connaught Hotel in Hamilton, Ont., on February 18, 19 and 20.

A program of exceptional interest has been arranged. There will be something doing every minute that will not only be interesting, but instructive and profitable to every hardware merchant.

Hardware merchants, owing to conditions in general, and the scarcity of help in particular, have had perhaps the most strenuous twelve months in the history of the trade. They have been kept at the business grind steadily, and now that war conditions are over, a gathering such as the annual convention should bring them out in large numbers.

Should Get Together

There is no place like a convention for getting together and talking over the problems of the trade. One of the great troubles with merchants in general is that they have a tendency to keep apart instead of pulling together. It is only by getting together and hearing what the other fellow's problems are, and how he gets around difficulties, that you can solve your own. There are many big problems that affect the whole trade. Matters of this kind can be threshed out at such a gathering as that in Hamilton, and recommendations can be made that will be of benefit to the whole trade.

Apart from all this, every merchant has a duty toward the trade. If he can help make better conditions it is his duty to do it. It has been proven by actual experience that the quickest and most effective way of benefiting the trade is through associations. If every member takes an active part, tremendous results can be accomplished. Last year's convention was one of the best in the history of the association, and those who attended were more than pleased, as it was demonstrated to them just how valuable the sessions could be made. This year's convention promises to be an even greater success.

No Better Location

It would be hard to find a more desirable place for holding the annual meeting than Hamilton. It is a central point, and as such is easily and quickly accessible to hardwaremen from all over the province. Few cities have accommodation equal to that obtainable in Hamilton, and the quarters used for the meetings are most suitable in every way.

As far as Hamilton itself is concerned it has advantages that no other Canadian city can offer. It has forged ahead as one of the leading manufacturing cities of the Dominion and holds an especially strong place in the steel industries.

The manufacturers and business men of Hamilton are as hospitable as they are progressive, and miss no opportunity of showing to the visiting hardware men the numerous points of interest in the big factories or of entertaining them.

The Hamilton Spirit

This year when the question of selecting a meeting place was under consideration, Hamilton was the unanimous choice of the members of the committee. It was felt, however, that the Hamilton business men and manufacturers had been so generous last year that it was not fair to expect them to entertain the hardware men again. The matter was discussed thoroughly, and it was not until the committee members were assured that the Hamilton firms did not consider the matter in this light at all, but were only too willing to have the hardware men visit them again, that Hamilton was selected.

A Fine Program

With this problem settled the committee got busy with a program and they are confident that even last year's splendid program has been excelled. It will contain all the good features that made the sessions last year so interesting and profitable, and several new ones that were added with a view of giving dealers visible and practical demonstrations of how to handle important matters. An expert, for instance, has been secured to deal with the question of floor finishes, both wax and varnish. Another new feature will be a moving picture show entitled "The Troubles of a Merchant, and How to Stop Them." In addition to things like these there will be addresses by men who are in the closest possible touch with various phases of the hardware trade and manufacturing. They will discuss business conditions, the trade outlook, prospects of market conditions, prices and other points of keen interest to the hardware men.

Should Come Prepared

Hardware dealers should come prepared to make notes of everything that may interest them. There will be so

Programme

Fourteenth Annual Convention Ontario Retail Hardware and Stove Dealers' Association, Tuesday, Wednesday, Thursday, February 18, 19, 20, Banquet Hall, Royal Connaught Hotel, Hamilton, Ont.

TUESDAY FEBRUARY 18

10.30 A.M.

MORNING SESSION

Executive Meeting
Appointment of Committees
Reception of Members

2. P.M.

AFTERNOON SESSION

Open Session
Reception by Mayor and Trade Representatives.
Greetings by Mr. Adam Taylor of Guelph; Mr. H. P. Hubbard of Hamilton, for Manufacturers, and Mr. James Hardy of Toronto and others.
Address by Col. J. B. Maclean, Publisher Hardware and Metal, Toronto.

3. P.M.

MEMBERS' SESSION

Distribution of Officers' Reports and reference to proper Committees.
Consideration of Notice of Motion from 1918 Convention, as follows:
1st. "That the Membership fee in the Association be $5.00, for Associate Members $1.00, and for Clerks $1.00."
2nd. "That the name of the Association be shortened to The Retail Hardware Association of Ontario."
3rd. "That the office of Second Vice-President be abolished, and that the Executive Committee shall consist of three members in place of six."

3.45 P.M.

Ten minute talks by Exhibitors
"Windsor Solvent Stains." Mr. A. L. Mason of Standard Paint and Varnish Co., Windsor.
"Door Hangers and Track." Mr. R. K. Falkiner of Allith Manufacturing Co., Hamilton
"Kasement Screen Doors." Mr. W. H. Cunningham of Kasement Skrene Dore Co., Toronto
"Building Materials that are Easily Handled." Mr. Cale of The Alabastine Co., Paris, Ltd., Paris, Ont.
"Manufacture and Sale of Roofing." Mr. F. T. Bush of Bird & Sons, Hamilton.
Visit Exhibits

6.30 P.M.

TUESDAY EVENING

Banquet and Entertainment tendered by Wood, Alexander and James, Hamilton.
Visit Exhibits

WEDNESDAY, FEBRUARY 19

9.30 A.M.

MORNING SESSION

Series of ten minute addresses on prospects for 1919 by Manufacturers and Wholesalers.
"Wire and Wire Fencing." Mr. H. L. Frost, President Frost Steel & Wire Co., Hamilton, Can.
"Ready Mixed Paints." Mr. W. S. Fallis, Managing Director The Sherwin Williams Company of Canada, Limited.
"The Glass Situation." Mr. J. E. Harrison, Canadian Manager, Pilkington Bros., Ltd., Thorold, Ont.
"Wire Nails and Kindred Products." Mr. F. H. Whitten, General Manager Steel Company of Canada
"Stoves for 1919." Mr. F. M. Tobin, Secretary Stove Founders Association.
"Electrical Supplies for the Retail Trade." Mr. A. S. Edgar of Canadian General Electric Co.
"The Wholesalers' Viewpoint." Mr. C. A. Witwam of Hobbs Hardware Co., London, Vice-President Canadian Wholesale Hardware Association.
Mr. S. H. Alexander of Wood, Alexander & James, Hamilton, Can.
"The Manufacture and Use of Insecticides in Canada." Mr. Shirley P. Newton, Chief Chemist of Canada Paint Co., Montreal.

11.30 A.M.

Nomination of Officers
Nomination papers will be issued in advance to all members of the Association
Visit to Exhibits

1.30 P.M.

WEDNESDAY AFTERNOON SESSION

"The Gasoline Situation." Is a fixed retail price in this commodity in the best interests of the retail trade? Mr. F. J. Wolfe, District Manager Imperial Oil Limited, Toronto.

2 P.M.

"The Income Tax." Who is eligible and how to prepare financial statement. By Official of the Income Tax Department of Finance, Ottawa.

2.30 P.M.

"How to get the most out of your territory." Address by Mr. John C. Kirkwood, Business Counsel, Toronto.

3.30 P.M.

"Talk on how to advise customers to finish floors, both as to Wax and Varnish finish." Mr. William Home, Toronto, of Berry Bros. Inc., Walkerville, Ont.
Visit to Exhibits

7.30 P.M.

WEDNESDAY EVENING SESSION

Cash vs. Credit
"How I placed my business on a Cash Basis," showing Method of introduction and results. W. F. McPherson, Prescott.

8.00 P.M.

"The use of illustrations and prices in advertisements," an illustrated talk, Mr. Geo. D. Davis, Manager Hardware and Metal, Toronto.

8.20 P.M.

"The use of price tickets and show cards in windows, and results obtained," Mr. Nelson Mills, Hamilton, Vice-President, Mills Hardware Co.

8.40 P.M.

"How I made use of the Association Sales Bureau," Mr. J. B. Archer of Moore Hardware Co., St. Catharines.

9.00 P.M.

Motion Picture Show
"The Troubles of a Merchant and how to stop them." Mr. T. C. Warren, of Lecture Bureau National Cash Register Co., Dayton, Ohio.

THURSDAY, FEBRUARY 20

9.30 A.M.

MORNING SESSION

Election of Officers

9.45 A.M.

Address
Mr. Geo. A. Simpson, Hamilton, Sales Manager, Steel Co. of Canada.

10.30 A.M.

Ten Minute Talks by Exhibitors.

12

Luncheon and Entertainment tendered by Hamilton Hardware Manufacturers.

2 P.M.

AFTERNOON SESSION

Round Table Talk on problems affecting the Retail Trade.
Question Box.—An all round discussion in which every member should take part.
Drop your question in the box and win the experience of your fellow hardware men.

3.30 P.M.

Demonstrations at Exhibits.
Every Member is urged to be present at the opening session Tuesday, and stay to the finish.

Aggressiveness Should Be Motto of Canadian Manufacturer

A. A. Bittues, Managing Director Gillette Safety Razor Co. of Canada, Limited, Says Time Ripe For Big Manufacturing Development—Faith in Our Own Industries Fully Justified

THAT the Canadian manufacturer can undertake the development of his industry with every confidence and with a forward stride that he has not taken to date, is the opinion of A. A. Bittues, managing director of the Gillette Safety Razor Co. of Canada, Limited. To HARDWARE AND METAL he stated that there is every reason to face the immediate future with confidence, that manufacturers in general should adopt an aggressive policy, and that unless this aggressiveness is part and parcel of the development there will be a decided loss to industry generally. In other words, it is those who go after the business and who do so with a vengeance who will reap the reward of their labor. Just to that extent to which the Canadian maker of a given product binds his energies, just in such measure will the rewards be attained.

A. A. BITTUES

Managing Director of the Gillette Safety Razor Company of Canada, Limited.

Why Any Delays?

Mr. Bittues is a believer in the improvement of opportunities. Not only this, but he believes in turning opportunities one's way and making the most of the present hour. This has indeed been the governing policy of his company from its inception, and particularly since the war started. In support of this policy as an excellent one it is noteworthy that the company's products are shipped to, and sold in every part of the world. Export business has indeed grown so extensively that it has been difficult to cope with it at times and only the thorough systematizing of departments and the efficiency of the firm's policy has enabled it to take care of the immense export trade from all parts of the known world.

The above indicates clearly that export connections can be maintained and created, even under the unsettled conditions of to-day. For export demand has materially increased over recent months and the prospects are for a relatively large increase to come. Now, says Mr. Bittues, is the time for a forward and aggressive policy in foreign markets.

Bold Policy Necessary

Mr. Bittues is firmly of the opinion that what the Canadian manufacturers require at this time is a forward and constructive policy. Risks will have to be taken in that if Canada is to take her place among the manufacturing countries of the world she will have to assume a bold attitude which, to date, has been largely lacking. Since it is greater production that is required, if the competition of the world is to be successfully met, it is absolutely necessary that the mills turn out goods in such quantities as will reduce the unit costs to the minimum. Mr. Bittues is sure that the possibilities of developing overseas and foreign trade are so great at this time that any reasonable risk is justified. To feel one's way just now is not sufficient; overcaution is out of place; a bold, forward stride is the only safe one if big things are to be attained. No obstacles of transportation or of any other nature should be considered insurmountable.

Favors Standardization

That the manufacturer will have to get down to a basis of standardization is the opinion of Mr. Bittues. This has been one of the big factors in maintaining high costs. That his argument seems sound cannot well be doubted, for with manufacturing costs higher, with materials immensely higher than they were a few years ago, and with fine steel in particular scarce and high beyond any figures in the history of the trade, as well as labor and transportation costs, this company has been able to maintain its dividends and to exceed by a very large margin the net profits of any year in its history. Mr. Bittues therefore has a very effective argument in support of his claim that standardization must come, if, indeed, the manufacturer is to get down to bed rock and meet the competition of the world. "It needs little argument," said Mr. Bittues, "to convince a man that a hammer or a saw or other line can be made more cheaply if it is standardized and turned out in immense quantities."

Expansion is Vital

"Canada cannot develop her industries at home and find that sufficient," said Mr. Bittues. "Her population is not large enough. If we were confined to the Canadian market for our business it would be considered a very small thing. Even though there are perhaps a million to a million and a half men who shave, this would not be a large enough field for our product. Our export business has therefore been developed to reduce manufacturing costs, and this policy has been very successful. Just in like manner the maker of an average product must increase his business by seeking other markets. And we have been able to manufacture our own line here in Canada as cheaply as in the United States."

"Will it be possible for the Canadian manufacturer to compete abroad under existing conditions?" was asked of Mr. Bittues. "Yes, he ought to be able to do this. There are many countries to which shipment can be made under preferential tariffs. There is no reason why the manufacturers here cannot compete abroad and do it successfully.

"At the present time we have seventeen men out on special development work. They are not engaged in selling but in doing purely work of a missionary nature and investigating various conditions."

Thinks Real Preference

That there is really a bond of sentimental preference upon the part of England for her colonies is the belief of Mr. Bittues. Reports of late have indicated a very different condition. But with the sacrifices that Canada and the other Colonies have made Mr. Bittues feel sure that Canada will be given real consideration for the manufactured lines that she can supply.

In the matter of the development of Canadian manufacturing, Mr. Bittues is certain that it must become a big factor and that this must essentially go hand in hand with the agricultural development of the country. We cannot live within ourselves and the industrial development of the country can only be built up in a large way by an increase of output through export.

TWO INDUSTRIAL PLANTS TO LOCATE AT INGERSOLL

Ratepayers at Ingersoll, Ont. approved almost unanimously of industrial by-laws which will result in the Port Hope File Company and the T. E. Bissell Company of Elora, Ont., locating there. The Bissell firm was recently burned out with a loss of $60,000. The Bissell Company manufactures implements. The vote of the ratepayers empowers the Council to lease the Noxon plant from the Morrow Screw & Nut Company and sub-lease it for manufacturing purposes, and to grant exemption from taxation for a period of ten years. Both companies will begin operations as soon as their plants are ready.

Tripling Sales of Winter Accessories

The James Walker Hardware Co., Ltd., Montreal, Sold More Auto Accessories, Even Under Increased Opposition—A Steady Sale For These All Year Round —Care Has Kept Stock Clean and Saleable

"OUR sales during the first week of December were equal to those of the whole month a year before," said Manager Maxwell of the Auto Accessory Department of the James Walker Hardware Co., Ltd., St. James street, Montreal, to HARDWARE AND METAL. This indicates how interesting has been the development of this line with the firm and also goes to show that the winter months are not inactive periods. Montreal being one of the most typical centres from the standpoint of real Canadian winter, it is a decided argument that weather conditions should not disparage in any way the hardware dealer who has decided to handle automobile equipment. It has been demonstrated repeatedly that the automobile can run in all weathers and in a community where any closed cars are operated as well as some trucks, the hardware dealer will do well to obtain all the business possible from those using their cars.

Robes Big Sellers

A splendid range of comfort robes is handled at the Walker store. These are well displayed both in the store and windows. They also are frequently advertised. Mr. Maxwell pointed out to HARDWARE AND METAL that they had sold a large number this year for gift making. In one case a customer had purchased several as gifts for friends.

Replying to a query as to the grade of robes selling, Mr. Maxwell stated that a reasonably good quality met the requirements well. Some sales were made of high grades around $25 in price, but a larger number were sold around the $10 and $12 figure. At this price they were able to supply a durable article and the price was within reach of most buyers. One can soon test the wishes of the buyer in this respect.

Increase Under Competition

The business transacted in accessories is greater than ever before, and this under more active competition. As a matter of fact there are at least three large new factors in the local field, the past season having witnessed the entrance of this number of additional accessory concerns, each of them conducting business on a large scale. In addition to this there are a number of smaller stores carrying supplies in a more limited way. This would appear to be another argument in favor of the ild adage, that "Competition is the life of trade." However that may be, it indicates clearly that when one is aroused to the possibilities of selling a given line, he is induced to put forth his best and most serious effort in winning new business. In this new line of selling, the hardware man, to meet with reasonable success, should reach out after all the business that may offer.

Keeping Clean Stock

Eternal vigilance appears to have been exercised in the Walker store with regard to its accessory stock. Mr. Maxwell referred to this point when he told HARDWARE AND METAL that they had just one, or not more than two "lemons" in their accessory stock. That is to say, there was practically no money tied up in unsaleable specialties. They had just gone through their stock a day or two before. This was the net result of the investigation to ascertain its condition. It is a remarkably fine showing with so new a line. Even with reasonable care, a stock of automobile accessories is almost sure to accumulate a number of "dead ones," before the real sellers are ascertained.

Probably no better plan can be adopted than that of carefully considering the matter of a stock of accessories before it is bought. It would seem the part of wisdom, in any event, to go through the whole stock often and keep careful tab on any slow seller. Money tied up in nonsaleable goods is a great source of loss. Space is not only taken up, but the money invested might be profitably used in purchasing other lines that will sell.

Profits Are Good

Asked as to the profit end of their accessory department, Mr. Maxwell said that this was very satisfactory. He made the statement that the car owner is among the best buyers that came into the store. His car is not complete unless it possesses a goodly number of "trimmings" and as some of these buyers have very interested wives, they are pretty certain to see that their car is as well provided with extras as those of their friends. In fact much rivalry was manifest among a big class of buyers, and this kind of trade was well worth catering to. Provided that a radiator ornament, a foot warmer, running board mat, exhaust heater, and so on appeals to the owner or to his wife, the price was very frequently but a secondary consideration. This enabled the dealer to fix a fair margin on such goods and this line should carry a satisfactory return above its cost.

Altogether, the Walker stock has been gradually increased and with this increase of investment has come better business and more profit. The future, when cars are again made in increasing numbers, will be sure to open new opportunities of which the hardware men may take timely advantage.

EDITORIAL COMMENT

THE man who can't and the man who can, but doesn't, jog along together.

* * *

AS nearly as we can size it up the main idea of the Bolsheviki is to drop a monkey wrench in the wheels of civilization.

* * *

DO YOUR SHARE

THE value of a good local newspaper is much greater than many people seem to think. One way the home merchants can help not only to keep it good, but to make it better, is to patronize it and furnish it with ads. A little investigation will convince anyone that the great majority of people are just as much interested in reading attractively written ads. as they are in following the general news. Many merchants do not always appreciate the mighty power the press is in helping to carry on the business of the country and in maintaining its power.

FIGHTING MAIL ORDER HOUSES

FROM the standpoint of the retailer in the small towns one of the healthiest trade signs that has been apparent in many years is the way in which merchants are going after the mail order houses. One of the very best and most effective ways of doing this is to fight the department store with its own weapons, and this is just what the small town merchants have realized. The mail order houses base their entire campaign on advertising. Employed by some of the department stores are some of the brainiest advertising men in the country. They are men who have studied the question of selling by mail from every standpoint and they have centred their efforts in supplanting the personality of the salesman on the ground with a printed salesman in the shape of a cleverly worded advertisement. They have realized that in order to be successful their ads. must not only arouse, but must maintain interest. The same policy is carried out in connection with the "catalogues." Merchants in the small towns are more and more adopting the mail order firms, methods of advertising, and in so doing they are unquestionably taking a wise step. A study of well written, cleverly arranged advertisements is always profitable and there are many points which can be adopted from them.

FOUND THE LEAK

AN Owen Sound merchant had a peculiar experience last week when he unexpectedly solved the problem of why his cash register was not working properly. For some time past he had noticed that the cash very often did not check up with the showing of the register. Recently it was found that the drawer would not close properly, and on taking it out to locate the trouble the owner discovered a crack in it. On investigating further he found that silver had been clipping through this into the space at the back and that he had no less than $457.55 that he had not been counting in his receipts. It is believed that the silver had been accumulating a little at a time for five years, as a slip dating back to 1913 was also found. Incidents of this kind show how easy it is for losses to occur in business and how quickly they run up into a sum that is considerable. It is comparatively seldom that missing receipts turn up as happily as those of the Owen Sound merchant did. When the story got around in Owen Sound every merchant who had a cash register examined it, but only one other dealer discovered anything. He found $2 that had slipped away.

MAY BE BETTER SALESMEN

SOME one has said that the best school of salesmanship is the school of hard knocks and experience. It would appear that this is being proven by the fact that young men who went overseas and returned are now better at selling than they were before. It is pointed out that two of the disabilities common in young salesmen before the war were timidity and fright and lack of force. In many cases there was added to this, inability to understand or read human nature. This last was very often the result of inexperience, and of not having rubbed sides with the great buying public sufficiently to size people up quickly. It is stated that the conditions the youths had to face every day from the very start of their training was calculated to overcome these troubles To start with they were up against an entirely new set of conditions, and almost every minute they were meeting new men. They had to rely upon themselves very often, and on their own judgment depended a lot of their progress. In the case of young officers, who came in thousands from the business houses of Canada, it is stated this was especially noticeable. Some of them who when

they first started and had to give commands were almost frightened at the sound of their own voices. A few weeks though in the army and they developed confidence. The same was true of the men. The hard training, regular hours and the outdoor activity resulted in physical changes that wrought wonders in giving many of them the force they were lacking before. It is said there is no education like travel. This has also been exemplified in the case of the boys who have been "over there." They have learned new languages, they have seen how other people do things, they have broadened out and they are coming back to their positions with a vigor they did not have before, and with a confidence and force that would have taken years of experience to have acquired in the ordinary way. They will bring to Canadian trade an added vim that may go a long way in increasing business.

THREE BIG FACTORS

ONE of the most important things in connection with any store to-day is the sales force. The sales force includes more than your clerks and salespeople. Your show windows and your advertisements, if properly handled, can do just as much for you in quickening turnover, more in many cases than your sales staff can. Every good window display will produce direct results and the same can be said of forceful and timely advertising. An advertisement does not need to occupy a whole page of space to deliver its message. The combined efforts of a well-trained sales force, a well-dressed window and a well-worded advertisement makes a combination that cannot fail to increase business.

ANOTHER BANK MERGER

OTTAWA merchants are greatly disturbed over the amalgamation of the Bank of Ottawa and the Bank of Nova Scotia. At a largely-attended meeting they registered a protest against the merger and are following up this action by a proposal to buy enough of the stock to control affairs and prevent the deal going through. This is the fifth bank merger in a few years and is another step in the direction that has been noticeable for some time, that of consolidation. This tendency is noticeable not alone in banks but in manufacturing concerns and in merchandising also. As far as the banks are concerned, figures do not indicate that the public is receiving any less service. In 1912, with five more banks operating than there are to-day, Canada had 2,696 banking offices. To-day in spite of the reduction of banking companies, there are 3,550 branches.

COMMERCIAL AVIATION

COMMERCIAL aviation is progressing so fast that those who are not in the closest touch with the developments have little idea of what is being accomplished. Projects that a couple of years ago had not even been dreamed of are now being planned and many of the plans are well on the way to maturity. The public will awaken one of these days to the fact that an entirely new and very much faster service is available between points that are separated by thousands of miles. The importance of this to commercial interests is manifest and many other developments are expected to follow the establishment of air routes.

WHAT OTHER EDITORS SAY

The "Wall Street Journal" says the Kaiser's backers are quitting him von by von.

Germany's leading exports at present are railway trains, submarines, airplanes, Hohenzollerns and dukelets.—Vancouver "Province."

If the Bell Telephone Company will limit the length of local conversation to five minutes it will earn the clerical gratitude of busy people who occasionally want to say a word.—Brockville "Record and Times."

If some scheme for bringing the price to something nearer the normal level could be hit on it would be one of the best ways to bring about activity in the building trades and the consequent employment of a large number of returned soldiers. Certainly the question is one for the Government to think about, for every time a building proposition is mentioned the price of building material is raised as one of the objections.—Lethbridge "Herald."

Cost-finding systems are a comparatively recent innovation in business. In many instances, they have to win their way against the opposition of familiar methods. The number is not insignificant of dealers who think that they know the net profits of their store without entering into minute analysis of the various items which constitute the sum total of their accounts. The fact is that they have only the vaguest notion of overhead expenses. Indeed, some of them do not figure the overhead as part of the expense of merchandising. They have no way of estimating depreciation on the stock carried in trade. They fail to add to the cost of their goods the money which they pay for fire insurance, taxes, postage, telephone rental, gas, and electricity. Other items which the retailer often fails to take into consideration are his own salary as a worker in the store, bad debts, breakage, delivery, rents (whether he owns the property or not), interest on the investment he has in the stock, advertising, and many other expenses.—*American Artisan and Hardware Record.*

The Minister of Finance and the directors of the Banks of Nova Scotia and Ottawa seem to be entirely unaware of the fact that in proposing and consenting to another bank merger, despite the growingly strong protests throughout the country against the concentration of the banking business of Canada in the hands of a small group of men, they are not "doing what they like with their own," but are using the deposits of hundreds of thousands of people in a way that may be entirely objectionable to these depositors.—Toronto *Globe.*

What we have been going through in these last exciting years seems to have produced a tendency to exaggeration in what relates to the present and the future. There is great need of calming down and seeing things with a clear vision for the future. The terrible suffering and sacrifices of war are likely to result in provision for avoiding this in the future.—*New York Journal of Commerce.*

EVENTS IN THE TRADE

Business Changes

Sceptre, Sask.—J. L. Walker has purchased the hardware business of Frank Newby.

Millet, Alberta. — Millet Hardware Company to discontinue business March 1.

Filmore, Sask.—S. M. Stone of Creelman has taken over the hardware business of J. E. Wright.

London, Ont.—Wm. Odell has purchased interests of his partner in the firm of Odell and Mitchell.

Toronto.—W. D. Pritchard has purchased the hardware business of Ralph Iredale, 223 Danforth Ave.

Obituary

The death occurred at Elk Lake, Ont., of Elsneth Porter, of the Elk Lake Hardware Company.

Fire Losses

Fire which is supposed to have originated in the hardware store of Hawkins & Co., at Little Current, Ont., completely destroyed that building, Boyter's tin shop and fourteen other business places, causing a loss of $40,000.

Personals

T. M. Perry, of Estevan, Sask., who has been in Winnipeg, left Tuesday for Vancouver, where he will spend the balance of the winter.

Mr. MacLean, of the Western Hardware Co., Mossbank, Sask., was in Winnipeg on business recently.

L. A. Blackwood, of Morrison & Blackwood Hardware Co., Moosejaw, is in Winnipeg on business this week.

F. M. Hatch, of the Canada Steel Goods Company, Hamilton, who has been ill with influenza, is much improved.

Cleve Cuyler, of the Shiells Hardware, Kincardine, Ont., had his ankle badly twisted by falling on an icy pavement.

Arthur J. Wright, of the hardware firm of Jas. Wright & Son, Glencoe, Ont., has been elected Reeve for the third term.

A. E. Mulloy, formerly with the James Smart Mfg. Co., Ltd., is now covering South Western Manitoba for D. Ackland & Son, Ltd., Winnipeg.

The wedding took place on January 15 of J. E. Vick, of the staff of the Cochrane Hardware Co., Copper Cliff, Ont., and Miss Eva Bucknam, formerly with the firm of C. H. Parry & Co., grocers and dry goods, Copper Cliff.

W. F. Braun has been placed in charge of the tinsmithing department of Stade & Weido, hardware, Zurich, Ont.

Mayor J. A. Rollefson, of the Rollefson Hardware, Swift Current, Sask., was in Regina attending a meeting of the councils of the district with Premier Martin to discuss housing conditions.

J. G. McVeigh, of Toronto, manager of paint and varnish sales for the Du Pont Company, Wilmington, who has been ill with influenza, is recovering.

J. C. Breckenridge, sales manager for Ontario of the International Harvester Company, is seriously ill with pneumonia.

S. H. Whyte, president of the Wakyte Mfg. Co., Ltd., Winnipeg, who joined the Royal Air Force, has returned to business, having secured his discharge.

Roy Finley, junior partner of Finley & Finley, Kincaid, Sask., spent the first part of the week in Winnipeg and left on Wednesday for Minneapolis, and points south.

Friends of L. A. Willson, manager for Anthes Foundry, Limited, Winnipeg, will be glad to learn that he is on the road to recovery. Mr. Willson has been seriously ill for several weeks.

R. J. Lavelle, manager of the Hamilton Whip Co., Hamilton, who has recently underwent an operation for appendicitis, is improving rapidly and expects to be around again in a week or so.

R. F. Elliott, of Elliott Bros., Kingston, Ont., has been elected chairman of the Civic Utilities Commission. This is the third term Mr. Elliott has been elected to this position. He served in the City Council for many years, and also served a term as Mayor.

Frederick Moore, manager of Benjamin Moore & Co., Ltd., paint manufacturers, Toronto, left the end of this week for Halifax, N.S., and St. John, N.B. Mr. Moore will spend a couple of weeks in the Maritime Provinces in the interests of the company.

Trade Notes

James Weir, Bounty, Sask., hardware, is discontinuing business.

George Vinette, hardware, has been registered at Montreal.

Walter Waters has opened a hardware store at Riding Mountain, Manitoba.

D. A. Brebner, Limited, Hamilton, Ont., manufacturer of abrasives, has been succeeded by Coralox, Limited.

The Louis McLain Company, of Winnipeg, will locate an Eastern Canada branch at Kitchener, Ont., and C. A. Kern, sales manager for Ontario, will be in charge.

The Best Weatherstrip Company, formerly of 18 Ferguson Ave., Hamilton, Ont., has moved to new quarters at King and Kenilworth Sts.

The International Harvester Company of Canada, Limited, has purchased the Oliver Chilled Plow Works of Canada, Limited, Hamilton, Ont.

B. O. Parker & Co., hardware, Strathroy, Ont., plan to enlarge and improve their store. Alterations will be made and the store adjoining the firm's present premises will be occupied.

W. H. Bridgeman, of Winnipeg, who suffered a fire loss just before Xmas, is again getting his store in first class shape and is open for business as usual.

G. S. Collins is now associated with his brother, C. W. Collins, in the Collins Manufacturing Company, of Toronto, makers of poultry supplies. Prior to assisting in Y.M.C.A. war work Mr. G. S. Collins had several years' experience in the transportation business.

Whites Limited, Collingwood, wholesale hardware dealers and importers, are making extensive alterations in their main warehouse. They have built new cutlery and sporting goods rooms and have re-arranged and enlarged the shelving in the tool department. They are also installing an up-to-date electric hoist serving the three floors in the main building. These improvements will facilitate the handling of increased business and serve to maintain the firm's record of prompt and efficient service.

Montreal News

Mr. Merrill, of the Utica Drop Forge and Tool Co., was in Montreal this week.

Mr. Stewart, of Hamilton Cottons, was in Montreal on business this week.

W. F. Duffield, with the Reading Hardware Co., was a recent Montreal visitor.

L. E. Griffith, representing Surpless, Dunn and Co., is expected in Montreal on Monday.

John Richardson and Ernest Bureau, Montreal, were in Sherbrooke during the week.

Chas. Hossack, of the Lufkin Rule Co., Ltd., Windsor, Ont., was this week in Montreal.

J. W. Crowley, representative for Alexander Gibb, who has been ill with pneumonia, is recovering.

A. A. Seeley, representing L. B. Wasserstrom, 91 Gold St., New York, was a Montreal visitor this week.

A. H. Richardson, representing the Canadian Warren Axe and Tool Co., Ltd., St. Catharines, was in Montreal this week.

N. Wineroope, who represented Brandram-Henderson, Ltd., in Eastern Ontario, but who was with the soldier boys for some time, has been relieved of his duties in this capacity and is again back on his old territory.

Regina News

Frederick Hamm has returned to his duties after a few weeks' illness.

Mr. Tinline, salesman for the Robson Cutting Co., was in the city this week.

Mr. Brodie, Marshall Wells Co.'s paint salesman, is out on his spring campaign.

W. H. Hall, representing Pilkington Bros., Winnipeg, was in the city this week.

W. S. Bates, representing the National Rubber tire Filler Co., was in the city this week.

J. W. Smyth, of Armstrong, Smyth, and Dowswell, is ill with a slight attack of influenza.

Mr. Morrison, of the Moosejaw Hardware Co. visited the hardware firms in Regina this week.

H. I. Martin, the Wood, Vallance Co.'s auto accessories' specialty man, is in the city this week.

Mr. McLaughlin, traveller for Marshall Wells Co., Winnipeg, is able to be around again after an attack of the flu.

Stanley Anderson, representing The Garlock Packing Co., Hamilton, Ont., was in the city this week.

Mr. T. Waldon, sales manager for Marshall Wells Co., Winnipeg, spent a few days in the city this week.

Mr. Fletcher, representing the Partridge Auto Tire Co., Guelph, called on the hardware and auto accessories stores this week.

Incorporations

Union Iron and Metal Company, Limited, head office, Toronto, capital $100,000, plans to manufacture and deal in machinery and supplies.

McCoy Auto Lock Company, Limited, head office, Hamilton, Ont., capital $100,000, plans to manufacture locking devices for autos.

The Canadian Cartridge Company, head office, Toronto, Ont., capital $1,000,000, has been granted a Dominion charter.

Canada Iron Foundries, Limited, capital $1,000,000, head office, Hamilton, Ont., has been granted a Dominion charter.

The Aero Cushion Inner Tire and Rubber Company, of Ontario, Limited, capital, $300,000, will have its head office at Wingham, Ont.

Clark Pressed Metals, Limited, capital $100,000, head office, Toronto, plans to manufacture and deal in brass, steel and iron goods.

Dominion Sewer Pipe and Clay Industries, Limited, capital, $1,000,000. will have its head office in Toronto, and plans to manufacture building supplies and clay products.

Canadian Potteries, capitalized at $500,000, head office, St. Johns, Quebec, plans to manufacture pottery, earthenware, porcelain, enamelled metal goods and metal piping and fittings.

Knox Brothers, Limited, capital $1,000,000, head office, Montreal, plan to manufacture and deal in timber and to manufacture implements and hardware goods.

Hyde Engineering Works, Limited, head office, Montreal, capital $100,000, plans to carry on the business of tool makers, brass founders, iron and steel converters and to manufacture and deal in implements and hardware of all kinds.

John E. Riddell & Son, Limited, head office, Hamilton, Ont., capital $100,000, plans to carry on the business of sheet metal workers and roofers and to take over as a going concern the business of John E. Riddell & Son.

HELD SOCIAL EVENING

The staff of the Aikenhead Hardware, Limited, Toronto, were guests of Mr. T. E. Aikenhead, president of the company, at a most enjoyable social evening. The programme included a dance and euchre followed by refreshments. During the evening Mr. Aikenhead was presented on behalf of the staff with a handsome watercolor picture of St. Etienne Cathedral at Toul, France. The presentation was made by S. T. Sheppard, secretary-treasurer of the firm, and he also read an illuminated address. Mr. Aikenhead made an appropriate reply. During the evening musical numbers by Miss Donner and W. J. A. Lytle, manager of the firm, were much enjoyed.

AIKENHEAD SALES CONVENTION

A sales convention of the staff of the Aikenhead Hardware, Limited, Toronto, was held at the King Edward Hotel on Wednesday, Thursday and Friday of this week and was such a success that it is likely that similar gatherings will be held regularly. W. J. A. Lytle, manager of the Aikenhead company, was chairman and the programme included practical sales talks by W. R. Yendall of the Richards Wilcox Company, London, Ont.; F. A. Reid of the Clayton and Lambert Manufacturing Company, Detroit; E. H. Jones, Canadian Yale and Towne, St. Catharines, Ont.; W. N. Turnley, Dominion Battery Company, Toronto; Roy E. Harris, Renfrew Electrical Manufacturing Co., Renfrew, Ont.; W. Benson, Sherwin Williams Co. of Canada, Toronto; A. James Armour Sandpaper Works, Chicago.

CANADA METAL COMPANY ACQUIRES GRAHAM NAIL WORKS

A transfer of interest to the hardware trade has taken place in the acquirement of the Graham Nail Works, Toronto, by the Canada Metal Company Limited, Toronto. The latter company plans to go into the manufacture of nails in a large way and the plant started in operation this week. During the past few years the Canada Metal Company had expanded their business to a considerable extent and have added many lines which are sold through the hardware trade. It is intimated, although not officially confirmed, that the manufacture of nails by this company is only another step towards even greater activities on the part of the Canada Metal Company in making various products to be sold through the hardware trade.

MAKE SALESMEN SHAREHOLDERS

Customers of Sanderson Pearcy & Co., Limited, Toronto, may be interested in knowing that consequent upon the working out of the new plans of the company all its salesmen are shareholders, their long service records having been duly recognized. The list includes Messrs. Chas. E. Warnock, F. W. S. Davis, Jas. E. Booth, Geo. E. Temple, Harvey West, and Geo. Allen.

BARRETT COMPANY SALESMEN CONVENE

The sales staff of the Barrett Company convened this week in Montreal under the direction of H. C. Bonney, district manager, and D. P. Hatch, sales manager. Some forty salesmen were in from their territory for this event from all Canadian branches, and the interest manifest at all sessions was close and attentive. Recognizing the forward plans of industry and commerce, as well as the development contemplated on the farm and throughout Canada generally, this convention's programme had to do very largely with sales plans and methods. That the men profited by their assembling at the Canadian head office was expressed to HARDWARE AND METAL by the sales manager, Mr. D. P. Hatch.

Held Banquet

The convention was held on Monday and Tuesday. On Monday night the sales force was entertained to a banquet, and this was held at the Queen's Hotel. It was a very pleasurable part of the proceedings and a toast list of many numbers was proposed and the response made to these was very enthusiastic.

CAPTAIN FISHER HOME

Captain Fred Fisher of London, Ont., who went overseas as commander of "A" Company, 142nd Battalion, has returned and has been appointed demobilization officer for military district No. 1. He is a member of the firm of D. H. Howden & Co., Ltd., wholesale hardware, London, and on his arrival home was tendered a banquet by his associates.

AUTO SHOW IN APRIL

Although the trade association in Montreal decided not to hold their annual motor show this year, arrangements are being made for the National Automotive Show of Eastern Canada to be held April 5 to 12, in the Victoria Rink.

GILLETTE SALESMEN'S CONVENTION

SALESMEN from all parts of the United States and Canada as representing the Gillette Safety Razor Company, met this year in Boston from January 6 to 11. Those attending from the Canadian factory at Montreal were A. A. Bittues, managing director for Canada; N. P. Petersen, M. J. Maguire, G. P. Shortrede, C. H. Edick, F. C. Fitchie, P. C. Shaver, D. P. Cotter, H. S. Beecher, and W. F. Shaver.

There was naturally a great deal of enthusiasm this year, for with employees shareholders in a concern whose export and domestic business has developed wonderfully, so as to break all previous records, there could not be any other spirit.

While in 1917 the output of this company was 5,000,000 razors to the domestic trade alone, the records for 1918 showed that this had been surpassed by 45 per cent., notwithstanding the fact that there had been a shortage of blades.

As far as Canada is concerned, the export business from the Canadian factory at Montreal showed great growth. Orders from the London office, which are being executed largely from the Canadian plant, total at the present time 600,000 razors and 6,000,000 blades. Only last week in the neighborhood of twenty-two tons of razors were consigned overseas through Halifax—a very considerable tonnage of so small an article.

Unity of purpose and unbounded enthusiasm were the keynotes of the convention. Even though 1918 had been a record year, the salesmen are aiming at breaking this record in 1919, and plans have been laid down to meet a growing demand. To this end expansion is already under way at Boston, and the Montreal plant will, it is stated, be enlarged in due course to meet the demands made upon it.

The convention was concluded with a banquet, and this afforded the salesmen opportunity to voice themselves, and was pronounced a success.

EXPECTS BIG REVIVAL OF BUILDING

THAT there will be a revival of activity in building operations in many parts of Canada and that this will mean increased sale for axes and lumbering tools is the opinion of A. H. Richardson, of the Canadian Warren Axe and Tool Co., Ltd., St. Catharines, Ontario. To HARDWARE AND METAL Mr. Richardson stated that there ought to be a big increase in this business, and for the many who handle these lines in a big way it ought to be interesting information.

It will be recalled that the British Government recently announced its intention to purchase a great quantity of lumber from Canadian lumber mills. This is very probably but the beginning of larger orders, for there is immense construction to be undertaken there and in all parts of Europe. Mr. Richardson also thinks that the timbered lands of the various European countries that have been at war must be in a more or less unsatisfactory condition. If so, this will but further stimulate the demand for lumber from other parts, and Canada ought to get a great deal of this business.

But the needs of the Canadian people are also large. Even if there be a limited export development from the standpoint of the lumbering industry, the Canadian cities and towns are already short of needed housing, and there must be started in a short while, a building program of considerable proportions. This will mean that axes and saws and the various lumbering tools required to fell the timber and to prepare it for market, should be sold in large and increasing numbers.

Prices to Hold

Mr. Richardson is of the opinion that prices will continue to hold. "We are guaranteeing these for six months, and I do not think there will be any reduction from the present basis. There were large increases in our costs last summer, and the prices of manufactured axes and tools were not revised. Even at this time axes are selling for less money in Canada than the same goods are sold for in the States.

This ought to be encouraging news for the retail hardware man. Axes and lumbering tools are a big line. They will require to be displayed and the sales will be determined, to an etxent at least, by the initiative of the seller. Window displays and inside displays of this line ought to be timely now. There is money to be made if the business is sought and catered to effectively.

PRICES COULD BE MADE LOWER

A prominent stove manufacturer who had just returned from the meeting of the stove manufacturers' association held in Montreal expressed the opinion that if Canadian firms wish to meet outside competition it would be necessary to lower the prices on stoves. This manufacturer states that so far as his firm is concerned there are in a position to make a reduction in price and while his opinion appears to be the opposite to that expressed by several other stove manufacturers the manufacturer in question is well-known and his opinion is worthy of consideration.

AUTO EXPORTS DECREASE

In 1916 the Dominion exported 14,107 automobiles, valued at $7,174,440. The following year the exportation of motor vehicles fell to 9,879, valued at $4,717-593. Last year there was a further decrease to 9,019, valued at $4,307,475.

Brass Rolled in Canada

Wm. Bonner, Pictou, N.S.—Please give me address of manufacturers of brass "rolled" in Canada. Also give me address of the Manufacturers' Association.

Brass such as you want is manufactured or distributed by Brown's Copper & Brass Rolling Mills, Ltd., New Toronto, Ont.; Booth-Coulter Copper & Brass Co., Ltd., 115 Sumach St., Toronto; T. McAvity & Sons, Ltd., St. John, N.B.

The address of the Canadian Manufacturers' Association, Inc., is the Trader's Bank Building, Toronto. J. E. Walsh is the general manager. The Nova Scotia branch is at Amherst, N.S., in charge of H. R. Thompson, Box 93.—Ed.

Electric Coffee Grinders

Fred C. Bishop, Norwich, Ont.—Would you kindly send addresses of firms who manufacture electric coffee grinders?

Firms manufacturing electric coffee grinders are the Hobart Manufacturing Co., Toronto, and W. A. Freeman Co., Hamilton.—Ed.

Poultry Supplies

Ralph & Wilson, Dundas, Ont.—Can you give us names of manufacturers of poultry supplies, such as fountains, etc.?

Poultry supplies are manufactured or distributed by the following firms: Steel Trough and Machine Co., Tweed, Ont.; Collins Mfg. Co., Toronto; Model Incubator Co., Toronto; Geo. Keith & Sons, 124 King St. E., Toronto; Rideau Specialty Co., Smith's Falls, Ont.; Wm. Rennie Co., Ltd., Toronto; Carter's Tested Seeds, Inc., Toronto.—Ed.

Wheelbarrow Manufacturers

Kent, Garvin & Co., Ltd., Hamilton.—Please give us names of manufacturers of wheelbarrows in Canada.

Wheelbarrow manufacturers in Canada are: Wm. Kribs & Co., Hespeler, Ont.; Maxwell's Ltd., St. Thomas, Ont., Erie Iron Works, Ltd., St. Thomas, Ont.; John Watson Mfg. Co., Ayr, Ont.; Bateman-Wilkinson Co., Toronto; J. Fleury's Sons, Aurora, Ont.; B. Bell & Son Co., Ltd., St. George, Ont.—Ed.

ENLARGING PLANT TO MAKE ENAMELWARE

The Stamped and Enamelled Ware Limited, of Preston, Ont., have plans to greatly enlarge their plant and facilities for producing enamelware. An enlargement of the plant is now underway, and additional employees are taken on, and it is understood that the company intends to go extensively in the manufacture of enamelled ware, not only for Canadian but for export trade. It is expected that in the not distant future this firm will be producing enamelware on an extensive scale.

Says Firm Prices Likely to Prevail For Roofing and Paper

C. S. Jackson, general manager of the Canadian Roofing Mfg. Co., Ltd., Windsor, Ont., advises merchants to place their orders early because the home demands and export business may keep manufacturers very busy. Discussing prospects for 1919 with HARDWARE AND METAL he said:

"I might say the most appropriate word I could use to describe the business outlook would be the one that was so often spoken by the late Theodore Rosevelt—'Bully.'

"I shall not give my reason by making the time worn statement: 'History shows in every instance that the end of a great war marked the beginning of a wonderful era of prosperity,' for while this is quite true I believe that you would be more interested in an outline of the present situation without regard to precedent. However, I might say that basing our judgment on that belief, the fact that this has been the greatest war makes it necessarily follow that we will have the greatest era of prosperity.

Are Far Behind

"We have just passed through four years of war, during which time practically our entire energies have been directed toward winning of the war work, and our usual domestic duties have been neglected to such an extent that we are tremendously behind in our peace time operations.

"To illustrate we will say that a community that usually builds fifty buildings a year, to take care of its normal requirements during peace times, has during the last four years built but five buildings for this purpose, the materials for the other forty-five being used for war work. Therefore, at present that community is behind four years or one hundred and eighty buildings. This is, of course, only a figure of speech and applies to thousands of operations other than the construction of buildings.

Will Make It Up

"There is beyond doubt an average consumption of every article per year during normal times, and if we are behind, and there is no question that we are behind, we will make it up at once. In other words, milady who usually has two hats a season, and owing to the war conditions during the last four years has only been allowed one, will doubtless have three or four during the next season to make up for lost time. This is human nature and does not only apply to milady.

Stocks Not Heavy

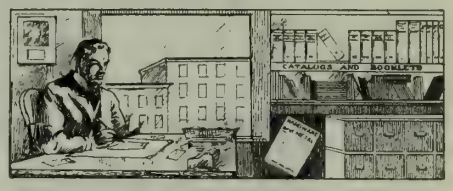
"There is no indication that there are heavy stocks anywhere and the merchant who is holding back his normal buying awaiting hard times is certainly a ridiculous object and compares favorably to the man who said: 'I will drown and nobody shall save me.' There is only one thing, and one only, that can cause hard times, and that is for every one to do as this merchant is doing. No matter how favorable conditions may be we can bring on a panic by getting scared, and for the life of me I cannot see how an ylevel-headed business man can see anything in the present situation to be afraid of.

Optimist Wins

"If you will stop to think the very man who is holding back and crying hard times is the same individual who said during the war: 'We cannot beat Germany, they are too strong for us,' and it was that individual who did us more harm than German bullets. Fortunately the "other man" was in the majority and we won the war, and I am happy to say that the 'other man' is still in the majority, and he is creating a feeling and a spirit which will bring us results beyond the hope of even the most optimistic.

"I find that the greatest period of depression was during the first week following the signing of the armistice, and since that time it has gradually disappeared until it is only a ghost of its former self, and if I were asked to-day as to the trend of the public mind, I would unhesitatingly answer that it was confident, firm and wonderfully optimistic.

Warns Merchants



"Let me here warn the merchant who is holding back and refusing to buy his normal requirements that the day is coming when the demand for our materials abroad will leave nothing for him and he will have no one to blame but himself. The war time cry that he cannot get material to run his business will not be accepted by his customers, and they will turn to the merchant who is far seeing enough to protect himself against just such a condition.

Little Sympathy

"Now is the time for the merchant to assist the manufacturer by taking in his normal requirements, and he had better do so, because the manufacturer will have little or no sympathy for the merchant who three months from now admits that he has no goods because he was afraid to buy them until he was sure good times were coming or that prices were not going down. The manfacturer is asking the merchant to help him now, and if he is not willing to give that help he can expect no mercy when the great wheels of industry begin to turn at a speed the world has never witnessed before, and that is just what will happen beyond a question of doubt.

Europe's Needs

"Devastated Europe needs and must have at once billions of dollars' worth of material for reconstruction. Canada needs thousands and thousands of buildings to relieve their terribly overcrowded housing conditions, and the world in general is returning to its normal business life and will use and use quickly all that it has been denied during the past four years."

NEW ACCESSORY CATALOG

Lewis Bros., Limited, Montreal, have just received from the press a handsome new catalog of auto accessories and equipment. This is of some 200 pages and is one of the finest and most complete illustrated catalogs of these lines yet published by the firm.

The catalog size is 11 inches in width by 12½ inches long and with a heavy cardboard cover suitably bound, it makes a real acquisition to the catalog file of the hardware merchant. Full illustrations in half-tone are given and special grade of heavy paper has been used to make the catalog as durable as possible.

The catalog is bound in bright red and is lettered in gold. Copies will be available about February 1, and readers of HARDWARE AND METAL may obtain one by requesting it.

The Collins Manufacturing Company, 411-415 Symington Avenue, Toronto, has just issued a new catalog listing a complete line of poultry supplies, incubators and brooders, hoppers, founts, sprayers and other lines. A copy will be sent to all readers of HARDWARE AND METAL who are interested.

The Canadian Warren Axe and Tool Co., Ltd., St. Catharines, has just issued a catalogue of Sager axes and lumbering tools, and also of the Soo line of lumbering and logging tools. The catalogue is fully illustrated and a copy may be had by anyone interested writing the St. Catharines office.

The Dougall Varnish Co., Ltd., Montreal, has a neat calendar. This is somewhat unusual in that a leatherette or fiberized panel, about 9x13 inches, is used. The same is a dull black, and the date pad is so arranged as to make the calendar perpetual. A set of cards provides for the day of the week, another set of these each for the months and the day of the week. The firm's trade mark is neatly printed at the top and beneath a limited amount of advertising.

Taking as its central feature one of the effective posters used during the past few months, Brandram-Henderson, Ltd., have issued a calendar which is bright and attractive in large measure. The scene is that of the youthful hardware salesman in the act of showing a customer a variety of paint, three colors of this streaming from the opened cans across the counter.

THE CLERKS DEPARTMENT

How to Retain a Valuable Clerk

Difficulties and Dangers of Partnerships—A Minor Interest in a Corporation Obviates These Difficulties—A Satisfactory Method of Bonusing

A MERCHANT has an exceptionally valuable, effective clerk. The man is industrious, earnest, a good salesman, skilful at display work. The time comes when such a man gets beyond the wage line. He cannot be paid more wages than he is getting because, no matter how it might be kept "confidential," the fact would become known and dissatisfaction would result with the others. Yet ways must be devised whereby that clerk can progress to higher earnings or he will be lost to the store.

The end can be reached either through giving the man some kind of interest in the business or paying him a percentage. Let us work it out both ways.

Time was when the custom of taking the senior clerk into partnership was common. In fact, the man began as a boy with that plan in mind, and everything shaped itself to that end. But many disasters warned merchants to go slow on that experiment. For partnership is like marriage: easy to get into but hard to get out of—and plain purgatory if not congenial, while the opportunity for legalized robbery is wide open.

Dangers of Partnership

The fundamental danger of partnership is that partners are not only equal owners, but, in the eyes of the law, each is the sole owner of the business so far as the outside world is concerned. Thus, the merchant who takes into partnership a favorite clerk to reward him and retain his services, may agree with the clerk that he gives him only a quarter interest in the business; but the minute the papers are signed, the clerk may exercise all the functions of sole owner. He may order goods to the limit of the responsibility of the business; he may tap the till, the safe and the bank account with utter immunity from danger of legal process, because the law says it is all his. The idea seems to be that, inasmuch as outsiders cannot tell anything about the inside agreements between partners, each partner is vested with full authority. Thus all who make contracts with the firm may have full protection and can evoke the law against all the assets of the firm to protect their contracts.

Aside from plain dishonesty and fraud, there is the great element of human nature. Plenty of men make agreements in entire good faith who later on come to misunderstand each other, grow apart, are estranged, become suspicious of each other, get to fighting and dissipate all their substance in quarreling and the costs thereof. We hear every day of cases wherein one partner puts it up to the other to "buy out or sell out—an' I don't give a continental damn which you do!" Often when the decision finally is made, there is nothing left either to buy or sell.

Contrast the Corporation

The corporation is another matter. There the assets are taken by the courts and formed into "an artificial person." Fred Hanson may be a grocer in his own individual right. He has absolute control over his possessions and can do with them practically what he likes. But when he incorporates into Fred Hanson, a corporation, he can do with his own as he wills only through sundry well defined courses of action, all subject to legal restriction. Moreover, Fred Hanson, a corporation, may consist of any number of natural persons over two.

If, then, the merchant desires to take into limited control his favorite clerk and give him an eighth of the business, he can accomplish this not only definitely but with comparative safety through incorporating and allotting an eighth of the capital stock to his clerk. Furthermore, since he himself still is sole owner of seven-eights of the business, he controls every particle of it as fully and exclusively after he has incorporated as while he owned it all; for his is the majority interest.

The beauty of the corporation is that it provides for a square deal to all. Each party in interest gets what is his—no more, no less—and it is safeguarded to him. Thus the clerk who is given an interest will have the interest secure from any "reniging" or change of mind of the old boss; but he can get no more than is provided for him through the action of the boss. There are other points, but these are all we need for our present purpose.

If the Boss Wants No Divided Interest

But let us consider the case of the man who has this kind of clerk whom he desires to retain and whom he wishes to treat equitably, but whom he does not want to take into the business in any capacity. Let us suppose that the clerk manages a department and also sells on the floor about as much as any one man can be expected to sell. Let us agree that he is being paid so liberally that any further advance in mere wages would lead to embarrassment with the rest of the help. How shall he be paid more without having an interest in the business?

Of course, there is always the commission plan. One always can pay a man a definite percentage for work done. The difficulty about one who has grown to importance on a salary basis is that it is hard to arrive at a basis of percentage which will satisfy him without entailing overbalancing difficulties.

Let us suppose the man is selling $600 a week, running the perishable goods department and drawing $25 wages. That may be $10 more than you are paying the next highest man, yet it is far within the average allowable wages expense simply figured on his sales alone. But again, he has attained to such sales ratio and been satisfied up to now, while doing all the rest of the work indicated. The man is so cheap that you cannot afford to let him go.

If you took 8% as the basis of wages expense on sales, you would have to pay this man $48 per week—and that, obviously would never do.

You might take $600 weekly sales as your basic figure and pay him as much as 10% on all sales in excess thereof. But if you did that you would have him so eager to makes sales in excess of $600 that undoubtedly he would neglect his other work and you would merely spoil a good clerk.

Really, there seems to be only one way to meet the difficulty: to give him a definite share in the net earnings of the business, either in addition to or in lieu of a salary. Of course, such a matter must be handled with great care and foresight. It will have the great advantage that if there are no net earnings, no bonus will be due the clerk, while every incentive will impel him to watch and work to the end that the business be made more profitable.

The Equitable Share

Suppose your records over a series of years show that your average net profits—I mean absolutely net, with all shrinkages; losses and reasonable depreciation of all kinds out—is $2,400 a year. It might be good to arrange to give the man ⅛ or 3-16 of the net profit in addition to his salary as now fixed. This is

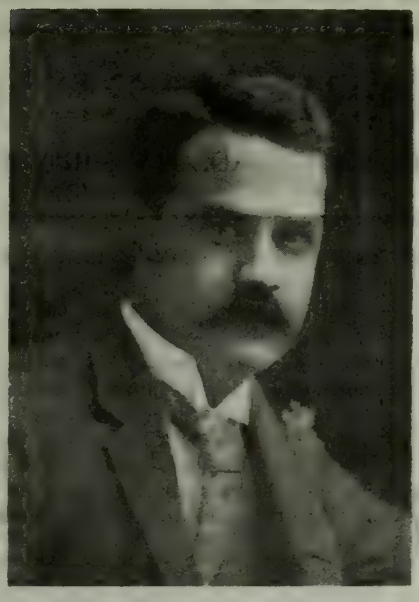
safe, for the net profits accrue over and above your expenses, and those expenses now include his salary. Yet this would give him $300 to $450 additional a year.

That figure would be well inside of the $48 per week to which 8% on sales would entitle him, while the chances are that, with such incentive to work, he would so exert himself, and be so greatly additionally helpful to you that he would more than earn his extra pay. Suppose, for example, that together you could make $3,000 net and your agreement was to pay him 3-16 of the net. His extra would be $462.50, and that deducted from $3,000 would leave you $2,537.50, or $137.50 more than your former total.

My excuse for discussing this matter is that I was asked a time since to write it in confidence to one who was faced with the problem. I hope, therefore, that it may be of some use to others.

ARE THE GIRLS TO BLAME?

The Editor of the Southampton, Ont., "Beacon" discussing editorially the coming to Canada of 50,000 British, Scotch, Irish and French girls as wives of soldiers says:



"Instead of complaining over the actions of their more successful sisters who have captured and are capturing by thousands the hearts of Canadians, let them of this and other Canadian cities consider where they stand.

It isn't to be wondered at that young men are fighting shy of marriage in this country, for the girls have made them afraid of the expense involved. Nowadays a girl is not content to start life where her parents started, or even where they leave off. She wants to start life on a scale that is simply ruinous to any young man except those earning enormous salaries, and there aren't many of these hereabouts.

Girls nowadays are demanding to be taken to the best shows. They want diamond engagement rings, and anything less than a $10 or $15 Christmas present is scarcely looked at. Then there are motor drives, boxes of chocolates, a house furnished on a costly scale when it comes to marriage, and so on, until it is no wonder the Canadian youth fights shy of marriage or keeps postponing it. They cannot stand the expense.

Over in England it is probable that the "get-rich-quick" craze hasn't yet reached our stage of magnificence. The girls are probably more human and appraising of values except the looks of our boys and so our Canadian girls are losing out. They want too much and are rendering marriage impossible."

The Pyrene Manufacturing Co. of Canada, Ltd., has issued a calendar entitled, "Burning the Debt of Home Sweet Home." The scene is that of a suitably tinted lithograph, showing a happy family of father, mother and child sitting before the lighted fireplace, and the mortgage is just being thrown on the flames.

W. A. MACLENNAN

Who as stated in last week's issue of HARDWARE AND METAL *died suddenly. He had charge of the sales office of the Steel Company of Canada at Vancouver.*

CHRISTMAS WINDOW CONTEST

Continued from page 41

with a Japanese parasol hung from the peak.

"The floor, which is in three steps, is covered with white cheese cloth and powdered mica to represent snow.

Specially Selected

"The goods which are displayed on these steps are those selected for the Christmas trade and are of the highest quality. Each article is priced in plain figures so that the price is well fixed in the mind of the shoppers. We find that it is much more effective having the price on each article, for often people are afraid to come in and ask for fear the price will be higher than they expected and they will be forced to buy. Whereas on seeing the price they will often come in and buy an article and perhaps see several other things they want before leaving. Hence by the free use of price tickets we have increased our sales many times, which is the main object of well dressed windows."

MAY ASK FOR INQUIRY

According to newspaper reports Eastern Canada farmers are preparing petitions to be forwarded to the Government demanding an inquiry into the high cost of fertilizer over that of last year. It is pointed out that fertilizer without potash should not have advanced in price at it has. The farmers will insist that a Government inquiry be made and they will further demand that the Government grant preference to perishable goods immediately for shipments to Europe.

MAKE THE CONVENTION A REAL HUMMER

Continued from page 46

many points coming up continually through the sessions, which will apply to the business of each individual, that unless he comes prepared with pad and pencil to make notes right at the time, he will miss many valuable suggestions. It is useless to try to trust to one's memory on an occasion of this kind. The only way to do is to make notes, and then they can be referred to afterwards and the whole subject may be recalled.

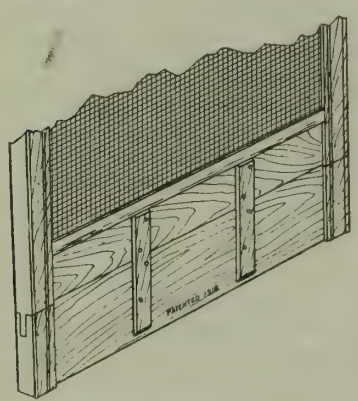
A gathering like that which is to be held in Hamilton on February 18, 19 and 20, affords a real opportunity that no hardware man can afford to miss. The points that he will pick up in regard to conducting his business will alone repay him for the trip, to say nothing of the opportunities of meeting the manufacturers, seeing how the products he handles are made, learning what conditions are likely to prevail in the future regarding markets and prices. The chance of meeting the other hardware men and of hearing them discuss their problems is worth while in itself. More valuable experience can be picked up in a short time in this way than the average merchant would gather in any other way in years. It is the men who are face to face with the business problems who can tell just what they have had to meet and how they met it. Many dealers have been surprised to find that the problems mentioned were often the very ones that they had been puzzling over and trying to figure out.

Hardware men who are not members of the association have an opportunity to come to Hamilton and join. The more members any association has, the more powerful will be its influence, and the more widely it can be exerted. It is the aim of the officers of the Ontario Hardware and Stove Dealers' Association to make the organization of real value and service to all members. One of the best ways hardware men can assist in doing this is by co-operating closely in every way with the work that is in hand.

All hardware men who are going to the convention are advised by the committee to purchase an ordinary return ticket. Owing to the abnormal demands on the railways, due to the returning troops and the forwarding of food stuffs, it has been impossible to secure reduced fares during 1919.

The Officers

The officers of the association are:



President, D. A. Macnab, Orillia; First Vice-President, A. J. Wright, Hamilton; Second Vice-President, Ed. Wanless, Chatham; Secretary, W. F. Macpherson, Prescott; Treasurer, John Caslor, Toronto. Executive Committee, F. B. Smith, Belleville; Jas. McGregor, Caledonia; A. K. Bernhardt, Preston; A. H. Wideman, Markham; A. E. Bottum, Bobcaygeon; Geo. E. May, Toronto. Auditors, Geo. Matheson, Toronto; J. W. Peacock, Toronto.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

A NEW SCREEN DOOR INVENTION

In certain cities and localities it has become a custom in building brick houses to use very narrow door sills, even narrower than the hanging-stile or door frame. This custom, it is said, has been the cause of much annoyance to the hardware dealers because in nearly every instance the front door step is built from 3½ to 7 inches above the verandah of porch floor, and in cases of

Screen Door Extension

this kind the dealer has not been able to sell a stock screen door that would be suitable and the householders have heretofore been advised to "build the step out" or let the door come down to the floor and fill in the top with a board.

The Kasement Skrene Dore Co., Toronto, has recently put on the market a new extension bottom which can be easily attached to their doors and which makes it possible to extend the length of any stock door from 3 to 7 inches according to the requirements.

The illustration herewith shows the inside lower part of a door with the Extension Bottom attached. The exterior, of course, is finished perfectly flush with the bottom rail of the door. The Extension Bottoms are made with mortises at each end which fit over the tenons already on every "Kasement" door, and there is also furnished with each Extension Bottom, two reinforced cleats. The bottoms are furnished in widths to correspond with the doors and can be had in any finish to match the doors.

The trade prices on the Extension Bottom with the two cleats, finished to match any 'Kasement" door, is thirty-five cents (35c).

Further information may be obtained by writing Kasement Skrene Dore Company, 183 Church Street, Toronto.

CHAMPION SPARK PLUG CO

The Champion Spark Plug Co., Toledo, Ohio, manufacturers of the Champion Dependable Spark Plugs, produces three types of plugs specially adapted for tractor and truck service. Of the three, probably the Champion "Tractor" plug is best known as it is used as regular factory equipment on Fordson tractors.

It is of two-piece construction which, it is stated, makes it easy to take apart and clean. The length of the shell, it is claimed, is just right to bring the electrodes into the combustion chamber and the fixed electrode has the sparking end of the electrode higher than the bend; in

Spark Plug

this way, it is stated, any oil which may get on the electrode will drip away from the sparking point.

The insulator, it is stated, is made of the finest porcelain mixture obtainable and patented copper gaskets lined with asbestos protect the shoulders of the porcelain where the pressure is greatest.

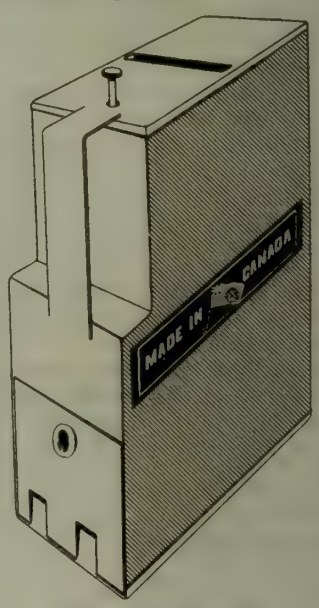
SE-MENT-OL LIQUID

Se-Ment-Ol Liquid, a product which it is claimed will add greatly to the convenience of the motorist, has been placed on the market by the Northwestern Chemical Co., Marietta, Ohio.

Se-Ment-Ol Liquid, it is stated, contains all the chemical properties of the original powder form, of Radiator Cement.

The motorists, it is stated, pours Se-Ment-Ol Liquid into the radiator and drives on, losing no time from business or pleasure, as it is not necessary to lay up the car to allow the repair to set or harden.

The water is circulated through the cooling system, it is stated, carries Se-Ment-Ol to the leak and on coming in contact with the air, it is claimed, it congeals and is hardened by the heat from the motor, forming an elastic repair which cannot be destroyed by the action of the water or the vibration of the car.



It is not necessary, it is stated, to drain the radiator.

SeMent-Oil Liquid

FARE BOX BANK

The Coleman Fare Box Co., Ltd., 1191 Bathurst St., Toronto, is putting on the market toy fare box banks. These are made in three sizes, and it is stated they are made up in miniature after the

Fare Box Bank

same style as the portable fare box equipment supplied to the street railway companies. They are made in three colors, red, green and blue. One style of bank is of rectangular shape and has a small sliding door with handle and slot for coins or tickets.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

FURTHER declines have been recorded in jobbers' prices of both galvanized and black sheets. The former have come down 80c per 100 pounds, and the black are down from 50c to 80c. It is indicated that basis now established is right in line with figures at the mills, and no further recessions from quotations adopted are expected unless the mills undertake a further revision in their prices. The tonnage coming to hand is considered very good, and salesmen are very keen on the trail of orders.

A marked lowering of values on white lead in oil has occurred this week. Prices now ruling provide for a decline amounting to $1.50 per 100 pounds. This move to lower levels is primarily a result of the downward trend of pig lead, with the lower values on linseed oil a contributing factor also.

Prices on linseed oil this week are again under the hammer, and quotations prevailing are at figures from 5c to 10c per gallon below last week's levels. The depression in the market on flax seed is in line with other grains, and the lower quotations have not served to stimulate buying interest to any extent. The same is true of the linseed oil, for even at low figures to-day there is only nominal interest shown. Prospects of an early spring, with an early painting season, may stimulate sales and start things moving in another week or two.

Quotations established this week on fuel oil are lower, the decline amounting to 2¼c per gallon. Coal oil and lubricating oils are unchanged, and gasoline is holding at steady levels. Business is very brisk and outlook bright.

Revised prices on discharge hose, suction hose, injector hose, rubber belting, canvas belting and endless belts have been issued, some showing slight declines, whereas others again are up from 10 to 25 per cent. Scythe stones, stove polish, self-wringing mops are higher, and toilet clippers have also followed the upward trend. Machine screws came in for revision downward, and new prices have been issued on shock absorbers and one line of churns which provide for a slight readjustment from recent figures.

Business is looked upon as seasonably good, and a much better feeling exists throughout the trade as a whole. Inquiries are coming to hand and that these will early develop into orders seems consensus of opinion. The outlook is considered very bright, and once things open up, which they will soon do, it is expected that business will hum.

MONTREAL MARKETS

MONTREAL, Jan. 23.—Hardware markets are fairly steady this week, but there have been a few changes, some of them in staple lines. Of prime interest is the announcement of a decline in iron and steel bars. This is 25c per 100 pounds in the case of common iron, and as high as 75c for some grades of steel. Mild steel, sleigh shoe steel and band steel are also on the same basis now as common bar iron. Other declines are those for carpet sweepers of various makes, wrought brass butts, and ingot tin, lead, antimony and spelter. Old materials are easy and quiet, while lead products are quiet and the undertone is easy. Fuel oil is likely to decline. The rope market has been firmer on advices from without, which indicate a stiffening basis for hard fibres.

Carpet Sweepers Less; Wrot Brass Butts

Montreal.

CARPET SWEEPERS, BUTTS.—Declines have been effected for carpet sweepers. Universal, japanned are now selling at $37 per dozen; nickel-plated at $43; Grand Rapids, japanned at $39, and nickel-plated at $45. Wrought brass butts are down approximately 10 per cent.

Nails Are Steady; Wire Unchanged

Montreal.

NAILS AND WIRE.—The market for nails is seasonable and there are no changes of any kind, wire nails of standard make selling still at $5.50, and cut at $5.85 per keg of 100 pounds. Standard smooth wire is steady and unchanged at $6.25 per 10 pounds.

Gas and Electric Ranges Will Sell

Montreal.

STOVES AND WARES.—That there will be a revival of special stove business is predicted here. The use of gas stoves is expected to be larger than ever, and that for oil ranges as well. The development of the electric range business is also expected to be greater this year than ever before. Regular stove and range business is naturally small at present, and while the demand for wares in a general way has been light, business is now coming to hand, orders already having been received.

Rope is Firmer, But No Change

Montreal.

ROPE AND CORDAGE. While there is no quotable change in the rope basis, the stiffening of prices on manila hemp outside leads to the possibility of prices

being revised upward, particularly on manila grades. There is a very much firmer undertone at this writing. Pure manila basis is 28½c; British manila 24c, and sisal 25½c per pound.

Basis is Held on Oil and Gasoline

Montreal.

GASOLINE, COAL OIL.—The markets are without change for both coal oil and gasoline, and a seasonable amount of business is being effected. The quotation for motor grade gasoline is 34c, and coal oil prices are: Royalite, 19c; Palacine and Electroline, 22c per gallon. There is likely to be a slight reduction in the price of fuel oil.

Little Trade in Sheets and Plates

Montreal.

SHEETS AND PLATES.—The week has not brought forth a great deal of change in the demand for sheets. The basis is rather nominal and various jobbers are making revision from time to time, although no quotable changes are effective as yet. Stocks are ample to meet the present needs of the trade.

BLACK SHEETS—		Per 100 lbs.	
10 gauge	7 25	$7 35	$8 50
12 gauge	7 35	7 40	8 50

22 and 24 gauge		.....	9 85
20 gauge		.....	9 65
18 gauge		.....	9 65
16 gauge		.....	9 50

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Iron, Steel Bars Down 25c to 75c

Montreal.

IRON AND STEEL.—A reduction in the basis of all grades of iron and steel has been effected and the changes are from 25c per 100 pounds to 75c. Thus the base price now for bar iron is $4.30 per 100 pounds, and one of the interesting features is that of band steel, mild steel and sleigh shoe steel being placed on the same quotation. Tow calk steel has been reduced 75c per 100 pounds to $5.20, and spring steel to $6 from $6.50.

Common bar iron, per 100 lbs.	$4 30
Refined iron, per 100 lbs.	5 30
Mild steel	4 30
Iron finish machinery steel	4 35
Norway iron	12 00

Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Lead Products Easy, But No Change

Montreal.

LEAD PRODUCTS.—There has been an easy undertone to these lines and it will not be surprising if revisions are made to lower levels on some products. With a continued decline in pig lead and the same available on a better basis than for some time, manufacturers will undoubtedly be able to offer a somewhat better price range, although this change, when effected, will doubtless be gradual.

Old Material in Quiet Condition

Montreal

OLD MATERIAL.—The condition of the markets is still very quiet. There is really nothing doing at the present time and buyers are not at all anxious to purchase even at the lower prices quoted last week. It is doubtful if the markets will be stimulated greatly for a few weeks.

Yellow brass	0 10	0 11

Automobile tires	0 04	0 04½

Tin, Lead, Spelter, Antimony Lower

Montreal.

INGOT METALS.—A sagging of values is still manifest in many of the ingots. Tin, spelter, lead and antimony are all down somewhat, and it is expected that an easy condition will prevail.

COPPER.—While there is no quotable change of price this week, the demand for copper is light, and the price holds at 25c per pound.

TIN.—With little business in sight, lower prices are being quoted and a basis of 66c per pound is now prevailing here. There are ample stocks.

SPELTER.—A slight shading of price is noticeable this week and sales are made at 9c to 9½c per pound.

LEAD.—Softness still characterizes this line and the quotations are somewhat below the figures of last week, $8.50 to $8.75 per 100 pounds being quoted.

ANTIMONY.—Half a cent per pound has been taken from the previous quotation and the price to-day in this market is 9½c per pound. Sales are light.

ALUMINUM.—At 43c per pound aluminum still holds, and this price is said to be close. Little business is obtainable.

TORONTO MARKETS

TORONTO, January 23.—Lower prices have been named on black and galvanized sheets, the former coming down from 50c to 80c per 100 pounds, and the latter 80c. On the basis now established jobbers indicate that absolutely rock bottom figures have been reached in line with prices at the mill and they are now keen on the trail of business which can be handled from ample stocks. Machine screws show a slight revision downward and pipe taps, reamers, countersinks and screw plates have in some instances declined slightly. Lower buying prices on some lines of scrap are ruling, but these are really only nominal, as dealers are not keen on securing further stocks. Fuel oil has come down another cent or two.

Business is fairly good and in another couple of weeks the movement of spring orders will, it is thought, be in full swing. Prospects are considered bright.

Machine Screws Revised Downward

Toronto.

MACHINE SCREWS. — New discounts have been established on cut-thread machine screws which provide for net prices below previous levels. This shows some readjustment, the oval and fillister head steel being unchanged, while other changes provide for declines of from 10 per cent. upward. The present discount on cut-thread machine screws are given herewith along with the old discount for comparison. These apply to standard lists:

	New	Old
Flat and round head, steel	27½%	27½%
Oval and fillister head, steel	10%	10%
Flat and round head, brass	15% plus	20%
Oval and fillister head, brass	net plus	20%

Screw Plates, Pipe Taps Down

Toronto.

SCREW PLATES, PIPE TAPS.—Revised prices have been issued on some lines of screw plates which provide for a decline of about 5 per cent. Similar action has been taken in reference to pipe taps, pipe reamers, countersinks and kindred lines, the new quotations ranging

from 5 to 10 per cent. below previous figures.

Wood Screws Hold Unchanged

Toronto.

WOOD SCREWS.—Discounts on wood screws show no revision during the week and indications seem to point to a very well maintained market for some little time to come. Canadian manufacturers, it is indicated, have not taken full advantage of advances recorded in the United States markets and unless very much lower levels were to be established there the situation here might not be affected very materially. Latest available quotations on the flat head steel in the United States markets are made at a basis of 67½ and 20 per cent. from list, while the Canadian price to-day is 72½ per cent., only a fractional difference. About the same difference exists in round head steel screws.

Prospects on Wares Good; Stoves Too

Toronto.

STOVES, WARES. — Travellers for enamelware and kindred lines are out on the trail again and business they are sending along is considered quite satisfactory. Sorting business is fair and booking for a little later date quite brisk. Indications point to a good movement and manufacturers are very busy getting stock ready to complete business on their files.

Business in stoves is a little quiet just now. This is a seasonable condition and the mild weather has been another factor to curtail sales somewhat. Prices are holding at unchanged levels.

Cordage Unchanged; Bookings Good

Toronto.

CORDAGE.—There have been no new developments as regards prices this week in relation to cordage. The manila hemp market is firmly held at slightly stiffer prices and this has strengthened the situation in rope somewhat. Jobbers report a very nice volume of business booked up for a little later shipment and the outlook is considered good. Prices to-day are held at following figures: Pure manila 28½c per pound base; British manila 24c; New Zealand hemp 24c; sisal 25½c.

Nails Remain at Unchanged Figures

Toronto.

NAILS, WIRE.—There has been no change recorded in the situation on nails. There seems to be some shading of prices going on but just how extensive this is cannot be determined. It is indicated that most manufacturers must be working on high priced rods and the only reason assigned for lower prices is to increase sales. Whether this result will be attained or not is just a question—such action often develops into buyers adopting a waiting attitude to see what will happen next. Generally, quotations are holding at $5.50 per 100 pounds base for the wire and $5.85 for the cut nails. The situation is just a little uncertain in view of price shading noted above.

Prices hold at unchanged levels for smooth steel wire with little demand recorded. The base price is $6.25 per 100 pounds.

Fuel Oil Declines; Coal Oil, Gasoline

Toronto.

OILS, GASOLINE.—A decline of 2¼c per gallon has been recorded in the price of fuel oil this week. On the new basis, barrels are quoted at 10¼c per gallon and tank cars at 8¾c per gallon.

No change has been recorded in prices of coal oil this week and indications point to a very active demand. Quotations being made to the trade range from 18½c to 21½c per gallon according to grade. Gasoline is without any special feature this week. Sales have been maintained at a high average throughout the winter season owing to the mild weather with a consequent increased use of cars. Price holds without change at 33c per gallon.

Bars Unchanged; Outlook Better

Toronto.

IRON AND STEEL.—It is understood that several Canadian mills that are maintaining merchant bar mills are giving quotations to the trade that put them in the position of meeting the base price for United States steel. They have not dropped their price to the exact United States figure; in fact, it is doubtful if they could do so and make any returns at all. But add freight, duty and war tax, and you will have almost the price at which bars can be bought in Canada to-day. This may mean a further slight revision in prices to the retail trade which will be taken care of in due course. For the present there is no further change in quotations shown below:

Common bar iron	$4 75	$5 00
Common bar steel	5 00	5 25
Refined iron	5 15	5 40
Angle base	5 25	5 50
Horseshoe iron	5 00	5 25
Tire steel	5 15	5 40
Mild steel	5 00	5 25
Norway iron	11 00	13 00
Toe caulk steel	5 90	6 15
Sleigh shoe steel	5 00	5 25
Band steel, No. 10	5 25	5 50
Do., No. 12	5 50	5 75
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Market Holds in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—There is little new to report in the situation in regard to corrugated sheets and kindred lines. The market is firmly held and there seems to be a fair amount of business, for the season, available. A little more activity is expected early this month and from then on it is hoped trade will open up quite actively. Quotations on eavetrough and conductor pipe shown in

BRIEFS FROM THE WEEK'S MARKETS

Galvanized sheets declined 80c per 100 pounds in some quarters this week. To-day's basis is said to be absolute rock bottom on mill values now. Black sheets came down 50c to 80c per 100 pounds also.

* * * *

A slight revision downward in waxing brushes has been recorded. Lower cast iron value is contributing factor.

* * * *

Machine screws, cut thread, have undergone a revision downward. New discounts provide for declines of 10 to 25 per cent.

* * * *

Fuel oil recorded a decline of 2¼c per gallon this week.

* * * *

White lead in oil registered a substantial decline this week, prices dropping $1.50 per 100 pounds. Lower pig lead was main contributing factor, though lower oil entered into the situation, too.

Linseed oil declined 20c per gallon at Winnipeg since last issue. Two 10c drops were recorded. Other markets show declines also, ranging from 5c to 10c per gallon.

* * * *

Lead pipe and waste came down another 1c per pound this week.

* * * *

Rubber belting shows a slight decline this week. Discharge, suction and injector hose, along with canvas belting and endless belts, came in for revision, too, some downward and others the other way, the advances amounting to 10 to 25 per cent.

* * * *

Lower buying prices have been named on some lines of scrap metals. Even at to-day's figures, there is little inclination to buy in evidence.

* * * *

Shoe polishes are lower and stove polishes have advanced, Winnipeg and London markets indicate.

current market quotations are without change; prices on corrugated sheets herewith are steadily maintained.

No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Lower Prices Named on Sheets

Toronto.

SHEETS, PLATES.—Lower prices have been named in some quarters on both galvanized and block sheets, the former coming down about 80c and the latter from 50c to 80c per 100 pounds. Prices named herewith are right in line with quotations from the mills and that lower prices than these will develop is not probable unless mill figures are revised; this is not an immediate prospect. The tonnage coming to hand is good and jobbers generally are in a position to take care of all business offering. The demand just at the moment is not heavy but activity is looked for at an early date.

BLACK SHEETS—			Per 100 lbs.
10 gauge	$6 00	$7 50	$8 50

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

Boiler Tubes Hold; Wrought Pipe

Montreal.

BOILER TUBES, WROUGHT PIPE—There has been no new developments of particular interest this week in boiler tubes. Prices are holding steadily at new levels reached last week and a fair amount of business is coming to hand. Jobbers report stocks in much better shape as a result of shipments from the mills coming in more freely and it is hoped that supplies will soon be available as wanted. Prices are shown below.

Wrought pipe reveals no further price changes from those noted last week and the trade generally has settled down to the new basis and is now keen on developing new business. The present scale of prices appears in current market quotations.

Boiler Tubes— Toronto—	Per 100 feet Seamless	Lapweld
1 inch	$32 00	$.....
1¼ inch	36 00	.....
1½ inch	39 00	32 00

3½ inch	70 00	54 00
4 inch	80 00	67 00

No Further Change In Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—No further change has been recorded in manufactured lead products this week, the market being steadily held at levels shown below. A fair amount of business is being transacted and manufacturers are very well satisfied with volume of orders coming to hand. Solder shows comparatively little change although wire solder is down another ¼c per pound in some quarters to 46½c. Other grades are held at unchanged levels as shown herewith.

Lead pipe, lb.		$0 13
Lead waste pipe, lb.		0 14
Lead traps and bends		Net list
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sqr. ft., in rolls, lb.	0 11½	0 12½
Cut sheets, ½ to ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	0 40	0 45
Solder, strictly, lb.	0 38	0 43
Solder, commercial, lb.	0 33	0 39
Solder, wiping, lb.	0 31½	0 45
Solder, wire, lb.	0 46½	0 54
Zinc sheets, lb.		0 26

Scrap Markets Show Little Change

Toronto.

OLD MATERIALS.—Conditions in the scrap market are not improving. Neither are they getting any worse, for the good reason that there is no business moving by which to judge. Although some dealers report fairly barren yards, they are not minded to go out and fill up even at the present low levels. Buyers are fairly well stocked in many cases, and do not want anything. Some further revisions from levels noted last week have been made in prices given herewith:

Dealers' Buying Prices—		
Tea lead, lb.	$0 03½	$....
Heavy lead pipe	....	0 05
Yellow brass	....	0 08
Red brass	....	0 10
Light brass	....	0 06
Heavy zinc	....	0 05
Heavy copper	....	0 15
Stove plate, per ton	.....	14 00
Old cast iron, per ton	....	18 00
Overshoes, trimmed Arctics		0 06
Auto tires	0 04	....
Bicycle tires	0 02½	....

	Per gross ton.
No. 1 railroad wrought	$15 00
No. 2 railroad wrought	8 00
Pipes and flues	8 00
No. 1 busheling	11 00
No. 2 busheling	7 50
Country mixed scrap	10 50

LIST PRICE CHANGED

The list price on the Playtime washing machine, Style B, has been changed. The new list provides for an advance from $19.50 to $22 each. Discount remains unchanged.

Belting Holds At Unchanged Levels

Toronto.

BELTING.—There has been no change reported in the situation on leather belting during the past week. Business is considered very good and prices are steadily maintained with indications that this condition may prevail for some little time to come. One manufacturer stated that stocks had reached such a low ebb during the war period that it would take a good six months yet before supplies were really back to what might be termed a normal basis. The outlook for business is generally considered very good.

Easier Tone in Lead; No Quotable Changes

Toronto.

INGOT METALS.—A somewhat easier tone is reported in the lead market but this has not yet been reflected in local prices. The entire range of metals shows little variation and no quotable changes are reported. The demand for all lines is within rather narrow channels just at the moment.

COPPER.—As far as the copper market is concerned there is no news of any change. It is indicated that there is no real business in sight at the moment but producers and consumers seem to feel that the situation will work out satisfactorily without any rushing on the part of the trade. Prices locally provide for no change, the basis of 30c per pound generally prevailing.

TIN.—The situation in regard to tin is reported unchanged and stagnant. Conditions remain much the same as last week, in fact there has been little of particular interest develop since the turn of the New Year. Quotations locally remain at basis of around 70c to 80c per pound.

SPELTER.—The market generally is considered weak, but there is no change worth noting. Primary points report straight declines with little or no activity apparent. The price holds around 9½c per pound.

LEAD.—The feeling is one of easiness and primary points report lower levels as having been reached. This has not been reflected locally as yet, quotations holding at 7c to 7¼c per pound. Activity is not one of the features reported in the situation on lead.

ALUMINUM.—Prices in United States markets rule at fixed figures, and will until March 1. This is having a stabilizing influence on the market, but there is little movement noticeable. Commercial interests are not yet absorbing any considerable quantity. Price locally holds at 50c per pound.

ANTIMONY.—No change in the price of 10c per pound locally has been reported. The spot markets at primary points exhibit some weakness with trading in futures practically at a standstill. There is little moving here.

PIG IRON.—No startling changes are reported. A steadier feeling seems to have materialized and the trade is proceeding with the work in hand. The ocean freight rate situation is being watched carefully by United States interests in anticipation of further reductions which will enable the producers to offer their goods in markets abroad at prices which will compare more favorably with British market values.

LONDON MARKETS

LONDON, Ont., Jan. 23.—A remarkable decline of $1.50 per 100 pounds in white lead in oil featured the markets this week. Lower prices have been recorded on linseed oil also, while turpentine has stiffened somewhat. Higher prices on scythe stones, mops and stove polish have been recorded, and a similar move has been made in toilet clippers as well. Prices on churns have in some instances shown some slight readjustment.

Business continues good, although the exceptionally mild weather is stopping the sale of many winter lines in this district.

Churn Prices Show Adjustment

London, Ont.

CHURNS.—The new prices issued on "Dazey" churns a couple of weeks ago have come in for a slight readjustment, and the quotations which are now being made to the trade, representing the new figures, are as follows: No. 30, glass, $20.75 per doz.; No. 40, glass, $27 per doz.; No. 200, metal, $3.65 each; No. 400, metal, $5.75 each; No. 600, metal, $6.85 each; No. 1000, metal, $11.50 each.

Shock Absorber Prices Announced

London, Ont.

SHOCK ABSORBERS.—Prices have been announced on H. & D. shock absorbers for Ford cars. The levels which have been reached are given as follows: Single arm: 1 to 5 sets, $7.50 per set; 6 sets to 1 case, $7 per set. Twin arm: 1 to 5 sets, $9 per set; 6 sets to case, $8.40 per set. For one-ton trucks: 1 to 5 sets, $15 per set; 6 sets to case, $14 per set.

Mops Higher; Stove Polish, Too

London, Ont.

MOPS, STOVE POLISH.—New prices have been announced this week on self-wringing mops, which provide for an advance of 25c per dozen. On the new basis quotations being made to the trade are at $5.25 per dozen. Self-wringing mop cloths are also higher in price at the new figure of $3.25 per dozen. Stove polish has come in for revision in some quarters, the Zebra line being quoted at $1.40 per dozen, which figure represents an advance over previous levels.

Scythe Stones Revised Upward

London, Ont.

SCYTHE STONES.—New prices are available on scythe stones, and these show an advance over former levels. The present basis of quoting which has been established is given as follows: Western Red End, $2.75 per box of 3 dozen; Clear Grit, $3.50 per box; Star, $3.85 per box; Quinebog, $4 per box.

Toilet Clippers Move Higher

London, Ont.

TOILET CLIPPERS.—Quotations have been revised on toilet clippers, and on the basis now established prices are higher. The figures which have been attained on the Brown and Sharp line of toilet clippers are given as follows: Bressant No. 0, $4.15 each; No. 1, $4.15 each.

Marked Decline in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—The market on white lead in oil has undergone a sharp revision downward this week, quotations being made to the trade at figures $1.50 per 100 pounds below figures ruling for some time past. It is indicated present basis will be maintained until July 1. The new quotations are for pure, $16.30 per 100 pounds in ton lots, and $16.65 in less than ton lots.

Wash Machines Enjoy Activity

London, Ont.

WASHING MACHINES.—Indications are that there has been an extra good sale in this district during the past month for washing machines and wringers, hand, water power, and electric. Prices on some of the best selling lines of washing machines follow: Hamilton, $7.56 each; Patriot, $11.97; Canada First, $11.97; New Era, $11.34; Ideal Water Power, $17.64; Connor Water Power, $18.90; Perfection Electric, $71.51.

Why not go down simultaneously?
—Morris for the George Matthews Adams Service.

Cross-Cut Saws in Fair Demand

London, Ont.

CROSS-CUT SAWS, HANDLES.—A very fair sale of cross-cut saws is reported and the market has held firmly at unchanged levels. Quotations now ruling are given as follows: Philadelphia Lance, 57c; Champion, 57c; Improved Champion, 57c. Maple Leaf Lance, Premier, Pangburn, Maple Leaf Racer, Arrow Head, Simonds, No. 22 and No. 13, 5 ft. $4.95; 5½ ft. $5.85; 6 ft. $6.60 each. Cross-cut saw handles are moving forward fairly well also. Prices have shown no recent change, the quotations today being given as follows: No. 6, $4.05; No. 6½, $4.05; No. 3, $5.30; No. 4, $4.05; No. 5, $7.20 per dozen. Lion, one man, $5.00 dozen only.

Oil Stoves and Heaters Moving

London, Ont.

OIL STOVES AND HEATERS.—A very fair movement of oil stoves is reported and a general movement to this trade is expected from now until March, the date set for shipment of spring orders. A good demand for oil heaters is still noticeable and prices on these, as well as stoves are well maintained. Quotations are as follows on some of the lines: Perfection oil stoves, 2-burner, list, $18.75 each; 3-burner, $24.25; 4-burner, $30.75, less 25 per cent. Perfection oil heaters, No. 525, list $7 each; No. 530, $8.25; No. 630, $10.25, less 25 per cent.

Putty Unchanged; Glass, Too

London, Ont.

PUTTY, GLASS.—Lower prices on linseed oil have not yet affected prices on putty, and the general feeling is that no immediate change will be made from present basis. Quotations to the trade to-day are: Standard, 100 lb. drums, $6.75; 25 lb. drums, $7 per 100 lbs.; pure, 100 lb. drums, $8.75; 25 lb. drums, $9 per 100 lbs. Window glass rules without change at firm levels, the following discounts still apply: Single diamond, 25 per cent. off list; double diamond, 25 per cent. off list; cut lights, 10 per cent. off list.

Linseed Oil Down; Turpentine Up

London, Ont.

LINSEED OIL, TURPENTINE.—Lower prices are again the order of the day on linseed oil, the decline for the week amounting to 5c per gallon. The market on seed seems somewhat depressed in line with other grains and the lower prices have not served to stimulate the demand on oil noticeable. Quotations to-day are: 1 to 2 bbls., raw, $1.55, boiled, $1.58 per gallon; 3 to 5, raw, $1.54, boiled, $1.57; 6 to 9, raw, $1.52, boiled, $1.55. Less bbls. add 10c per

gallon. Turpentine has followed the upward trend of Southern markets, being quoted to-day at an advance of 2c per gallon over former figures. Present basis is: 1 bbl. lots $1.12 per gal.; 2 to 4, $1.11; 5 gal., $1.22 per gal.

WINNIPEG MARKETS

WINNIPEG, January 23.—Markets during the past week again showed numerous price changes, some lines registering declines, while others show advances. The following lines are included in those to register advances: Rubber belting, canvas belting, endless belts, discharge hose, suction hose, injector hose and Norfolk latches. Linseed oil, wrought iron pipe, soldering coppers, bar iron and steel, and shoe polishes declined.

Business is reported to be brisk again, as many of the dealers have finished their annual stocktaking and are again replenishing their stocks. Spring orders in general have not started to move, but the next two weeks will no doubt see the start of the spring rush, and the outlook for a good year is very bright.

Lower Prices on Mouse, Rat Traps

Winnipeg.

MOUSE, RAT TRAPS.—A slight change has been made in the selling price of Victor mouse and rat traps during the week. New prices show a reduction of about 10 per cent., making to-day's prices as follows: Victor mouse traps, 30c dozen; Victor rat traps, $1.30 dozen.

Rubber, Canvas Belting Revised

Winnipeg.

RUBBER, CANVAS BELTING. — Prices for this season covering rubber belting and canvas belting, including threshers' belts, have just been announced. New prices on some lines show a slight reduction, while others show advances of from 10 to 25 per cent. over former quotations. The following are to-day's prices on a few of the lines:

RUBBER BELTING

Lion Brand	15-2½%
Western or Leader Brand (not over 6 in. wide)	20-5 %
For full rolls of above deduct an extra	5 %

Canvas Belting:—50% off new list.

Endless Thresher Belts:—

Feet	in.		ply	Rubber Price each.	Canvas Price each
100	6	x	4	$ 59.30	$ 55.00
100	7	x	4	69.20	62.50
120	7	x	4	82.65	74.50
150	7	x	4	102.80	92.50
100	7	x	5	85.70	85.50
120	7	x	5	102.35	93.00
150	7	x	5	127.30	115.50
100	7	x	4	79.10	70.50
120	8	x	4	94.45	84.00
150	8	x	4	117.50	104.00
100	8	x	5	98.05	.....
120	8	x	5	117.10	105.00
150	8	x	5	145.65	130.50
160	8	x	5	155.15	138.50
150	9	x	5	164.00	143.50
160	9	x	5	171.75	152.50

Suction, Injector Discharge Hose Changes

Winnipeg.

SUCTION, INJECTOR, DISCHARGE HOSE.—Revised prices have been issued to the trade on suction hose, injector hose and discharge hose for the coming season. These generally provide for a revision upward. Orders are now being booked for all these lines, subject to the usual terms. Quotations follow herewith:

Discharge Hose "Cable & Trade Brand," 1 x 3 ply, 19¼c ft.

Injector Hose—"Competition," 1 inch x 3 ply, 22c ft.; "Cable," 1 inch, 27½c ft.; "Yellowstone," 1 inch, 52c ft.

Suction Hose—J.C. or Cable, 2 inch, 15, 20 and 25 ft. lengths, 50c ft.; Yellowstone, 2 inch, 15, 20 and 25 ft. lengths, 75c ft.; Redstone, 2 inch, 15, 20 and 25 ft. lengths, 75c ft.

Hard Rubber Suction Hose—½ in., ¾ in., 1 in., 1½ in and 1¾ in., 3 or 4 ply, 33 1-3c ft.

Bar Iron Down To Lower Levels

Winnipeg.

BAR IRON.—Market prices on bar iron and steel show a slight reduction during the week of approximately 25c per 100 pounds. This change affects the following lines: Bar iron, $5.25 per 100 pounds, base; fire steel, $5.65 base; mild steel, $5.50 base; sleigh shoe steel, $5.50 base; all other lines remain at former levels.

Soldering Coppers Down 3c Pound

Winnipeg.

SOLDERING COPPERS.—Following the drop in the price of copper new prices have been named by the manufacturers on soldering coppers. Present quotations show a drop on the local market of 3c pound, and are to-day selling at 57c pound base, with the usual extras for sizes under 3 pounds per pair.

Further Change In Wrought Pipe; Down

Winnipeg.

WROUGHT PIPE—Prices on wrought iron pipe have again been revised during the week, showing a slight reduction over former quotations. To-day's market is as given below:

Wrought Iron Pipe—

Inch	Black	Galvanized
⅛	$5.76	$8.10
¼	5.40	7.74
⅜	5.50	7.88
½	7.38	9.10
¾	9.32	11.60
1	13.77	17.20
1¼	18.63	23.22
1½	22.28	27.77
2	30.00	37.40
2½	48.10	59.80
3	63.87	78.20
3½	81.80	100.80
4	96.90	119.30
4½	113.00	140.40
5	131.40	163.80
6	171.00	212.40
7	250.20	.....
8	262.80	.....

Latches Up 10%; Shoe Polish Down

Winnipeg.

LATCHES, SHOE POLISH.—Prices on Norfolk latches have been revised, due to increased production costs, and show an increase of approximately 10 per cent. Prices now ruling are given herewith:

Norfolk latches, unpolished: No. 1, $2.70; No. 2, $3.25; No. 3, $3.65; No. 4, $4.95; No. 5, $6.80 dozen.

Prices on "Two in One" shoe polishes, which are set by the manufacturers, have been revised to lower levels, and black, white, and tan polish is now selling at $1.20 per dozen.

Linseed Oil Sags; Down Twenty Cents

Winnipeg.

LINSEED OIL.—The price of flaxseed, which has declined during the past week, has been the means of lowering linseed oil prices. Present figures provide for a decline of ten cents on the local market. To-day's market prices are as follows: Raw linseed oil, $1.80 per gallon; boiled linseed oil, $1.83 per gallon; in single barrel lots.

Turpentine Goes Up Five Cents

Winnipeg.

TURPENTINE. — As predicted by HARDWARE AND METAL, prices have again advanced on turpentine, due to the limited supplies, together with the demand for export. New prices just announced show an upward trend of 5c per gallon, making to-day's selling prices as follows: Barrels, $1.30 gallon; ½ barrels, $1.33 gallon; 5-gal. lots, $1.35 gallon; 1-gal. lots, $1.35 gallon, plus the usual extras for containers.

Lead Pipe and Waste Down 1c

Winnipeg.

LEAD PIPE AND WASTE.—Lead pipe and lead waste have declined another 1c per pound in new prices just issued to the trade. The continued weakness of the pig lead market is primarily responsible for this move and quotations which are now being made to the trade are as follows: Lead pipe, $13.40 per 100 pounds; lead waste, $14.40 per 100 pounds.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Jan. 23—Steel mill operations continue to decrease. While there is noted an increase in specifications in a number of lines, the increase is not sufficient to take up the slack caused by old orders running out. The current rate of operation is variously estimated, estimates ranging from 60 to 75 per cent. of capacity. The variation is doubtless due largely to the fact that the mills do not present an even front at all in this respect, some running much better than others, while there are also great variations in different departments in the same mill. Thus one interest states just to-day that it is operating 50 per cent. in ingots, 60 per cent. in one finishing department, 75 per cent. in another and 80 per cent. in another. The great divergence between its rate of steel production and its average rate of steel finishing is due to the fact that it had an accumulation of ingots, due to the sudden cessation of war work, and it is now seeking to finish all raw materials on hand. No one cares to carry any stock of anything, production costs being high with prospects of costs as well as selling prices coming down. There are probably many cases like that of this mill, where more steel has been produced than has been finished. That would explain the curious fact noted in last report, that production of ingots in December, taking the industry as a whole, was at a rate 2 per cent. in excess of the November rate.

Business Increasing

The common testimony is that orders and specifications are extremely light, but that they are increasing. They will have to increase quite a great deal in order to support the present rate of steel output, or indeed to keep the steel industry operating at 50 per cent. of its capacity, and doubts are entertained whether that can occur in the near future. A relatively hopeful view of the near future is entertained by some observers, who point out that so far as business is concerned the signing of the armistice came at the worst period of the year. By the time war work was largely stopped the holiday period was upon the trade, always a very quiet time in the industry, and so there has been no good opportunity thus far for business to revive. Now, however, it may do so. The season of the year, however, is still unfavorable. Trade revivals have never come in January, but rather appear in spring.

Prices

According to all accounts finished steel prices are being strictly held. This is regarded as perfectly natural in the circumstances. It is not that the mills do not need orders, for if they want to operate at anything approaching capacity they do need them badly, but because there is no incentive or temptation to cut prices. Nobody is placing temptation in the way of the mills by offering large tonnages of business at lower prices. Nobody is buying or specifying except those who must have material at once, and they are quite as ready to act at present prices as at cut prices, perhaps more so, as if there were cutting buyers would then begin to wonder how long the cutting would continue. So it seems to be settled that present prices will continue for some time to come, perhaps until spring.

Production Costs

All producers feel that there is opportunity for a very considerable reduction in cost of production without basic rates of wages being reduced, and it is well settled that no general wage reduction is going to be attempted, or even thought of, for months to come. Labor performance has been very poor, but unemployment is increasing and workmen have become afraid for their jobs so that they are disposed to render more nearly a day's service for a day's pay. Those who are not willing, however, can be replaced by men who are now seeking employment. There have been printed rumors of men seeking employment and offering to work at reduced rates, but these rumors are not confirmed, and may have been put out from interested sources.

Apart from the reduction in labor cost that will come from a restoration or partial restoration of normal performance on the part of labor, there are various decreases in production costs occurring. Scrap, for instance, has greatly declined. Heavy melting steel under Government control was $29, delivered, dealers being permitted to charge 3½ per cent. commission, making the actual cost about $30. Moreover, a great deal of material was sold as "unguaranteed low phosphorus scrap" at $34, this being an evasion of the regulations involving that higher price since the material was used as ordinary heavy melting steel. In the past week mills have bought heavy melting steel at $20, delivered, and now fear that possibly they paid too much. This is $10 to $15 decline in cost of that material.

As to coke, there has been a slight softening in the market. Before the announcement last Saturday that the Fuel Administration price control of coke and bituminous coal would come off February 1 there had been sales of off grade Connellsville furnace coke at $5.50, or 50 cents under the Government limit. While the sales were excused on the ground that the material was "off grade," the fact is that previously such coke, no matter if off grade, brought the full limit. With control to come off so soon, Connellsville coke operators will probably start cutting prices at once. They have had the idea, or professed to have it, that the Government limit was a minimum as well as a maximum price, but they have lately succeeded in getting that idea out of their heads.

The export situation has, of course, proved a very disappointing one. There has been a very considerable volume of enquiry, but mills have been unable to take much business because while, as a rule their quotations at seaboard were a trifle less than the British, the ocean freights have been adverse to the extent of, say $20 to $40 a ton. Possibly this situation will soon be improved, however. Last week the Shipping Board announced: "Through its division of operations, the U.S. Shipping Board today (Thursday) announced the release of all American-owned steamships from requisition charter, excepting those in the service of the War Department or employed in other Government service. In the case of these the owners are given privilege to obtain from the Shipping Board steamships of equal tonnage which they will be permitted to operate on their own account." The releases occur as ships complete their present voyages. Also, there is a cable from Paris, which may or may not be authentic, that the Shipping Board intends to write off a depreciation of $1,000,000,000 against cost of the ships it controls, and perhaps an equal amount against the cost of the shipyards, whereby the board will be able to figure much lower freight rates. All this indicates, however, that mills in the United States should be eager to book Canadian orders at the regular "domestic" quotations.

Trade Inquiries

18. **Carbon black.**—A Glasgow firm who have been importing the above from the United States wish to hear from Canadian exporters.

27. **Cast-iron pipes.**—A South African commission agent, with an established connection, inquires for agency proposition from Canadian manufacturers of cast-iron piping for water and sewerage purposes.

29. **Iron and brass beds.**—A South African commission agent is making a special inquiry for the representation of Canadian-made beds in iron and brass.

30. **Paints and varnishes.**—A South African sales agent covering all centres of South Africa twice a year is prepared to take up a Canadian paint and varnish agency, also white lead and linseed oil.

31. **Closet seats.**—A South African commission agent calling on the trade in South Africa asks for correspondence and particulars, including f.o.b. Canadian port prices, from manufacturers of closet seats who are prepared to appoint an agent. Price must include selling commission. Kind of seats required illustrated in Weekly Bulletin No. 636. Copy may be had on request.

32. **Tools.**—A South African commission agent specializing for the hardware trade only is prepared to take up the representation of Canadian manufacturers of tools, household, farming mechanics and general. Correspondence is requested from individual or group of manufacturers with kindred lines.

Continued on page 74.

What's Your Selling Policy This Year?

Have You Figured Out a Course of Action?—Now is the Time to Settle it Definitely, and a Careful Study of Conditions May Help You in Deciding

WHAT is going to happen in Paints and Varnishes? This is the first and most natural rejoinder to the above question.

And you are asking something! No one cares to commit themselves to any definite answer; in fact, no one appears to have any idea of what is likely to happen.

While many in the trade are hoping for lower price levels they do not want them to come with their present stocks in hand.

In some quarters there is an apparent expectation of higher prices; others, again, are of the opinion that present prices will remain about the same for some time to come.

The writer is not attempting to foretell, prophesy or foreshadow what will actually happen. But he has his hopes, ambitions and the privilege of guessing along with the rest. At times he has his hunches on which he is privileged to act or refuse action as pleases his own sweet will.

So here is one guess to match against all the others that are floating around. And while at it, the reasons for this guess are given.

GOVERNED BY CONDITIONS

Under given conditions of the same kind, the economic laws of supply and demand act and react in a practically similar manner at all times. Price levels are largely governed by these laws as they respond to the conditions of the times. That is to say, the laws of supply and demand and the controlling influence they have on prices now the war is over, will be quite similar to the action following other wars.

Now, this will be largely a statistical guess. So we shall briefly examine the statistics taken upon price levels of commodities in general following the Napoleonic wars, the Franco-Prussian war, and the American Civil War.

Statistics bearing directly on raw materials entering into the manufacture of paints and varnishes or the manufactured goods are not available so far as is known. But deductions from the statistics on general commodities and foodstuffs will have sufficient weight for the purpose in hand.

In 1791, previous to the Napoleonic wars, prices of general commodities in England were at the index number 90. These rose gradually to 153 in the year 1800, when the food riots took place. A decline to about 118 took place till 1802, when the Peace of Amiens was signed. A further decline continued until 1803 and 1804, when 112 was reached. War was renewed with France in 1804 and prices began to again rise. France and Russia signed Peace Terms in 1807, but prices rose to 148 in 1809. Following the American War of Independence and Napoleon's Retreat from Moscow, prices continued to rise to 165 in 1813-14. When, in 1814 the European struggle began to exhaust itself, prices started on a gradual decline and reached 120 in 1816, but rose to 150 in 1817. Not till 1819 did they reach the former level of 90.

AFTER FOUR YEARS

Following the Franco-Prussian War in Europe, it was observed that foodstuffs, taking wheat as the key, did not revert to pre-war values until four years after the close of hostilities. Wages in neutral countries like the United States and Belgium took respectively three and seven years to revert to their old money value. Wages in France, the defeated country, remained below those of Germany for five years after peace was signed. Wages rose in both belligerent and neutral countries, after the close of hostilities, due in part to high food prices, and in part to the concurrence of a period of good trade with the demands to make good much of the material destroyed in the war or diverted to other uses.

How nearly Canada and the United States will approach conditions following the American Civil War remains to be seen. Some idea of the comparative rapidity in the rise of prices under war conditions, and the slowness of resumption to normal levels may be gained from the fact that from a ratio of 105 in 1860 prices rose to 237 in 1864, or in a period of three years. It was not until 1878 that they gained a ratio of 103, taking a period of 14 years to do so.

RAW MATERIAL PRICES

Already indications have come to hand that prices of paints, and especially varnishes, will remain

Continued on page 68

In City or Country
Moore's Paints

There is little in common between the huge skyscraper of the crowded city and the small pioneer's cottage of the open prairies. In one essential only have they a common interest, and that is **Paint.** It spreads its colour and adds a touch of beauty to both of them.

Moore's Paints have proven their worth and staying qualities against the dust, smoke and grime of city conditions, as well as standing the test of raging elements in unprotected places. You take no risks by lining up with a **Moore Agency.** Moore's Paint is so 100% efficient under all conditions that it sells on its merits.

Write us to-day for our interesting agency proposition.

Benjamin Moore & Co., Limited

West Toronto
Ontario

at the present levels, with the possibility of going higher. In fact, certain raw materials show tendencies towards higher levels for 1919.

Deducting by analogy from previous wars, and with positive tendencies indicated at the moment of writing, I am strongly inclined towards the belief that present price levels are very attractive.

How should our own cards be played? Is it any use fastening down to a definite programme?

Well, here is the writer's hunch. Buy at present price levels, and buy early to insure delivery. Raw materials are not any too plentiful, and March may see the trade thrust into a period of activity that will tax every facility to keep up with demands. But plan to have every available piece of stock over and above immediate requirements cleaned off the shelves by July at the very latest. As suggested previously on this page, clean out all old stocks at present price levels. Cut stocks to the bone, so as not to carry anything over during the summer.

In Healthy Condition

Now this does not pretend to prophesy lower prices in the summer. I am not guessing that far ahead. But no matter what comes, whether it be high prices or low prices, your Paint Department will be in a healthy condition to meet circumstances as they come.

If higher prices come, well and good! Buy accordingly. If lower prices come, you do not stand the chance of being caught with high priced goods on your shelves, and again—buy accordingly.

Nor must the fact be overlooked that from everywhere come indications of increased demands for paints and varnishes.

This is one man's guess.

If it is worth anything as a suggestion then it is time to soberly sit down and figure out a program for action. You may have a different idea; well and good. Sit down and figure your line of action out accordingly.

No rudderless ship at sea is in a more hopeless condition than a store without some pre-arranged plan of action. Where there is a definite plan there is hope; where there is none, there is chaos.

Now Is The Time

Now is the time to square off your timber and instruct your staff to hew to the line.

Activity in the agricultural industry will be probably greater than at any time during the war. Already industries supplying machinery for the farm are speeding up their plants. Demands in other raw material industries are increasing. This means demand for labor, with wage levels that will probably not be materially below those now existing. This means paint sales in both town and country.

Those who have postponed painting as a war measure will not stand the pressure that previous neglect will bring on them, very much longer.

Yes; I am positively optimistic about the future of the paint and varnish trade—and I am optimistic, and then some, about the man who sits down and formulates a definite policy about his Paint Department to meet the prosperity that Canada anticipates.

Foresight, reasonably planned and executed, is a handy thing to carry around. It doesn't eat itself up with overhead expense. It pays handsomely, and sometimes enables a fellow to say, "I told you so."

But now is the time to bring it into action!

"Million-a-Month Gain" in Paint Business is Firm's Objective

President of the Sherwin-Williams Company of Canada, Limited, Looks For Record-breaking Business in the Spring—Never So Much Work Held Over as at Present

"A MILLION-a-Month" gain is the objective of the Sherwin Williams Company of Canada, Limited, this year. In a letter sent out to the company's agents by President Walter Cottingham, he says he is confident the coming spring trade will break all records. It is only a question of preparedness, he says, and the shrewd retailer will see to it that he has sufficient stocks to take care of an unusual demand. Mr. Cottingham says the retailer will realize that he will lose the profits coming from this great demand if he waits until the last minute and trusts to "fill in" orders and the chances are he will be disappointed unless he anticipates his stocks.

WALTER H. COTTINGHAM

President of Sherwin Williams Company of Canada Limited who sees record business ahead this spring.

Million A Month Gain

Mr. Cottingham's letter is as follows :

"A few days ago we held a meeting of our headquarters staff, in my office, to discuss the million-a-month gain, and to make further plans to insure the success of this high aim.

"After carefully reviewing all the estimates and the progress made to date, we are convinced, while the figure aimed at is a very high one, it is within reach and we are determined to make the effort of our lives to "put it over."

We realize, very fully, this cannot be done by mere talk, or by bulletins, or by "hot air." But we are sure it can be done by intelligent, constructive methods, which will create actual business that will move our goods to the agents, and through them to the consumers.

The First Step

"The first step is to convince the members of our own organization that the proposition we are planning is a sound one, and the next step is for the members of our organization to convince, by reason of their own confidence and ability, their customers that we are right.

"That there are obstacles to be overcome, we recognize, and let us remember obstacles are the things that test our strength, our ability, our energy, and our resourcefulness. To overcome them, gives to effort a keenness and a delight that makes work actually exhilarating, and gives to it all the interest and excitement of the game.

"There is no doubt business must undergo a change before it becomes normal again, but the change will be gradual and will be effected without any upheaval. The man who hesitates, and holds back waiting for lower prices or more favorable conditions, will be disappointed and will lose a great opportunity for action and results now.

Channel Changed

"Business did not slump when war began, only to a very slight degree and for a very short time. It simply changed from one channel to another. A remand sprung up for new kinds of materials, brought about by war requirements, and the demand for some other kinds slackened, especially for such materials as were considered non-essential.

The same process, in my judgment, will be followed in getting back to normal. Business will not slump, but it will change. The demand for those goods, not wanted in war times, will revive again, and eventually trade will flow in the old channels.

"I am sure this is so, as far as our own industry is concerned. As to prices, the cost of our principal raw materials have changed very little—some have advanced since the war stopped, and our labor costs are at the highest point. Therefore, there are no grounds for reducing

our prices at present. It does not look to me now as if there can be any change for many months to come.

Larger Production

Believing this to be true, we ourselves are going ahead with a larger production program than ever before. We believe there will be a heavy demand for our materials this spring, and we propose to be ready to supply that demand.

"The big and vital thing, in my opinion, necessary to start business going strong, is to get out of the minds of the people that the bottom is going to drop out of things. It's not going to do anything of the kind. Fundamental conditions are sound. The country never possessed so much wealth. People as a whole never were so well off, and never has there been so much to do—so much unfinished work held over, just waiting for such a time as this.

The Way To Win

All that is necessary now is confidence, courage and enterprise. Confidence that the readjustment will be gradual and steady; courage to take hold when the weaklings are holding back; enterprise to strike out boldly and aggressively along new lines. And, let me add, for ourselves, determination and enthusiasm to put over whatever we undertake, as we have already done in spite of all obstacles, be what they may.

"The Million-a-Month Campaign is easy, compared to many of our past undertakings, and I have not the slightest doubt of our ability to make it the usual success. Yes, I will put it stronger—the greatest success of all our campaigns.

"We have the greatest and strongest proposition we have ever had, and we have the greatest and strongest selling force we have ever had. And we've got the confidence, the courage and the enterprise, and I know what you can do, and I have never been disappointed. Good luck to you!"

J. G. McVeigh Promoted By Du Pont Company

J. G. McVeigh, of Toronto, of the paint and varnish department of the Dupont Company, Wilmington, Delaware, has been promoted to the position of director of paint and varnish sales. His headquarters will remain in Toronto. Other promotions announced by the Du Pont Company are: T. O. Bannister, assistant director of sales, will be in charge of all paint and varnish trade sales. W. F. Donohoe, assistant director of sales, in charge of all paint and varnish industrial sales; R. W. Sample, manager of paint and varnish sales at Philadelphia; Giles McDaniel, manager of paint and varnish sales at Chicago; E. W. Tomlinson, assistant manager of paint and varnish sales at Chicago; A. H. Sarvis, manager of paint and varnish sales at the Flint Varnish and Color Works, Flint, Mich.

McArthur-Irwin, Ltd. Awarded Gold Medal

At the first annual meeting of the Builders' Exchange of Quebec City a presentation was made to the firm of McArthur-Irwin, Limited, of a gold medal. The following resolution was prepared and passed:—

"At the occasion of its first annual banquet after the war, the Builders' Exchange of Quebec will present to the firm of McArthur-Irwin, Ltd., of Montreal, the gold medal it has offered, and that the judges at the last exhibition have awarded to this firm for the finest exhibition and for the best paint products, 'Crown Diamond,' and for varnishes and enamels, 'Glidden Brand.'"

This resolution was used on the first page of the menu card.

John Irwin, general manager of the firm of McArthur-Irwin, Ltd., received the medal, which was presented by His Worship Mayor Lavigueur.

JOHN IRWIN

General Manager of McArthur Irwin, Limited, Montreal.

Speeches were delivered by many prominent members of the Builders' Exchange and by Mr. Irwin, Mr. Guy Higgin, Canadian manager of the Glidden Varnish Co., and by Leonard Mould, the Quebec representative of this firm. Mr. A. W. Poole, of the McArthur-Irwin Co., was prevented from attending through the effects of a heavy cold.

MUST BE CERTIFIED

All goods which may be imported into Canada from Belgium must have certificates of Origin and Interest issued by British consular officers in Belgium before they can be brought into the Dominion, according to an order which has just become effective.

Says Spring Bookings Are Ahead of Last Year

HARDWARE AND METAL has been giving in recent weeks a survey of the unusual conditions brought about through the cessation of the war. Many viewpoints have been given and the opinions and forecasts of many captains of industry have been voiced in these pages.

The managing-director of one of Canada's largest manufacturing enterprises states that business actually received so far has been very large and indicates most substantial increases over the relative periods of last year. Not only has this been so with regard to bookings for spring shipment, but the present volume of business is much ahead of the comparative business one year ago.

"There is no cessation in the effort of the department stores," he said. "They are reaching out for more business, are buying largely, and are anticipating a large season. It behooves the smaller dealer not to let his opportunity pass, but to secure the stock he can dispose of and have this when the demand comes for it. Canada has prospered and is prospering, has plenty of money and will spend it, and the merchant who is ready to sell the goods will secure the profits."

In the matter of price, labor costs are at their highest point, he stated. As far as production was concerned, it was going to be large in anticipation of the probable demand and if there was a sane and well-founded optimism upon the part of the trade, there would be nothing to fear. Orders have been coming to hand right along and business prospects were excellent for 1919.

CHANCE FOR CANADIANS

American manufacturers are seeking to largely increase their trade with New Zealand in motor cars and motor bicycles and there may be a chance for Canadian firms to get a good share of this business. Motor cars are being put to more practical use in the country than ever before, farmers using them extensively for different kinds of work about the farm and in transport wherever it is possible, using such attachments and improvements as are now on the market to adapt them to different kinds of work.

SCARCITY OF FLAX

Latest reports indicate that the flax market is likely to remain very firm as there are not likely to be sufficient supplies to take care of the world's needs. Advices from Belfast predict higher prices. This will have an effect on some lines of cordage. As far as Canada is concerned, it is stated there will be more flax raised this year than ever before, but even at that it will not begin to take care of the demands.

Quality First

In the long run quality is the deciding factor among most varnish buyers.

The high quality and uniform dependability of Berry Brothers' varnishes and their allied products, is widely recognized among all classes of buyers and consumers.

Varnishes, Enamels and Stains bearing Berry Brothers' label need no selling arguments—because it is known to be a guarantee that any product sold under it, is true to description and the best that can be produced for the uses intended.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 23.—Two very important changes are announced this week, a decline of a dollar and a half per 100 pounds being made on white lead in oil, and another seven cent decline being recorded in linseed oil, bringing the price in single barrels to $1.45 per gallon. This latter reduction is due to an easier movement of seed from the West, and also to the lower quotations made on Argentine seed. The lower prices for white lead are attributable to the sagging pig lead prices.

Turpentine is firmer this week and is quoted up five cents to $1.10 in single barrel lots. Stocks are not heavy of this commodity.

Business is looking up somewhat, and from now on it is expected that there will be a steady improvement in point of sales.

Linseed Oil Drops Another Seven Cents

Montreal.

LINSEED OIL.—Another decline of seven cents has been made in the price of linseed oil. Many thought the bottom had been reached last week, but further weakness in the Argentine and better deliveries of flaxseed from the West have contributed to make seed supplies more than normal for this part of the winter. In fact, transportation has been reported very satisfactory. Sales are not heavy, but at the prices now attained it is very probable that selling will be stimulated. It is also stated that at the prices ruling the margins are exceedingly small, and not ample to cover the present seed and manufacturing costs and leave anything of consequence.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 45	$1 52
5 to 9 bbls.	1 44	1 52
10 to 25 bbls.	1 43	1 52
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 47½	1 55
5 to 9 bbls.	1 46½	1 55
10 to 25 bbls.	1 45½	1 55

Turpentine Up; Five Cents Higher

Montreal.

TURPENTINE.—A gain of five cents has been recorded in the basis for turpentine. This is due to the bareness of supplies, and the outlook for increasing these has not been too rosy. Sales are not large, of course, but there is enough movement to keep the surplus stocks down to a small compass. In one to four barrels the price is now $1.10 per gallon, while some are asking as much as $1.20 for 5 gallon lots.

Turpentine—	Per Imp. Gal.	
1 to 4 barrels	$1 10	$....
Small lots	1 12	1 20

(Packages extra)

No Putty Change; Sales Light

Montreal.

PUTTY.—While there has been a considerable decline in linseed oil for some time past, the price of standard and pure putty is maintained. Some believe that the basis will hold, and there is no immediate prospect of lower levels being reached. Sales are naturally limited.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Declines $1.50

Montreal.

WHITE LEAD IN OIL.—As pointed out last week in HARDWARE AND METAL there was a probability of a decline being registered in the basis for white lead in oil. This has now been made effective and the reduction totals a dollar and a half per 100 pounds. It followed a decline of one per cent per pound for dry white lead and the new prices become effective at once. Prices are as follows: Five ton lots standard lead, $15.50 per 100 pounds; ton lots, $16 per 100 pounds, and less than tons, $16.35. Prices become immediately effective, but will hold at this figure until July 1, unless advances are considered necessary. The corroders state that there will be no lower price than this.

Paint is Steady; Orders Placed

Montreal.

MIXED PAINTS.—That the present basis for mixed paints will continue, is asserted by the paint makers. Costs for all materials entering into the product of past weeks and months have been high, and the basis for standard goods is likely to remain as it is at present.

Orders have been received from the country in goodly numbers, and some report their sales as even better than those of a year ago.

TORONTO

TORONTO, January 23.—Important changes are provided for in the markets this week. White lead in oil has declined $1.50 per 100 pounds, due to the continued weakness in the pig lead markets primarily, with lower linseed oil a factor. Further declines have been registered in linseed oil this week as well. The seed market seems quite depressed and little oil business is offering even at present levels. Turpentine is steady and unchanged. Mixed paint orders are coming along very well, and prospects are considered very good for Spring business.

Linseed Oil Lower; Business Quiet

Toronto.

LINSEED OIL.—Lower levels are again in evidence on linseed oil this week, the prices now obtaining providing for declines of from 5c to 10c per gallon. The flax seed market seems to be rather depressed these days in sympathy with other grains, and whereas prices have sagged still further, there has been little buying interest developed. Similar conditions extend right through to linseed oil, business just at the moment being quiet in spite of low price levels prevailing. There is not much movement looked for during the next couple of weeks, but with the possibility of an early Spring, activity will not be long delayed now. Quotations for the week range at following figures:

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1 48	$1 55
3 to 5 barrels, gal.	1 47	1 54
10 bbls. and over	1 44	1 52
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1 50½	$1 58
3 to 5 barrels, gal.	1 49½	1 57
10 barrels and over	1 47½	1 55

Turpentine Rules At Unchanged Levels

Toronto.

TURPENTINE.—No further change has been recorded in the situation on turpentine. Export movement is developing, and this factor is one which it is expected will stabilize markets and hold them at firm levels. There has been little change in Southern markets during the week, quotations holding at

FURNIVAL & CO.,

631 Dupont St., Toronto, Ont.

about the figures reached last week at this time. Rosin is steady and firm also, and with the export increasing no marked change downward is looked for in the immediate future. Turpentine prices locally range at these figures:

Turpentine--	Imp. gal.
1 barrel (barrel included)	$1 10-$1 12
2 to 4 barrels (barrels included)	1 09- 1 11
5 gallon lots	1 20- 1 22

White Lead in Oil Declines $1.50

Toronto.

WHITE LEAD IN OIL.—The situation in pig lead has been outlined weekly in HARDWARE AND METAL and the lower tendencies there with their probable effect on white lead in oil was mentioned in these columns two or three weeks ago. The results are now evident in a decline of $1.50 per 100 pounds on white lead in oil, which represents a substantial lowering of values. The present basis will, it is expected, be maintained until July 1. Prices now ruling to the trade on pure white lead in oil are $16.30 per 100 pounds in ton lots, and $16.65 per 100 pounds in less than ton lots. The various brands are shown in current market quotations.

Glass Firm; Putty Unchanged

Toronto.

GLASS, PUTTY.—The market on window glass continues one of strength, and there has been no apparent tendency to shade prices. Indications seem to point to a well maintained market for some little time to come, discounts shown in current quotations still being general.

Putty remains unchanged this week. Lower linseed oil has not yet resulted in any revision of prices, and until supplies of whiting are much improved, present figures may hold. The immediate future seems to hold promise of steady prices at following figures:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Mixed Paint Orders Coming

Toronto.

MIXED PAINTS.—There is not any great activity just at the moment in mixed paints, but the volume of business booked for Spring is considered good, and some movement of these is already under way. There seems to be a possibility of an early Spring, and the opportunities this will present should not be lost on the retailer. The paint department should be an active one this year and many retailers are already interviewing prospects. Whether lower white lead in oil and linseed oil will have any immediate effect on prices is not yet known. The effect will be felt in time, undoubtedly.

Slight Revision In Waxing Brushes

Toronto.

WAXING BRUSHES. — There has been a slight revision downward in the price of waxing brushes, due, it is stated, to lower prices obtaining on the cast iron going into the frame. As far as the bristles are concerned they are not a factor in this move, it being indicated that were present market values taken advantage of, a general revision in all brushes upward, to the extent of 10 to 15 per cent., would have to be made. Business in brushes, though quiet just now, looks good for Spring.

A National Crow Shoot

A National Crow Shoot which is open to contestants all over Canada and the United States is being held by E. I. du Pont de Nemours & Company, of Wilmington, Delaware. Every contestant who during 1919 shoots at 25 crows will be awarded a triangular bronze lapel button. To the bronze trophy winner in each province who shoots the largest number of crows there will be presented a gold trophy button, and for the second largest number a silver trophy button.

To the three gold trophy winners who shoot the largest number of crows during 1919 will be awarded, respectively, the following trophies, each to be appropriately engraved:

First National Prize, gold trophy cup; Second National Prize, silver trophy cup; Third National Prize, bronze trophy cup.

To receive credit in the contest, crows must be killed with a shotgun or rifle.

Evidence of crows shot is to be furnished by the contestant in the form of a signed statement, countersigned by an ammunition dealer, upon forms furnished for the purpose. It is expected that the contestant will furnish the dealer with evidence of his kills in the form of the bills or feet of the crows shot.

The contest will be open from January 1 to December 31, 1919.

The crow shoot in addition to ridding the country of birds which cause much damage, will, it is stated, stimulate sales of shells. Almost any load is good enough for killing crows and this may help dealers to clean up odds and ends of loads that may have accumulated.

Manitoba May Cancel The Moratorium Act

The Winnipeg *Telegram* says: "A movement is afoot to have the Manitoba Moratorium act cancelled and the protection which it affords debtors wiped out.

A counter proposition is also being advanced which would make the rescinding of the moratorium a gradual undertaking, still giving protection in worthy cases, but protecting creditors against impositions on the part of those who would take undue advantage of the act to refuse payment of obligations which could be met without stress.

The situation was discussed at a meeting of the members forum of the Board of Trade, following the receipt of a letter from Vere C. Brown. Mr. Brown suggested the discussion of the Moratorium act and the advisability of terminating it.

In the discussion which followed James H. Ashdown believed that an endeavor should be made to induce the Government to amend the Moratorium act in order to protect persons who were willing to pay, but who, at the present time, were not in circumstances to handle payments according to the original agreements and also that an amendment be made to protect those to whom money was owing and in which cases parties might use the protection of the Moratorium act to avoid carrying out their agreement. Mr. Ashdown, while not advising the extension of the Moratorium act, suggested that it might be made easier to some extent by the appointment of a referee to deal with such individual cases which might come to dispute, with power to decide the advisability of extension upon consideration of the individual cases involved and the circumstances surrounding them.

"In most cases," said Mr. Ashdown, "I consider that the Moratorium has been in force long enough, but I believe it would not be in the interests of the community to have an immediate cancellation of the act."

A committee was then formed to make preparation for future action. This committee consists of the following: Joseph Campbell, A. E. Ham, C. D. Shephard, C. Isbister, Ed. Anderson, Wm. Harvey, Vere C. Brown, W. H. Carter, J. H. Ashdown, Isaac Pitblado.

33. **Ploughs.**—A South African commission agent makes inquiry about the representation of Canadian manufacturers able to supply the cheap plough as used by the South African native.

35. **Reconstruction machinery, implements and raw materials.**—A Belgian co-operative company has been organized for the re-equipment of Belgian industry and for the reprovisioning of Belgian trade. They wish to receive offers from Canadian manufacturers of machinery, implements and raw materials of every description for reconstruction purposes. This organization is recommended by the Consul-General of Belgium in Canada and it will have financial assistance from the Government of Belgium.

36. **Agency.**—A large wholesale general merchant in La Bouverie, Belgium, would like to get in touch with Canadian merchants exporting brushes, chocolate, biscuits, etc.

38. **Representation in the United Kingdom.**—A British firm of manufacturers' representatives with headquarters in London and arrangements for the marketing of goods throughout the United Kingdom, wishes to get in touch with Canadian manufacturers of the following articles with a view to representing them as sole agents either on a commission or buying basis: Malleable iron steam fittings, electrical plant and equipment for all purposes, including shipbuilding; brass fittings, pumps, forgings, stampings, machine tools, etc.; tools of all kinds, wood manufactures, chemicals, household laundry machinery, toys, metal fittings for fancy goods.

It's Music to their Ears!

THE "Song of the Sale" bursts forth early and often from the P&L dealer's cash register, because his store is identified with that 24 carat, quick-sale line — "61" Floor Varnish in Colors!

It's music to the ears of the dealer because it means a quick turnover! It's music to the ears of the customer because he knows he is getting one hundred cents worth of durable, satisfaction-giving varnish for every dollar he invests.

"61" in Colors is the same reliable "61" Floor Varnish that has made good with P&L dealers and consumers for 30 years. It is backed up with a nation-wide advertising campaign to increase its already far-reaching popularity.

Let this advertising boost your store and link it up with that 70-year-old P&L reputation for quality varnishes. Write today for full particulars of Introductory Assortment.

What Varnish Do You Sell?

There is just as big a difference in varnishes as in paints. Cheap varnishes will not stand the test and cause dissatisfaction and disappointment to the user.

Dougall Varnish

is the line of entire satisfaction. Every user is a pleased customer. There is a Dougall Varnish for every purpose and our reputation and guarantee stand behind every gallon sold.

Our Proposition to the dealer is a good one. Write for it.

"Belleville" Hardware

A "Made-in-Canada" Product Equal to the Best in the World

We are all apt to look up to imported goods as superior to home-made lines. Pause before you concede anything to foreign products over "BELLEVILLE" HARDWARE. Here is a Canadian-made product that is as good as the best.

"Belleville" hardware is meeting the demand of the most particular architects and builders, and is recording wonderful success throughout Canada. It is a worthy Canadian product, worthy of the best Canadian patronage. All hardware looks very much alike to builders and architects until they have had experience with "Belleville."

Best line for dealers to handle. Has greatest demand. Get our proposition.

Belleville Hardware & Lock Mfg. Company

BELLEVILLE ONTARIO

CARTER'S

QUALITY

THE BEST

Your customers will need Red Lead to protect the iron work around their homes.

The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Watches and Clocks

We have built up a large trade in this line owing to the fact that in these particular goods the merchant appreciates service. The popular priced watch that sells for $1.75 carries the following guarantee. They are guaranteed to be running right and keeping good time when you sell them to the customer. If they cannot be adjusted or fail to give satisfaction, in say, one week's time, the customer can return the watch and have it replaced, and we in return replace it free of charge to the dealer. But the customer cannot use his watch until it is worn shabby and then have it replaced. We will have it repaired for him if he wishes at a slight charge. On clocks the guarantee is two years, and if they do not keep good time for that period we will have them repaired free of charge provided they are not abused.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Let this *Worthy* Brand Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want *you* to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will *pay* you to sell Jamieson Paints and Varnishes exclusively to your customers.

Talk No. One Hundred and Eighty-Three

The sheet metal worker who used "PREMIER" GALVANIZED SHEETS throughout the war made money—he paid less and got more—and he had the goods. The same will hold good in peace times—Buy the MADE-IN-CANADA SHEETS.

TINKER TOM

Look for Talk No. 184 next week

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

SELL
THRIFT STAMPS

THE dealer who encourages his customers to take their change in Thrift Stamps is giving valuable aid to the work of Reconstruction. He is helping to foster Prosperity by making small savings assist in financing Governmental expenditures.

Then, while he is doing that much for the country, let him do something for himself—

Buy
War-Savings Stamps

Indurated Ware

Far superior to metal and will last many times as long. Will not split, warp, crack or come apart. Eddy's washtubs, washboards, household pails, milk pails, butter tubs, cuspidors, etc., are made from this granite-like substance and will last indefinitely. Eddy's washtubs and pails will never show a leak—Eddy's butter tubs will never taint the product as wood is apt to do.

These goods being light, economical and practically unbreakable, are favorites in every home. Therefore, it will pay you to display them prominently in your store.

THE WAR IS WON

and arrangements for

Canada's Development Have Begun

Building programmes that were dropped on account of the war are now being taken in hand.

Factories are being enlarged, homes for workmen are in course of erection, good roads plans are under way, all of which means that there will still be

A Big Demand for

LONDON BAR IRON

Be prepared to supply this demand—don't be caught with short stocks.

London Rolling Mills Co.

LIMITED

LONDON, ONTARIO

Wall Cases, Shelving, Display Counters, Nail Bin Counters, Screw Cases—all kinds of Store Fittings.

The quality of our goods is top-notch. Prices right

CAMERON & CAMPBELL, Sole Manufacturers

Toronto, Canada

Why you should advertise on Buyers' Guide Page

Many dealers are sometimes in doubt as to where they can buy supplies of various kinds. The Buyers' Guide gives it to them in condensed form, easily located.

Advertise in the Buyers' Guide page and reach nearly all the aggressive Canadian dealers.

HARDWARE AND METAL

143-153 University Avenue - TORONTO, CANADA

"Delta" Files

—we'll help you sell them

TRADE MARK

DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

Horse Blankets for 1919

We are booking orders for fall delivery, and while prices are higher, we strongly advise customers placing orders now for what they require.
Prices will not be lower for 1919 trade.

THE "NEW" MACLEAN'S

Starting with the January issue, MACLEAN'S MAGAZINE comes out in a new size—11 x 14¼—same size as *The Saturday Evening Post.* This change will enable us to give readers more entertaining articles and stories, and a very much enlarged "Review of Reviews" Section. You will find this January issue of MACLEAN'S more pleasing and instructive than the great majority of magazines you find displayed on news-stands—and

contents are carefully censored—no sex stories—you can take it into your home with the utmost confidence.

A word about the contents—

"Why Laurier Will Wait"

In discussing the policy of the Liberal leader during the coming session of Parliament, J. K. Munro predicts, in January MACLEAN'S, that Laurier will allow Union Government a free hand. In this policy of inactivity "he sees the w y open to the accomplishment of all his purposes. If he is half the politician his friends believe h is, he will sit and smile and wait—yet a little longer."

All Canada is interested in what is going to h ppen in Ottawa. J. K. Munro, veteran press gallery man, is a shrewd observer, and his political articles in MACLEAN'S have stirred up more comment than anything else appearing in the p ess of the country. He knows politics from the inside. "Why Laurier Will Wait" is a forecast of the near future that bristles with interesting points. A few of the other "head-liners" in this issue:

Bolsheviks at Work in Canada

A sensational article on activities in subterranean circles. There are foreigners in Canada ready to wave the red flag.

Achievements of the Canadian Army

Since the Canadian Division was formed, they have not retired a foot nor lost a gun—a marvellous record. An inside story of how this great army was handled and controlled is told by H. F. Gadsby who spent a month at Headquarters during the last great offensive.

The Grave Dangers of Peace

An article by Agnes C. Laut on the insidious new propaganda being launched by the Germans to split the Allies.

Jock in a Juggernaut

The most interesting war article in a long while, because it is new—it deals with experiences in the tanks.

AND THESE AS WELL:

The Dance Halls of Dawson - By E. Ward Smith

My Hour - - - By Robert W. Service

The Strange Adventure of a Rialto Rainstorm - By Arthur Stringer

The Minx Goes to the Front - - - - By C. N. and A. M. Williamson

The Three Sapphires - - By W. A. Fraser

Mr. Craighouse, of New York, Satirist - - By Arthur Beverley Baxter

The Intercepting Spark, By Mary Josephine Benson

Over 65,000 Canadian Families Buy

MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

20c PER COPY. $2.00 PER YEAR. A TRIAL!—6 MONTHS FOR $1.00

MACLEAN'S sells for $2 a year—should be more. We want you to get acquainted with MACLEAN'S, for we know that after we once introduce you to "Canada's National Magazine" you two are going to be friends for life. So, to make you known to each other, we will accept your subscription now for only six months to start off with. In other words, we want you to "try out" MACLEAN'S, and see for yourself just how good it is!

Don't miss this unusual opportunity. Simply sign the coupon, pin a postal note to it, and mail it to us.

TO-DAY

Tear off here and mail

The MacLean Publishing Company,
143 University Ave.,
Toronto, Ontario.

I accept your offer. I am enclosing $1.00 to pay for MACLEAN'S MAGAZINE for six full months. Please start me off with the big January issue.

Why Not Use Facts? They are Excellent When of the Right Sort.

Then why not have your store equipped with the best and latest time and labor-saving devices? Our cash carrier service will afford one of them. The merchant without it is losing more dollars in one year than are required to defray its cost. Your money, by it, would be sent to the office, where it properly belongs.

Our circular—full of information—will tell you more about it, and a post card costs but two cents to enable you to get it.

TIME SAVER

The Time Saver Electric Washer

If any advertisement interests you, tear it out now and place with letters to be answered.

The Time Saver Electric Washer

IT IS THE POPULAR WASHER

This is the popular electric washer. It sells at a popular price. Even the labouring man can afford it. The Time-Saver will wash the clothes against any other washer, is far more simple in construction, and much easier to operate! The day will soon come when there will be a Time-Saver Electric in every home. Get in on the ground floor in your town. Write for particulars about our dealer proposition.

Letting You Into a Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

Helping The Hardware Dealer Handle Gasoline Trade

Hardware dealers building up a lucrative gasoline trade through the great increase in automobile and motor-truck operators can give speedy and convenient service by installing a Gilbert & Barker T-206 pump.

It discharges, exactly, gallons or lesser quantities as desired. Discharge register tallies from one to ten gallons. Such an outfit pays for itself by eliminating waste, and with underground tank, minimizes fire risk.

There are other G & B pumps delivering from one to five gallons at a stroke and suitable for the needs of dealers with a small or large gasoline trade.

G & B storage outfits for lubricants, paints and varnishes are made in different sizes; substituting safety and convenient service for fire risk and messy waste.

Write for catalogue or call at any branch of Imperial Oil Limited.

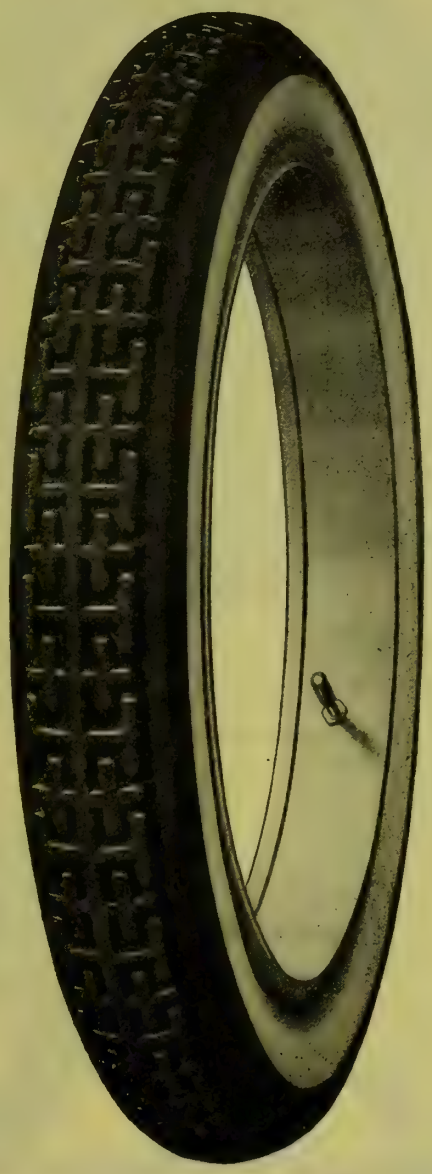
Paragon—

"Type of Excellence"



The excellent workmanship, design and material, typical of these tires, have made "Maltese Cross" the choice of discriminating motorists throughout Canada.

Only the BEST is allowed to go into their manufacture—only the BEST need you expect from their performance.

MALTESE CROSS TIRES

with their safe, certain treads and their *extra* volume of tough, hard-wearing rubber, offer you the utmost in Speed, Security and Service.

In all the essentials of a good, reliable, serviceable tire, "Maltese Cross" Tires with Paragon tread measure up to the name "Paragon"—type of excellence.

Champion
Priming Plugs

—eliminate delays and worry.
—make cold weather motoring more comfortable.
—help conserve gasoline and batteries.
—and, above all, increase your cold weather sales of spark plugs, by giving your customers the one article that makes all these things possible.

Champion Priming Plugs Price $1.50

Champion Priming Plugs will make your customers' cars start almost as easily in zero weather as in mid-summer. Show them how Champion Priming Plugs put the gas right at the sparking point—where the first turn of the engine starts it spinning.

Champion Priming Plugs save gasoline by enabling drivers to stop their engines when they stop their cars even in the coldest weather. Priming starts it again and saves unnecessary cranking or useless wear and tear on starter and batteries.

You can build bigger cold weather spark plug sales on these arguments. If you haven't a stock of Champion Priming Plugs, order them to-day from any jobber in auto accessories

Champion Priming Plugs carry the same guarantee as all other Champions—"Complete satisfaction to the user or free repair or replacement will be made."

"The Colts are Coming"

We will soon have good news for you, Friend Dealer

AS you know, it has been a long time since we have been able to fill orders from the trade.

The great Colt Factories have been attending strictly to Uncle Sam's needs.

But now there is a lull on the firing line. So just the minute we get the word we are going to switch and go full steam ahead on unfilled orders. Our dealer friends have waited patiently. A little more patience will be rewarded.

In the meantime, here is a little inside information:

The folly of unpreparedness has taught its lesson. It has changed our people from a condition of gunshyness to a desire for proficiency in the use of firearms, *AND THE PISTOL IS IN THE FRONT RANK!* The boys returning from "Over There" have learned the *business* of shooting. They will want to keep at the *sport* of it. Municipalities and the newspapers will foster target practice. The homefolk will want a gun for the house.

THE YEAR 1919 WILL BE A BANNER ONE FOR COLT'S FIREARMS

We give you these facts so that YOU may be prepared. Get your order in early for COLTS—the firearms that helped to bring the boys home victorious and are going to be desired in preference to all others.

If any advertisement interests you, tear it out now and place with letters to be answered.

12,000,000 brake bands

Why your brake lining business will be bigger in 1919 than ever before

THE coming year will be the biggest year ever known for the sale of brake lining. According to official registration figures there will be approximately 6,000,000 passenger cars and trucks in service which have been run at least one season. The brake linings of these cars are worn, and the owner of every single one of them is a prospect for a new brake lining. Altogether 65 million feet of brake lining will be needed.

Here is an opportunity for you to increase your business. Make these winter months, ordinarily so dull, pay you a profit. Get a list of the cars in your territory. Go after the owners hard this month and persuade them to have their brakes relined before the motoring season opens.

We are backing up your efforts by starting our big spring advertising drive in all the leading publications. We are convincing these 6,000,000 owners of the need of new brake lining and the value of Thermoid. We are showing them the difference between Thermoid Hydraulic Compressed Brake Lining and the ordinary woven kind.

Start right away to get your share of this big market. Recommend Thermoid Hydraulic Compressed Brake Lining to every customer. Thermoid will build good-will for you by giving your customers longer, surer service.

Every foot of Thermoid which you put on is backed by ***our Guarantee: Thermoid will make good—or WE WILL.***

YOU SHOULD SELL WEED CHAIN JACKS

The most easily operated Jack on the Market

Weed Chain Jacks lift a car by a few pulls on a chain and lower by a few pulls in the opposite direction. The operator can stand away from the car, clear of the wheels, mud guards and tire carriers. This feature is especially noteworthy where cars are operated by women.

They are made of malleable iron, black enamelled; the base is extra heavy to prevent upsetting; the top is concave to prevent slipping of the axle. The lifting screw is cold rolled steel with square machine-cut threads. The gear housing is stamped steel, and the chain is heavily plated to prevent rust.

A Weed Jack purchaser is a pleased customer.

The Big Annual Spring Buying and Directory Number of HARDWARE AND METAL

Canada's National Hardware Weekly

will appear on

March 22

The advertisements in HARDWARE AND METAL'S Annual Spring Number are salesmen who are right on the job when Canadian hardware merchants are placing the biggest orders of the year.

Hardware buyers in Canada hang up their copy of HARDWARE AND METAL'S Spring Number, close beside their desk. A cord is inserted in the upper left-hand corner for this purpose.

Impress buyers with the importance of your firm and the quality of your goods! Make the impression strong and lasting by using big space in the biggest and best annual issue of any Canadian trade paper.

There is scarcely a hardware store of importance in any part of Canada where you will not find HARDWARE AND METAL.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

STOVE REPAIRS FOR ADMIRALS, CLIMAX, Pen Esthers, Acmes, Crown Hurons, Garlands, Colonials, Marvels, Silver Kings, Souvenirs, Imperial Oxfords, Jewels, Peninsulars, Sterlings, Oak Laurels, Sunlights, Pandoras. Write for full list of stoves and prices. Grundy Bros., Strathroy, Ont.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Gardens and Orchards

Are a safe investment when

Sprayed with CANADA PAINT insecticides

C-P PARIS GREEN
for Potatoes

C-P ARSENATE OF LEAD
(Dry)

In powdered form 1 pound will do the work of 2 pounds of Paste. No loss from freezing or evaporation.

C-P KALCIKILL
Arsenate of Calcium
(Lime)

C-P DRY LIME SULPHUR

For combination Spraying only needs to be added to water to be ready for use. No danger of evaporation or loss from frost.

C-P ARSENATE OF LEAD
(Paste)

A Neutral Paste Arsenate for Spraying.

C-P BUG-O-CIDE
The Potato Growers' Friend

It is a recognized fact by all fruit growers and owners of orchards that spraying must be done at certain times during the year. Market conditions are so uncertain. The quantity of insecticides available cannot be depended upon. Help your customers by placing your order for their requirements now.

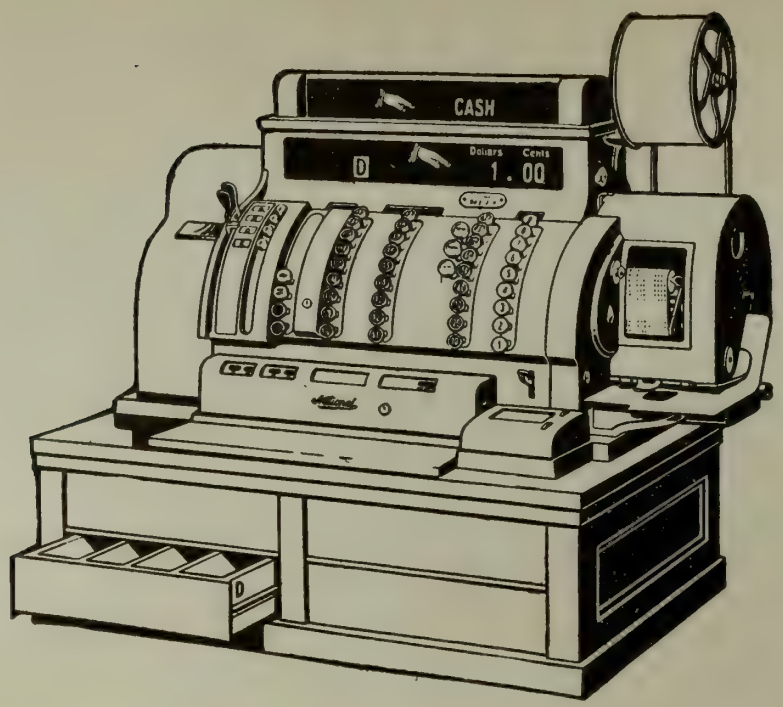
PAROID

ONE OF THE

NEPONSET ROOFS

For the Farm—Paroid should roof every building on the farm from the big barn to the pig pen and poultry house. No matter what size the building is—it pays to roof it with Paroid.



For Factory Buildings—Industrial Plants, Railroads and other large concerns have been using Paroid for twenty years on large and small buildings, sheds, shops and tool houses. It is fire-resisting. It defies rain, snow, sleet, sun and heat. It lives long—delivers satisfaction and proves its economy by stubborn wear.

As a Thrift Roof. Paroid is now being laid over old shingles to form the new roof. This procedure eliminates the trouble and cost of tearing off the old roof and the results are quite satisfactory.

"Forward Canada" is now the watchword and the building trade is about to receive a new impetus. Stock Paroid—as the demands for it will soon be heavy.

The best store improvement you can make

The best store improvement you can make to-day is to install a modern National Cash Register — because it will build up and systematize your business.

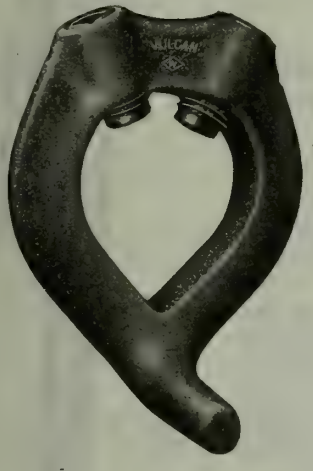
A modern National Cash Register will raise the tone of your store, make your clerks more efficient, and put you in the class of up-to-date merchants.

It will enable you to save expense in running your store, and thus release money for other purposes.

It will make possible quick, accurate service to customers — the greatest inducement that any merchant can offer to get and hold trade.

It will give you unequaled protection, that will check every cent of your profits into the bank.

It will give you information that will enable you to control your business.



A modern National Cash Register is a store improvement that will quickly pay for itself out of what it saves.

In the face of increased competition you cannot afford to postpone making this improvement.

The National Cash Register Company, of Canada, Limited, Toronto, Ont.
Offices in all the principal cities of the world

Williams' "Vulcan" Drop-Forged Safety Lathe Dogs

INDUCE your customer to start right. Show him that without extra cost Williams' "Vulcan" *Safety* Lathe Dogs provide absolute and certain safety for the operator; in fact, safety is *automatic*—there is no "if" or "but" about it. Also, that the ordinary dog is far surpassed in design for better balance on the lathe, greater strength and longer life.

Bent and Straight Tail
1 or 2 Screws—Sixteen Sizes
$\frac{3}{8}$ to 6 inches capacities

And for yourself, don't forget that while we originated the present standard form of *Safety* Lathe Dog some years ago, for nearly half a century we have been making *Superior* Drop-Forged Tools—the kind that stand up in service. They have earned and enjoy an enviable repute in the trade. Add their prestige to your own.

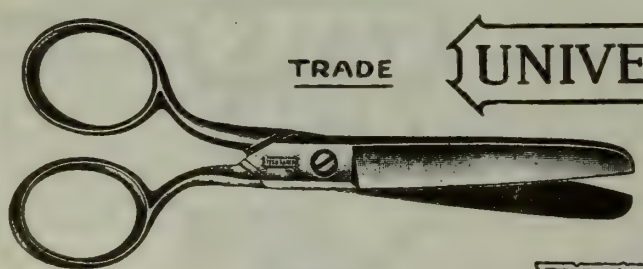
UNIVERSAL
SHEARS
LAST FOR YEARS

Here they are, shears of all kinds and for all purposes. Embroidery shears, pocket and barber shears, straight trimmers, bent trimmers, office or paper hanger shears.

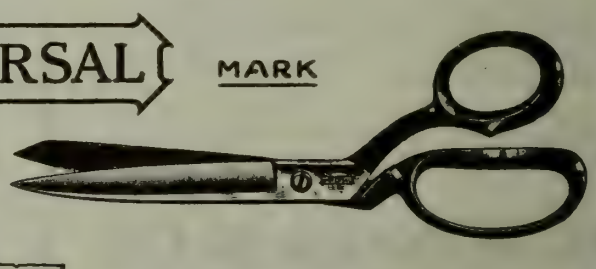
Users of UNIVERSAL shears get the habit of recommending them to their friends because of their long and worthy service.

Have you a complete stock on hand to meet their wants?

In the manufacture of UNIVERSAL Shears and Scissors a special combination of High Carbon Crucible Steel, together with a selected Steel Forging, is used. The latter forms a frame of unusual strength, while the former is used for making the fine, sharp, cutting edge which makes UNIVERSAL Shears unusual. These two bars of steel are so perfectly welded together as to make them one piece, thus giving to the blade perfect cutting qualities, as well as absolute strength and accuracy.



Every pair of UNIVERSAL Shears and Scissors are most carefully inspected and tested as to their cutting efficiency before leaving the factory. When you sell a pair of shears bearing the UNIVERSAL trade-mark you are certain of selling the best that money can buy.



"Master Cutlers for over half a century."

Burns Coal-Oil

22 Hours To A Gallon

An Opportunity For Progressive Hardware Dealers

Oil Stoves are rapidly coming to be the year round stove in every community. The dealer who is handling a good oil stove is building up a good business that is growing better every year. And you should have such a stove.

Detroit Vapor Oil Stoves

No Wicks *Light Instantly* *Work Like Gas*

The advantages of the wickless oil stove are appreciated by all oil stove users. Detroit Vapor Stoves are wickless. A heavy iron burner vaporizes the oil, making a gas which can be controlled to any requirement.

Detroit Vapor Stoves have the same sturdy construction —the same convenience as gas stoves and they operate at a cost much lower than either gas, coal or wood stoves.

Dealers in all parts of the country have found a distinct advantage in the co-operation which the manufacturer gives them and also in the exclusive agency proposition. There are factory representatives in every territory to give service and help in building up a good oil stove business.

For 24 years Detroit Vapor Stoves have been on the market and they are well and favorably known all over the country. They are stoves the best dealers are glad to handle and endorse.

You can get an exclusive agency proposition from our provincial representative or direct from the factory, as you prefer.

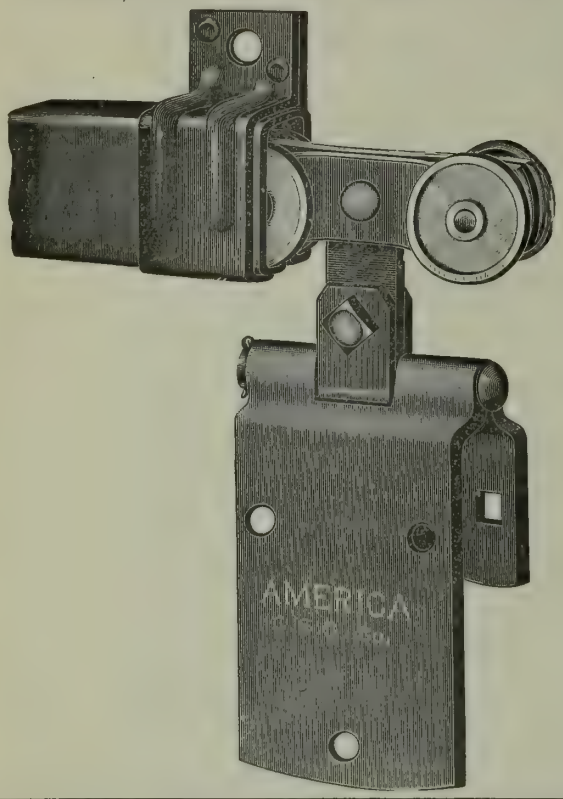
No. 810 GARAGE DOOR HOLDER

Every Automobile Owner a prospect with this fast selling device.



Here is the most complete **Garage Door Holder** on the market to-day. Saves the price of needless repairs caused by loosely swinging doors. Holds the doors securely open so that car may pass in or out without the risk of being damaged. There is no doubt about its usefulness and no question but what there are many sales you can make in your district.

Made of heavy gauge steel, strong and durable, easy to operate, a slight pull on the safety chain releases the door. Length thirty-two inches, comes to you in several finishes and packed in the **"Unusual National Way"** complete with screws.

May we send you prices and further information? We have a big catalogue of Builders' Hardware, free for the asking if you send for it. Write to-day.

NATIONAL MANUFACTURING COMPANY, STERLING, ILL.

America Tandem Truck Trolley Hangers

Among users of Door Hangers and merchants who sell them the "AMERICA" is admitted to be the most efficient and practical hanger for operating barn, factory, warehouse or garage doors.

Constructed of heavy steel, fitted with hardened roller bearings and has lateral adjustment which permits increasing or decreasing space between door and building.

AMERICA Hangers run in the famous Hatch Trolley Track supported with corrugated brackets, and carry heavier doors.

Are You Still Weighing the Length?

Are you still selling so many **pounds** of rope when your customer asks for a certain number of **feet?** If so, you are going through two unnecessary operations — weighing and calculating.

How annoying when part of the rope slips down on the counter or on the floor. How bothersome to recoil it in compact form so as to fit your scale.

Plymouth Rope

is now being sold by the foot, which is the logical way of retailing rope because your customer **asks** for it on that basis.

Selling Rope-by-the-Foot reduces the cost of handling, enables the dealer to give better service, and with Plymouth Rope insures a larger profit.

Just measure the length and refer to the Plymouth Automatic Selling Chart, which gives the exact cost for each and every size. No weighing, no calculating.

This complete selling plan is furnished free to Plymouth dealers on request.

PLYMOUTH CORDAGE COMPANY

NORTH PLYMOUTH, MASS. WELLAND, CAN.

INDEPENDENT CORDAGE CO., LIMITED

TORONTO, CANADA CANADIAN SALES AGENTS

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

Looking at Sterling Spark Plugs from the Standpoint of the Man Who Uses Them

The broadest business policy demands that a manufacturer's product should, first of all, yield to the man who buys it the longest possible service economically. That policy dictates a separable Spark Plug.

Sterling Spark Plugs

Sterling Spark Plugs

Why Sterling Spark Plugs Are Built Demountable

There are two good reasons why Sterling Spark Plugs are built demountable, or separable.

Both of these reasons are primarily for the benefit of the user.

First: A separable plug can be taken apart and cleaned easily when carbon accumulates.

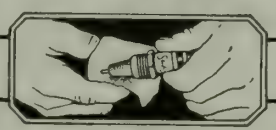
Second: A separable plug can be easily and simply rebuilt by inserting a new porcelain core should the old one be broken.

With a new porcelain core, of course, are included new center electrode, thumb nut, and new copper-asbestos gaskets.

And this replacement can be made at a fraction of the expense of a complete new plug.

The steel shell of a spark plug does not deteriorate from service except in the most minor way.

So the user of Sterling Spark Plugs is assured economical service both from the standpoint of cleaning and of rebuilding.



Sterling Spark Plugs are sold everywhere by progressive garages and supply dealers.

Sell This Complete Line

NOT all of your customers can afford the initial expense of an Electric Washing Machine, but, for those who can, there is nothing on the market so sure to please them as the "1900" Cataract Washer here shown. We do not limit you to this machine, however, as in our Agitator Electric we have a wood tub machine of exceptional merit that retails at a very moderate price.

Then, for the large class who want a good, reliable water power washer, our present "1900" line gives you a dependable machine which, by the mere turning of a tap, will do a week's washing quickly and thoroughly.

But if your biggest class of washing machine prospects want a hand machine, our "1900" Gravity Washer completes the list. It is radically different in design from other hand-washers, and intending buyers will quickly recognize its advantages.

So, you have all the washer styles you need, in the "1900" lines. Each style is unequalled in its class, and our Agency Proposition gives you exclusive control in your town, if you mean business. A full line of high-grade wringers, too.

Don't carry a mixed-up line of washing machines any longer. Push the "1900" Washers exclusively and forget about competition.

Ask us to tell you about our Agency Proposition.

HESSCO ELECTRIC MFG. CO.

33 Church Street, Toronto, Ontario

SHARP SPARKS

Exact size ½ in. Reg. The entire shell is copper covered.

Exact size Goliath Spark plug. Size ⅞ in. x 18 Reg.

"Carbon-free
after months of service."

A selling point that sells—that challenges the attention of every motorist—brings the first order and the order for every additional plug replacement in his car.

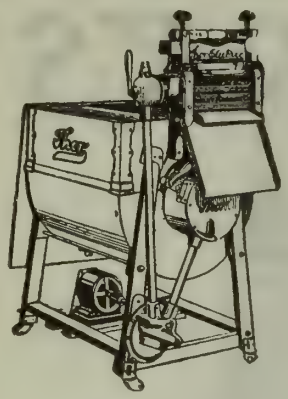
Kopper King

Spark Plugs are both anti-fouling and rust-proof. They are big, husky plugs with the points that appeal to every motorist—

porcelains of rock-like strength;
firing points non-softening in the hottest engine;
shells of heavy steel protected from carbon and corrosion by a thick surface of copper.

"Built for Endurance"
The Goliath

a massive, strongly built plug, fully a match for hard usage and strenuous service in pleasure car or truck.



The shell is extra large—of ivory, blued steel. The porcelain is designed for super-strength at points of greatest strain and is hardened into rock-like strength at a temperature of 2,600°, insuring greatest possible freedom from insulation troubles.

Goliath extra-strength construction gives your customers trouble - free sparking.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

Before

After

"BEFORE"—To the stove dealer, this reproduction illustrates a familiar sight—the old stove that you allowed your customer a few dollars for in the deal for a new one.

Now, the question arises in your mind, "Shall I dump it in the junk heap, or put it in shape to sell again at an attractive profit?"

You have the extra fittings to put the inside in good order, and we have the equipment and expert workmen to put all nickel trimmings in the same condition as when new, and at a small cost.

What are the net results?

1. **You are in a position to allow your new stove customer more money for his old stove—he is thoroughly satisfied.**

2. **When you and us convert this old stove into practically a new one, as shown above as "AFTER," you will have a "most as good as new" stove to sell to a customer at a medium price—he will be absolutely satisfied.**

3. **Now you have made two sales instead of one—have two satisfied customers instead of one—have made two profits instead of one, and you are satisfied.**

4. **Now, remove all the nickeled trimmings from the old stoves you have on hand, wrap in old newspapers and pack securely in a box and send them along to us—we will make them look like new at a trifling cost, and we will be satisfied.**

5. **Up to now everybody is satisfied, and you can feel that you have conserved instead of wasted.**

We have been rendering this service for years and have scores of satisfied customers.
We have recently doubled our capacity and can give you quick delivery.
On receipt of your shipment of fittings we will quote prices for your approval.

"Dependable and Accurate"

—it is dependability and accuracy that have built Dominion Ammunition sales for the dealer. From the beginning Dominion Ammunition has been subjected to inspection and tests that have brought it up to the highest of ammunition standards.

Dominion Ammunition

Above are shown two of the many processes that insure the dependability and accuracy of Dominion Ammunition —the individual inspection and the final machine test as to size.

is recognized by your customers because of its two cardinal points—***dependability and accuracy***—and they insist on having the ammunition that possesses them. Impress on them that the nimble fingers and quick eyes of scores of inspectors detect the slightest visible imperfection in Dominion Cartridges or Shotgun Shells. Intricate machinery tests the quality and quantity of loads and measures to a hair the calibre and size—all a part of the Dominion Service to guarantee ammunition that is "dependable and accurate."

Build your sales of Dominion Ammunition on this and benefit by the profit you make on these sales.

Order from your jobber to-day.

Regarding Business and Income Tax

Details of These Acts and Their Amendments in Brief, With Some Illuminating Comments by the Tax Commissioner

THERE seems still to be a good deal of uncertainty regarding the conditions of the Business Profits Tax and the Income Tax. Many enquiries are being received regarding these matters, and for this reason the following synopsis of the more essential points in the two acts is set forth herewith:

The Business Profits Tax

This tax is one that in the nature of things may pass by many retailers. It imposes a tax on all incorporated companies having a capitalization of $50,000 or upwards, or companies with lesser capital, 20 per cent. of whose business is or has been the manufacturing of or dealing in munitions. It excepts insurance companies and those engaged in agriculture. Such companies shall pay one-fourth of their net profits in excess of an exemption of 7 per cent. on paid-up capital.

Moreover this act passed in 1916 is retroactive, and is levied for three years upon the net profits shown in any accounting period after December 31st, 1914.

The profit from businesses carried on by private firms or individuals, is also subject to the same conditions except that such concerns are exempt up to 10 per cent. on the capital employed, which shall be taken to be a fair value of all assets used in the business, less all debts owing to the business.

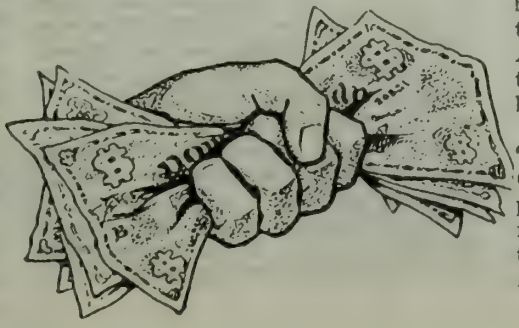
In either case reasonable deductions from gross profits from depreciations, renewals, etc., are allowed.

Business Profits Tax of 1917

By the Business Profits Act of 1917 which amends the foregoing act, provision is made whereby on any business, taxable under the 1916 act, where the annual profits exceed 15 per cent. per annum, the tax shall be increased to 50 per cent. in respect to all profits in excess of 15 per cent., but not exceeding 20 per cent., and where the tax exceeds 20 per cent. the tax shall be increased to 75 per cent. with respect to all profits in excess of 20 per cent. This increased tax applies to the last year of the three year period of the 1916 act noted above.

Business of $25,000 Affected

Early in 1918 the period of the operation of the Business Profits Act was extended a year. By this amendment companies, whether incorporated or not, having an invested capital of $25,000 and up to $50,000 were also brought within the provisions of the Act, the rate to be 25 per cent. of all profits for the accounting period ending in 1918 in excess of 10 per cent. per annum on the capital invested.



Under the terms of this Act, there shall be levied upon the income during the preceding year of every person residing, or ordinarily residing, in Canada or carrying on a business in Canada, a normal tax of 4 per cent. upon incomes exceeding $1,500, in the case of unmarried persons, and widows or widowers without dependent children, and upon incomes exceeding $3,000 in the case of all other persons. In addition to the normal tax of 4 per cent., surtaxes as indicated below will be levied upon incomes of individuals exceeding $6,000.

On account by which income exceeds	But does not exceed	Supertax
$ 6,000	$ 10,000	2%
10,000	20,000	5%
20,000	30,000	8%
30,000	50,000	10%
50,000	100,000	15%
100,000		25%

The following deductions are permissible on these terms:

(a) From income tax accruing for 1917, the amounts paid for taxes accruing during 1917 under the provisions of the Special War Revenues Act of 1915, and from the income tax payable on any other year, the amount paid by the taxpayer for taxes accruing during such year under the act mentioned.

(b) From the income tax of 1917, the amounts paid for taxes under the business profits war tax of 1916 and amendments thereto for any accounting period ending in the year 1917. If the business tax is the greater, it is the only tax payable.

Exempted Income Lowered

By an amendment made in 1918 to the Income War Tax Act of 1917, the exemption in the case of an unmarried person is reduced from $1,500 to $1,000, and for a married person from $3,000 to $2,000 the rate of tax to be 2 per cent. between these figures, advancing to 4 per cent. with incomes of $1,500 in the case of unmarried persons and $3,000 in the case of married persons.

In addition to these changes there have been some changes in the surtax that is paid in addition to the regular tax. The basis of surtax remains the same up to $50,000; from this on there are some sharp increases in the supertax demands, and in addition a surtax that makes still more rigorous demands.

For example, the surtax upon incomes of $6,000, but not exceeding $10,000, shall be 5 per cent. of the tax and supertax payable thereon.

On incomes of $10,000 and not exceeding $100,000, 10 per cent. of the normal tax and supertax payable thereon.

In a recent address delivered by R. W. Breadner, the Taxing Commissioner for Canada, before the annual meeting of accountants in Montreal some interesting points in regard to these acts were raised.

This official gave the men before him the impresion that a reasonable interpretation and operation of both acts was the guiding motive of the Department, and so thoroughly was this spirit reciprocated by the business men, he declared, that the Board of Referees that was provided by the Act in cases of dispute had never been appointed. Mr. Breadner also gave the impression that the Business Profits Act would not continue for long, but that the Income Tax would be on the statute books "to the end of our lives."

In the course of his address and the "question" period that followed, the Commissioner dealt with the vexed points of depreciation, capital, dividends, reserves for future depreciations, inventories, patriotic gifts in relation to the Act, and many other disputed subjects.

Continued on next page.

Do You Realize the Importance of Attractive Window Displays?

Winner of First Prize For Places Over 5,000 in "Hardware and Metal's" Christmas Contest Says Merchants Should Pay More Attention to Sales Possibilities of Their Windows

TOO many merchants fail to realize the great sales possibilities of their show windows and are content to go along following methods that were in use years ago and which are not in line with the requirements brought about by the keen competition that exists to-day. This is the view of G. E. Hammond, of the Mills Hardware Company, Hamilton, Ont., whose Christmas window display won first prize in the contest held by HARDWARE AND METAL.

"To my mind we are getting to a crucial stage in window dressing," said Mr. Hammond to HARDWARE AND METAL, "and merchants need to put on their thinking caps to come up to the requirements of to-day as competition is far greater than it was 10 years ago, as there are so many grades of different lines. The people want to be shown, and to see what they are getting for their money.

"What we need is more energy and tact instead of going on in the same old way.

Sales Question

"How many realize the importance of window dressing? It is just in the last few years that we have come to the conclusion that you have to advertise and bring before the people goods to be sold (competition again), and so we have been increasing our ads. and window dressing, but we have still farther to go.

"How many realize or figure out the earnings of the sales window? I can mention different window displays that have sold goods, whereas if not shown would not have sold.

Not Criticizing

"Do not think I am criticizing as I am not. I have stated the true facts if you think it out. I have not been window dressing very long, but I have been enlightened to the window question, and if the merchants would figure this out I think they, too, would see farther ahead.

"Window dressing is not necessarily an art, but it needs a little study to attract the people. When you have attracted

GEORGE HAMMOND

the people you have still farther to go to arrange your window so as to draw prospective customers into the store.

Always Price Goods

"Always price your goods, as I find that when not priced people walk on and if priced they become curious and begin to figure out how they can get that article, if not just then later on. I often find people come in to the store and ask for goods that have been shown before."

REGARDING BUSINESS AND INCOME TAX

Continued from page 37

In relation to inventories of merchandise, Mr. Breadner pointed out that owing to the very high price of goods at the present time there was certain to be an adjustment necessary when normal conditions returned. On this account the Department had ruled that an inventory of merchandise should be taken at cost, or the market value if this was less than the cost. As to whether, in addition to this method of handling the inventory, a company set aside as a contingency reserve an amount to meet in the future a drop in prices was no concern of the Department. The decision as to what would be done with this reserve, whether part or all of it would be allowed to go untaxed, could only be determined when it was scrutinized for assessment purposes. No ruling on any special case could be given in advance. Suppose a firm carried a stock that cost $400,000 in 1915, while the same stock to-day would cost $550,000, that merchant might very well say, "We'll lose that $150,000 sooner or later when normal prices are in force.' The Department says, "You can set aside $50,000 or $100,000 to apply against a future loss, but whether any of that will be allowed when the assessment comes to be scrutinized a year from now can only be settled then."

At this point a special case was introduced by one of the accountants that refers particularly to dry goods stores, ness. The question implied that the general basis allowed for valuing merchandise, namely, the cost—or present market price if this were below the cost—would not apply to many lines where there was a special depreciation.

Fair Value at Time of Inventory

The Department recognized cases like this. Where the goods for any other reason are of less value than when purchased, the merchant is justified in taking in the goods at what he recognizes to be the fair value at the time of the inventory, subject, of course, to the approval of the Department. This means that the Department fully recognizes the principle of depreciation of this nature.

Goodwill Not An Asset

The Commissioner took an emphatic stand as to an allowance for "goodwill." "Goodwill," he said, "is not allowed unless it is represented by actual cash expenditure."

Real Estate Sales and Profits

Another interesting question asked was as to the relation of sales of real estate to profits. A company was cited that sold some real estate and declared a dividend with the proceeds. "The receipt of the dividend would be simply the return of capital," was the ruling. "Only the amount of income received from this sum would be taxable" — in other words the interest on the dividend, "Return of capital is not income." The Act allows for depletion in the case of mines, timber limits, real estate, etc. Then an instance was mentioned where a company had bought a boat for $50,000 and sold it for $200,000. Would the $150,000 be treated as a taxable profit? No, was the reply. The $200,000 itself would be held to be capital; the fact that the first expenditure had increased to an amount four times as great, did not affect the principle. The $200.000 itself affect the principle. The only case where the $150,000 would be taxed as profits would be where the company or individual was in the business of buying and selling boats. A similar point has been decided by the Privy Council.

Insurance Premiums Not an Expense

The Department has held that it cannot be considered as an expense, but rather as an asset, and the proceeds when realized will be treated as profits

Donations

Donations to patriotic purposes, the Red Cross, etc., must not be considered as deductions from the tax payable; "if they were, we would have no tax at all. They would pay it all out in this way."

As to losses in one year being charged against profits in a subsequent year?

Cannot Allow for Losses

Mr. Breadner stated: "I have no hesitation in saying the Act on this point seems a hardship. A loss incurred in one period cannot be placed against profits in a succeeding period. The tax

(Continued on page 55)

Don't Be a Business "Ostrich"

Every Hardware Man in the Province Should Attend the Annual Convention of the Ontario Retail Hardware and Stove Dealers' Association at Hamilton on February 18, 19 and 20—Co-operation the Only Way to Solve Trade Difficulties

DON'T be a business ostrich. Fortunately for all lines of retailing the species is fast becoming extinct. We refer to the type of merchant who is buried so deeply in the sandy desert of his own business that he has not time to co-operate with his fellow retailers in working out successfully the problems of the trade. This sort of chap says he has no time for trade conventions or for co-operation.

"Why should I let anybody else know about the things that I've paid good money to learn?" he says.

Merchants with views of this kind are very much like the ostrich, which buries its head in the sands of the desert and imagines because it cannot see, that no one can see it.

Short-Sighted Policy

That this policy either for an ostrich or a retailer is worse than short-sighted is obvious. Trade conditions as they exist at present demand that merchants co-operate to the fullest extent if their mutual problems are to be worked out. Merchants are realizing as never before that they have interests in common and that these are best served by meeting on a common ground and helping one another.

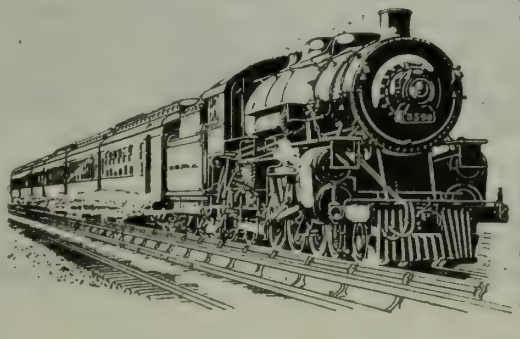
The hardware men of Ontario have a chance to do this in the annual convention which will be held at Hamilton, Ont., on February 18, 19 and 20.

Just imagine three whole days devoted to solving the problems peculiar to the hardware trade and in helping hardware dealers to become better merchants.

Be Sure To Go

The programme that has been arranged this year is an exceptionally fine one. It is one of the broadest that has ever been attempted by the association and is filled with features that will not only be intensely interesting but of real service and profit to merchants.

A gathering of this kind gives merchants a chance to meet one another, get acquainted and talk over trade matters. More than this, it puts them in direct touch with the manufacturers whose lines they are handling. They get a different viewpoint altogether from the man who never meets the manufacturer or sees how the goods are made. The hardware dealers get an immense amount of information that they could not get in any other way and they also learn a whole lot regarding the future of prices and trade conditions that is invaluable.



A Splendid Selection

No better spot for holding the convention could have been selected than Hamilton. It is central and easily reached from any point in Ontario. The accommodation both for the visitors and for the sessions of the convention is of the best.

A meeting of this kind is looked forward to by scores of hardware men as a real treat. It gives them a chance to get away from the steady grind of business and at the same time obtain a splendid lot of information that they can turn to practical account right in their own stores.

Are Coming Again

This was amply proven by last year's convention. Many who missed it for one reason or another plan to be there this year. Those who were there were so well pleased that they will be there again this year. All hardware men attending the big convention are urged to come prepared to make notes. There will be any number of points coming up continually which the retailer can use in his own store. If he trusts to his memory there are so many things he may forget that he would have liked to remember. It has been found by experience that the best way is to come prepared and then the dealer can refer to his notes after.

Letter From the President

Orillia, Ont.

To The Retail Hardware and
Stove Dealers of Ontario.

Gentlemen:—

The last Annual Convention of Ontario Retail Hardware and Stove Dealers' Association was conceded by all who attended to be the best to date, and while the attendance was good, it was worthy of much better, and many who were not present but had read the report of the meetings in HARDWARE AND METAL, have since expressed their full intention of being at the next Convention.

I wish to assure the dealers of Ontario, that the programme for the 1919 Convention is complete, and will be brim full of information and suggestions, and as there is no one of us but who can still learn, am satisfied that all who attend will leave with many valuable suggestions which will serve to advance their own interests.

President Wilson, on landing in England, stated that "Nothing brings men together like a common understanding and a common purpose," and no better definition can be given of the aims of our Association, and I would appeal to every dealer in Ontario to unite with us, the better to strengthen and enlarge the usefulness of the Association.

I would ask you to send in your application to Secretary Macpherson, and attend the Convention in Hamilton, February 18th to 20th.

"In Unity is Strength."

Yours sincerely,

D. A. MACNAB,
President O.R.H. & S.D.A.

APPOINTED MANAGER

John M. Graham, assistant sales manager of Lowe Bros. Co., of Dayton, Ohio, and formerly manager of the firm's Toronto branch, has been appointed advertising manager. He succeeds E. L. Shuey, who is retiring.

According to newspaper reports the high price of steel was responsible for the closing down on Wednesday of the rolling mills of the Canadian Steel Foundries at Welland, Ont. It is stated the whole plant may close shortly for an indefinite period.

SALES OF GARDEN TOOLS ARE LIKELY TO BE LARGE

THE stimulus that home gardening received during the war and last year particularly will, it is expected, be continued to a very large extent this year. Manufacturers of garden tools and growers of seeds are preparing for a big business and inquiries already received and orders already placed indicate that they are not likely to be disappointed. Thousands of people who successfully fought the high cost of living and discovered the joys of being able to raise their own freshly grown vegetables on back yard or vacant lot gardens are planning to repeat the process this year. These efforts are being encouraged by the horticultural societies in various parts of the country who are offering to help in every way possible by helping in the selection of seeds, giving gardening instructions, etc. The Canada Food Board has been advised that the United States Government has removed field and garden seeds from the restricted export list and that in future American shippers will not require licenses for seeds coming into Canada. Last year hardware men sold large quantities of seeds and gardening tools and there is every prospect that this season will see sales at least as large, possibly larger. In many places, citizens who last year asked for vacant land for gardening purposes are not only seeking the plots again, but asking for larger ones.

BIG BICYCLE BUSINESS IS EXPECTED THIS YEAR

PROSPECTS for the bicycle business this year are, it is stated, very good. There are no indications, manufacturers state, of reductions in price for some time to come. Orders have been coming in to the factories satisfactorily and as the materials to fill them have had to be purchased at prevailing prices the manufacturers are not making any changes. Reports from the United States are to the effect that the supply of bicycles is the smallest in years. This is attributed to the stringent regulations which were put into effect by the Government to divert all materials needed for war purposes. While some of this is being released a great quantity of it will, it is stated, not reach the factories in time for them to take care of their early shipments. Another factor in the situation is the high wages that are being paid to skilled workers.

EXPECT RECORD BUILDING DESPITE DEARER LUMBER

DEMANDS for lumber for construction purposes are likely to be far greater this spring than the mills can produce, it is stated. This may result in considerably higher prices and in some quarters advances as great as twenty to thirty per cent. are predicted. Higher freight rates, increased wages for lumbermen and similar causes are given as reasons for raising the prices of lumber. In some lines prices have already been advanced. According to reports from the lumber camps conditions vary greatly in different parts of the country. In some sections there has been very little snow in the bush. In others there has been plenty to facilitate the work of getting out the timber. In addition to heavy demands at home, it is stated that a much larger volume of export trade than usual is likely. Stocks of lumber in the mill yards have not been heavy for some time and there is little reserve of this kind that can be counted on. All these conditions will have an effect on the spring building situation and on construction work throughout the year. Notwithstanding higher costs of some materials, however, it is stated that this spring will see one of the greatest building periods in the country's history. A saw manufacturer stated to HARDWARE AND METAL that he has orders for lines of saws that have not been called for since the war started. Tool makers report many inquiries and indications are that hardware men will do a splendid business in building materials and supplies this year.

CANADIAN STOVE FIRMS WILL MAKE BOTH SIZES

AMERICAN stove manufacturers are working towards the elimination on the Number 9 lid on cook stoves and ranges altogether. This was a part of the conservation policy adopted during the war and many firms are planning to make only stoves with Number 8 lids. Canadian manufacturers state that they will continue to make both styles as they have to meet the demands of both the city and country trade, although the stoves with Number 9 lids are in much greater demand, being used almost entirely in the country. The sale of stoves with Number 8 lids is limited practically to the cities and even there the manufacturers state the sales are steadily growing smaller because of the use of gas and electric stoves. The original idea of building stoves with Number 9 lids was to accommodate the hollow-ware utensils with pit bottoms. These are still largely used in the country. In the city, flat bottom utensils are more generally called for.

MORE SALES REPORTED IN SOME LINES OF STEEL

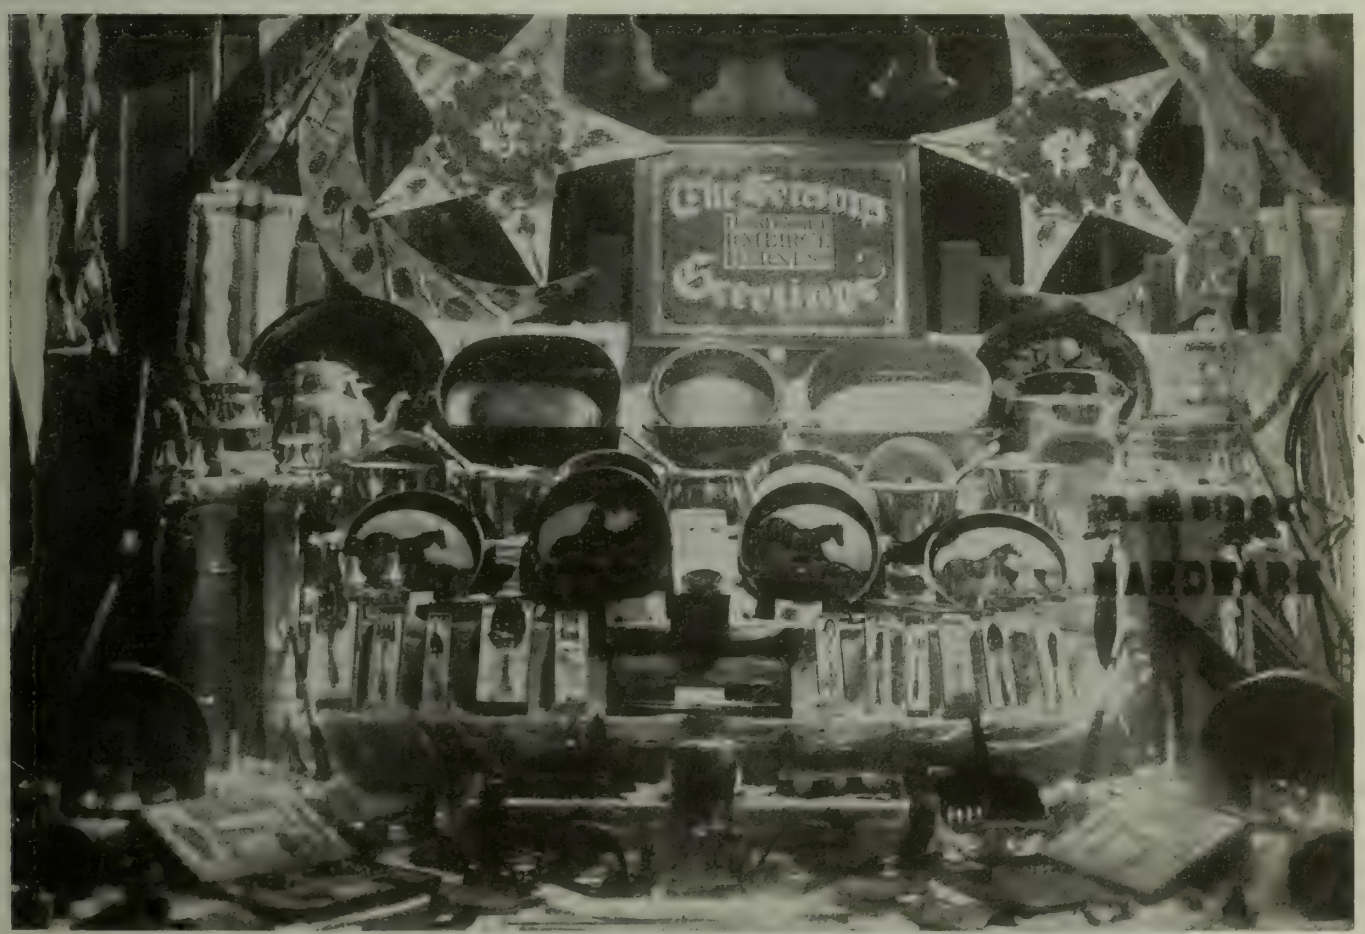
A DOWNWARD revision of coke prices following the relinquishment on February 1 of Federal control, and the fact that bookings are less than half the current production in American steel mills are taken by many as indications that as far as the United States is concerned the moment of total deflation from the war basis is measurably nearer. In many lines of finished steel, it is stated, there is not more than a month's work ahead. From the buyer's standpoint an encouraging feature of the situation is that labor now idle shows a disposition to resume work at lower wages. Firm offers for steel at levels lower than the present seem more likely to lead to successful negotiations, it is stated. More sales are reported in Canada this week and a revival in certain lines is indicated. The awarding of contracts for a number of cars will start business in some lines and also create some demand for tools. It is interesting to note as an aftermath of the war that British lines are making their appearance once more in the Canadian market. This week a good sized tube order went to a British firm. Warehouse interests report quite a lot of business moving in their lines, especially from shipyards, mines and repair requirements in various plants. Some of the factories making agricultural machinery are making

good sized purchases of machinery and materials and others, it is stated, are contemplating this step also. The scrap metal market shows no change.

NEW CLOSING HOURS FOR RAILWAY FREIGHT SHEDS

BY an order just issued by the Canadian Railway War Board, which becomes effective February 1, railway freight sheds in Canada will open at 7.30 a.m. and close at 5 p.m., except on Saturday, when the hours will be from 7.30 a.m. to 1 p.m. All teams in line at the shed at the closing hour will be accepted. At special points where a later closing hour is essential on account of local conditions, an extra half-hour is added to the end of the day and taken off at the beginning of the day. In other words, sheds will open at 8 a.m. and close at 5.30 p.m., except Saturday, when the hour will be 1.30 p.m.

The old hours were 7.30 to 5 in the West, and 5.30 or 6 in the East.



AMERICAN FIRMS HAVE CUT PRICES ON BURLAP

BUSINESS in burlaps is reported quiet this week, and in the absence of demand prices have continued on the downgrade. According to American reports by representative members of the trade, considerable manipulation of prices on syndicate burlaps has been resorted to in an apparent effort to dispose of goods, and the repeated cutting of prices on such goods has resulted in a lowering of quotations throughout the market.

AMERICAN RESTRICTIONS REMAIN ON TIN AND JUTE

THE United States War Trade Board announces in a new ruling (W. T. B. R. 526) that the supervision heretofore exercised by it through various associations in the several trades over the distribution of raw materials has been removed, except as to the following commodities: Pig tin, tin ore and concentrates, jute and manufactures thereof, and Egyptian cotton.

As to all other commodities, the distribution of which has been controlled through trade associations, import licenses may now be issued without requiring indorsement of bills of lading to any association, and collectors of custom have been instructed to permit entry under outstanding licenses without indorsement to the associations, irrespective of the clause on such license. It will not be necessary, therefore, for importers holding licenses containing such a clause to return them to the War Trade Board or any of its branches for cancellation of this clause.

Above is shown the window which won second prize in the Xmas contest conducted by HARDWARE AND METAL *for the best displays in places under 5,000 population. It was dressed by F. S. Newton of the hardware firm of R. M. Birce, Essex, Ontario. Essex is in the heart of one of the most prosperous farming communities in Ontario. Note how the window dresser varied the showing of Christmas good to include not only the more showy articles but such lines as roasting pans, etc., which would interest the farmers and their wives. Splendid sales resulted from this window.*

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

The following letters have been received in connection with the article recently published in HARDWARE & METAL regarding the proposal to tax the mail order houses, which will be considered by the Ontario Legislature shortly.

E. Miller, hardware dealer, Aylmer, Ont., writes as follows:

HARDWARE & METAL:

Toronto, Ont.,

Gentlemen:—Re taxation of mail order houses. This we think is proper. I would suggest that they be taxed on the amount of their sales instead of profits.

Another step towards fighting the catalogues is for the retailers to get together and force the manufacturer to put them on an equal buying footing with the catalogue houses.

Yours truly,
E Miller.

HOW HE BEATS THEM

Editor, HARDWARE & METAL:—
Toronto, Ont.,

Dear Sir:—I believe most merchants in the towns throughout Ontario would approve of legislation whereby mail order houses could be taxed in some way for the volume of business done in each municipality, and at present I can think of no better way than that suggested.

So far, as my own line of business in this district is concerned, I believe we have been fortunate in keeping at home a very large part of the business which in some sections goes to the mail order houses. We have been using considerable newspaper space regularly, changing it every week, and giving the folk prices on the goods advertised. Periodically, as in our recent stock-taking sale, we have used more space with better prices and the results have been very satisfactory.

Yours truly,
F. E. Hendershot,
Mount Forest, Ont.

IN FAVOR OF TAX

HARDWARE & METAL

Toronto, Ont.,

Dear Sir:—In regard to proposed assessment on profits of departmental stores we certainly do think this is a move toward the right as we retail merchants all pay a business tax and why not the departmental stores? It should hardly be necessary to ask our representatives to put such legislation into force, but as they have not already done so it is neccessary that they should be reminded of the importance of same as we are getting anything but a square deal in such matters. In regard the mail order home competition to the hardware business here, we notice that their stove business seems to be growing and of course if it grows the rest of the hardware line will be affected also. The roofing line is also another line which we notice seems to be growing with them. It seems to us that the stove business is the worst and we cannot see why our stove men should not be in a position to give us better prices to enable us to cope with this competition.

Yours very truly,
C. Richardson & Son,
Harrow, Ont.

A WESTERN VIEW

Hardware and Metal, Toronto, Ont.

Gentlemen:

While the proposed Ontario legislation to assess the profits of the mail-order houses does not afford us any immediate relief in the West, it is a good thing, and will be an example for Western legislators to follow. It is our idea that all business houses, large and small, should pay a tax on their turn-over, the tax to be graduated the same as the income and inheritance taxes are. The larger the business the more economical the management should be, the greater purchasing power and a smaller overhead in proportion to sales, so the graduated tax if equitably worked out would be quite fair. In addition concerns using above a certain amount of capital, say $25,000.00 to $50,000.00 should, as has been the case during the war, have their profits above 10 per cent. on the capital invested taxed also.

Help Distribution

The idea of making a fairly reasonable sized investment free of profit taxation would be to encourage the retail distribution of merchandise through the local dealer (who would in any case be paying a tax on his annual turn-over). Concerns employing above $50,000.00 capital in their business may be well regarded as out of the individual class and as a corporation, whose profits really afford a means of livelihood to more than a single individual.

Service Counts

Our own individual businesses are not greatly cut into by the mail-order houses. We have always been satisfied with a very reasonable profit; have run our business on up-to-date lines giving a large *service* consideration with the lines we handle; have stuck to standard lines of dependable merchandise, not making price so much as quality and service the keynote of our buying, as well as our selling. We do, of course, occasionally run into mail-order competition and are quite satisfied if our *friend* thinks he is bettering himself by sending for his goods, to let him save the few cents possible.

Get Their Innings

There usually comes a day when he is in need of accommodation, not always of a credit nature at that, and then the matter is discussed freely and we find that our innings comes. Just recently the writer made a trip in the country to see an engine that turned out to be a mail-order engine. When the charge of $6.00 was made for the time and material, and then it was explained that had this been one of our own engines the matter would have been entirely a service proposition, except for the few cents' worth of material used, one mail-order crank saw the light as he had not seen it before and has since been a regular visitor to our store. We use all little occasions of this nature to combat any mail-order tendencies and we are not really worried about what we lose to them.

Yours very truly,
Whyte & Orr Limited,
Daysland Alta.

FAVORS GIVING CREDIT

Editor, HARDWARE & METAL,
Toronto.

Re Credit vs. Cash System,

There has been quite a discussion lately about the switching of businesses from credit to cash system, and I also have been asked at different times to express my views regarding the subject; why I should be singled out for discussing such an important a subject, I am not aware. It might be because I have been charging up goods for the last ten years and managed to stay in business.

In a recent issue of your paper, I read an article from the manager of a Western retail firm, who has switched from credit to cash lately, and he winds up the interview as follows: "We thoroughly believe that no hardware merchant in any country town can make a success of the hardware business on the credit plan."

Well I can say right here that the gentleman is away off his beat; in fact it is the other way about, I have yet to see a country merchant (there may be one or two exceptions) that made it stick any length of time on a strictly

cash basis. I have seen lots of them try it, to dwindle back little by little to the credit system.

Must Keep Credit Good

The fact remains that credit is the fundamental principle of business. The government of nations, of municipalites, railroads, etc., down to the small individual could not do business without credit, and for that reason they have to keep their credit "good." Then when the individual has a good credit, why should he have to suffer for the "deadbeat?" Still this is what he is up against when you raise up the cash sign in his face. It is like some of the foolish prohibition legislation of some of our provinces and states; for a few drunkards in the country, the rest of the public cannot get their glass of beer when they feel like it. Just like the man with the good credit has to pay cash just on account of a few deadbeats and slow pay there is in the country.

Of course, when a man has been giving credit indiscriminately for a number of years and sees too late that he cannot stop it, "up" goes his cash sign; this is what I call trying to suit the job to the man, instead of suiting the mar for the job, as it should be.

Must Use Judgment

Of course, I don't believe in giving credit to everybody that asks for it, but I believe in studying individually the ability of each applicant to pay, for what amount, and when. I refuse credit sometimes, but also sometimes I invite it.

The country dealer should know the financial affairs of his customers, just as the credit manager of a jobber knows the financial affairs of the dealers. Of course, you will say, how is a man to know the good and bad ones? Well, I agree with you, it is some job, and here is where you have a chance to show your skill in the sizing up business.

You will understand that I am speaking from the point of view of a country merchant, where the proprietor is manager, credit man, etc., and when we glance at the responsibility of a credit manager in a large wholesale or manufacturing business, we can understand better that passing on credits in retail establishments is a very important branch of the retail business.

Depends On Conditions

Of course, it might be a different thing when the management of a store is left to a manager who is not always well versed in local conditions, and whose ambitions are more often emulated by increased sales than by scrutinizing the ability of customers to pay their bills; in such circumstances it may be advisable to suit the job to the man and run on a cash basis. It might be well right here to review a few advantages and disadvantages of the credit system; for one thing, it is the best weapon the retailer has against the M. O. house, and it also promotes consumption, and it is a highly appreciated convenience by the purchasing public, and moreover, the credit purchaser generally confines his buyings to the one store, the result being larger orders to the merchant. On the other hand, it takes a little more capital to do business on credit, and also causes extra work and necessarily a small percentage of losses, although, if well managed the percentage should be very small; don't forget that the time to collect a bill is when it is due.

Live and let live.

Work on the new steel plant of the Dauntless Mfg. Co. at Redeliffe, Alta., is progressing rapidly, and operations are expected to commence in April.

An American Tribute to Britain

A striking illustration of the good feeling that prevails between the United States, England and Canada took place at New Britain, Connecticut recently when parade in which 6,000 citizens marched and in which there were forty splendid floats was held. This was the cit's tribute to Great Britain for her part in the world war. One or the handsomest and most striking floats in the whole parade was that of Landers, Frary, and Clark which is shown in the above illustration. "H. M. S. Britannia," was the name and costumed officers and enlisted men rode on the bridge and on the deck. "Uncle Sam" and "John Bull" occupied prominent places and the float bore the legend "England Kept the Huns From Our Shore."

Two widely different ways of doing the same thing.

GETTING IN THE MONEY

NOTICE !

As we begin our annual stock taking this week and all accounts are being rendered we would ask your immediate attention to these. Just to give you a little idea of the amount lying out, it is better than Ten Thousand Dollars, you can see the importance of you paying attention to this notice.

We appreciate your business given us and we trust we have merited a portion of this by giving you good goods at the right prices. This is the season of the year when every account should be balanced and we will thank you most heartily if you will respond to this public request.

Any accounts outstanding against us we would be pleased to have handed to us at once

Again wishing you the Season's Compliments, we remain

Yours very truly,

O. B. HENRY & CO.,
Hardware, Stoves and Tinware.

T. W. LEWIS
GENERAL HARDWARE AND BEDDING

Are You a "Collector" or a "Worryer"?

Statistics Show That a Great Many Retailers Are Too "Easy" When It Comes to Getting in the Money For Goods They Have Sold—The Merchant Who is a Good Collector Saves Himself a Lot of Worry

STATISTICS show that getting in the money for goods which have been sold is a part of their business at which a very large percentage of retailers are not a success. The general tendency seems to be for merchants to be too easy. They grant credit in the first place without proper consideration and once a bill is owing to them they are often inclined to let it drag along. The sums of money that are owing to merchants who have carried on business in this way are startling and the amount of the losses they have sustained reaches figures that are impressive.

Collecting is a most important matter. There are good ways and bad ways of collecting. There are merchants who can antagonize people by their approach and there are others who can collect regularly and never have a bit of trouble. There are merchants who let accounts drag along in the hope that the parties owing them will happen in and "settle up" and there are merchants who go after their money systematically. If those owing them cannot pay all they owe, they insist upon regular small payments, and get the account cleaned up without loss.

Afraid to Collect

One of the great troubles with merchants, especially those in small towns, seems to be fear. They are afraid that they will offend somebody if they ask for the money to which they are entitled. They are afraid that if they try to collect the party who owes them will take his trade to some other store or to some other town. Most of these fears are absolutely groundless. A great section of the buying public will take full advantage of the merchant who is "easy." They reason that because he does not make them pay up he can afford to wait. In a great many cases, especially under present conditions, the merchant cannot afford to wait. He has to pay promptly for his goods and he needs the money when they are sold to buy new stock and put back into his business in various ways. By granting credit too freely he very often risks his own standing and may very easily get into deep water.

Makes it Easier

The man who does not grant credit indiscriminately and who insists upon doing business in a business-like way not only has the increased respect of his customers but escapes any number of those annoyances that result from having too much money outstanding. Without in any way giving offence he explains to customers that all payments must be made upon whatever terms he agrees with them. If credit is granted he sees that as short a limit as possible is set on the payments, and that their payments are made as stipulated. This is merely a matter of business and the customers who are worth having are ready to meet him more than half the way. The others, those who are in the doubtful class, he either keeps right up to the mark in their cash payments or lets them go to some other store and lets the other merchant do the "worrying."

Of course there are exceptions to every rule. There are merchants, and good merchants too, who will grant credit pretty extensively and by good collecting

methods not lose a cent. They are however the exceptions. For every one who follows this course and gets away without losses, there are fifty who sustain more or less loss and have a whole lot of worry and annoyance.

Are Trying it Out

As stated in HARDWARE AND METAL from time to time hardware firms all over the country who have been trying out the cash basis plan declare it is a success.

Other firms are adopting the idea from time to time. One of the latest is the Bernhardt Hardware Company of Preston, Ont. They made the following announcement to their customers last week in an advertisement on the front page of the local paper.

ANNOUNCEMENT

As the wholesale and manufacturing concerns have shortened their terms on goods to the retailer, we find it necessary to adopt strictly cash business, except factory, building and Government accounts.

This will enable us to give you lower prices on the goods you require, as we will save considerable on bookkeeping expense, postage, stationery, time and poor pay accounts, and we will give you the benefit of this saving.

We appreciate very much your past patronage, and hope for a continuance of same, and will do our utmost to merit your confidence by giving you good merchandise at reasonable prices.

BERNHARDT HARDWARE

Will Cooperate

Up at Elmwood, Ont., an agreement has been made by eight merchants and blacksmiths to sell for cash only. They made the following announcement:

SELL FOR CASH AT ELMWOOD

We, the undersigned merchants and blacksmiths in the village of Elmwood mutually agree to conduct a strictly cash business on and after the 15th day of January, 1919.

John Thaler, general store; A. P. Reuber, hardware; Earnest Pries, boots and shoes; Noah Wildfang, general store; Thos. Henderson, general store; John Kurtz, blacksmith; Charles Schaab, blacksmith; Wm. Russwurm, blacksmith.

A Different Plan

Here is a little different plan that is being tried out by a hardware firm at Nokomis, Saskatchewan. In their regular advertising space they announced the following:

CASH DISCOUNT

We wish to announce that after January 1st, 1919, we will allow a Cash discount of 10 p. c. on all goods except barb wire, nails, paint and paint oil, on purchases over 50c. Will allow a Cash discount of 5 p. c. on paints and paint oil. CASH must be paid at time of purchase to get this discount. Positively no discount on charge accounts.

MASON & DURGAN

Hardware Merchants, Nokomis

Hardware For Cash

Another Western Canada firm, the Northern Hardware Co., Limited, with branches at Vermilion, Edmonton, Vegreville and Lloydminster, leads off its advertisement in large type as follows:

1919

The world is changing, business methods are changing and WE are changing with them. We are going to change a good, up-to-date stock of

HARDWARE FOR CASH

Discounts will be given from 5 to 50 p.c.

Then follows a list of goods and the announcement concludes with

"Buy your Hardware where you get the Best Service, Best Goods and the MOST for your CASH."

An Oil Agent Too

J. D. Turner of Central Butte, Sask., agent for the Imperial Oil Company advertises as follows:

NOTICE TO OIL USERS

After January 1st we will have to insist on cash at the time of delivery of all oils and greases. If you are sending the boy or hired man for a barrel of oil, make sure that he has the cash or a check to pay for same as we will have to refuse all credit business in oils, not being able to grant even short date credits in this line.

J. D. Turner, Agent,
Imperial Oil Ltd.

Predicts Big Sales of Electric Washers

Will be in Every Home in Few Years, Declares Manufacturer—Sales Can be Boosted by Aggressive Methods Similar to Those Used by Sewing Machine Men and Gramophone Dealers

"THE possibilities for the hardware merchant in the electric washer line are very great. Although there is a hand washer of some kind in most homes, there are comparatively few electric washers in use. The field is just opening up now. In fifteen years there will be an electric washer in every home, just as there is a sewing machine in every home now. Hardware dealers, by going after business aggressively, can work up as big a trade in electric washers as music dealers have in gramaphones."

This is the view of a representative of one of the largest firms of its kind in Ontario. He declares that hardware dealers can sell electric washers just as easily as they can sell any other staple article. It is simply a question of going out after the business.

Greater Profits

"The profits on electric washers," he said, "are much greater than on the hand machines. This is one reason why it is better for dealers to push electric machines. Aside from this, there is a steadily growing popularity for everything electric. This is based on the fact that all kinds of electric devices and appliances have proven by actual tests, very often in the hardest kind of service, that they are not only dependable at all times, but do the work thoroughly, do it economically and take the drudgery out of a lot of tasks. There is no question about a washing machine being a real labor saver. The hand variety is a vast improvement over scrub board and tub methods and no one has realized this quicker than the women, especially the farmers' wives, who put in years of drudgery. The electric washer is just as great an advance over the hand washer and women are beginning to realize it and demand them. Ask any woman who has ever used an electric iron to go back to the old plan of heating on a stove and see what happens. The same thing is applicable to electric washers. The woman who has used an electric washer knows how much better it is than a hand washer and she knows and appreciates just how much labor her hand washer saved."

EDITORIAL COMMENT

LOOSE credits and poor buying are to blame for a whole lot of business failures.

* * * *

PEOPLE respond readily to the advertising of firms they know and respect, but are slow to act on the occasional small advertisement of a little-known concern.

KEEP THINGS MOVING

THE success of business depends much on the "drive and push" you put into it. Continual efforts count. Spasmodic flurries soon expire, and he who relinquishes his grasp a particle will lose more in a month than three months booming will make up. Keep things moving.

This is a good business policy at all times, but just now it is especially applicable. Only a short time ago a merchant had more trouble to get the goods very often than to sell them. Many firms broke all sales records. Now when things are getting back to a normal basis again, the only way to maintain these sales records is to increase your turnover. You can do it, but it will take effort and the effort is certainly worth while.

TRY CANADIAN GOODS

AS was expected, inquiries from all parts of the world have been pouring into Canadian firms since hostilities ceased and commercial activities are being resumed on a normal basis. Canadian manufacturers are prepared to look after the needs of all and the Dominion's rich resources will never stand her to better advantage than in the coming periods. Supplies of raw materials are scarce almost everywhere now and Canada has these in abundance. During the past four years Canadian producers found themselves and made a showing that astonished the world. The facilities that made Canada's immense war output possible are now available for supplying the needs of a world whose stocks of many badly needed commodities are the lowest on record. By getting in touch with Canadian firms dealers in all parts of the globe can secure quickly any quantity of goods they require. In this issue of HARDWARE & METAL will be found the names of a great number of firms who are prepared to take care of a large export business. There is no better way of forming valuable business connections that will result profitably all round than to write to these reliable houses and state your needs. Give them a chance to figure on your requirements. Their goods will speak for themselves and the foundation will be laid for a business that will steadily increase. Dealers in any part of the world will find that Canadian firms make high quality goods that will sell on their merits in competition with the best. They will find also that Canadian firms will give them prompt and efficient service and stand ready at all times to back their products.

ATTEND THE CONVENTION

AT no time in five years have there been so many matters of importance for the hardware men of Ontario to talk over as at present. All these questions will be gone into at the big convention to be held in Hamilton on February 18, 19 and 20. They will be gone into thoroughly and in that friendly and practical manner that is only possible when business men with kindred interests meet to discuss matters that are of interest to them all. Hardware men have had a pretty steady grind for some time past between difficulties in getting orders filled, shortage of sales help, and other troubles. The gathering at Hamilton will give them a chance to have a splendid outing, meet their fellow hardware men and discuss with them ways and means of combating various trade problems. More than this it will give him an insight into market, manufacturing, and business conditions that he could not obtain in any other way and which may well prove invaluable in the coming months. Aside from these considerations there is the duty that every hardware man owes to his own trade organization. The officers of the Ontario Retail Hardware and Stove Dealers' Association have spared no effort this year to provide a programme that will surpass anything that has taken place in the past. They have aimed to provide features that will be interesting and of real value, that will help hardware men to sell more goods, sell them in the best way and make then better merchants. The stronger the association is the more of this good work it can do and one way to help it obtain its maximum strength is to attend the conventions. Last year's convention was a record breaker. You can help make this year's even better. It is up to you. Come.

SHORT-SIGHTED POLICY

IT would cost less to only keep your store open three days a week but there is no question whatever that it would not pay so well.

A merchant who thinks only of "the cost" of advertising often persuades himself that by advertising only half as much as usual he is saving one-half of the expense of advertising.

The same logic would lead him to keep his store open but half the time—thus cutting running expenses in half and "saving" all of the money!

The plan of adequate advertising service (for your ads do render a most valuable service to your patrons) is as essential to store success as the plan of keeping the store open every shopping day!

EXPECT BIG DEMAND FOR PAINT

THERE is every indication that this spring will see the greatest sales of paints and varnishes that have been made in years. The demand promises to be Dominion-wide because for the past five years work has been held up in every city and hamlet. This work includes not only buildings, interiors and implements that needed painting badly, but hundreds of thousands of dollars' worth of construction that was not proceeded with because all available materials were required for war purposes. All these restrictions have been removed and the outlook now is for a flood of steady business. That is one of the most satisfying things in connection with the present outlook, that it promises to be steady and not merely a spurt. Many retailers are already busy with plans to capture their share of the trade that is coming and are aiming at new objectives in paint sales. One of the ways they are doing this is by attractive window displays and seasonable advertising.

A REAL HOUSING PROBLEM

WHILE the housing problem in many parts of Canada is acute it is nothing like as serious as in England. It is estimated officially that right now in old London alone 100,000 houses are needed. More than 1,500 houses which have been condemned as insanitary have been allowed to remain because of the serious shortage of residences. The London *Evening News* recently declared that there are "a million persons too many in London" and that they are living under conditions that do not make for the best, owing to scarcity of dwellings. The same state of affairs, to a lesser degree, obtains in other parts of England and it is estimated that 500,000 new dwellings will be erected in the next ten years. Plans are under consideration to provide these and it is likely that there will be a big opening for Canadian products in their construction.

WHAT OTHER EDITORS SAY

TEN years ago there were but 2,500 automobiles in all Canada; to-day there are over 250,000. A decade hence, there will likely be similarly startling figures in regard to the use of aeroplanes.—Hamilton *Spectator.*

CHEAP! What is cheapness? When is a thing cheap? "Cheap" has been considered by many as synonymous with "low-priced." Sometimes it is—and sometimes it is not. Is an article cheap that you buy just because the price is small, whether you want it or not? How often we hear that "I didn't really need it, but it was cheap!" Nothing is cheap, no matter how low the cost, unless it is worth much more to the buyer than the sum paid for it. Conversely, nothing is dear, no matter how much it costs, if it is worth what is paid for it. It is value that counts, not price.—Owen Sound *Advertiser.*

THE "loafing" order-in-council has been suspended. But that is not adequate reason for Canada's War Trade Board to hang on to its comfortable billet long after the American Government has disbanded a similar organization and removed trade restrictions as far as possible. The Canada War Trade Board was one of the numerous commissions appointed during the war to do the work that should have been handled by the cabinet ministers. But the cabinet ministers were so busy with elections and "feeling the pulse" of the patients that they had to delegate all serious labor to "experts." The War Trade Board placed many restrictions on the various exports and imports. It arranged embargoes and many of these embargoes still exist. Manufacturers say that the reason or excuse for many of the regulations has long since passed. But the War Trade Board hangs on, despite an announcement some weeks ago that it would be disbanded in a fortnight. Demobilization of such a bureau no doubt involves a tremendous amount of unwinding red tape. It is high time to get the scissors and do some heroic cutting.—London *Advertiser.*

IT is the duty of the home merchant to advertise and boost his business and everything that is of interest to the community in order to hold the interest and the business at home. Any merchant failing to do this shirks the responsibility he owes to the home community, and places the load of holding business in the home community more heavily upon the shoulders of others. In short he is shirking his responsibility to the community and his fellow merchants.

On the other hand, the people of the community owe it to themselves and the home merchant to patronize the local stores that advertise and boost the town and its interests. This part of the unwritten law of community building is invariably carried out. We have yet to see the merchant who did not get the business of the people of his community who was wide awake enough to get after it. The merchant who does not reach out after business will soon have nothing left to reach out after. In effect, he indicates that he does not want business, and business will not go where it is not invited.—Okanagan *Commoner.*

WITHIN a few weeks the best brains of the American copper industry will be on European soil to study the probabilities of American copper requirements there. The possibilities of European consumption of the red metal produced by us have been threshed out again and again by the press, but what the copper men are after is not so much the possibilities as the probabilities. In fact, the possibilities are largely yellow press moonshine.—*Daily Metal Reporter.*

EVENTS IN THE TRADE

Business Changes

Toronto—Cawker, Guest Hardware Co. dissolution registered.

Stayner, Ont. — Partnership between McCague & Watson, hardware merchants, has been dissolved and A. Watson will continue the business.

London, Ont.—A. J. Smith, of Toronto, has purchased the business of the London Hardware Co. from A. H. Nelley.

Chatsworth, Ont.—L. D. Merriam Co. have purchased the hardware business of John McKay.

Obituary

Alex. Beaudreau, of Caron, Sask., father of H. H. Beaudreau, hardware, Lawson, Sask., died suddenly while on his way to Rochester, Minn., to undergo an operation. He was a former member of the Saskatchewan legislature.

John H. Savage, Jr., vice-president and treasurer of the Cleveland Electro-Metals Company, secondary aluminum smelters, of Cleveland, O., died after a few days' illness with influenza.

Personal

A. B. Langenfeld, of Lena, Man., was in Winnipeg over the week-end.

Wm. Ackert has joined the sales staff of F. E. Elson, hardware, Florence, Ont.

W. Kresesy, of Kresesy Bros., Kipling, Sask., spent the early part of the week in Winnipeg on business.

A. L. Winston of the Victoria Electric Supply Co., Toronto, is away on a business trip to American cities.

Herbert Clare, manager of Clare Bros. & Co.'s branch at Winnipeg, is spending a few days at the head office at Preston, Ont.

Col. W. M. Gartshore, of the McClary Mfg. Co., London, Ont., has been re-elected as chairman of the Board of Trustees of Victoria Hospital.

Mrs. Franklin, who formerly kept a hardware store at Shallow Lake, Ont., is visiting friends in Chesley, prior to leaving for her home at Glensides, Manitoba.

F. C. Carman, of Canada Dry Cells Ltd., Winnipeg, left on a business trip last week and will call at all important points between Winnipeg and the Coast.

E. M. Russell, travelling salesman in the Niagara district for the D. H. Howden & Co., Ltd., London, Ont., is seriously ill in St. Joseph's Hospital at London, from complications which followed an attack of appendicitis.

President B. W. Vallat, of the Dominion Forge and Stamping Company, Walkerville, who has been overseas as a major with the 107th Engineers, 32nd Division, American forces, has returned to the Border Cities to resume his duties as head of the corporation. He participated in the drive on Chateau Thierry, and has been invalided home.

Trade Notes

J. G. Godfrey, hardware, Loverna, Sask., is remodelling the interior of his store.

Vinet & Dufresne have been appointed liquidators of the Foundry and Machine Co., Ltd., Montreal.

Meeking Bros., of Morse, Sask., are adding garage and implements to their auto and harness business.

George E. Bell, formerly with the Detroit Graphite Co., is now with the Wright Varnish Co. of Cleveland.

The National Lead Company has purchased the plant of the Hirst and Begley Linseed Company, of Chicago.

The Union Iron & Metal Company, Ltd., 1951 Dundas St. W., Toronto, is now manufacturing a full range of plain galvanized wrought washers and annealed rivet burrs.

Word has just been received of the death in France from meningitis of Lieutenant Llewellyn R. Davies, only son of William L. Davies, president of the Acme White Lead & Color Works, Detroit, Mich.

A successful annual convention of the salesmen of the Imperial Oil Company, Regina district, held in the Regina offices, was followed by a dinner at the Assiniboia Club and a theatre party.

Walter B. Clouston will carry on the hardware and tinsmithing business at St. John's, Newfoundland, established by his father, the late W. J. Clouston.

The W. C. Shinn Mfg. Co., of Chicago, is establishing a Canadian branch at Guelph, Ont. Professor W. H. Day, formerly of the staff of the Ontario Agricultural College, will be manager.

According to newspaper reports, a deal is pending by which the Ames, Holden, McCready Company of Montreal may be taken over by the Canadian Consolidated Rubber Company.

The Victoria Electric Supply Co., Toronto, is opening a branch warehouse and office in Montreal in charge of J. C. Armour. The firm plans also to open a branch in Winnipeg about March 1.

Montreal News

L. Hahn, of New Hamburg, was in Montreal this week.

I. Cohen, representing Isaacs and Co., New York City, was in Montreal this week.

V. Ganey, of the sales department of Lewis Bros., Ltd., has been ill for several days.

Harry Shott, of the Canadian Eveready Co., was in Montreal during the week.

Mr. Wilkinson, of the Lunkenheimer Co., Cleveland, was in Montreal this week.

H. W. Marshall, with the Walworth Mfg. Co., Boston, was in Montreal this week.

The Firestone Tire and Rubber Co., Ltd., of Akron, O., were represented in Montreal this week by Mr. Venard.

W. W. Dowdell, sales manager of the Canadian National Carbon Co., Toronto, was in Montreal this week.

The Springer Lock Co., of Belleville, was represented in Montreal this week by W. C. Springer.

John Richardson, of Richardson and Bureau, Montreal, manufacturers' representatives, is in Quebec this week.

The Canada Metal Co., Ltd., have moved into their new warehouse in Outremont. The new manager is Mr. D. L. Scott.

S. A. Grondin, with the Thos. Laughlin Co., marine hardware manufacturers, Portland, Me., was in Montreal during the week.

H. B. Bender, manager of the Auto Accessory Dept. of Lewis Bros., Ltd., expects to visit Ontario points early next week.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., who has been ill for several days, is improving rapidly.

R. W. Robinson, Winnipeg manager for the Thos. Davidson Mfg. Co., Ltd., Montreal, spent part of this week at the head office and factory in Montreal.

John R. Anderson, manufacturers' representative, was in Allentown, Pa., recently. While there he secured the agency for the Bonney Vise and Tool Works, Incorporated, and will represent them from London East to and including Halifax.

O. A. Lacroix, retail hardware merchant of St. Denis street, had his premises partly destroyed by fire this week. Most of the damage done is said to be on the stock, water and smoke being responsible for the bulk of this.

UNITED STATES STEEL AND IRON MARKET CONTINUES TO DRIFT

Cleveland, Ohio, January 30.—"The Iron Trade Review" to-day says: "Liberal buying of iron and steel has yet to make its reappearance and the market continues to drift. Peace readjustments manifestly have not gone forward as fast as hoped and the delay in winding up the Government's war settlements also is a factor tending to promote conservative and cautious policies in general industry. Iron and steel manufacturers evidently are reconciled to a period of waiting and are earnestly seeking to avoid any extensive dislocation of employment or wages. Some headway being made by labor agitators in the Middle West in their efforts to organize all mill employees, is not calculated to help the situation at this stage.

"The industry is being obliged to make further curtailment of operations to square itself with the light volume of buying. A canvass of the pig iron situation shows that at the present time 39 stacks with an estimated daily capacity of 15,000 to 20,000 tons have been blown out or banked, most of these since January 1. Mill activities are not far from 60 per cent. on the average. The best showing appears to be in plates, sheets, and merchant mill products. Finished and semi-finished steel prices are steady and scattered reports of concessions usually prove incorrect.

"Export demands overhang the market in large amount but their conversion into sales still is being held off by the present levels of shipping rates and mill prices combined. Reduction of ocean freights and releases of further vessel tonnage for commercial use by the Shipping Board form a favorable development but producers have not yet been able to satisfy foreign buyers on prices. Welsh tin-plate makers have been quoting below the American price and also have a favorable position on freights, but these advantages, it is believed, largely are neutralized by the fact that these plants now are able to operate on only about 30 per cent. basis. With many furnaces banked or going out of blast, the lifting of federal control Feb. 1 has been signified by a softer market in coke. Coke operators contemplate a corresponding reduction of output in the event of further weakening of the market. This probably will be done by a reduction of the working days per week. Some companies already have taken action along this line."

Incorporations

The Victoria Electric Supply Co., Limited, head office, Toronto, capital $250,000, plans to manufacture electrical appliance.

The Cleveland Tractor Company of Canada, Limited, capital $200,000, head office, Windsor, Ont., plans to manufacture and deal in tractors and farm implements.

The Premier Rubber Company, Limited, head office, Guelph, Ont., capital $500,000, plans to manufacture and deal in rubber goods of all kinds and also steel and iron goods.

Golden Glow Chemical Products Limited, head office, Montreal, capital $5,000, plans to manufacture soaps, oils and polishes.

Canadian Simplex Auto Wheel Company, Limited, head office, Vancouver, capital $325,000, plans to manufacture and deal in automobiles and auto accessories.

W. J. CHAMBERS OPENS AGENCY

Mr. W. J. Chambers, formerly of Brandram-Henderson Limited sales staff has opened a manufacturer's agency business at 43 Scott Street ,Toronto, and will represent the American Steel Wool Mfg. Company, New York, and the Bronze Powder Works of Elizabeth, N.J.

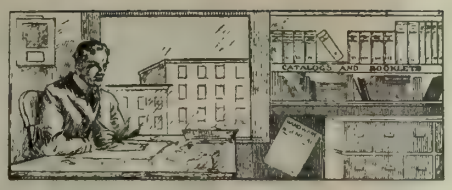
MAY MANUFACTURE AUTOS

The Canadian Cartridge Company, of Hamilton, Ont., is considering the manufacture of automobiles. The management stated to HARDWARE AND METAL that nothing definite in the matter has yet been decided. The firm plans to branch out into new lines, and one of these will be the manufacture of steel barrels.

OPENING WAREHOUSES

Western Aluminum House Will Carry Stocks in British Columbia and Ontario as Well as Winnipeg.

On and after Feb. 15 the Louis McLain Co. announce that they will carry stocks of aluminum at their warehouses at Kitchener and Vancouver.



The head office will remain at Winnipeg. It will be remembered that a fire destroyed the head office on December 16. The stock is being replaced with new goods from the factory.

J. S. K. Weber will have charge of sales in British Columbia, and Chas. A. Kern in Ontario.

Government May Sell Binder Twine Plant

Although no official information has been given out by the Government, it is understood that negotiations are under way for the sale of the binder twine plant and rope machinery at the Portsmouth Penitentiary, Kingston, Ont. The officials at the "pen" refuse to give out any information.

The binder twine plant was purchased from Connor Bros., of St. John, N.B., in 1894, and for a number of years was conducted by the Government with a view to keeping down the price of twine to farmers. On account of it being operated with a loss the industry was closed down in 1911, and Inspector W. S. Hughes, who made an investigation was credited with the statement that the loss on the industry reached $50,000.

Electric Motors

Hamilton Sales Co., Hamilton.—Can you give us names of firms who can supply very small electric motors?

Manufacturers of very small electric motors who could probably supply what you want are: Northern Electric & Mfg. Co., Toronto; Canadian General Electric Co., Toronto; Canadian Westinghouse Co., Ltd., Toronto; Lancashire Dynamo & Motor Co., of Canada, Ltd., Toronto; Wagner Electric Mfg. Co., of Canada, Ltd., Toronto.—Ed.

Stove Repairs

Scott Bros., Forest, Ont.—Can you advise us where we can secure repairs for the Art Garland stove?

The Art Garland was formerly made by the Bowes Jamieson Co., of Hamilton, who have been succeeded by the Garland Stove & Foundry Co., Hamilton, and from whom you should be able to secure repairs.—Ed.

Show Cards, Etc.

Cochrane Hardware Co., Ltd., Sault Ste. Marie, Ont.—Where can we secure promptly show cards, banners and streamers?

The following firms can take care of your requirements: F. Williams 34 Richmond St. E.; G. H. Charles, 31 Richmond St. E.; Wm. L. Lamb, 7 Gerrard St. E.; Mills-Brumby-Collins, 151 King St. W.—Ed.

CRANE COMPANY PLANS EXTENSION

The Crane Company, of Montreal, is looking toward expansion in Ontario and will very probably establish a large plant at Toronto some time in the future — possibly within the present year.

H. F. Potter, the Montreal acting manager, stated to HARDWARE AND METAL that the company had been looking after Toronto business from its office there, which was established last July under the management of G. A. Vowell, but contemplated expansion. Mr. Potter stated that they had considered some propositions already, but that values seemed to be inflated and for the present definite plans were deferred. They still were looking over the Toronto field.

EXPECT DEVELOPMENTS AT OJIBWAY

Developments at the Canadian Steel Corporation, Ojibway, are expected in the near future. W. B. Perley, general manager, and O. E. Fleming, legal adviser, have secured a charter to operate the Canadian Steel Lands Company, capitalized at $1,000,000, and contracts for workingmen's homes will be let, it is stated, in a few months at the lastest.

STABILITY

That manufacturing business endures whose products are of unquestioned quality.

In 1842—seventy-seven years ago—the foundations of McArthur, Irwin, Limited, were llaid. Just a small business it was, but honest and ambitious, with an all-enveloping desire to put such quality into its products as would guarantee them eager reception everywhere.

Through three generations there has been no swerving from the standard set in the old days. To-day, because of that same uniformly high quality which first gave them fame, McArthur, Irwin, Limited, products are accepted without question by all who know them.

We will be pleased to give you full information on any product listed in the accompanying coupon. Such information will help you to understand why McArthur, Irwin, Limited, products stand so high with those who use them. Send in the coupon to-day.

MORE HONORS FOR "CROWN DIAMOND" PAINTS

At the Annual Banquet of the Builders' and Contractors' Exchange of Quebec, held January 9th, 1919, tendered in our honor, in Quebec city, Mr. John Irwin, our Vice-President and Managing Director, had the great pleasure of receiving from the hands of his Worship Mayor Lavigueur, the gold medal awarded to this company at the 1918 Quebec Provincial Exposition for Crown Diamond Paint Products of our manufacture, and Glidden's Green Label Varnishes, which we distribute in the Province of Quebec.

We consider this a most worthy achievement for "Crown Diamond Paint Products," and trust our dealers and agents throughout the Dominion will have the same feeling of pride which we have, in the satisfaction of knowing that our products are thus able to win out against all competitors.

Many fine compliments were paid us at this banquet, and it is our sincere desire that we may prove worthy of them in the days to come —both through the excellence of our products and the service we render the trade.

Predicts Increased Business in Trap and Target Shooting

Nothing to Indicate Early Decline in Prices of Ammunition, Says Vice-President of Union Metallic Cartridge Co.— Says His Firm Plans to Adopt Policy of Standardization

GREATLY increased business in arms and ammunition for the retail trade was predicted by C. L. Rierson, vice-president of the Remington Arms Union Metallic Cartridge Co., Inc., in an address before the members of the National Hardware Association.

"Repeating shotguns have been purchased in large numbers by the Government," he said, "many of these having been used to train aviators to shoot at moving objects, millions of trap loads and clay pigeons having been used in this way. Unless my guess is wrong, this is one of the contributing factors which will give trap and target shooting a great boost after our soldier boys return to their homes. You gentlemen and your retail customers will doubtless be alive to this situation and will profit by it in an increased volume of business in arms and ammunition.

No Early Decline

"So far as can be seen at this time there is nothing to indicate an early decline in prices. Prices of copper are fixed for some time to come, and it is generally believed that if prices were not so fixed, copper would go higher rather than lower in price. Zinc is as low as those in a position to know believe present cost of production will permit. Lead is the only essential raw material which seems unduly high and sooner or later there will probably be a lowering of present prices, but it should be borne in mind that for many months the production of lead has been curtailed to the extent that there was not enough to go around, many lines of business using lead in large quantities being unable to secure sufficient supplies. It therefore seems logical to believe that there will be no great reduction in lead prices until all demands have been taken care of and the beginning of a surplus is in sight, which now seems improbable in the near future.

"There has been no decline in the cost of labor nor is there any likelihood that there will be such decline in the near future.

Time for Clean-Up

"Due to scarcity of loaded shells, the present seems an ideal time for a grand cleaning up of stocks. Fortunately in our product there are no remnants, nothing to go out of style or to be eaten by mice or moth, or to deteriorate with age, or to be placed on the bargain counter. Loaded shells and ammunition, if stored in a dry place and not subjected to artificial heat such as radiators, steam pipes or boilers, will be just as good in five years as when they left our works.

"There is a tendency to sell goods in original packages. Even chewing-gum manufacturers spend a lot of money advertising to the public urging that gum be bought by the box. The advantage is obvious. You pay us a differential if you buy loaded shells in less than full-case lots of one-half thousand of each particular load. I am wondering if there is a jobber in this room who charges the retailer a higher rate for single boxes of 25 shells than for full cases of 500. How strongly do you urge your salesmen to sell shells and even the staple sizes of cartridges, particularly .22's, in full-case lots? Isn't it worth while to try the power of suggestion by quoting .22's at so much per case instead of per thousand? Sales of case lots mean an increased volume of business and a decreased cost of handling as the labor in repacking is thereby eliminated.

Reduction of Assortments

We contemplate making an effort, with the co-operation of our competitors, to reduce present assortment of loads now listed by us. This large assortment works an even greater hardship upon us than upon you, as it forces us to carry in stock during certain seasons from fifty to ninety million loaded shells in order to enable us to ship promptly carloads calling for varied assortments.

"You gentlemen could assist in this matter if you would carefully compile a list of loads suited to the requirements of your various territories, catalogue these loads and take orders for no others except for direct shipment. This plan is followed by a few of the very large jobbers and is known to have worked out very well, indeed, even though some of them cover exceptionally large territories and consequently encounter a demand for a much greater variety of loads than would be the case with eight out of ten jobbers.

Keep Sales Records

"The large jobbers referred to keep records of their sales of each load from year to year and consequently are able to place with us as early as February of each year orders for 75 per cent. of their entire year's requirements, such order specifying nothing but their regular catalogued loads, the quantity of each load being based upon averages of sales during years past. The jobber who has no such standardized stock, though his volume of business may be smaller, orders a greater variety of loads than his larger competitor who uses the above system. Apparently many jobbers use manufacturers' catalogues in soliciting loaded shell business, the result being that such jobbers cannot place orders with the manufacturers until their salesmen have gone over their territories, taken orders and these orders have been tabulated.

"A standardization of your stocks of loaded shells along the line above suggested would enable you to determine your approximate needs far in advance of the actual time of taking and later of tabulating your orders and would place you in a position to buy early in the year upon the most favorable terms submitted by the manufacturers. Moreover, it would enable us to know early in the year more nearly what our manufacturing programme should provide for and would enable us to take care of your wants more nearly at the time you desire shipments made.

"We anticipate the co-operation of all other manufacturers in this direction."

Tax Mail Order Firms Says Galt Hardware Man

While probably there is no city in Ontario where the big mail-order houses have made greater inroads than Galt, hardware merchants when asked regarding the legislation to come before the Provincial Government shortly, to assess these mail-order houses on the business they do in each municipality, said that of all the retailers, the hardware men were the least affected. Admitting that the mail-order houses probably obtained a certain amount of hardware business they declared it was small, since hardware prices in Galt are far better than those in the catalogues on the majority of articles.

J. A. Fraser was the only hardware merchant who was prepared to discuss the question at length, others remarking that they had not studied the question thoroughly and were not prepared to be quoted.

Mr. Fraser stated that there was no doubt every merchant suffered, although the hardware men much less than others. He attributed the success of the mail-order houses to their system of educating the people by advertising and in specializing in paying freight up to certain amounts, which made people salesmen for the firms, women especially combining in sending orders so that they could secure purchases delivered free.

"It is only fair," said Mr. Fraser, "that the mail-order houses should pay a tax on their out of town business because we have to pay a business tax and these mail-order houses come in and take business and go scott-free."

Wm. T. Boyington has purchased the auto and implement business of T. E. Poland at Brigden, Ont.

Wave of Optimism For Canada's Future

Canada Metal Company's Seventh Annual Sales Convention—President Looks For Big Development in Canada

ON Monday, January 20th, the seventh annual convention of the Canada Metal Co., Ltd., was opened and a sale-staff of thirty were congregated round the board when Mr. Harris, Sr., president of the company, welcomed the staff to the convention.

Referring to business of the past year, Mr. Harris stated that it was remarkable, and yet there is no reason why 1919 should not be greater in its trade expansion, not only for our own firm, but for every Canadian manufacturer who will determine to go after the business and take advantage of opportunities presented.

Sees Bright Future

Continuing, Mr. Harris stated, "one of our leading financial houses recently sent out a circular broadcast, which expresses my sentiments exactly, for I am a firm believer in Canada and its future. The reasons given for expecting a period of exceptional prosperity in the Dominion were as follows:

"The stage is set in Canada for a period of development, the like of which has never been known in the history of the Dominion. The nation is building ships that will carry Canadian products to every country in the world. The steel industries are being equipped on a scale that should, before long, make Canada independent of imported supplies. The big consuming markets are becoming more dependent each year on Canada for pulp and paper supplies, and this country is, physically, in a position to provide for the world's requirements indefinitely."

Mr. Harris, Jr., vice-president, presided, and in going over the annual report of sales of each salesman, said that it was most gratifying to see the progress made in 1918.

In 1917 the company's sales established a record, but 1918 was far ahead. Not only had the branches made considerable progress, but large business had been done with Australia, New Zealand, South Africa, and other distant parts of the British Colonies.

Our convention, Mr. Harris, Jr., continued, will be devoted to going thoroughly into our various lines, so that salesmen can gain a greater knowledge of the goods they are selling.

Prizes Presented

The presentation of the prizes was very interesting, and Mr. Martin, in Toronto, when he received his cheque for the first prize in general sales, was like Niobe—all smiles. Mr. White, of Winnipeg, made a good second. Mr. Parkin was the one to put the Ham in Hamilton and received a beautiful diamond ring for the first prize in the Harris heavy pressure babbitt metal competition.

In this competition, Mr. Hughes, Toronto, was second.

Salesmen had been encouraged to send in questions to be answered in reference to all metals, or anything associated with the metal industry, and one morning was devoted to taking up such questions.

At noon each day, lunch was served at the Humber Bay Inn, and the trip along the lake shore made a most enjoyable break in the proceedings. Monday evening there was a smoking concert in the convention hall.

At the conclusion of the convention, a hearty vote of thanks was accorded to Mr. Harris, Sr., Mr. Harris, Jr., and Mr. H. C. Crow, for the excellent way in which everything had been prepared and carried out, and in reply Mr. Crow stated that he hoped that each salesman had gained a little more knowledge of the goods manufactured by the company and that they would be able to assist everyone interested in the metal business with any difficulty which might arise, and that the motto for each one be: "We will be satisfied with nothing short of perfection."

Expects Greatest Demand For Glass During the Summer and Fall Months

THE Johnston Brokerage Company, of Pittsburgh, Pa., has sent out the following:

To Factories:—

Since the wage scale has been concluded and wages and working periods fixed, a very large number of factories seem to prefer the first period. It is not our purpose to influence any factory as to operating period, but under this plan every factory is assured of its full quota, whether they work in the first or the second period. It is also the opinion of most business men that there will be an increased demand for our goods as the year advances. We will have some business right along, but doubtless the early part of the year will show a lighter demand than the summer and fall, which should be borne in mind. Those who operate should be reconciled to the fact that they must carry some glass.

We think the present prices will be maintained; the only penalty will be the burden of financing operations. New building is starting slowly and it will be well along in the summer before glass is required, as it is the last thing that goes into new construction. Therefore, those who operate in the second period will make no sacrifice. If predictions are correct the demand will be greater and they will escape the necessity of carrying considerable stock for several months. It would be more satisfactory to manufacturers, workers and jobbers if about 50% of the hand plants operated in each period. If there is some uncertainty on your part as to fuel supply or ability to finance, give some thought to the question of operating later on. It would be ruinous for anybody to accumulate stock and then try to secretly dispose of it at cut prices, as we must be absolutely firm in price maintenance.

The jobbing trade is now in the humor to go along with the present program and the manufacturers must not disturb them. You know your conditions better than anyone else, so that it is a problem that only your own company can dispose of. The machine production is going to be well divided.

Also give some thought to the handling of export business, as inquiries are now quite numerous and we will be glad to have any information that you see fit to give us on the subject.

R. Ellis has joined the sales staff at McNeill's Hardware, Provost, Alberta.

F. W. Evans, of Toronto, general manager of the Fairbanks-Morse Co., who has been seriously ill with pneumonia, is greatly improved.

W. G. DeWolfe, of the DeWolfe Hardware Company, Limited, St. Stephen, N.B., was re-elected as president at the annual meeting of the St. Stephen branch of the New Brunswick Retail Merchants' Association.

The National Varnish Company of Canada has been registered at Montreal by Louis A. Dubrule & Adolphe Morin.

The Canadian File and Tool Works of Montreal has been dissolved and will be continued under the same style by J. H. Bowman.

Officers elected for 1919 by Regina district Retail Merchants' Association were: J. W. Creswell, president; W. G. F. Scythes, vice-president; A. F. Little, 2nd vice-president; J. R. Young, treasurer and G. D. Raymond, secretary.

Trade Inquiries

144. **Wire rods.**—A Warrington firm using 500 tons of the above, monthly, ask to be placed in touch with exporters with a view to business as soon as conditions permit.

145. **Wire rods.**—A Warrington firm who use 5,000 of the above annually would be pleased to receive Canadian offers, with a view to business as soon as conditions permit.

147. **Wire nails, locks, hinges and general ironmongery.**—A Liverpool firm would like to be placed in touch with exporters of the above with a view to business as soon as conditions permit.

148. **Wire nails.**—A Liverpool firm would like to be placed in touch with exporters of the above with a view to business as soon as conditions permit.

150. **Three-ply wood.**—A Glasgow firm are in the market for several cartloads of beech or ash 3-ply wood, 3-, 4- and 5-inch thick, with a view to business as soon as conditions permit.

THE CLERKS DEPARTMENT

E. C. Simmons Says Promptness is Essence of Good Business

"An Ounce of Industry is Worth a Pound of Brains," Says Head of Simmons Hardware Company—Originated the House Organ and Other Business-Getting Plans

IF a writer of motion picture scenarios were to take for his subject the life story of Edward C. Simmons, president of the Simmons Hardware Company and the man who has stamped the name "Keen Kutter" upon the buying consciousness of the world, he would probably write his opening scene something about the following line:

Interior of a hardware store — St. Louis—1855. Boy of sixteen enters—asks for manager—applies for job.

Title: "What can you do, my boy?"

Boy registers eagerness to get to work—takes off his hat and coat.

Title: "As much as any other boy. Where shall I hang my hat?"

For that's the way that the head of the largest hardware manufacturing company in the world got his first job.

"I went out and hunted for it," said Mr. Simmons, not long ago, in speaking of his early experiences. "I didn't wait for my opportunity to come and knock at the door. I preferred to wake her up myself.

"I don't remember the time that I wasn't interested in knives and other kinds of hardware. So, when I had to earn my own living, it was natural that I at once thought of the largest hardware store in St. Louis—Child, Pratt & Co.—and went there in search of work. I got it.

Three Years for $650

"To be sure it wasn't much of a position. The arrangement, as I well remember, was that I should remain three years, receiving $150 the first year, $200 the second and $300 the third. My principal work was to dust off the shelves and take care of the stock, but this was just what I would have asked for because it gave me an opportunity to familiarize myself with the store organization, the lines carried and the best items to be stocked in a successful establishment. What I learned during those first three years was of tremendous value to me when I realized the ambition of having a business of my own.

"A store is one of the best places in the world to collect valuable information, not only about stock, but about human nature and the habits of customers, and the man who doesn't make a special effort to capitalize this information is overlooking a big chance to make good in later years."

A Question of Keys

At the end of his three years' apprenticeship young Simmons, he was only nineteen then, came to the conclusion that he would have more opportunity for advancement in a somewhat smaller concern, for he felt that there he could make his work and his personality more effective than in a large organization. He, therefore, secured a minor position with another hardware house, Wilson, Levering & Waters.

Yale locks were unknown in those days and store doors were opened with a huge key, nearly a foot long—keys which resembled those presented in olden days to typify the "freedom of the city." The keeper of the W. L. W. key was the porter and Mr. Levering was rather startled one evening when Simmons—his new employee—asked permission to take over the custody of this badge of office.

"What do you want the key for?" inquired Mr. Levering.

"Because I want to do more work and the porter doesn't get down early enough."

"What time does he arrive?"

"Seven-thirty."

"What time would you like to get here?"

"Six-thirty, sir."

Mr. Levering later admitted that he thought the young man merely wished to make a good impression by appearing to be anxious to come to work early and that he would soon tire of rising before dawn. Nevertheless, he permitted him to carry the key.

The Reason Why

But Simmons had a constructive thought in his mind—an idea which he believed would enable him considerably to increase business and at the same time bring him forcibly to the attention of his superiors.

He had noted that a considerable number of the farmers and other country buyers who flocked to St. Louis on the river boats rose very early in the morning—usually being on the street by 6.30. He didn't know whether it was that the unaccustomed noises of the city disturbed them or because they could not break their habit of early rising. He had seen them on the streets, and that was enough for him.

The very first morning that Simmons opened the door at 6.30 he found that his idea was a good one.

A farmer from down the river stopped to look at some grindstones and Simmons, putting into practice the principles of selling that he had picked up by observation, sold him a good-sized bill of goods. After that, it was an unusual morning when the young clerk did not have a profitable sale or two to report when the regular sales-force came on at 7.30.

Not many months later, the sign over the door was changed to "Waters, Simmons & Co."—the immediate predecessors of the Simmons Hardware Company, which to-day issues an annual catalogue containing 22,000 illustrations and listing upward of 80,000 separate items.

Incidentally, Mr. Simmons was the first hardware man to issue a complete catalogue. When his competitors learned that he had sunk $30,000 in the ven-

SOME OF SIMMONS' SAWS

"An ounce of industry is worth a pound of brains."

"If a customer gets into a hole see that you find a loophole for him."

"Promptness is the essence of all good business."

"Spend fifteen minutes every night in going over the day and planning to do better to-morrow."

"The only difference between success and failure is that between doing a thing nearly right and doing it entirely right."

"The merchant who doesn't permit himself to be imposed upon once in a while won't get far."

"Having chosen one line of business, stick to it."

"I love to work because it gives me an opportunity to teach others what it took me sixty years to learn."

ture, they threw up their hands in amazement—and when they found that he increased his sales $1,000,000 in a single year through the distribution of the catalogue, they repeated the operation.

The Two Frogs

The "house organ" is another commonplace of modern commercial life which owes its origin to the president of the Simmons Hardware Company.

In its original form this was a weekly letter to the salesmen, written by Mr. Simmons and filled to overflowing with his friendly advice and suggestions. The men were so enthusiastic over the letter and so appreciative of its worth that they petitioned Mr. Simmons to continue it. To-day the Simmons "weekly magazine" is more eagerly anticipated than any fiction periodical.

"In the panic of 1873 a lot of us fellows were feeling mighty glum," a veteran Simmons salesman said, in discussing the letter from the boss, "but Mr. Simmons brought every one of us up on our toes by writing us the story of the two bullfrogs that fell into a pail of milk. Neither of them could jump out—so one gave up the struggle and drowned. But the other kept on trying and kicking until he churned the milk into butter and jumped out without any trouble."

"That homely illustration got a laugh. It also got us on our mettle. We went out and sold the trade in spite of panic conditions and we've never stopped selling them since."

In 1870 Mr. Simmons came to the conclusion that Simmons hardware being of the highest grade, should bear a distinctive name — a guarantee of quality. So he selected the trade mark "Keen-Kutter," and to-day this name, with the slogan, "The recollection of quality remains long after the price is forgotten," is known in every part of the world where hardware is used.

MAJOR MITCHELL IS STILL "OVER THERE"

A Kingston hardwareman who dropped his business at the commencement of the war, to do his "bit" overseas, is Major William A. Mitchell, one of the best known men in the trade in Eastern Ontario. For many years Major Mitchell conducted a business on Princess Street. He went over as Captain, in command of No. 3 Canadian Army Service Corps, and is still "over there." He was promoted to the rank of Major while on the field. He went over with the first contingent and was engaged with the First Division. On signing up with the colors he left his business in the charge of a manager, but a little over a year ago disposed of the business to Messrs. Robert Stevenson and Richard H. Hunter, for many years employed as clerks with the hardware firm of McKelvey & Birch.

The official Government estimate of the 1919 Argentine linseed crop is 705,000 tons, exportable surplus 679,000 tons.

English Cutlery Still Scarce and Prices Are Likely to Remain Firm

RECENT press dispatches stated that cutlery was now on the "free" list, and that the Canadian trade would soon be able to secure its usual supplies of this much-needed commodity. HARDWARE AND METAL has made enquiries regarding this and is definitely informed that there will not be, and cannot be for some time, an improvement in the matter of delivery. In fact there is no promise, the representative of a British manufacturer stated to HARDWARE AND METAL, of the present or near future season showing much, if any improvement in the situation generally.

British cutlery manufacturers are under agreement to execute certain extensive orders for the British military authorities. Their output will be required for some time, and while they would be glad to take care of the trade more promptly, circumstances at present make this a difficult matter.

One of the biggest factors in the situation is labor. Skilled cutlers are scarce in England as they were called to enlist. They responded to such an extent that skilled cutlers are scarcer, it is stated, than at any time in the history of the trade. So great were the needs of the War Office that little could be done to cater to domestic trade. There has been, and there is to-day, plenty of fine steel. There is also a great deal of machinery. This is not the difficulty facing the manufacturer. Not only has he to face a shortage of the needed skilled workers, but he has to pay for his work an increased wage equal, in some cases, to 300 per cent. increase over pre-war rates. Therefore, cutlery production may continue to be limited for some time to come, and the prices to prevail may rule high..

BUSINESS AND INCOME TAX

(Continued from page 38)

stands for each and every accounting period by itself. The Department can only administer the Act as it exists; it cannot alter it."

No Impairment of Capital

Impairment of capital does not reduce the amount paid up in capital stock, and there is no provision in the Act for reduction of the capital stock, therefore the Department holds that it has no power to consider impairment of capital. In some cases this would have reduced the capital below the taxable amount.

No change can be made in the accounting period without the consent of the Department. Some business men had shortened the last year with the idea that their payment of taxes would be cut down in this way. All must pay for the full 48 months.

The assessment for 1917 is not made until September, 1918. In making assessments the Department is usually one year to 1½ years behind.

Dealing with the Income Tax, Mr. Breadner advised all who had received forms to fill them in, no matter whether they considered themselves liable or not. If they did not the Department would follow them up.

Losses sustained in endorsing notes will not be deducted from income for taxation purposes.

Act Produces $64,000,000

One of the surprising features of the working out of the Act was the large amount collected of business profit taxes and the small cost of collection. The estimated receipts of the Act when it was passed were about $25,000,000 or $30,000,000. The amount collected the first year was $12,508,509, and in the second year $21,271,083, making a total to date of $43,330,494, with an estimated amount still to be collected for these years of $2,500,000, and for the accounting period of 1917, $18,000,000. This would bring the total to $63,830,494. For the first year the expense of collection was only $58,174, and $80,000 for the second, making the cost for the first year 46½ cents per $100, and less than 38 cents per $100 in the second. Of the whole staff of 40, more than half were stenographers and typists.

The End of the Road
